Annex A	146
Annex B	147

1. Introduction

- 1.1. This code of practice relates to the exercise of function conferred by virtue of Part 5 (equipment interference) and Chapter 3 of Part 6 (bulk equipment interference) of the Investigatory Powers Act 2016 ("the Act")¹. It should be read alongside Part 5 and Chapter 3 of Part 6 of the Act and the explanatory notes. The Act provides a statutory framework for authorising equipment interference when the European Convention of Human Rights ("the ECHR") and/or the Computer Misuse Act 1990 ("the CMA") are likely to be engaged. This code provides guidance on when an equipment interference warrant under the Act is required or available to authorise equipment interference activity, the procedures that must be followed before equipment interference can be carried out, and on the examination, retention, destruction and disclosure of any information obtained by means of the interference.
- 1.2. This code of practice is primarily intended for use by the public authorities able to authorise equipment interference activity under the Act, namely the intelligence services (Security Service, Secret Intelligence Service ("SIS"), and Government Communications Head Quarters ("GCHQ")), law enforcement agencies (listed at Schedule 6 of the Act) and Ministry of Defence (Defence Intelligence) (collectively referred to as "the equipment interference authorities"). It will also allow other interested bodies to understand the procedures to be followed by the equipment interference authorities. This code is publicly available and should be readily accessible by members of any of the equipment interference authorities seeking to use the Act to authorise equipment interference.
- 1.3. This code is issued pursuant to Schedule 7 to the Act, which provides that the Secretary of State shall issue one or more codes of practice about the exercise of functions conferred by virtue of the Act. This code replaces the previous Equipment Interference Code of Practice (dated March 2018).
- 1.4. The Act provides that all codes of practice issued under Schedule 7 to the Act are admissible as evidence in criminal and civil proceedings. Any court or tribunal determining a question in any such proceedings or a supervisory authority, such as, the Investigatory Powers Tribunal ("the IPT"), the Investigatory Powers Commissioner, responsible for overseeing the powers and functions conferred by the Act, or the Information Commissioner, exercising functions by virtue of the Act, may take into account a failure by a person to have regard to the code. The equipment interference authorities may also be required to justify, with regard to this code, the use of equipment interference warrants in general or the failure to use warrants where appropriate.

¹ as amended by the Investigatory Powers (Amendment) Act 2024.

- 1.5. For the avoidance of doubt, the duty to have regard to the code when exercising functions to which the code relates exists regardless of any contrary statement set out in an equipment interference authority's internal advice or guidance.
- 1.6. Examples are included in this code to assist with the illustration and interpretation of certain provisions. Examples are included for guidance only. It is not possible for theoretical examples to replicate the level of detail to be found in real cases. Consequently, equipment interference authorities should avoid allowing superficial similarities with the examples to determine their decisions and should not seek to justify their decisions solely by reference to the examples rather than to the law, and the provisions of this code. The examples should not be taken as confirmation that any particular equipment interference authority undertakes the activity described; the examples are for illustrative purposes only.
- 1.7. Persons in an equipment interference authority who are likely to be involved in applying for equipment interference warrants, carrying out equipment interference, or use the product of equipment interference should receive mandatory training regarding their professional and legal responsibilities, including the application of the provisions of the Act and this code of practice. Refresher training and/or updated guidance should be provided when systems or policies are updated.

2. Definitions

Equipment

- 2.1 Equipment is defined in the Act as comprising any equipment producing “electromagnetic, acoustic or other emissions” and any device capable of being used in connection with such equipment.² "Equipment" for these purposes is not limited to equipment which is switched on and/or is emitting signals but also includes equipment which is capable of producing such emissions.
- 2.2 The definition of equipment is technology neutral and encompasses devices that may be thought of as “computers” in the traditional sense as well as the increasing range of “smart” and Internet of Things devices. Examples of the types of equipment captured by the definition include devices that are "computers" for the purposes of the CMA³, such as desktop computers, laptops, tablets, internet-enabled smart devices and smart systems (including phones, watches, cars and domestic household devices), other internet-enabled or networked devices and any other devices capable of being used in connection with such equipment. Cables, wires and storage devices (such as USB storage devices, CDs or hard disks drives) are also covered as they can also produce "emissions" in the form of an electromagnetic field.

Equipment data

- 2.3 An equipment interference warrant may authorise the obtaining of communications, equipment data and other information. Equipment data is defined in the Act and comprises:⁴
- systems data;⁵ and
 - identifying data:⁶
 - which is comprised in, included as part of, attached to or logically associated with a communication or any other item of information,

² See section 135 in Part 5 and section 198 in Chapter 3 of Part 6 – the definitions are identical.

³ "The term "computer" is not defined in the CMA; rather the Act relies on the ordinary meaning of the word in the relevant context."

⁴ See section 100 in Part 5 and section 177 in Chapter 3 of Part 6 – the definitions are identical.

⁵ See section 263(4) for the definition of systems data.

⁶ See section 263(2) and (3) for the definition of identifying data.

- which is capable of being logically separated from the remainder of the communication or item of information, and
- which, once separated, does not reveal anything of what might reasonably be considered to be the meaning (if any) of the communication or item of information.

2.4 **Systems data** means any data that enables or facilitates, or identifies and describes anything connected with enabling or facilitating, the functioning of any systems or services. Systems data that is necessary for the provision and operation of a service or system also includes the data necessary for the storage of communications and other information on relevant systems.⁷ Systems data includes communications data as defined in section 261.

2.5 Examples of systems data would be:

- messages at rest or in the course of transmission between items of network infrastructure to enable the system to manage the flow of communications;
- router configurations or firewall configurations;
- software operating system (version);
- unique identifiers that facilitate the operation of a service or system such as MAC (media access control) addresses, IP (internet protocol) addresses, and SSIDs (Service Set Identifier) but also user identifiers such as email addresses, user names, screen names, and other, similar account identifiers; and
- the period of time a router has been active on a network.

2.6 **Identifying data** is data which may be used to identify or assist in identifying:

- any person, apparatus, system or service;
- any event; or
- the location of any person, event or thing.

2.7 In many cases identifying data will also be systems data, however, there will be cases where this information does not enable or otherwise facilitate the functioning of a service or system and therefore is not systems data.

⁷ Systems data held on a relevant system may be obtained via an equipment interference warrant under Part 5 or Chapter 3 of Part 6 (Bulk equipment interference warrants) of the Act or a targeted interference warrant under Part 2 or Chapter 1 of Part 6 (Bulk interception warrants).

2.8 Identifying data will only be equipment data if it is comprised in, included as part of, attached to or logically associated with a communication or any other item of information and can be logically separated from the remainder of the communication or item of information and does not, once separated, reveal anything of what might reasonably be considered to be the meaning (if any) of any communication or item of information (disregarding any inferred meaning). Examples of such data include:

- the location of a meeting in a calendar appointment;
- photograph information - such as the time/date and location it was taken; and
- contact 'mailto' addresses within a webpage.

Equipment interference authorities

2.9 The equipment interference authorities are those public authorities to which an equipment interference warrant may be issued.

2.10 Under Part 5, a targeted equipment interference warrant may be issued:

- to the intelligence services (MI5, SIS and GCHQ) by
 - the Secretary of State,⁸ or
 - the Scottish Ministers (i.e. the Scottish Government) in relation to the prevention or detection of serious crime;⁹
- to the Chief of Defence Intelligence by the Secretary of State, in the interests of national security;¹⁰
- to officers of the law enforcement agencies by the senior officers of those agencies (known in the Act as “law enforcement chiefs”) as set out in Schedule 6.¹¹

2.11 The law enforcement chiefs are:

- The Chief Constable of a police force maintained under section 2 of the Police Act 1996,
- The Commissioner, or an Assistant Commissioner, of the Metropolitan Police Service,

⁸ See section 102 (power to issue warrants to intelligence services: the Secretary of State).

⁹ See section 103 (power to issue warrants to intelligence services: the Scottish Ministers).

¹⁰ See section 104 (power to issue warrants to the Chief of Defence Intelligence).

¹¹ See section 106 (power to issue warrants to law enforcement officers).

- The Commissioner of Police for the City of London,
- The Chief Constable of the Police Service of Scotland,
- The Director General, or a Deputy Director General of the National Crime Agency,
- The Chief Constable of the British Transport Police Force,
- The Chief Constable or a Deputy Chief Constable of the Police Service of Northern Ireland,
- The Chief Constable of the Ministry of Defence Police,
- The Provost Marshal of the Royal Navy Police,
- The Provost Marshal of the Royal Military Police,
- The Provost Marshal of the Royal Air Force Police,
- An immigration officer who is a senior official and who is designated for the purposes by the Secretary of State,
- An officer of Revenue and Customs who is a senior official and who is designated for the purpose by the Commissioner for His Majesty's Revenue and Customs,
- A designated customs official who is a senior official and who is designated for the purpose by the Secretary of State,
- The Chair of the Competition and Markets Authority,
- The Director General of the Independent Office for Police Conduct, and
- The Police and Investigations and Review Commissioner.

2.12 For the purposes of the Act and this code of practice, the Service Police (Royal Navy Police, Royal Military Police and Royal Air Force Police) and the Ministry of Defence Police are considered separate authorities to the Ministry of Defence (Defence Intelligence).

2.13 In common with other bulk powers available under the Act, a bulk equipment interference warrant may only be issued to the intelligence services.¹²

¹² See section 178 (power to issue bulk equipment interference warrants).

- 2.14 Warrants may be issued by law enforcement chiefs for the purposes of preventing or detecting serious crime¹³ and, in respect of some law enforcement agencies, for the purposes of preventing death or preventing or mitigating injury.¹⁴
- 2.15 The powers of certain law enforcement chiefs to issue warrants are subject to restrictions as set out in section 107 which require there to be a British Islands connection (see paragraphs 3.33-3.36).
- 2.16 The decision to issue a warrant must be made personally by a Secretary of State or the Scottish Ministers in the case of an intelligence service, and by a Secretary of State in the case of the Ministry of Defence (Defence Intelligence). The decision to issue an equipment interference warrant for law enforcement agencies must be issued by a law enforcement chief (or an appropriate delegate in urgent circumstances), listed in Schedule 6 of the Act.

Overseas-related communications, information and equipment data

- 2.17 Bulk equipment interference is mainly concerned with obtaining overseas-related communications, overseas-related information and overseas-related equipment data.¹⁵ These terms are all defined in section 176 of the Act.
- 2.18 The purpose of the definitions is to ensure that bulk equipment interference warrants are foreign focused and are aimed at identifying communications and other information relating to individuals outside the British Islands. The intelligence services must accordingly ensure that the main purpose of bulk equipment interference warrants is to obtain the communications, equipment data or other information relating to individuals outside the British Islands.¹⁶

Protected material

- 2.19 Protected material is a concept that arises in the context of bulk equipment interference.

¹³ See section 106(1); in respect of the Police Service of Northern Ireland, the reference to the purpose of preventing or detecting serious crime includes a reference to the interests of national security (see section 106(6)).

¹⁴ See section 106(3) and Part 1 of Schedule 6.

¹⁵ See section 176 (bulk equipment interference warrants: general)

¹⁶ Section 176(3) extends the definition of “overseas-related equipment data” for these purposes.

- 2.20 Protected material includes private information and the content of communications. Equipment data and non-private information (that is not a communication) are not protected material.¹⁷ All other data obtained under a bulk equipment interference warrant will be protected material.
- 2.21 Given the nature of the bulk acquisition of data by means of equipment interference, there are additional safeguards concerning the examination of protected material.¹⁸ Section 193(4) sets out a prohibition on seek to identify communications of, or private information relating to individuals in the British Islands¹⁹ unless a targeted examination warrant has been issued.²⁰

Example: In the case of an email stored on a mobile phone, the message in the body of the email and the text in the subject line would not be equipment data (unless separated as identifying data). Accordingly, in the context of bulk equipment interference, this would be protected material and subject to the relevant safeguards set out in the Act when selected for examination using criteria referable to an individual known to be in the British Islands. Information associated with the stored email, such as the sender and recipient of the email or information about where the email is stored on the device, is equipment data and is not therefore protected material. In addition, information that is not private information which may be attached to the email, such as a publicly disseminated electronic magazine, would not be protected material.

Telecommunications operator

- 2.22 Part 5 and Chapter 3 of Part 6 of the Act impose obligations on telecommunications operators.²¹
- 2.23 A telecommunications operator is a person who:
- offers or provides a telecommunications service to persons in the UK;
 - controls or provides a telecommunication system which is (wholly or partly) in or controlled from the UK; or
 - controls or provides a telecommunication system which is not (wholly or partly) in, or controlled from, the UK and is used by another person to offer or provide a telecommunications service to persons in the UK.²²

¹⁷ See section 99(9) in Part 5 and section 193(9) in Chapter 3 of Part 6.

¹⁸ See section 193 (safeguards relating to the examination of material etc).

¹⁹ The British Islands means the United Kingdom, the Channel Islands and the Isle of Man (see schedule 1 to the Interpretation Act 1978).

²⁰ In respect of targeted examination warrants in this context, see section 99(9); to note that targeted examination warrants also arise in other contexts – see e.g. section 15(3)

²¹ See in particular section 128 (duty of telecommunications operators to assist with implementation) in Part 5 and section 190 (implementation of warrants) in Chapter 3 of Part 6

²² Section 261(10) of the Act (as amended by s.19 of the Investigatory Powers (Amendment) Act 2024).

- 2.24 This definition of a telecommunications operator makes clear that a UK nexus is required.
- 2.25 Obligations in the Act cannot be imposed on persons who do not provide a service to persons in the UK, whose equipment is not in or controlled from the UK, or where equipment is outside the UK it is not used by another person to provide a telecommunications service to persons in the UK.
- 2.26 A TO will also include an application and website provider, but only in so far as they provide a telecommunications service or system to persons in the UK.
- 2.27 Section 261(11) of the Act defines ‘telecommunications service’ to mean any service that consists in the provision of access to, and of facilities for making use of, any telecommunication system (whether or not one provided by the person providing the service); and section 261(13) defines ‘telecommunications system’ to mean any system (including the apparatus comprised in it) which exists (whether wholly or partly in the United Kingdom or elsewhere) for the purpose of facilitating the transmission of communications by any means involving the use of electrical or electro-magnetic energy. The definition of ‘telecommunications service’ and ‘telecommunications system’ in the Act are intentionally broad so that they remain relevant for new technologies.
- 2.28 The Act makes clear that any service which consists of or includes facilitating the creation, management or storage of communications transmitted, or that may be transmitted, by means of a telecommunications system are included within the meaning of ‘telecommunications service’. Internet based services such as web-based email, messaging applications and cloud-based services are therefore covered by this definition.
- 2.29 The definition of a telecommunications operator also includes application and website providers but only insofar as they provide a telecommunication service. For example an online marketplace may be a telecommunications operator if it provides a connection to an application or website. It may also be a telecommunications operator if and in so far as it provides a messaging service. This means that many businesses will be considered telecommunications operators in respect of some of their operations, even where much of their work is unrelated to telecommunications services or telecommunication systems.
- 2.30 Telecommunications operators may also include those persons who provide services where customers, guests or members of the public are provided with access to communications services that are ancillary to the provision of another service, for example in commercial premises such as hotels or public premises such as airport lounges or public transport.

3. Scope of equipment interference

- 3.1 This Chapter provides background on equipment interference and guidance on the scope of the equipment interference provisions in the Act, setting out the circumstances where an equipment interference warrant is mandatory. It also details circumstances where an equipment interference warrant may be applied for and clarifies when the provisions of the Act are not applicable.

Equipment interference capabilities

- 3.2 Equipment interference describes a range of techniques used by the equipment interference authorities that may be used to obtain communications, equipment data or other information from equipment. Equipment interference can be carried out either remotely, near field (close proximity) or by physically interacting with the equipment.
- 3.3 Equipment interference operations vary in complexity. At the lower end of the complexity scale, an equipment interference authority may covertly download data from a mobile device when it is left unattended, or an equipment interference authority may use someone's login credentials to gain access to data held on a computer. More complex equipment interference operations may involve exploiting existing vulnerabilities in software in order to gain control of devices or networks in order to remotely extract material or to monitor the user of the device.

Example 1: An equipment interference authority covertly downloads data from a device (such as a smart phone or laptop) either through direct access to the device itself (for example by access to USB ports) or by remotely installing software which enables material to be extracted.

Example 2: Key logging software is installed on a device by an equipment interference authority, making it possible to track every keystroke entered by users. The equipment interference authority uses the key logger to track the keystrokes used when logging into a relevant website.

Restrictions on interference with equipment

Human Rights Act 1998

- 3.4 The Human Rights Act 1998 gives effect in UK law to the rights set out in the ECHR. Some of these rights are absolute, such as the prohibition on torture, while others are qualified, which means that it is permissible for public authorities to interfere with those rights if certain conditions are satisfied. In practice this means that qualified rights may only be interfered with in order to protect the rights of another or when necessary the wider public interest (e.g. national security, the prevention of crime).

3.5 Amongst the qualified rights is a person's right to respect for their private and family life, home and correspondence, as provided for by Article 8 of the ECHR. It is Article 8 that is most likely to be engaged when the equipment interference authorities seek to obtain personal information about a person by means of equipment interference. Such conduct may also engage Article 1 of the First Protocol, the right to peaceful enjoyment of possessions, (which could include any equipment subject to interference) and Article 10, freedom of expression, which is another qualified right.

Computer Misuse Act 1990

3.6 The use of equipment interference techniques may also necessarily involve interference with computers. Interfering with the functions of a computer and accessing its data or its programs, where there is no lawful authority to do so, may, in certain circumstances amount to a criminal offence under sections 1 to 3A of the Computer Misuse Act 1990 (CMA).

3.7 The 2016 Act imposes restrictions on equipment interference authorities.

- Section 13 applies to the intelligence services and mandates the use of equipment interference warrants where the conduct concerned would amount to one or more offences under the CMA and there is a British Islands connection (see sections 3.26-3.28).
- Section 14 prevents the use of section 93 of the Police Act 1997 to authorise conduct that would constitute one or more offences under the CMA and that could be authorised by a targeted equipment interference warrant (see sections 3.29-3.32).

3.8 Accordingly, it is important that equipment interference authorities understand when a CMA offence would be committed.

3.9 The offences relating to unauthorised interferences with computers are summarised below:

- Section 1: Unauthorised access to computer material
- Section 2: Unauthorised access with intent to commit or facilitate commission of further offences
- Section 3: Unauthorised acts with intent to impair, or with recklessness as to impairing the operation of a computer
- Section 3ZA: Unauthorised acts causing, or creating risk of, serious damage
- Section 3A: Making, supplying or obtaining articles for use in offence under section 1, 3 or 3ZA.

- 3.10 Where an equipment interference authority has obtained an appropriate authorisation, no offence will be committed by virtue of the CMA.²³

Equipment interference warrants

- 3.11 Part 5 and Chapter 3 of Part 6 of the Act provide a statutory framework under which equipment interference activities which engage the ECHR and/or would otherwise constitute an offence under the CMA can be authorised and conducted lawfully. Conduct which has lawful authority by virtue of an equipment interference warrant is treated as lawful for all other purposes.²⁴
- 3.12 Further detail on the types of equipment interference warrants, the relevant processes and considerations is provided at Chapters 4 to 6 of this code.
- 3.13 Equipment interference warrants authorise interference with any equipment for the purpose of obtaining communications, equipment data or other information. Equipment interference warrants may authorise both physical interference (e.g. covertly downloading data from a device to which physical access has been gained) and remote interference (e.g. installing a piece of software on to a device over a wired and/or wireless network in order to remotely extract information from the device).
- 3.14 An equipment interference warrant provides lawful authority to carry out the acquisition of communications stored in or by a telecommunications system. Where equipment interference activity amounts to interception of the content of live communications (for example, live interception of an online video call), an interception warrant must be obtained under Part 2 or Chapter 1 of Part 6 of the Act.²⁵ An equipment interference warrant may however authorise the acquisition of communications that are stored by or on equipment.²⁶
- 3.15 The material obtained under an equipment interference warrant may be used evidentially or as intelligence. Further detail on handling and retention of material acquired by equipment interference is provided at Chapter 9 of this code.

²³ See section 10 of Computer Misuse Act 1990.

²⁴ See section 99(11) in Part 5 and section 176(9) in Chapter 2 of Part 6.

²⁵ Live communications includes communications in the course of their transmission, but not stored communications.

²⁶ See section 6(1)(c)(i) (definition of lawful authority).

Incidental conduct

- 3.16 Where an equipment interference authority obtains an equipment interference warrant, the warrant also authorises any conduct necessary to undertake what is expressly authorised or required by the warrant (excluding conduct that constitutes the interception of live communications).²⁷ This conduct may therefore include interference with associated or non-target equipment in order to obtain communications, equipment data or other information from the target equipment.
- 3.17 When applying for an equipment interference warrant, the applicant should set out expressly any foreseeable incidental conduct that will be required to facilitate the equipment interference. It is possible that, during the course of equipment interference activity further incidental conduct will be required that was not previously foreseen. This incidental conduct, and the obtaining of any material pursuant to this incidental conduct, is permissible and lawful for all purposes.

Example: An equipment interference authority has obtained a warrant to carry out equipment interference on a device used by a particular person, which it anticipates gaining covert access to for a brief period of time. During the operation, the equipment interference authority is unexpectedly exposed to two devices, and cannot determine which device is being used by the person referred to in the warrant without conducting preliminary examinations. The equipment interference authority is permitted to examine both devices using equipment interference techniques in order to clarify which one belongs to the person – this is incidental conduct, which may involve the obtaining of data from the other device. If data is obtained from a device that is not connected to the person referred to in the warrant, the full equipment interference described in the warrant will not take place and any data already obtained from or relating to that device will be deleted as soon as possible.

- 3.18 The person applying for the warrant, the person issuing it, and Judicial Commissioner should consider the incidental conduct that it may be necessary to undertake in order to do what is authorised on the face of the warrant. In cases where conduct is not clearly incidental, but may instead constitute a separate use of another power, the person applying for the warrant should consider whether a separate authorisation is required.

²⁷ See section 99(5) to (8).

Surveillance

- 3.19 The obtaining of communications or information authorised by a targeted equipment interference warrant, includes the ability to obtain those communications or information by surveillance when the overarching operational objective is to obtain equipment, systems or identifying or other data. 'Surveillance' for these purposes includes monitoring, observing or listening to a person's communications or other activities, or recording anything that is monitored, observed or listened to. This could include intrusive surveillance (surveillance carried out in a residence or private vehicle) or directed surveillance (surveillance that is not in an intrusive setting, such as monitoring a subject in a public place).²⁸
- 3.20 Part II of the Regulation of Investigatory Powers Act 2000 ("RIPA") provides a scheme for the authorisation of covert surveillance. Conduct that amounts to surveillance under Part II of RIPA but that is properly authorised by a targeted equipment interference warrant does not need to be further authorised under RIPA. The interference with privacy and property resulting from the surveillance will be considered as part of the approval process for the equipment interference warrant.
- 3.21 In cases where an equipment interference authority wishes to obtain communications or information by surveillance under a targeted equipment interference warrant, the proposed activity should be set out in the application.
- 3.22 By contrast, where the surveillance is not linked to the communications, equipment data or other information obtained from the equipment interference, this will not be capable of authorisation under a targeted equipment interference warrant. For example, if an equipment interference authority wishes to conduct separate surveillance by directing an officer to observe the user of a device at the same time as the device itself is being subject to equipment interference, then this will not be considered as part of the activity authorised by the equipment interference warrant and an appropriate surveillance authorisation or warrant under Part II of RIPA should be considered. Alternatively, in this situation, a combined warrant may be appropriate (for information on combined warrants, see paragraph 5.142 onwards).

²⁸ See also section 48 in Part II of the Regulation of Investigatory Powers Act 2000 and the associated Covert Surveillance and Property Interference Code of Practice (August 2018): <https://www.gov.uk/government/publications/covert-surveillance-and-covert-human-intelligence-sources-codes-of-practice>.

Interception

- 3.23 An equipment interference warrant can provide lawful authority for interception involving a public telecommunications system²⁹ only to the extent that the interception involves obtaining of communications stored in a telecommunications system.³⁰ It cannot authorise the interception of communications in the course of transmission (i.e. live communications). If conduct proposed by an equipment interference authority amounts to the interception of live communications by means of a public telecommunications system an interception warrant under Part 2 or Chapter 1 of Part 6 of the Act would be required.
- 3.24 Lawful interception is governed by Part 2 (targeted interception) and Chapter 1 of Part 6 (bulk interception) of the Act. Targeted interception warrants may be sought by each of the intercepting authorities:³¹ the head of an intelligence service, the Director General of the NCA, the Commissioner of the Metropolitan Police Service, the Chief Constable of the Police Service of Northern Ireland, the Chief Constable of the Police Service of Scotland, the Commissioners for His Majesty's Revenue & Customs and the Chief of Defence Intelligence. In common with other bulk powers available under the Act, a bulk interception warrant may only be issued to the intelligence services.³²
- 3.25 Further guidance on interception warrants may be found in the Interception of Communications Code of Practice.

Example: An equipment interference authority wishes to conduct equipment interference on a device to acquire communications stored on the device and intercept video calls being made from the device in the course of their transmission. The interception of the video calls in the course of their transmission cannot be authorised by an equipment interference warrant as incidental conduct. An interception and equipment interference warrant must both be obtained (either as a combined warrant or separately).

Mandatory use of targeted and bulk equipment interference warrants: intelligence services

- 3.26 Section 13 of the Act provides that it is mandatory for an intelligence service to obtain an equipment interference warrant for the purpose of obtaining communications, private information or equipment data where it is considered that a CMA offence would otherwise be committed and there is a British Islands connection.

²⁹ The position is different in respect of a private telecommunications system because interception may be carried out on a private telecommunication system by, or with the express or implied consent of, a person with the right to control the operation or use of that system – see section 3(2).

³⁰ See section 6(1)(c).

³¹ See section 18 (persons who may apply for issue of a warrant).

³² See section 138 (power to issue bulk interception warrants).

3.27 A British Islands connection exists if:³³

- any of the conduct would take place in the British Islands (regardless of the location of the equipment which would, or may be, interfered with),
- the intelligence service believes that any of the equipment would, or may, be in the British Islands at some time while the interference is taking place, or
- a purpose of the interference is to obtain:
 - communications sent by, or to, a person who is, or is believed to be in the British Islands;
 - private information relating a person who is, or is believed to be in the British Islands; or,
 - equipment data which forms part of, or is connected with, the communications or private information outlined above.

Example: An intelligence service installs a piece of software on a device located outside the British Islands by means of conduct effected within the UK. The software sends back information about the activities of the user of the target device. The intelligence service must obtain a targeted equipment interference warrant as the conduct would otherwise amount to unauthorised access to computer material contrary to the CMA and there is a British Islands connection by virtue of where the conduct takes place.

3.28 It is not mandatory under the Act for an intelligence service to obtain a bulk equipment interference warrant other than when it is considered that a CMA offence would otherwise be committed and there is a British Islands connection. As a matter of policy, however, and without prejudice as to arguments regarding the applicability of the ECHR, when an intelligence service plans to engage in activity for which it is able to obtain a bulk equipment interference warrant it should do so.³⁴ The difference between targeted and bulk equipment interference is explained in Chapter 6 of this code.

³³ See section 13(2).

³⁴ Section 13(3) makes clear that an intelligence service can apply for an equipment interference warrant even if it does not consider that the conduct would amount to an offence and / or there is no British Islands connection.

Law enforcement agencies: restrictions on interference with equipment

- 3.29 The Act provides a statutory framework under which law enforcement agencies may authorise targeted equipment interference. Whether a targeted equipment interference warrant is available or required will depend on a number of factors, including whether the CMA is engaged, the appropriate law enforcement officer making the application for a warrant, the nature of the equipment interference, where the interference would take place, where the conduct would take place from and whether there is a requirement that the activity is covert.
- 3.30 Section 14 of the Act provides that law enforcement agencies may not apply for a Police Act property interference authorisation³⁵ for the purpose of obtaining communications, private information or equipment data, if the conduct could be authorised by a targeted interference warrant and would otherwise constitute one or more offences under the CMA.
- 3.31 Where section 14 of the Act applies, a law enforcement officer must obtain a targeted equipment interference warrant under the Act to authorise equipment interference, unless either the conduct is authorised under another law enforcement power (for example if the officer is exercising any powers of inspection, search or seizure or undertaking any other conduct that is authorised or required under an enactment or rule of law),³⁶ or it is authorised by a court order.³⁷
- 3.32 There are a number of powers in other enactments that are used for the purpose of obtaining material (including communications and private information) for evidential purposes. Those that are most commonly used by law enforcement agencies to access or obtain material include (but are not limited to) the following:
- Powers of entry, search and seizure under Part II of the Police and Criminal Evidence Act 1984;
 - Powers to search and to obtain material under the Proceeds of Crime Act 2002;
 - Powers to search under the Firearms Act 1968, Protection of Children Act 1978, Theft Act 1968 and the Misuse of Drugs Act 1971. In Northern Ireland the following should be referred to as the Firearms (Northern Ireland) Order 2004, the Protection of Children (Northern Ireland) Order 1978 and the Theft Act (Northern Ireland) 1969;
 - Powers to examine imported goods under the Customs and Excise Management Act 1979;

³⁵ See section 93 of the Police Act 1997.

³⁶ See section 6(1)(c)(ii).

³⁷ See section 6(1)(c)(iii).

- Powers to examine material under Schedule 7 of the Terrorism Act 2000

Example: A law enforcement officer interferes with equipment to obtain information stored in electronic form on that equipment (as relevant evidence in a criminal investigation) under their powers of seizure arising from the Police and Criminal Evidence Act 1984. The officer's conduct is authorised by the 1984 Act and no equipment interference warrant is therefore required.

- 3.33 Section 107 places restrictions on the issue of equipment interference warrants to specified law enforcement agencies,³⁸ preventing a warrant from being issued unless the relevant law enforcement chief considers there is a British Islands connection.
- 3.34 A British Islands connection exists if:
- any of the conduct authorised by the warrant would take place in the British Islands (regardless of the location of the equipment that would, or may, be interfered with),
 - any of the equipment which would, or may, be interfered with would, or may, be in the British Islands at some time while the interference is taking place, or
 - a purpose of the interference is to obtain—
 - a) communications sent by, or to, a person who is, or whom the law enforcement officer believes to be, for the time being in the British Islands,
 - b) information relating to an individual who is, or whom the law enforcement officer believes to be, for the time being in the British Islands, or
 - c) equipment data which forms part of, or is connected with, communications or information falling within (a) or (b).
- 3.35 To further ensure that equipment interference activities conducted by these agencies are focused on investigations or operations within the British Islands, irrespective of whether there is a British Islands connection, they are prohibited by this code from obtaining an equipment interference warrant for interferences that take place outside of the British Islands unless the subject of investigation is a British national or is likely to become the subject of criminal or civil proceedings in the UK, or if the operation is likely to affect a British national or give rise to material likely to be used in evidence before a UK court.

³⁸ See section 107(2): police forces maintained under section 2 of the Police Act 1996, the Metropolitan Police, the City of London Police, Police Scotland, the Police Service of Northern Ireland, the British Transport Police, the Ministry of Defence Police, the Police Investigations and Review Commissioner, the Independent Office for Police Conduct.

Example: A law enforcement agency has obtained an equipment interference warrant authorising the acquisition of communications, equipment data and other information from a subject's equipment. The subject temporarily leaves the British Islands with the relevant equipment. The law enforcement agency may continue to obtain material from the equipment while the target is outside the British Islands.

- 3.36 An equipment interference warrant can only render conduct lawful in domestic law. In circumstances in which an equipment interference authority is seeking a warrant to interfere with equipment that is or that may be located outside the United Kingdom, the Judicial Commissioner will consider whether the equipment interference authority has complied with the multi-agency Host Nation Authority process and, if it has not, its reasons for not doing so.
- 3.37 The British Islands connections restrictions do not apply to the National Crime Agency ("NCA"),³⁹ to the Service Police (the Royal Navy Police, the Royal Military Police, and the Royal Air Force Police), in respect of immigration officers, officers of Revenue and Customs or designated customs officials, or to the Competition and Markets Authority. Officers in these agencies may therefore undertake equipment interference activities outside the British Islands.
- 3.38 This division reflects the different work that the agencies are expected to carry out. For example, the NCA may investigate crimes that originate outside of the British Islands but impact upon the UK. Conversely, a regional police force would be unlikely to routinely investigate crimes outside of the UK. In practice, should a regional police force need to investigate crimes taking place where there is no British Islands connection they will do so with the assistance of another agency, such as the NCA.

Non-mandatory use of targeted equipment interference warrants

The intelligence services

- 3.39 By virtue of the Act and this code, there are two circumstances in which it is not mandatory for an intelligence service to obtain an equipment interference warrant.

³⁹ But see section 107(3) which concerns applications from members of collaborative police forces to the Director General of the National Crime Agency.

3.40 First, an equipment interference warrant is not mandatory where the intelligence service does not consider that the conduct in question would constitute an offence under the CMA, e.g. because access to the computer has been authorised by a person who is able to authorise it.⁴⁰ As an example, an equipment interference authority may obtain the informed consent of a person to access stored communications on their device (relying on s.44 if there was a requirement to obtain the content of the communication).⁴¹

Example: An equipment interference authority gains access to a company's computer server with their informed consent in order to test the company's protections against cyber-attacks. As this access is not unauthorised, the interference does not amount to an offence under the CMA and so an equipment interference warrant is not required.

3.41 Secondly, the Act does not require an intelligence service to obtain an equipment interference warrant where there is no British Islands connection (even if it is considered that the conduct to be authorised would constitute an offence under the CMA). Some equipment interference conducted outside of the British Islands will often take place in difficult and hostile environments which are outside the control of the equipment interference authorities. In these circumstances it will be more appropriate to authorise the necessary conduct under section 7 of the Intelligence Services Act 1994.

3.42 However, the Act does not restrict the ability of an intelligence service to apply for a targeted equipment interference warrant even where it is not mandatory under the Act. In particular this may include circumstances where the activity is taking place outside the British Islands in such a place that the relevant intelligence service considers that, having regard to the ECHR, it may be prudent to obtain a targeted equipment interference warrant. Such activity may include activity within British embassies, military bases and detention centres.

⁴⁰ Offences under the CMA are dependent upon "unauthorised" access to computer material being obtained. Sections 17(5) and 17(8) of the CMA provide further explanation of the meaning of "unauthorised" in this context.

⁴¹ Children (any person aged under 16), missing persons and adults without capacity cannot provide informed consent. In these cases, a parent or guardian can provide consent on their behalf or, if they are in the care of a relevant authority or voluntary organisation, a person representing that authority or organisation can provide consent. A registered social worker or a person under a power of attorney may additionally provide consent in the case of adults without capacity. An adult without capacity is defined in the Mental Capacity Act 2005 in relation to England and Wales, in the Adults with Incapacity (Scotland) Act 2000 in relation to Scotland and in the Mental Capacity Act (Northern Ireland) 2016 in relation to Northern Ireland. In Scotland, a person under the age of 16 has no legal capacity to enter into any transaction, and a person over 16 has full capacity to enter into any legal transaction (section 1 (1) (a) of the Legal Capacity (Scotland) Act 1991. A deputy appointed under section 16 of the Mental Capacity Act 2005 or section 113 of the Mental Capacity Act (Northern Ireland) 2016 or a person authorised under an intervention order under section 53 of the Adults with Incapacity (Scotland) Act 2000 may also provide informed consent. If no such person is available, any responsible person who is aged 18 or over other than a relevant authorised person may provide informed consent on behalf of children or adults without capacity.

- 3.43 Equipment interference authorities should also consider seeking an equipment interference warrant under the Act for targeted operations outside the British Islands if the subject of investigation is a British national or is likely to become the subject of civil or criminal proceedings in the UK, or if the operation is likely to affect a British national or give rise to material likely to be used in evidence before a UK court.
- 3.44 In any case where communications, private information or equipment data are obtained in accordance with a warrant under the Intelligence Services Act 1994, an intelligence service must handle the material so obtained in accordance with the safeguards set out in Covert Surveillance and Property Interference Code.⁴² Compliance with these safeguards will ensure that the relevant intelligence service handles the material in accordance with safeguards equivalent to those set out in Chapter 8 of this Code.

Ministry of Defence (Defence Intelligence)

- 3.45 The Ministry of Defence (Defence Intelligence) will obtain an equipment interference warrant for any equipment interference conducted by its civilian or service personnel, where it is considered: the conduct could constitute an offence under the CMA; there is a connection to the British Islands; and where the circumstances are such that no defence to such a charge is clearly available (for example, in circumstances where combatant immunity might not apply).

Property interference

- 3.46 For the purposes of the Act, an equipment interference warrant can only be obtained for the purposes of obtaining communications, equipment data or other information. Interference with equipment that is not for that purpose cannot be authorised under Part 5 of Chapter 2 of Part 6. Such activity will amount 'property interference' and may be capable of being authorised under section 5 or section 7 of Intelligence Services Act 1994 ("the 1994 Act") or under Part 3 of the Police Act 1997 ("the 1997 Act"). The Covert Surveillance and Property Interference Code of Practice⁴³ sets out the relevant considerations and safeguards that apply to property interference.

⁴² Covert Surveillance and Property Interference Code of Practice (August 2018): <https://www.gov.uk/government/publications/covert-surveillance-and-covert-human-intelligence-sources-codes-of-practice>.

⁴³ Covert Surveillance and Property Interference Code of Practice (August 2018): <https://www.gov.uk/government/publications/covert-surveillance-and-covert-human-intelligence-sources-codes-of-practice>.

- 3.47 Before making an application, the intelligence service or law enforcement agency should consider whether the purpose of the conduct for which authorisation is sought is to obtain communications, equipment data or other information. If the acquisition of communications, equipment data or other information is not the purpose of the interference but is merely incidental, then this activity cannot be authorised under a targeted equipment interference warrant,⁴⁴ and consideration should be given to seeking an alternative authorisation, if necessary.
- 3.48 For example, an equipment interference authority recognises that the process by which it disables a particular CCTV camera results in it obtaining a stored copy of footage from the CCTV system. In such circumstances, although the agency is interfering with equipment (the CCTV system) and acquiring communications and/or private information, the purpose of the interference is to disable the CCTV camera. The acquisition of the CCTV footage is intended, in so far as it is a constituent part of the interference required to disable the CCTV camera, but is entirely incidental. Accordingly, this activity can continue to be authorised as property interference under the 1994 Act or 1997 Act (as applicable).
- 3.49 This can be contrasted with where an equipment interference authority is seeking to monitor the movements of a target who has been captured on CCTV footage. In such circumstances, the equipment interference authority interferes with the CCTV system for the purpose of acquiring a copy of the footage; the purpose of the interference with the equipment is to acquire communications and/or private information and an equipment interference warrant would be required.
- 3.50 The Act applies tailored safeguards, handling arrangements and oversight to activity where the purpose of the interference is to acquire communications, equipment data or other information from equipment. Different considerations apply where the purpose of the interference is not for that purpose. The safeguards required in respect of such activity differ to those applicable to equipment interference under the Act, and are provided through existing legislation and the Covert Surveillance and Property Interference Code of Practice.⁴⁵

⁴⁴ As to which, see section 99(2).

⁴⁵ Covert Surveillance and Property Interference Code of Practice (August 2018): <https://www.gov.uk/government/publications/covert-surveillance-and-covert-human-intelligence-sources-codes-of-practice>.

4. Warranted equipment interference: general rules

Types of warrants

- 4.1 Part 5 of the Act provides for two types of targeted warrants which are listed in section 99: targeted equipment interference warrants and targeted examination warrants. Guidance on these warrants is set out in Chapter 5 of this code (Targeted warrants). In addition, Chapter 3 of Part 6 of the Act provides for bulk equipment interference warrants, further guidance on which is set out in Chapter 6 of this code (Bulk equipment interference warrants).
- 4.2 A targeted equipment interference warrant (see section 99(2) of the Act) authorises or requires the person to whom it is addressed to secure interference with any equipment for the purpose of obtaining communications, equipment data or other information. Such a warrant will also authorise:
- any conduct it is necessary to undertake to do what is expressly authorised or required by the warrant⁴⁶ and
 - where the person to whom the warrant is address requires another person to provide assistance in giving effect to the warrant, any conduct required of that person in doing so.⁴⁷
- 4.3 A **bulk equipment interference warrant**⁴⁸ is a warrant which has as its main purpose the obtaining of overseas-related communications, equipment data and other information. A bulk equipment interference warrant authorises the acquisition of communications, equipment data and other information and may authorise or require the selection for examination and/or disclosure of the communications, equipment data and other information. A bulk equipment interference warrant will also authorise any conduct it is necessary to undertake to do what is expressly authorised by the warrant.

⁴⁶ See section 99(5)(a).

⁴⁷ See section 99(5)(b); in respect of the imposing requirements to provide assistance in giving effect to targeted equipment interference warrants, see section 126 (implementation of warrants).

⁴⁸ See section 176 of the Act.

- 4.4 A **targeted examination warrant**⁴⁹ authorises the person to whom it is addressed to carry out the selection for examination of protected material⁵⁰ obtained under a bulk equipment interference warrant when to do so would otherwise be in breach of the prohibition in section 193(4) of the Act. This type of warrant must be sought in all cases where protected material is to be selected for examination on the basis of criteria referable to an individual who is known to be in the British Islands at that time the protected material is selected for examination.
- 4.5 Where there is no targeted examination warrant in respect of an individual who subsequently enters or is found to be in the British islands, a senior official may authorise the continued selection of his protected material using only the existing criteria, and without a targeted examination warrant being in place, for a period of up to five working days.⁵¹ This period allows a targeted examination warrant to be sought without losing coverage of intelligence targets
- 4.6 Targeted equipment interference warrants and targeted examination warrants may relate to thematic and non-thematic subject matters.⁵²

Necessity and proportionality

- 4.7 Equipment interference is likely to involve an interference with a person's rights under the ECHR.⁵³ This is only lawful if the interference is necessary for a legitimate purpose and proportionate to that purpose. The Act recognises this by first requiring that the Secretary of State, Scottish Minister or law enforcement chief considers that the warrant to be necessary for one or more of the statutory grounds set out in the Act.
- 4.8 For targeted equipment interference warrants and targeted examination warrants issued to an intelligence service, the Secretary of State or Scottish Minister, where relevant, must consider the warrant to be necessary for one or more of the grounds set out in section 102(5) of the Act:
- in the interests of national security;
 - for the purpose of preventing or detecting serious crime of violence;
 - in the interests of the economic well-being of the UK so far as those interests are also relevant to the interests of national security.

⁴⁹ See section 99(9) of the Act.

⁵⁰ For the definition of protected material see sections 2.19-2.21.

⁵¹ See section 193(5)-(8).

⁵² As to which see section 101 (subject-matter of warrants).

⁵³ See the heading "Human Rights Act 1998" in chapter 0.

- 4.9 Serious crime means crime where the offence is either:⁵⁴
- one for which a person who has reached the age of 21 and has no previous convictions could reasonably be expected to be sentenced to imprisonment for a term of three years or more,⁵⁵ or
 - one which involves the use of violence, results in substantial financial gain or is conduct by a large number of persons in pursuit of a common purpose.
- 4.10 The purposes of detecting serious crime includes establishing (a) establishing by whom, for what purpose, by what means and generally in what circumstances any serious crime was committed, and the apprehension of the person by whom any serious crime was committed.⁵⁶
- 4.11 The power to issue an equipment interference warrant for the purpose of safeguarding the economic well-being of the UK may only be exercised where it appears to the Secretary of State that the circumstances are relevant to the interests of national security and a Judicial Commissioner approves the decision. The power to issue an equipment interference warrant for the purpose of safeguarding the economic well-being of the UK may only be exercised if the information it is considered necessary to obtain is information relating to the acts or intentions of persons outside the British Islands.
- 4.12 For targeted equipment interference warrants and targeted examination warrants issued to an intelligence service by a Scottish Minister, the Scottish Minister must consider the warrant to be necessary for the purpose of preventing or detecting serious crime.⁵⁷
- 4.13 For targeted equipment interference warrants issued to the Chief of Defence Intelligence, the Secretary of State must consider the warrant to be necessary in the interests of national security.
- 4.14 For targeted equipment interference warrants issued to a law enforcement agency, the law enforcement chief (or appropriate delegate) must consider the warrant to be necessary for the purpose of preventing or detecting serious crime.

⁵⁴ See section 263(1).

⁵⁵ The definition in section 263(1) is subject to a transitional provision such that it is to be read as if the words “the age of 18 (or in relation to Scotland or Northern Ireland, 21)” were substituted with “the age of 21” until such time as the amendment to section 81(3)(a) of RIPA heralded by paragraph 211 of Schedule 7(II) to the Criminal Justice and Courts Services Act 2000 is brought into force – see paragraph 6 of Schedule 9.

⁵⁶ See section 263(6).

⁵⁷ See section 103(1) and (2).

- 4.15 For certain law enforcement agencies, a warrant can also be issued if it is necessary on the grounds of preventing death or injury or any damage to a person's physical or mental health, or of mitigating any injury or damage to a person's physical or mental health.⁵⁸ Use of equipment interference for these additional purposes will most likely be used to assist in locating vulnerable persons. Accordingly, the Act limits the use of equipment interference for this purpose to only the law enforcement agencies listed in Part 1 of Schedule 6 of the Act.
- 4.16 Some law enforcement agencies may only carry out equipment interference for the purpose of preventing or detecting serious crime, when in relation to specific functions of that agency. These are:
- For immigration officers, the serious crime must relate to an offence which is an immigration or nationality offence;⁵⁹
 - For Revenue and Customs officers, the serious crime must relate to an assigned matter within the meaning of section 1(1) of the Customs and Excise Management Act 1979;
 - For a designated customs official, the serious crime must relate to a matter in respect of which a designated customs official has functions; and,
 - For the Competition and Markets Authority, the serious crime must relate to offences under section 188 of the Enterprise Act 2002.
 - For the Independent Office for Police Conduct, the offence, or all of the offences, to which the serious crime relates are offences that are being investigated as part of an investigation a part of an investigation under Schedule 3 to the Police Reform Act 2002.
 - For the Police Investigations and Review Commissioner, the offence, or all of the offences, to which the serious crime relates are offences that are being investigated as part of an investigation under 33A(b)(i) of the Police, Public Order and Criminal Justice (Scotland) Act 2006.
- 4.17 Applications for bulk equipment interference warrants may only be made by or on behalf of the head of an intelligence service in the interests of national security, for the purpose of preventing or detecting serious crime and in the interests of economic wellbeing. At least one of the grounds for issuing a bulk equipment interference warrant must always be national security.⁶⁰

⁵⁸ See section 106(3) and Part 1 of the table in Schedule 6.

⁵⁹ See section 106(13) for a description of the conduct that would amount to an immigration or nationality offence.

⁶⁰ See section 178(1)(b) and (2).

4.18 In respect of both targeted and bulk warrants, the person issuing the warrant must consider that the conduct authorised is proportionate to what is sought to be achieved by that conduct.⁶¹ Any assessment of proportionality involves balancing the seriousness of the intrusion into the privacy (and other considerations set out in section 2(2)) or interference with the property of the subject of the operation (or any other person who may be affected) against the need for the activity in investigative, operational or capability terms. The conduct authorised should bring an expected benefit and should not be disproportionate or arbitrary.

General duties in relation to privacy

4.19 Section 2 of the Act requires the public authority to have regard to the following when deciding whether to apply for, issue, renew, modify or cancel a warrant under Part 5 or Chapter 3 of Part 6:

- whether what is sought to be achieved could reasonably be achieved by other less intrusive means;
- whether the level of protection to be applied in relation to any obtaining of information by virtue of the warrant is higher because of the particular sensitivity of that information. This includes whether additional safeguards (as set out in Chapter 9) should apply and whether threshold for the conduct to be proportionate is higher because of the sensitivity of the information;
- the public interest in the integrity and security of telecommunication systems and postal services; and
- any other aspects of the public interest in the protection of privacy (including the obligation for a public authority to comply with the Human Rights Act 1998).

4.20 In the case of warrants issued for the purposes of testing, maintenance, development or training, proportionality should be considered by assessing the potential for, and seriousness of, intrusion into any affected persons' privacy and interference with property against the benefits of carrying out the proposed exercise. The person issuing the warrant must be clear that the warrant is also required for at least one of the relevant statutory purposes.

4.21 No interference should be considered proportionate if the material which is sought could reasonably be obtained by other less intrusive means.

⁶¹ See section 102(1)(b) and (3)(b), section 103(1)(b) and (2)(b), section 104(1)(b), section 106(1)(b) and (3)(b), and section 178(1)(c).

- 4.22 The following elements of proportionality should therefore be considered in addition to the requirements set out in section 2(2):
- the extent of the likely interference with the privacy of individuals balanced against the public interest in what is sought to be achieved;
 - how and why the methods to be adopted are the least intrusive means of achieving what is sought to be achieved;
 - what other methods, where appropriate, were either not implemented or have been employed but which are assessed as insufficient to fulfil operational objectives without the use of the proposed investigatory power;
 - whether the conduct to be authorised is an appropriate use of the Act and a reasonable way, having considered all reasonable alternatives, of achieving what is sought to be achieved;
 - whether the conduct to be authorised by the warrant has any implications for the privacy and security of other users of equipment and systems, including the internet, and an explanation of why (if relevant) it is nevertheless proportionate to engage in the conduct;
 - where a bulk equipment interference warrant is available, the safeguards set out in Chapter 3 of Part 6 of the Act.
- 4.23 Typically it will be necessary for an additional warrant to be authorised, at the conclusion of an equipment interference operation, the removal of the means by which the interference was carried out. Where this is the case, a warrant may remain in place until such removal has taken place, as long as the tests of necessity and proportionality and any other relevant statutory requirements are met.

Trade Unions

- 4.24 As set out in sections 102 to 104 and 106 the fact that the information that would be obtained under the warrant relates to the activities in the British Islands of a trade union is not, of itself, sufficient to establish that the warrant is necessary on the grounds on which warrants may be issued. Equipment interference authorities are permitted, however, to apply for a warrant in respect of members or officials of a trade unions who are considered to be a legitimate intelligence target where that is necessary for one or more of the statutory purposes and proportionate to what is sought to be achieved.

Protection of the privacy and security of users of equipment and systems

- 4.25 Equipment interference authorities must not intrude into privacy any more than is necessary to carry out their functions or enable others to do so. Equipment interference activity must therefore be carried out in such a way as to appropriately minimise the risk of any increase in the likelihood or severity of any unauthorised intrusion into the privacy; or increase in the risk to the security, of users of equipment or systems (whether or not those equipment or systems are subject to the activities of the equipment interference authority).
- 4.26 To ensure responsible use and handling of discovered vulnerabilities in technology, agencies should engage with the GCHQ-led equities process to determine whether information about these vulnerabilities should be disclosed. The Investigatory Powers Commissioner has oversight of this equities process under section 229 (3B).

Example: An equipment interference authority wishes to obtain communications from a device that is associated with a particular individual and that is connected to the internet through a network used by a number of other users, not all of whom are of intelligence interest. Before issuing the warrant, the relevant decision maker must consider whether the proposed course of action would enable others to intrude into the privacy of the other users of the network, including those not of intelligence interest, as well as the individual to whom the warrant relates. If this were to be the case, the person issuing the warrant would (having first determined the necessity and proportionality of the activity proposed) need to be satisfied that the enabling of any such intrusion was minimised to the greatest extent possible.

- 4.27 In the case of warrants issued for the purposes of testing or training, interference should be carried out in such a way as to appropriately minimise the probability and seriousness of intrusion in to the privacy of any persons affected by, or in the vicinity of, the proposed activity.
- 4.28 Any application for an equipment interference warrant should contain an assessment of any risk to the security or integrity of systems or networks that the proposed activity may involve including the steps taken to appropriately minimise such risk according to paragraph 4.25. In particular, any application for an equipment interference warrant that relates to equipment associated with critical national infrastructure should contain a specific assessment of any risks to that equipment and the steps taken to appropriately minimise that risk. The person issuing the warrant should consider any such assessment when considering whether the proposed activity is proportionate.

5. Targeted warrants

- 5.1 This section applies to the two kinds of targeted warrants that may be issued under Part 5 of the Act (as set out at paragraph 4.4). These are:
- targeted equipment interference warrants; and,
 - targeted examination warrants (authorising the selection for examination of protected material obtained under a bulk equipment interference warrant).
- 5.2 Responsibility for the issuing of targeted equipment interference warrants, and the grounds on which the warrant may be issued, depends on the equipment interference authority applying for the warrant. The role of the Judicial Commissioner in approving the decision to issue warrants is explained in paragraph 5.76.
- 5.3 Prior to being submitted for a decision on issuing, each application should be subject to a review within the equipment interference authority seeking the warrant. This review involves scrutiny by more than one official, who will consider whether the application is sought for an applicable statutory purpose and whether the conduct to be authorised is both necessary for that purpose and proportionate to what is sought to be achieved by it. A copy of each warrant application should be retained by the equipment interference authority.
- 5.4 Once a warrant has been approved by the Judicial Commissioner, confirmation will be passed back to the relevant person who issued the warrant (the Secretary of State, the Scottish Ministers, or a law enforcement chief as the case may be). The person who issued warrant is responsible for notifying the persons who applied for the warrant such that they can give effect to it.
- 5.5 Although a warrant will be applied for by one of the equipment interference authorities, this does not prevent another agency from assisting them with giving effect to the warrant.
- 5.6 In the case of the **intelligence services**, warrants may be issued by the Secretary of State on an application made by or on behalf of the head of an intelligence service. Where the only equipment to be interfered with is in Scotland at the time the warrant is issued, and the warrant is only necessary for the purpose of preventing or detecting serious crime, a warrant may be issued by Scottish Ministers.
- 5.7 In the case of the Ministry of **Defence (Defence Intelligence)**, warrants may be issued by the Secretary of State on an application made by or on behalf of the Chief of Defence Intelligence.

- 5.8 In the case of **law enforcement agencies**, warrants may be issued by a law enforcement chief (or appropriate delegate) on an application made by a person who is an appropriate law enforcement officer in relation to the chief.⁶²

Subject-matter of targeted warrants

- 5.9 Section 101 sets out the subject-matter of targeted warrants and constrains what equipment can be described in the warrant or what material can be selected for examination. The subject-matter of equipment interference and examination warrants may be specific or thematic.

Targeted warrants relating to a person, organisation or particular location

- 5.10 In many cases, equipment interference and examination warrants will relate to subjects as set out in sections 101(1)(a) and (d). Section 101(1)(a) and (d) warrants are sometimes referred to as “non-thematic” warrants and may relate to one or a combination of:
- equipment belonging to, used by or in the possession of a particular person;
 - equipment belonging to, used by or in the possession of a particular organisation; or
 - equipment in a particular location.
- 5.11 A “person” for these purposes may be an individual but a person also includes a body of persons corporate or unincorporated.⁶³ An “organisation” may additionally include entities that are not legal persons.

This means, for example, that a warrant may relate to a particular company. In such a case, the company is the “person” to which the warrant relates (e.g. the focus of the warrant is the company itself). Section 115 (requirements that must be met by warrants) does not impose an obligation to name individual employees or workers in the warrant. However, the warrant must describe the type of equipment to be interfered with, which is likely to include equipment used by employees or workers. Similarly, in the case of an unincorporated body such as a partnership, a warrant may refer just to the partnership, but will authorise the interference with equipment used by members of that partnership.

⁶² As to which, see Schedule 6.

⁶³ See Schedule 1 to the Interpretation Act 1978.

- 5.12 The Act does not require the equipment interference authority to name or describe individuals within legal persons or organisations in the warrant; in many cases the identities of these individuals will be irrelevant to the intelligence being sought and their identities will not be known (or could only be ascertained by further interferences with privacy). Individual names are not required to ascertain the scope of the warrant or the interference with privacy authorised.
- 5.13 In practice, an equipment interference authority may need to build intelligence about a legal person (e.g. a company) or organisation (e.g. a partnership) itself, rather than the individuals who are directors, employees or members of it. In such circumstances, it may be more appropriate to obtain a warrant against, for example, a company, as opposed to individuals working for it. However, in certain circumstances, such as where a warrant is against a large organisation, the intrusion may be higher than a warrant targeting a small subset of individuals working for that organisation. As such, the equipment interference authority will need to justify why it is necessary and proportionate to target the company itself, rather than a limited number of individuals working for that company.
- 5.14 In the case of a particular location, a warrant may relate to interfering with equipment in a building or a defined geographic area, where it is not technically feasible to identify individual users of the equipment. Whilst in this instance, activities of individuals may be of intelligence interest, it is the information gained from the equipment described in the warrant in which will be of interest to the equipment interference authority.

Example 1: Information is sought about an organisation suspected of sourcing material in a country subject to UN sanctions. As the intelligence interest is in the organisation and its activities, and not the individuals who are employed by the organisation, it is considered that equipment interference is the least intrusive means of acquiring said information. The use of equipment interference yields intelligence on the products being shipped to the country and confirmation that these items could only be used for nuclear production which in turn enables the UN to take action.

Example 2: A military base is situated in a specific location known to be the centre for weapons research being undertaken by a country with hostile intentions against the UK. In order to track how the research is evolving and what types of systems are being developed, equipment interference is used to gather intelligence from that specific location. Intelligence reveals that the military base is in a state of readiness to test a recently developed weapon and also exposes future plans for using the weapon on an attack against the UK should the test be successful. The intelligence allows a UK military unit in the area to take action to safeguard UK national security

Targeted thematic warrants

5.15 In other cases, equipment interference and examination warrants will relate to equipment linked by a common theme. These are sometimes referred to as targeted “thematic” warrants. Targeted thematic warrants can cover a wide range of activity; it is entirely possible for a thematic warrant to cover a wide geographical area or involve the acquisition of a significant volume of data, provided the strict criteria of the Act are met. Thematic warrants, as set out at sections 101(1)(b), (c) to (h) and 101(2)(b) to (e) of the Act, may relate to:

- equipment belonging to, used by or in the possession of a group of persons who share a common purpose or who carry on, or may carry on, a particular activity;⁶⁴
- equipment belonging to, used by or in the possession of more than one person or organisation, where the interference is for the purpose of a single investigation or operation;⁶⁵
- equipment in more than one location, where the interference is for the purpose of a single investigation or operation;⁶⁶
- equipment which is being, or may be, used for the purposes of a particular activity or activities of a particular description;⁶⁷
- equipment which is being, or may be, used to test, maintain or develop capabilities relating to interference with equipment for the purpose of obtaining communications, equipment data or other information;⁶⁸
- equipment which is being, or may be, used for the training of persons who carry out, or are likely to carry out, such interference with equipment.⁶⁹

5.16 A thematic warrant may be appropriate where the relevant statutory tests are met and where a series of individual warrants is not practicable, or where the proposed activity is more suitably dealt with by a thematic subject-matter in light, for example, of the operational circumstances.

⁶⁴ See section 101(1)(b).

⁶⁵ See section 101(1)(c).

⁶⁶ See section 101(1)(e).

⁶⁷ See section 101(1)(f).

⁶⁸ See section 101(1)(g).

⁶⁹ See section 101(1)(h).

Specificity of thematic warrants

- 5.17 The Act requires that certain additional details must be included in the warrant dependent on the subject-matter(s) of the warrant.⁷⁰ This is set out in section 115 (requirements that must be met by warrants). For example, a thematic warrant that relates to equipment used by a group which shares a common purpose must include a description of that purpose as well as the name or description of as many of the persons who form part of that group as it is reasonably practicable to name or describe.
- 5.18 An equipment interference authority must, when section 115 requires, name or describe as many of the persons, organisations, or locations as is reasonably practicable. The descriptions of persons, organisations, or locations provided in a warrant application must be as granular as reasonably practicable in order to sufficiently enable proper assessment of the intrusion arising from the conduct to be authorised. In some cases aliases may be used in place of names or descriptions, for example where the person's real name is not known.
- 5.19 However, it may not always be reasonably practicable to include the names or descriptions of each and every one of the persons, organisations, locations, or sets of premises. Accordingly thematic warrants can be seen to fall into two types, those where it is reasonably practicable to include additional details and those where it is not:

Example of interference where it is reasonably practicable to include additional details of those falling within the subject-matter of the warrant: An equipment interference authority wishes to interfere with the equipment of three people for the purposes of an investigation into human trafficking. The authority applies for a warrant in relation to "equipment used by more than one person for the purpose of operation X" and those persons are known to be 'Person A', 'Person B' and 'Person C'. As it is reasonably practicable to do so their names must be included in the warrant at the point of issuing. Once issued, this warrant authorises interference with the equipment used by 'Person A', 'Person B' and 'Person C', the type of equipment must be described within the warrant in accordance with section 115(4), Further equipment or further names must be added by modification (see paragraph 5.25) if the authority wishes to undertake further activity.

⁷⁰ As per section 115(3) and 115(5).

Example of interference where it is not reasonably practicable to include additional subject-matter details: An equipment interference authority wishes to identify persons accessing terrorist material online. The agency seeks a thematic warrant in relation to more than one person for the purpose of a single investigation, with the subject matter of the warrant being “persons known to using equipment to access the terrorist website ‘X’”. In such a case, it may not be reasonably practicable to name or describe those persons any further than by this description which is based on their use of website ‘X’. Once issued, any authorised interference with equipment falling into the description of equipment within the warrant, and used by persons known to be accessing the terrorist website ‘X’, is lawful. There is no requirement to modify the warrant in accordance with section 115(3) to add names or descriptions of persons accessing the website. In the case of the second example, the requirements of the Act would be met as the warrant describes the persons, as far as is reasonably practicable, by reference to them accessing the relevant website. However the warrant application must make clear why the subject-matter is appropriate, and why it is not reasonably practicable to name or describe any further those falling within the relevant subject-matter in any more detail.

- 5.20 There is no requirement to modify warrants falling into this category during the currency of the warrant providing any additional names or descriptions already fall within the subject-matter of the warrant and the description of the persons.
- 5.21 The practicability of providing individual names or descriptions will need to be assessed on a case by case basis by the equipment interference authority making the application and will depend upon, for example, the existing intelligence picture, the scale and pace of the operation, the nature of the equipment to be interfered with and the time constraints of the particular operation.
- 5.22 In some instances it may not be possible to identify individual pieces of equipment or be specific about the nature of the equipment to be interfered with in advance, or there may be a technique that in itself carries out a specific, small amount of interference but enables access to the data that may already have been granted under an existing authorisation. In these cases the warrant should be specific about the technique and the circumstances in which the warrant is to be used, and the circumstances must be described in a way that enables the requirements of section 101 of the Act to be met.

Authorisation of thematic warrants

- 5.23 Before issuing a thematic warrant the decision maker must be satisfied that it is necessary, that the conduct to be authorised is proportionate to what is sought to be achieved by it, and that both the subject matter and the method of naming or describing the additional details provided in relation to the subject matter are compliant with the applicable requirements of section 115.

5.24 The thematic warrant application, including the necessity and proportionality of the conduct to be authorised, the assessment of collateral intrusion, and the further details provided in relation to the subject-matter of the warrant are provided to assist the decision maker and the Judicial Commissioner in foreseeing the extent of the interference with privacy arising from the conduct to be authorised. The interference with privacy has to be sufficiently foreseeable to allow the decision maker and the Judicial Commissioner to make a proper assessment of the necessity and proportionality of the conduct to be authorised; otherwise the warrant should not be issued.

Modification of thematic warrants

5.25 Thematic equipment interference warrants may be modified, subject to the provisions in the Act.⁷¹ Warrants that are not thematic warrants may not be modified.⁷²

5.26 The modifications that can be made to a thematic equipment interference warrant are:

- adding or removing a matter to which the warrant relates;
- adding, varying or removing a name or description in relation to a subject-matter; or,
- adding, varying or removing a description of the type of equipment to be interfered with.

5.27 The requirement to modify these details will vary depending on the subject-matter of the original warrant and whether the warrant does or does not contain additional names or descriptions of the persons, organisations or locations in relation to the subject-matter. This is illustrated by the examples in paragraph 5.19.

5.28 For example, for thematic equipment interference warrants that name or describe every person, organisation, location or set of premises individually, modifications must be made to add, vary or remove any names or descriptions. Modifications will also be required where the equipment interference authority wishes to interfere with a type of equipment that was not originally described in the warrant.

5.29 Where a thematic equipment interference warrant does not individually name or describe persons, organisations or locations (as it was not reasonably practicable to do so), but either describes the thematic subject-matter alone, or provides general descriptions within the subject-matter (for example 'the media wing of an overseas terrorist organisation'), modifications are not required to interfere with the equipment of any additional person, organisation or equipment in any location as long as one of these conditions is met:

⁷¹ See section 118 (modification of warrants issued by the Secretary of State or Scottish Ministers) and section 123 (modification of warrants issued by law enforcement chiefs); further detail on modifications, including how they apply to non-thematic warrants, is set out at paragraphs **Error! Reference source not found.** to 5.135.

⁷² See section 118(3).

- where it has not been reasonably practicable for the warrant to name or describe any of the persons, organisations or locations to which the warrant relates, that the persons organisations, locations or set of premises fall within the thematic subject-matter; or
- where it has been reasonably practicable for the warrant to describe the persons, organisations, locations or sets of premises using a general description falling within the subject matter, that the persons, organisations or locations fall within one of those general descriptions.

- 5.30 Modifications to add individual names or descriptions are not necessary in these circumstances as the warrant already provides lawful authority to interfere with the equipment within the subject-matter, or within any of the general descriptions falling within the subject matter that may have been provided. As described in paragraph 5.23, the decision maker must consider the conduct to be authorised to be necessary and proportionate before issuing the warrant and must clearly understand the extent of the interference that they are authorising.
- 5.31 An equipment interference authority is also permitted to amend a warrant after it has been issued (including the name or description included in relation to the subject-matter) as long as such an amendment does not alter the conduct that is authorised by the warrant.⁷³ An example of this would be to correct the spelling of a person's name.
- 5.32 If, over the course of an operation, an equipment interference authority considers that the nature of the operation has developed in such a way that the conduct authorised by the warrant might no longer be considered necessary and/or proportionate, the authority must consider whether the warrant should be modified pursuant to the requirement to ensure that any warrant remains necessary and proportionate. If the authority determines the warrant is no longer necessary and proportionate, even if it were to be modified, then the warrant must be cancelled.⁷⁴
- 5.33 There is an on-going duty to review warrants and to cancel them if they are no longer considered to be necessary and proportionate. More detail regarding the cancellation of warrants can be found in paragraph 5.136.

⁷³ See section 118(5) and 123(11).

⁷⁴ See section 125(2)-(3).

Example: An equipment interference authority requires a warrant to interfere with the equipment of a group of persons known to meet regularly and they need to be investigated rapidly because intelligence suggests they are involved in activities threatening national security. The agency sets out in the application that it is not reasonably practicable in the warrant to individually name or describe the people within this group due to the urgency of the investigation. However, over the course of the operation, the agency determines that only a proportion of people falling within the description of the group are of intelligence interest. The equipment interference authority must assess whether the necessity and proportionality case put to and accepted by the person issuing the warrant and the Judicial Commissioner remains accurate. If the change in circumstances affects the necessity or proportionality of the conduct authorised by the warrant, then the warrant may need to be modified to reflect more precisely those subject to interference or the person issuing the warrant should be notified that the warrant may need to be cancelled.

Renewal of thematic warrants

- 5.34 The provisions relating to renewal of warrants, described further in paragraph 5.102 apply to thematic warrants. An equipment interference authority seeking to renew a thematic warrant must present in the renewal application a thorough assessment of the proportionality of conduct carried out under the warrant to date, including any collateral intrusion, and the extent of any interference with privacy.
- 5.35 When seeking to renew a thematic warrant that does not individually name or describe each person, organisation or location, the person applying to renew the warrant should explain why the warrant in its current form remains most appropriate.
- 5.36 The renewal application should provide any further, relevant information about those who fall within the subject-matter of the warrant in order to enable assessment of the intrusion arising from the conduct authorised. This information will ensure that the decision maker and Judicial Commissioner will be able to consider the necessity and proportionality of the interference, supported by up to date information.

Consideration of applying for a thematic or bulk equipment interference warrant

- 5.37 If the relevant decision maker (i.e. the Secretary of State, Scottish Minister or law enforcement chief) is (a) able to foresee the extent of all of the interferences to a sufficient degree, including the degree of collateral material present at the time when examination of the material takes place, (b) can therefore properly and fully assess necessity and proportionality, and (c) agrees that it is necessary and proportionate, then a thematic warrant may be granted.

- 5.38 In such cases, the additional access controls which form an integral part of the bulk warrant regime are not required, given the decision maker can adequately assess and address all of the relevant considerations at the time of issuing the warrant. By contrast, if it is not possible to so assess the necessity and proportionality of all of the interferences at the time of issuing the warrant, or the assessment is that in the circumstances it would not be proportionate to issue a thematic warrant, then a bulk warrant with its second stage authorisation process might be more appropriate if available.
- 5.39 The following two examples regard operational scenarios in which the use of a thematic warrant would be appropriate:

Example 1: Intelligence has suggested that a number of unidentified criminal associates are planning to imminently commit a serious criminal offence. An equipment interference authority may wish to deploy equipment interference against the members of the group planning the offence. As the intelligence picture develops, the equipment interference authority expects to rapidly identify the potential offenders and the exact equipment that they are using. The equipment interference authority obtains an equipment interference warrant relating to the equipment belonging to, or used by, a group of persons who are carrying on a particular activity (i.e. the planned offence) so they do not have to wait to get a new authorisation each time they identify a new member of the group and a new piece of equipment.

Example 2: Intelligence suggests that a terrorist cell dispersed across a small number of locations in the Middle East is plotting an imminent bomb attack against UK interests. Interception reveals that the cell members are all using a unique technique to hide their identities online, known as an anonymisation package. After using equipment interference to obtain equipment data from a large number of devices in the specific locations, a search term ('selector') that is unique to the anonymisation package is applied to the data collected, ensuring that only data relating to the cell members is available for analysis. Using information from the initial analysis, the content from the cell members' devices is then obtained. As the cell members can be identified from their association to a specific, known anonymisation package, a targeted 'thematic' warrant is suitable.

Format of warrant application

- 5.40 In this Chapter, reference to an 'application' for a warrant includes the application form and the draft warrant (including the draft instrument and any draft schedules).

Targeted equipment interference warrants

- 5.41 An application for a targeted equipment interference warrant, a copy of which must be retained by the equipment interference authority applying for it, should contain the following information:
- The statutory ground(s) on which the warrant sought is considered necessary. Any application for a warrant in the interests of safeguarding the economic well-being of the UK should therefore identify how those interests are also relevant to the interests of national security;

- The background to the operation or investigation in the context of which the warrant is sought and what the operation or investigation is expected to deliver;
- The subject-matter(s) of the warrant, to include the following information dependent on the subject-matter(s);⁷⁵

Where the warrant sought relates to...	The warrant application must set out...
equipment belonging to, used by or in the possession of:	
<ul style="list-style-type: none"> • a particular person or organisation 	a name or description of that person or organisation
<ul style="list-style-type: none"> • a group of persons who share a common purpose or who carry on, or may carry on a particular activity 	a description of that purpose or activity, and a name or description of as many of those persons as it is reasonably practicable to name or describe
<ul style="list-style-type: none"> • more than one person or organisation, and where the interference is for the purposes of a single investigation or operation 	a description of that purpose or activity, and a name or description of as many of those persons as it is reasonably practicable to name or describe
equipment in:	
<ul style="list-style-type: none"> • a particular location 	a description of the location
<ul style="list-style-type: none"> • more than one location where the interference is for the purpose of a single investigation or operation 	a description of investigation or operation and a name or description of as many of the locations as it is reasonably practicable to describe
which is being, or may be, used	
<ul style="list-style-type: none"> • for the purposes of a particular activity or activities of a particular description 	a description of the activity or activities
<ul style="list-style-type: none"> • to test, maintain, or develop capabilities or for the training of persons 	a description of the nature of the testing, maintenance or development of the capabilities or the nature of the training

- Where a thematic equipment interference warrant either does not name or describe persons, organisations or locations, or describes persons, organisations or locations

⁷⁵ See section 101(1) and the table at section 115(3).

using a general description, an explanation of why it was not practicable to name or describe persons, organisations or sets of premises individually;

- A description of any communications, equipment data or other information that is to be (or may be) obtained and an outline of how obtaining the material will benefit the investigation or operation;
- Sufficient information to describe the type of equipment which will be affected by the interference;
- A description of the conduct to be authorised as well as any conduct it is expected will be necessary to undertake in order to carry out what is expressly authorised or required by the warrant, including whether communications or other information is to be obtained by surveillance;
- An assessment of the consequences and potential consequences of that conduct, including any risk of compromising the security of any equipment directly or indirectly involved with the interference and, in particular, whether this may enable further intrusion into privacy or impact upon critical national infrastructure;
- Consideration of why the conduct to be authorised by the warrant is proportionate to what is sought to be achieved by that conduct, including whether what is sought to be achieved by the warrant could reasonably be achieved by other less intrusive means;⁷⁶
- In the case of law enforcement agencies, the factors considered when determining if it is proportionate for the warrant to be issued to the appropriate law enforcement officer;⁷⁷
- Consideration of any collateral intrusion, including the identity of individuals and/or categories of people, where known, who are likely to be affected, and why that intrusion is justified in the circumstances;
- What measures will be put in place to ensure proportionality is maintained. (e.g. through filtering or processing the material where practicable before any of it is examined);
- Where an application is urgent, the supporting justification; and
- An assurance that all material obtained will be kept for no longer than necessary and will be handled in accordance with the safeguards required by section 129 of the Act and Chapter 9 of this code.

5.42 In certain circumstances additional information may be required which depend on the purpose for which the warrant is to be obtained:

⁷⁶ See also section 2 (general duties in relation to privacy).

⁷⁷ See paragraph 4.20.

- In respect of legal professional privilege:
 - Where the purpose, or one of the purposes, of the warrant is to authorise or require interference with equipment for the purpose of obtaining items subject to legal privilege, a statement to that effect and an assessment of why there are exceptional and compelling circumstances that make the acquisition of such items necessary and what protections it is proposed will be applied to the handling of the information so obtained;⁷⁸
 - Where it is not the purpose of one of the purposes of the warrant to obtain items subject to legal privilege but the person applying for the warrant nevertheless considers it likely that items subject to legal privilege will be included in the communications or information obtained by the conduct authorised by the warrant, a statement to that effect, an assessment of how likely it is that such material will be included and details of the protections it is proposed will be applied to the handling of information so obtained.⁷⁹
 - Where the purposes, or one of the purposes, of the warrant is to authorise or require interference with equipment for the purpose of obtaining items that would be subject to legal privilege if the items were not created or held with the intention of furthering a criminal purpose, the application should contain a statement to that effect and set out the reasons for believing that the items are created or held with the intention of furthering a criminal purpose.⁸⁰
- Where the purpose of the warrant is to authorise or require interference with equipment for the purpose to obtaining communications or private information of a member of a relevant legislature⁸¹ a statement to that effect and details of the arrangements for the handling of the information so obtained.
- Where the purpose, or one of the purposes, of the warrant is to authorise or require interference with equipment for the purpose of obtaining communications or other items of information which the applicant believes will contain confidential journalistic material,⁸² or where the purpose or one of the purposes of the warrant is to identify or confirm a source of journalistic information,⁸³ a statement to that effect and what protections it is proposed will be applied to the handling of the information so obtained.

⁷⁸ See section 112(1)-(2) (items subject to legal privilege).

⁷⁹ See section 112(7)-(9) (items subject to legal privilege).

⁸⁰ See section 112(11)-(12) (items subject to legal privilege).

⁸¹ See section 111 and Chapter 9 (below).

⁸² See section 113(1)-(2) (confidential journalistic material); see also section 264 for relevant definitions.

⁸³ See section 114(1)-(2) (sources of journalistic material); see also section 263(1) for relevant definitions.

- 5.43 When completing a warrant application, the equipment interference authority must ensure that the case for the warrant is presented in the application in a fair and balanced way. In particular, all reasonable efforts should be made to take account of information which weakens the case for the warrant.

Targeted examination warrants

- 5.44 Targeted examination warrants may be issued by the Secretary of State or where relevant the Scottish Ministers on an application made by or on behalf of the head of an intelligence service. An application for a targeted examination warrant should contain the following information:
- The statutory ground(s) on which the warrant sought is considered necessary, as set out in section 102(3) or 103(2);
 - The background to the operation or investigation in the context of which the warrant is sought and what the operation is expected to deliver;
 - The subject-matter(s) of the warrant, to include the following information dependent on the subject-matter(s):⁸⁴
 - where the warrant sought relates to a particular person or organisation, it must name or describe that person or organisation;
 - where the warrant sought relates to a group of persons who share a common purpose or who carry on, or may carry on a particular activity, a description of the common purpose or activity, and name or description of many of the persons as it is reasonably practicable to name or describe;
 - where the warrant sought relates to more than one person or organisation for the purposes of a single investigation or operation, description of the nature of the investigation or operation and a name or description of as many of the persons or organisations as it is reasonably practicable to name or describe;
 - where the warrant sought relates to any testing, maintenance, development and/or training activities, a description of those activities and a name or description of as many of the persons whose protected material will or may be selected for examination as it is reasonably practicable to describe.
 - Where a thematic examination warrant either lists the subject-matter alone, or provides additional details by means of general descriptions rather than individual names or descriptions, an explanation as to why it is not reasonably practicable to individually name or describe persons, or organisations.

⁸⁴ See section 101(3) and the table at section 115(5).

- A description of the protected material that is to be selected for examination.
- Consideration of why the selection for examination to be authorised by the warrant is proportionate to what is sought to be achieved, including whether what is sought to be achieved by the warrant could reasonably be achieved by other less intrusive means.
- Consideration of any collateral intrusion, including the identity of individuals and/or categories of people, where known, who are likely to be affected, and why that intrusion is justified in the circumstances.
- Where an application is urgent, the supporting justification.
- An assurance that any protected material selected will be kept for no longer than necessary and will be handled in accordance with the safeguards as set out in Chapter 9.

5.45 In certain circumstances additional information may be required which depend on the purpose for which the warrant is to be obtained:

- In respect of legal professional privilege:
 - Where the purpose, or one of the purposes, of the warrant is to authorise the selection for examination of items subject to legal privilege, a statement to that effect and an explanation of why there are exceptional and compelling circumstances that make the examination of such items necessary and the protections it is proposed will be applied to the handling of the information so obtained.⁸⁵
 - Where the purpose, or one or the purposes, of the warrant is to obtain items subject to legal privilege but the person applying for the warrant nevertheless considers it likely that items subject to legal privilege will be included in the material which the warrant authorises to be selected for examination, a statement to that effect and an assessment of how likely it is that such items will be included in the material and details of the protections it is proposed will be applied to the handling of information so obtained.⁸⁶
 - Where the purpose, or one of the purposes, of the warrant is to authorise the selection for examination of communications that would be items subject to legal privilege if the items were not created or held with the intention of furthering a criminal purpose, the application should contain a statement to that effect and set

⁸⁵ See section 112(1)-(2) (items subject to legal privilege).

⁸⁶ See section 112(7)-(9) (items subject to legal privilege).

out the reasons for believing that the items are created or held with the intention of furthering a criminal purpose.⁸⁷

- Where the purpose of the warrant is to authorise the selection for examination of the communications or private information of a member of a relevant legislature⁸⁸ a statement to that effect and what protections it is proposed will be applied to the handling of the information so obtained. See sections 8.46-8.55 below for further information on this issue.
- Where the warrant is intended to authorise the selection for examination of material which the application believes is confidential journalistic material,⁸⁹ or to identify or confirm the source of journalistic information,⁹⁰ a statement to that effect and what protections it is proposed will be applied to the handling of the information so obtained.

5.46 When completing a warrant application, the equipment interference authority must ensure that the case for the warrant is presented in the application in a fair and balanced way. In particular, all reasonable efforts should be made to take account of information which weakens the case for the warrant.

Format of targeted warrants

5.47 Section 115 of the Act prescribes the requirements that must be met by targeted warrants issued under Part 5.

5.48 Targeted equipment interference warrants or targeted examination warrants, when issued to the intelligence services, are addressed to the head of the intelligence service by whom or on whose behalf the application for the warrant was made.⁹¹ In the case of the Ministry of Defence (Defence Intelligence), warrants are addressed to the Chief of Defence Intelligence.⁹²

⁸⁷ See section 112(11)-(12) (items subject to legal privilege).

⁸⁸ See section 111 or Chapter 9 (below).

⁸⁹ See section 113(1)-(2) (confidential journalistic material); see also section 264 for relevant definitions.

⁹⁰ See section 114(1)-(2) (sources of journalistic material); see also section 263(1) for relevant definitions.

⁹¹ See section 115(2)(a).

⁹² See section 115(2)(b).

- 5.49 A targeted equipment interference warrants issued by a law enforcement chief can be addressed to the person who applied for the warrant or to another person who is an appropriate law enforcement officer in relation to the law enforcement chief.⁹³ The person to whom the warrant is addressed must be named or described in the warrant.⁹⁴ Such a person must be an accountable individual but can be described by their relevant post within the law enforcement agency. This ensures the law enforcement chief can address the warrant to the officer who is accountable for giving effect to the warrant (who may or may not be the person who applied for it).
- 5.50 Where required, (for example because of uncertainty over real identity) names or descriptions on the warrant can be in the form of an alias or other description that identifies the subject.

Targeted equipment interference warrants

- 5.51 A targeted equipment interference warrant must describe the type of equipment that is to be interfered with and the conduct that the person to whom the warrant is addressed is authorised to take.⁹⁵
- 5.52 Each warrant will comprise a warrant instrument signed by the person responsible for issuing the warrant and may also include a schedule or set of schedules. The warrant will include the following information:
- a statement that it is a targeted equipment interference warrant;
 - the person to whom the warrant is addressed:
 - Targeted equipment interference warrants issued to the Ministry of Defence (Defence Intelligence) are addressed to the Chief of Defence Intelligence.
- 5.53 Targeted equipment interference warrants issued by a law enforcement chief can be addressed to the person who applied for the warrant or to another person who is an appropriate law enforcement officer in relation to the law enforcement chief.⁹⁶ The person to whom the warrant is addressed must be named or described in the warrant.⁹⁷ Such a person must be an accountable individual but can be described by their relevant post within the law enforcement agency. This approach ensures that the relevant law enforcement chief issuing the warrant can address the warrant to the officer who is accountable for giving effect to it (who may or may not be the person who applied for it).

⁹³ See section 115(2)(c)(i); as to who is an appropriate law enforcement officer in respect of a particular law enforcement chief, section 106(5) and the table at Schedule 6.

⁹⁴ See section 115(2)(c)(ii).

⁹⁵ See section 115(4).

⁹⁶ See section 106(5) and the table at Schedule 6.

⁹⁷ See section 115(2)(c)(ii).

- the subject-matter of the warrant:⁹⁸
 - where the warrant relates to equipment belonging to, used by or in the possession of a particular person or organisation, the warrant must name or describe that person or organisation;⁹⁹
 - where the warrant relates to equipment belonging to, used by or in the possession of a group of persons who share a common purpose or who carry on (or may carry on) a particular activity, the warrant must: (i) describe that purpose or activity, and (ii) name or describe as many of those persons as it is reasonably practicable to name or describe;¹⁰⁰
 - where the warrant relates to equipment belonging to, used by or in the possession of more than one person or organisation, and the interference is for the purposes of a single investigation or operation, the warrant must: (i) describe the nature of the investigation or operation, and (ii) name or describe as many of those persons or, organisations as it is reasonably practicable to name or describe;¹⁰¹
 - where the warrant relates to equipment which is in a particular location, the warrant must describe the location;¹⁰²
 - where the warrant relates to equipment which is in more than one location, and where the interference is for the purpose of a single operation or investigation, the warrant must: (i) describe the nature of the investigation or operation, and (ii) name or describe as many of the locations as it is reasonably practicable to describe;¹⁰³
 - where the warrant relates to equipment which is being, or may be, used for a particular activity or activities of a particular description, the warrant must describe those activities;¹⁰⁴
 - where the warrant that relates to equipment which is being, or may be, used for any testing, training, maintenance or capability development activities, the warrant must describe those activities;¹⁰⁵
- the date the warrant was issued; and

⁹⁸ See section 101(1) and section 115(3).

⁹⁹ See section 101(1)(a).

¹⁰⁰ See section 101(1)(b).

¹⁰¹ See section 101(1)(c).

¹⁰² See section 101(1)(d).

¹⁰³ See section 101(1)(e).

¹⁰⁴ See section 101(1)(f).

¹⁰⁵ See section 101(1)(g) and (h).

- a warrant reference number.

5.54 A targeted equipment interference warrant may expressly authorise the disclosure of any material obtained under the warrant. However, a warrant does not need to specify all potential disclosures of material. Disclosure of material is permitted provided that it is not an unauthorised disclosure for the purposes of section 132 of the Act. This may include, for example, disclosure of material for admission as evidence in criminal and civil proceedings.¹⁰⁶

Targeted examination warrants

5.55 Each targeted examination warrant will comprise a warrant instrument signed by the Secretary of State (or Scottish Minister as the case may be) and may also include a schedule or set of schedules.

5.56 The warrant will include:

- a statement that it is a targeted examination warrant;
- the person to whom the warrant is addressed;
- the subject-matter of the warrant:¹⁰⁷
 - where the warrant relates to a particular person or organisation, the warrant must name or describe that person or organisation;¹⁰⁸
 - where the warrant that relates to a group of persons who share a common purpose or who carry on (or may carry on) a particular activity, the warrant must describe that purpose or activity, and name or describe as many of those persons as it is reasonably practicable to name or describe;¹⁰⁹
 - where the warrant relates to more than one person or organisation, and the interference is for the purposes of a single investigation or operation, the warrant must: (i) describe the nature of the investigation or operation, and (ii) name or describe as many of those persons or organisations as it is reasonably practicable to name or describe;¹¹⁰
 - where the warrant relates to testing, training, maintenance, or capability development, the warrant must describe the nature of that activity;¹¹¹

¹⁰⁶ In that regard, see section 133 (section 132: meaning of “excepted disclosure”).

¹⁰⁷ See section 101(2) and section 115(5).

¹⁰⁸ See section 101(2)(a).

¹⁰⁹ See section 101(2)(b).

¹¹⁰ See section 101(2)(c).

¹¹¹ See section 101(2)(d) and (e).

- the date the warrant was issued; and
- a warrant reference number.

Authorisation of a targeted equipment interference warrant

5.57 The person responsible for issuing a target equipment interference warrant may only do so if the person considers the following tests are met:

- the warrant is necessary for one or more of the applicable statutory grounds:
 - in the case of intelligence services, the grounds set out in section 102(5) and described in paragraph 4.8 (see paragraph 5.60 below as to the powers of the Scottish Ministers);
 - In the case of the Ministry of Defence (Defence Intelligence), the warrant is necessary in the interests of national security as described in paragraph 4.13;¹¹²
 - in the case of law enforcement agencies, the warrant is necessary for the purpose of preventing or detecting serious crime¹¹³ or, for some agencies, for the purpose of preventing death or preventing or mitigating injury,¹¹⁴ as described in paragraph 4.14;
- the conduct authorised by the warrant is proportionate to what is sought to be achieved.¹¹⁵ In considering necessity and proportionality, the decision maker must take into account whether the information sought could reasonably be obtained by other less intrusive means;¹¹⁶
- there are satisfactory safeguards in place.¹¹⁷ The decision maker must consider that satisfactory arrangements are in force in relation to the warrant. In respect of targeted equipment interference warrants, these are the safeguards required by section 129 and section 130 concerning the copying, disclosure and retention of material obtained by equipment interference; in respect of targeted examination warrants, there are safeguards in respect of the prohibition in section 193(4) on the selection of protected

¹¹² See section 103(1)(a).

¹¹³ See section 106(1)(a).

¹¹⁴ See section 106(3)(a) and Part 1 of the table in Schedule 6.

¹¹⁵ In respect of decisions by the Secretary of State, in section 102 see paragraphs (b) of subsections (1) and (3), and in section 104 see subsection (1)(b); in respect of decisions by the Scottish Ministers, in section 103 see paragraphs (c) of subsections (1) and (2); in respect of decisions by law enforcement chiefs, in section 106 see paragraphs (b) of subsections (1) and (3).

¹¹⁶ See section 2 (general duties in relation to privacy).

¹¹⁷ In respect of decisions by the Secretary of State, in section 102 see paragraphs (c) of subsections (1) and (3), and in section 104 see subsection (1)(c); in respect of decisions by the Scottish Ministers, in section 103 see paragraphs (d) of subsections (1) and (2); in respect of decisions by law enforcement chiefs, in section 106 see paragraphs (c) of subsections (1) and (3).

material relating to individuals in the British Islands. These safeguards are explained in Chapter 9 of this code;

- where the additional protection for members of a relevant legislatures applies (see section 111 of the Act and section 23 of the Investigatory Powers (Amendment) Act 2024 and paragraph 8.49 of this code), the Secretary of State has received approval from the Prime Minister (or, where appropriate an alternative approver);
- where the purpose, or one of the purposes, of the warrant is to authorise equipment interference to obtain, or selection for examination, of items subject to legal privilege, that there are exceptional and compelling circumstances that make it necessary to authorise the obtaining of or selection for examination of such items and that specific arrangements are in place for the handling, retention, use and destruction of such items;¹¹⁸
- where it is not the purpose, or one of the purposes, of the warrant to obtain items subject to legal privilege but the decision maker nevertheless considers it is likely that items subject to legal privilege will be included in the material obtained or selected for examination, that specific arrangements are in place for the handling, retention, use and destruction of such items;¹¹⁹
- where the purpose, or one of the purposes, of the warrant is to authorise or require interference with equipment for the purpose of obtaining items that would be subject to legal privilege if the items were not created or held with the intention of furthering a criminal purpose then the following conditions must be met;¹²⁰
 - the application must contain a statement to the effect that that the purpose, or a purpose, of the warrant, and
- the application must set out the reasons for believing why what is sought is likely to be communications made, or other items created or held, for the intention of furthering a criminal purpose. Where the purpose, or one of the purposes, of the warrant is to authorise or require equipment interference to obtain or to select for examination material containing confidential journalistic material,¹²¹ or where the purpose, or one of the purposes, of the warrant is to identify or confirm a source of journalistic information,¹²² that specific arrangements are in place for the handling, retention, use and destruction of such material;¹²³

¹¹⁸ See section 112(3)-(6) and subsection (4) in particular.

¹¹⁹ See section 112(9).

¹²⁰ See section 112(11)-(13).

¹²¹ See section 113(1).

¹²² See section 114(1).

¹²³ See subsection (3) of section 113 and section 114 respectively.

- except in an urgent case, the decision maker may not issue a warrant unless and until the decision to issue the warrant has been approved by a Judicial Commissioner.¹²⁴

5.58 When taking the decision to issue the warrant, the person issuing the warrant must have regard to the matters in section 2 of the Act, which imposes general duties in relation to privacy. That person must have regard to whether what is sought to be achieved could reasonably be achieved by other less intrusive means; whether the level of protection to be applied in relation to the obtaining of information obtained under the warrant is higher because of the particular sensitivity of that information; the public interest in the integrity and security of telecommunication systems and postal services; and any other aspects in the public interest in protection of privacy.

Power of Scottish Ministers to issue warrants

5.59 Targeted equipment interference warrants and targeted examination warrants may be issued by the Scottish Ministers to the intelligence services for the purposes of the prevention and detection of serious crime in certain circumstances.¹²⁵

- A targeted equipment interference warrant may only be issued by the Scottish Ministers if the warrant would authorise interference only with equipment that is, or believed to be, in Scotland at the time the warrant is issued.
- A targeted examination warrant may only be issued by the Scottish Ministers if it would relate only to a person that is, or believed to be, in Scotland at the time the warrant is issued.

Authorisation of a targeted warrant: senior official signature

5.60 The Act permits that when it is not reasonably practicable for the Secretary of State Scottish Minister to sign a targeted warrant a designated senior official may sign the warrant on their behalf.¹²⁶ Typically this scenario will arise where the relevant decision maker is not physically available to sign the warrant because, for example, they are on a visit or in their constituency. The relevant decision maker must nevertheless personally and expressly authorise the issue of the warrant. The warrant must be signed before it can be issued, and activity under the warrant can begin.

¹²⁴ In respect of decisions by the Secretary of State, in section 102 see paragraphs (d) of subsections (1) and (3), and in section 104 see subsection (1)(d); in respect of decisions by the Scottish Ministers, in section 103 see paragraphs (e) of subsections (1) and (2); in respect of decisions by law enforcement chiefs, in section 106 see paragraphs (d) of subsections (1) and (3).

¹²⁵ See section 103; see also section 102 which sets out circumstances in which the Secretary of State may not issue to the head of an intelligence service a targeted equipment interference (subsection (2)) or a targeted examination warrant (subsection (4)).

¹²⁶ See section 105 (decision to issue warrant under sections 102 to 104 to be taken personally by Ministers),

- 5.61 When seeking authorisation the senior official must explain the case, either in writing or orally, to the Secretary of State and this explanation should cover the considerations and information that would be included on an application form as set out at paragraph 5.41-9. This will include an explanation of necessity and proportionality.
- 5.62 Where the case is being explained orally, the senior official must keep a written record of the conversation. Once the issue of the warrant has been authorised the warrant must be signed by the senior official. If the Secretary of State refuses to authorise the issue of the warrant, the warrant must not be issued. When a warrant is signed by a senior official the warrant instrument must contain a statement to that effect.¹²⁷ Except in urgent cases, the decision to issue the warrant must then be approved by a Judicial Commissioner before the warrant is issued.

Authorisation of a targeted warrant: law enforcement agencies

- 5.63 A law enforcement chief may only issue a warrant if it is necessary for the purpose of preventing or detecting serious crime.¹²⁸ There are some qualifications to this purpose, such as;
- Where the law enforcement chief is the Chief Constable or the Deputy Chief Constable of the Police Service of Northern Ireland, the purpose of preventing or detecting serious crime includes a reference to the interests of national security.¹²⁹
 - A law enforcement chief who is an immigration officer may consider that the purpose is satisfied only if the serious crime relates to an offence which is an immigration or nationality offence (whether or not it also relates to other offences).¹³⁰
 - A law enforcement chief who is an officer of His Majesty's Revenue and Customs may consider that the purpose is satisfied only if the serious crime relates to an assigned matter within the meaning of section 1(1) of the Customs and Excise Management Act 1979.¹³¹
 - A law enforcement chief who is a designated customs official may consider that the purpose is satisfied only if the serious crime relates to a matter in respect of which a designated customs official has functions.¹³²

¹²⁷ See section 105(5) as to what is required.

¹²⁸ See section 106(1)(a)

¹²⁹ See section 106(6)

¹³⁰ See section 106(7)

¹³¹ See section 106(8)

¹³² See section 106(9)

- A law enforcement chief who is the chair of the Competition and Markets Authority may consider that the purpose is satisfied only if the offence, or all of the offences, to which the serious crime relates are offences under section 188 of the Enterprise Act 2002.¹³³
- A law enforcement chief who is the chairman, or a deputy chairman, of the Independent Office for Police Conduct may consider that the purpose is satisfied only if the offence, or all of the offences, to which the serious crime relates are offences that are being investigated as part of an investigation by the Commission under Schedule 3 to the Police Reform Act 2002.¹³⁴
- A law enforcement chief who is the Police Investigations and Review Commissioner may consider that the purpose is satisfied only if the offence, or all of the offences, to which the serious crime relates are offences that are being investigated under section 33A(b)(i) of the Police, Public Order and Criminal Justice (Scotland) Act 2006.¹³⁵

5.64 Section 107 places restrictions on the issuing of equipment interference warrants to specified law enforcement agencies. Warrants are prevented from being issued unless the relevant law enforcement chief considers there is a British Islands connection. Further details on British Islands restrictions are set out in paragraph 3.34-35.

Authorisation by appropriate delegates

- 5.65 Where it is not reasonably practicable for a law enforcement chief to issue a warrant, in urgent circumstances, an appropriate delegate (listed in Schedule 6 of the Act) may exercise the power to issue the warrant instead. This is distinct to the process outlined in paragraph 5.50 whereby a senior official signs the warrant instrument following a decision by the Secretary of State to issue it. In the law enforcement context, the appropriate delegate is themselves making the decision to issue the warrant. As such, where an appropriate delegate exercises the power to issue a warrant they must follow the same process that would otherwise be followed by a law enforcement chief.
- 5.66 Once the issue of the warrant has been authorised the warrant must be signed by the law enforcement chief or appropriate delegate¹³⁶. If the law enforcement chief or appropriate delegate refuses to authorise the issue of the warrant, the warrant must not be issued. Except in urgent cases, the decision to issue the warrant must then be approved by a Judicial Commissioner before the warrant is issued. For guidance on an appropriate delegate cancelling a warrant, please see paragraph 5.139 below.

¹³³ See section 106(10)

¹³⁴ See section 106(11)

¹³⁵ See section 106(12)

¹³⁶ This could be in the form of either a 'wet signature' or an 'electronic signature'.

Authorisation of capabilities

- 5.67 Law enforcement chiefs (and appropriate delegates where applicable) may only issue an equipment interference warrant if they consider that it is necessary and proportionate for the warrant to be issued to their appropriate law enforcement officer. In addition to the factors set out in paragraph **Error! Reference source not found.** above, in considering whether it is proportionate, they should consider the full context of the application, including:
- whether the appropriate law enforcement officer, or those effecting the warrant, have the capabilities and meets the appropriate standards to conduct the equipment interference techniques sought under the warrant;
 - whether the equipment interference technique that is sought under the warrant has been adequately tested for the proposed use;
 - whether the appropriate law enforcement officer, or those effecting the warrant, have sufficient training and experience in conducting the equipment interference techniques sought under the warrant;
 - if the equipment interference technique is sensitive, whether there are sufficient safeguards in place to ensure that the technique is protected; and
 - whether it would be more appropriate for another law enforcement agency to obtain the warrant on their behalf.
- 5.68 Specified law enforcement officers are able to apply for an equipment interference warrant that can impose an enforceable duty on a telecommunications operator to assist with its implementation.¹³⁷ In such circumstances, the relevant law enforcement officer must obtain approval from the Secretary of State or Scottish Minister where appropriate for any steps that the operators would be required to take (for further detail, please see Chapter 7).
- 5.69 The Secretary of State or Scottish Minister where appropriate may issue further guidance to assist law enforcement chiefs and appropriate delegates in considering whether it is proportionate to issue an equipment interference warrant. Taking into account the considerations listed above when deciding whether or not to issue a warrant will ensure that equipment interference techniques are deployed by law enforcement agencies in an appropriate, consistent and proportionate manner.

¹³⁷ The relevant authorities are: the NCA, HMRC, Police Scotland, the Police Service of Northern Ireland and the Metropolitan Police – see section 128 (duty of telecommunication operators to assist with implementation).

Consideration of collateral intrusion

- 5.70 Consideration should be given to the risk of obtaining communications, equipment data or other information about persons who are not the targets of the equipment interference activity. This is known as collateral intrusion.
- 5.71 Particular consideration should be given in cases where religious, medical, journalistic or legally privileged material may be involved, or where communications between a member of a relevant legislature¹³⁸ and another person on constituency business may be involved.
- 5.72 A person applying for an equipment interference warrant must also consider appropriate measures to reduce the extent of collateral intrusion. All applications for equipment interference warrants should include an assessment of the risk of collateral intrusion and details of any measures taken to limit it. These measures will be taken into account by the person issuing the warrant and a Judicial Commissioner when considering the application and in particular the proportionality of the conduct to be authorised.
- 5.73 Where collateral intrusion is unavoidable, the conduct may still be authorised, provided this intrusion is considered proportionate to what is sought to be achieved. The same proportionality tests apply to the likelihood of collateral intrusion as to intrusion into the privacy of the intended subject of the equipment interference activity.

Example: An equipment interference authority seeks to conduct equipment interference against a device used by a subject, T, on the grounds that this is necessary and proportionate for a relevant statutory purpose. It is assessed that the operation will unavoidably result in the obtaining of some information about members of T's family, who are also users of T's device, and who are not the intended subjects of the equipment interference. The person issuing the warrant should consider the proportionality of this collateral intrusion, and whether sufficient measures are to be taken to limit it, when granting the authorisation. This may include minimising the obtaining of any material clearly relating to T's family and in the event it is inadvertently captured, applying the safeguards in the Act, including destroying material where there is no longer an authorised purpose for its retention.

- 5.74 Where it is proposed to interfere with equipment used by individuals who are not of intelligence interest, interference with the privacy or property of such individuals should not be considered as collateral intrusion but rather as intended intrusion. Any such equipment interference activity should be carefully considered against the necessity and proportionality criteria.

¹³⁸ See section 111

Example: An equipment interference authority seeks to establish the whereabouts of N. It is proposed to conduct equipment interference against P, who is an associate of N but who is not assessed to be of direct intelligence interest. The equipment interference will enable surveillance to be conducted via P's device, in order to obtain information about N's location. In this situation, P will be the subject of the equipment interference warrant and the person issuing the warrant must consider the necessity and proportionality of conducting surveillance against P, bearing in mind the availability of any other less intrusive means to identify N's whereabouts. It may be the case that the surveillance conducted via P's device will also result in obtaining information about P's family, which in this instance would represent collateral intrusion also to be considered by the person issuing the warrant.

- 5.75 Should an equipment interference operation reach the point where individuals other than the subject of the authorisation are identified as investigative targets in their own right (for example when interfering with equipment used by more than one person) consideration should be given to applying for separate warrants covering those individuals or, in the case of thematic warrants, modifying the warrant to add those individuals if permissible.

Judicial commissioner approval

- 5.76 Before a targeted warrant can be issued, the decision to issue it must be approved by a Judicial Commissioner. The Judicial Commissioner will have access to the same application for the warrant as the person issuing the warrant.¹³⁹
- 5.77 Section 108 of the Act sets out the test that a Judicial Commissioner must apply when deciding whether to approve the decision. The Judicial Commissioner will review the conclusions of the person who issued the warrant as to whether the warrant is necessary and whether the conduct it authorises is proportionate to what is sought to be achieved. In reviewing those conclusions, the Judicial Commissioner will apply the same principles as would apply on an application for judicial review. The Judicial Commissioner must review the conclusions with a sufficient degree of care as to ensure that the Judicial Commissioner complies with the duties imposed by section 2 (general duties in relation to privacy).
- 5.78 In accordance with the investigation and information gathering powers at section 235(2) of the Act, there is an obligation on the equipment interference authority and the person who issued the warrant to provide the Judicial Commissioner with information if the Commissioner seeks clarification in relation to a warrant application. Where a Judicial Commissioner is seeking additional information this should be sought via the relevant warrant granting department in order to determine whether the requested information would also need to be considered by the person who issued the warrant. Where a warrant has been issued by a law enforcement chief and the Judicial Commissioner is seeking additional information, this should be sought from the relevant law enforcement agency.

¹³⁹ For details of what should be included in a warrant application, please refer to paragraph 5.34 for targeted equipment interference warrants and paragraph 5.37 for targeted examination warrants).

- 5.79 If the Judicial Commissioner refuses to approve the decision to issue a warrant, the person who issued the warrant may either:
- not issue the warrant; or,
 - refer the matter to the Investigatory Powers Commissioner for a decision (unless the Investigatory Powers Commissioner made the original decision).
- 5.80 An urgent warrant which is not approved by a judicial commissioner cannot be referred to the Investigatory Powers Commissioner.¹⁴⁰
- 5.81 If the Investigatory Powers Commissioner refuses the decision to issue a warrant the warrant must not be issued. There is no further avenue of appeal available under the Act.
- 5.82 Where a Judicial Commissioner refuses to approve the decision to issue the warrant, the person who made the decision to issue the warrant must be provided with written reasons.

Urgent authorisation of a targeted warrants

- 5.83 Part 5 of the Act makes provision for cases in which a warrant is required urgently.
- 5.84 Urgency is determined by whether it would be reasonably practicable to seek the Judicial Commissioner's approval to issue the warrant in the time available to meet an operational or investigative need. Accordingly urgent warrants can authorise equipment interference when issued without prior approval from a Judicial Commissioner. Urgent warrants should fall into one or both of the following categories:
- imminent threat to life or serious harm - for example, if an individual has been kidnapped and it is assessed that their life is in imminent danger;
 - an intelligence-gathering or investigative opportunity with limited time to act - for example, a consignment of Class A drugs is about to enter the UK and law enforcement agencies want to have coverage of the perpetrators of serious crime in order to effect arrests.
- 5.85 A decision to issue an urgent warrant must be reviewed by a Judicial Commissioner within three working days following the day of issue. In the case of urgent warrants signed by a senior official, the Judicial Commissioner's review should be on the basis of a written record of any oral briefing of the Secretary of State by a senior official. This written record should include, where relevant, any contemporaneous notes made and any questioning or points raised by the Secretary of State, or Scottish Minister where appropriate.

¹⁴⁰ See section 109(4).

- 5.86 If the Judicial Commissioner approves the decision to issue the urgent warrant, the equipment interference authority may seek renewal of the urgent warrant. A warrant issued under the urgency procedure lasts for five working days following the day of issue unless renewed. Once an urgent warrant is renewed it expires after six months, in the same way as non-urgent warrants. Where a decision is made to renew an urgent warrant prior to its approval by a Judicial Commissioner, the Judicial Commissioner may consider the original decision to issue the urgent warrant at the same time as considering the decision to renew the warrant.
- 5.87 Where a Judicial Commissioner refuses to approve a decision to issue an urgent warrant, the equipment interference authority must, as far as reasonably practicable, secure that anything in the process of being done under the warrant stops as soon as possible.¹⁴¹
- 5.88 A diagram illustrating the authorisation process is provided in Annex A.

Section 111 – Operating the alternative approvals process for targeted equipment interference warrants

- 5.89 Where the requirement for the approval of a warrant application requiring the approval of the Prime Minister under section 26 is urgent and the Prime Minister is unable to decide whether to give that approval (due to incapacity and/or a lack of access to secure communications), an alternative approvals process may be used whereby a Secretary of State designated for this purpose by the Prime Minister can perform this function instead of the Prime Minister.
- 5.90 The Secretary of State who is deciding whether to issue a warrant under section 19 may not also deputise for the Prime Minister in approving the decision to issue that same warrant.

Appointment of alternative approvers

- 5.92 Alternative approvers may only be appointed if they hold the position of Secretary of State. The appointment is not transferable to other roles. For example, if the Secretary of State for the Home Department is appointed as a alternative approver and then takes up a new position as the Secretary of State for Foreign, Commonwealth and Development Affairs, they must be formally reappointed as an alternative approver for the purposes of providing the necessary approvals.

¹⁴¹ See section 110 (failure to approve a warrant issued in urgent case).

- 5.93 When appointing alternative approvers, the Prime Minister must consider whether an appointee would have the necessary operational awareness of the warrant process in order to carry out the role. The selection of alternative approvers should be completed on a Prime Minister's first day in office. The Act provides that up to five Secretaries of State may be designated as alternative approvers, in order to allow for Secretary of State unavailability.
- 5.94 Necessary operational awareness should be understood to mean that the Secretary of State has received a briefing on the operation of the warrant process. This briefing should mirror the briefing which is provided to new Secretaries of State in warrant granting departments which enables them to undertake the warrant aspects of their roles.
- 5.95 A system should be established with the agreement of the Prime Minister to set out how the appropriate alternative approver will be selected (for example, on the basis of Cabinet hierarchy, or through a formal rota).

Urgency

- 5.91 As described in condition B urgency is determined by the Secretary of State or the Senior Official in the warrant granting department. All reasonable steps should be taken to avoid an expected warrant submission from becoming urgent.
- 5.92 There may be an urgent need to decide whether to approve the issue of a warrant in one or both of the following scenarios:
- Imminent threat to life or serious harm – for example, if an individual has been kidnapped and it is assessed that their life is in imminent danger.
 - An intelligence-gathering or investigative opportunity with limited time to act.

Prime Minister unable to decide whether to approve

- 5.93 As described in Condition A Prime Ministerial inability to decide whether to approve the issue of a warrant is limited to two circumstances, as :
- The Prime Minister is unable to access sufficiently secure communications to receive the warrant application and/or to communicate their decision on the application due to the security requirements and classification of the documents.
 - The Prime Minister is incapacitated and therefore unable to consider the warrant.
- 5.94 When seeking authorisation from the Secretary of State designated by the Prime Minister, a senior official from the warrant granting department must explain the case for utilising the alternative process, either in writing or orally, to the designated Secretary of State who will decide whether to approve the issue of the warrant.
- 5.95 The Prime Minister must be informed of any decisions made under the alternative approvals process as soon as is reasonably practicable.

Duration of targeted warrants

- 5.96 The duration of warrants issued under Part 5 of the Act is set out in section 116 (duration of warrants).
- 5.97 Targeted equipment interference warrants and targeted examination warrants issued using the standard (i.e. non-urgent) procedure are valid for six months.¹⁴² An urgent warrant is valid for five working days following the date of issue unless renewed.
- 5.98 Upon renewal, warrants are valid for a further period of six months. This period begins on the day after the day on which the warrant would have expired, had it not been renewed. In practice this means that if a warrant is due to end on 3 March but is renewed on 1 March, the renewal takes effect from 4 March and the renewed warrant will expire on 3 September. An equipment interference warrant may only be renewed in the last 30 days of the period for which it has effect (in the Act this is known as the “renewal period”).
- 5.99 Where a combined equipment interference warrant includes warrants or authorisations which would cease to have effect at the end of different periods, the combined warrant will expire at the end of the shortest of those periods.
- 5.100 Where modifications to an equipment interference warrant are made, the warrant expiry date remains unchanged.
- 5.101 Where a change in circumstance leads the equipment interference authority to consider it no longer necessary or proportionate for a warrant to be in force, the equipment interference authority must notify the relevant decision-maker so that it may be cancelled.

Renewal of targeted warrants

- 5.102 Section 117 of the Act sets out provisions for the renewal of targeted warrants.
- 5.103 A targeted warrant may be renewed at any time during the “renewal period”. The renewal period is 30 days before the warrant would otherwise cease to have effect (urgent warrants are an exception – see paragraph 5.87 above).
- 5.104 Applications for renewal should contain an update of the matters outlined in paragraph 5.41 or 5.44. In particular, the person seeking the renewal should give an assessment of the value of equipment interference to date and explain why it is considered that equipment interference continues to be necessary for one or more of the relevant grounds, and why it is considered that the interference continues to be proportionate. Consideration of the extent (if any) of collateral intrusion that has occurred to date, and how this has been managed, will be relevant to the consideration of proportionality.

¹⁴² See section 116(2)(b).

- 5.105 The additional safeguards set out in the following sections apply in relation to the renewal of warrants in the same way as they apply to a decision to issue a warrant: sections 111 (Members of Parliament etc.), section 112 (items subject to legal professional privilege), section 113 (confidential journalistic material), and section 114 (sources of journalistic material).¹⁴³
- 5.106 Where such material has been identified in material obtained under the warrant and is being retained other than for the purpose of destruction, the renewal application should explain this. Renewal applications should also make clear whether such material was identified and whether it is expected or likely that the warrant will produce any further such material following renewal.
- 5.107 In all cases, a warrant may only be renewed if the decision to renew the warrant has been approved by a Judicial Commissioner.¹⁴⁴
- 5.108 Where a warrant has been served on a telecommunications operator or other person for the purposes of seeking or requiring assistance with giving effect to it,¹⁴⁵ a copy of the warrant renewal instrument will be served on all those on whom a copy of the original warrant instrument was served (providing they are still able or required to provide assistance in giving effect to the warrant).¹⁴⁶ A renewal instrument will include the reference number of the warrant or warrants being renewed under this single instrument.

Modification of targeted warrants

- 5.109 Modification is a process by means of which: (i) the subject-matter of a warrant may be changed by adding or removing a matter, and (ii) the details in a warrant that are required by section 115 of the Act may be changed by adding, varying or removing details such as names or descriptions. A change to a warrant that does not affect the conduct authorised or required by it is not a modification and the modification provisions do not apply to such a change.¹⁴⁷ An example of this would be to correct the spelling of a person's name.

¹⁴³ See section 117(10).

¹⁴⁴ See section 117(9).

¹⁴⁵ See section 127 (service of warrants) and section 128 (duty of telecommunications operators to assist with implementation).

¹⁴⁶ In some cases only the part of the warrant that is relevant to the particular telecommunications operator or other person will have been served. In that case, only the corresponding part of the renewal instrument should be served.

¹⁴⁷ See section 118(5) in respect of warrants issued by the Secretary of State or Scottish Ministers, and section 123(11) in respect of warrants issued by law enforcement chiefs.

- 5.110 Sections 118 to 124 of the Act make provision for modifications of targeted warrants issued under Part 5. Section 118 to 122 concern warrants issued by the Secretary of State or Scottish Ministers, including by whom modifications may be made, the grounds on which they may be made, and the circumstances in which the approval of a Judicial Commissioner is required. Section 123 and section 124 are concerned with the modification of warrants issued by law enforcement chiefs. This section should be read in conjunction with the sections in this code on the subject-matter of targeted warrants.
- 5.111 An equipment interference warrant may require modification for a number of reasons including a change in circumstances or where new information becomes available that was not known previously. The modifications that may be made are:
- adding or removing matters to which the warrant relates;¹⁴⁸
 - adding to, varying or removing any name or description to the names or descriptions included in the warrant.¹⁴⁹ Such a modification cannot be made to a warrant which relates to a targeted subject (i.e. that relates to a particular person, organisation or location);¹⁵⁰
 - adding to, varying or removing descriptions of types of equipment.¹⁵¹
- 5.112 Three examples are provided below – the first would not be permitted, but the second and third would be:

Example 1 - a modification that would not be permitted: An equipment interference authority obtains a targeted equipment interference warrant relating to equipment associated with a specific serious criminal known as 'Person X'. The warrant authorises interference with equipment belonging to 'Mr. X'. The investigation progresses and the equipment interference authority wants to interfere with the equipment of one of 'Person X's' associates. This would require a new warrant – the warrant against 'Person. X cannot be modified so it is against an additional person because the subject-matter of the warrant is equipment belonging to a particular person (e.g. per section 101(1)(a)).

¹⁴⁸ See section 118(2)(a) and (b) in respect of warrants issued by the Secretary of State or Scottish Ministers, and the corresponding provisions in section 123 in respect of warrants issued by law enforcement chiefs.

¹⁴⁹ See section 118(2)(c) and (d) in respect of warrants issued by the Secretary of State or Scottish Ministers, and the corresponding provisions in section 123 in respect of warrants issued by law enforcement chiefs.

¹⁵⁰ See section 118(3) in respect of warrants issued by the Secretary of State or Scottish Ministers, and section 123(3) in respect of warrants issued by law enforcement chiefs.

¹⁵¹ See section 118(2)(e) and (f) in respect of warrants issued by the Secretary of State or Scottish Ministers, and the corresponding provisions in section 123 in respect of warrants issued by law enforcement chiefs.

Example 2 - a modification that would be permitted: An equipment interference authority obtains a targeted thematic equipment interference warrant as part of a single investigation relating to a serious criminal known as 'Person X' and associates 'Person Y' and 'Person Z' are known associates of Person X and are of interest to the investigation. The warrant authorises interference with equipment used by Person X, Person Y and Person Z, investigated under Operation "NAME". The investigation progresses and the equipment interference authority wants to interfere with the equipment of another one of Person X's associates 'Person A'. This warrant could be modified to add Person A and the equipment used by 'Person A', subject to the modification provisions of the Act.

Example 3 - a modification to add a new subject matter but still stay within the scope of the original warrant: An equipment interference authority obtains a thematic targeted equipment interference warrant relating to equipment associated with a specific malware attack against UK critical national infrastructure. Initially the subject-matter of the warrant is defined as section 101(1)(e) – equipment in more than one location, where the interference is for the purpose of a single investigation or operation. Data subsequently obtained indicates that the same equipment is being used for stealing high financial value commercial secrets from a financial institution. In order to investigate this additional criminality, the warrant could be modified to include a new subject-matter section, 101(1)(b) – equipment belonging to, used by, or in the possession of a group of persons who share a common purpose or who carry on, or may carry on, a particular activity. The same devices are targeted and the same conduct is used to obtain the data for both the malware attack and the theft, so the scope of the warrant stays the same.

5.113 The requirement to modify a thematic warrant varies depending upon the modification that is being sought and how the matter details are named or described in the warrant. For more information refer to paragraph 5.25.

5.114

Modification of warrants issued by the Secretary of State or Scottish Ministers

5.115 In the case of a warrants issued by the Secretary of State or Scottish Ministers,¹⁵² a modification may be made by the following persons in circumstances where that person considers that the modification is necessary on any relevant grounds:¹⁵³

- in the case of a warrant issued by the Secretary of State, the Secretary of State;

¹⁵² See sections 102 to 104.

¹⁵³ See section 119 (person who may make modifications under section 118).

- in the case of a warrant issued by the Scottish Ministers, a member of the Scottish Government;
- in both cases, a senior official acting on behalf of the Secretary of State or (as the case may be) the Scottish Ministers.

- 5.116 Where a modification of a warrant is made by a senior official, the Secretary of State or (in the case of a warrant issued by the Scottish Minister) is not required to be notified, where any subject matter, name, or description is removed from a targeted equipment interference warrant.¹⁵⁴
- 5.117 Section 119(1) makes clear that, otherwise than in urgent cases,¹⁵⁵ where the Secretary of State has issued a warrant, only Secretary of State (or an official acting on their behalf) may make any subsequent modification. This is the case regardless of whether the subsequent activity requiring modification of the warrant takes place inside or outside of England and Wales. This is also true for where a Scottish Minister issued the warrant.
- 5.118 For example, if a Scottish Minister has issued an equipment interference warrant under Section 103 but the requesting agency subsequently requires an amendment to the warrant to authorise equipment interference activity in England or Wales, the warrant must be modified by the Scottish Minister (or an official acting on their behalf) because it is a Scottish Minister who issued it. The same is true for the reverse scenario for a warrant that was issued by the Secretary of State authorising equipment interference in England and Wales, but if the warrant subsequently needs to be modified to authorise such activity in Scotland, the modification would need to be made by the Secretary of State.
- 5.119 Section 121 provides that, a Judicial Commissioner must be notified of the modification and the reason for making it, as soon as is reasonably practicable after a person makes a modification to a warrant under section 118. This does not apply if:
- the modification is an urgent modification made under section 119(2) (where different notification provisions are provided for, detailed below at paragraph 5.95);¹⁵⁶
 - judicial approval is required to carry out the modification by virtue of sections 111 to 114; or
 - the modification is to remove (as opposed to add or vary) any matter, name or descriptions included in the warrant.

¹⁵⁴ See section 121 (notification of modifications).

¹⁵⁵ As to which, see section 119(2).

¹⁵⁶ See also section 122 (approval of modification under section 118 made in urgent cases) which applies to all urgent modifications made under section 119(2) and to urgent modifications to which the additional safeguards in section 112, 113 or 114 apply; modifications to which the safeguards in section 111 cannot be made on an urgent basis – see section 120(4).

Modification of warrants issued by a law enforcement chief

- 5.120 In the case of warrants issued by a law enforcement chief or delegate,¹⁵⁷ section 123 provides that a modification may be made only by the following persons:
- a law enforcement chief; or
 - if the warrant was issued by an appropriate delegate, by that person.
- 5.121 A modification may only be made if the person making it considers that the modification is necessary on any relevant grounds and the conduct authorised by it is proportionate to what is sought to be achieved by it.¹⁵⁸ This does not apply to modifications to remove (as opposed to add or vary) any matter, name or description.
- 5.122 The modification must be approved by a Judicial Commissioner before it is made, unless:
- it is a modification to remove (as opposed to add or vary) any subject matter, name or description, or
 - where the person making the modification considers that there was an urgent need to make it (wherein different modification provisions are provided for, detailed below at paragraph 5.123).

Urgent modification of targeted warrants

- 5.123 Section 122 makes provision for urgent modifications of warrants issued by the Secretary of State or the Scottish Ministers. Section 124 makes provision for urgent modification of warrants issued by law enforcement chiefs.
- 5.124 A modification will only be considered urgent if there is a very limited window of opportunity to act. For example, this may include a threat to life situation, where a kidnap has taken place, in the immediate aftermath of a major terrorist incident or where intelligence has been received that a significant quantity of drugs is about to enter the country and where the activity required is not authorised by the existing equipment interference warrant.

¹⁵⁷ See section 106.

¹⁵⁸ Section 123(4) and section 123(5) as to “relevant grounds”.

- 5.125 For warrants issued to the intelligence services or to the Chief of Defence Intelligence, a person holding a senior position in the equipment interference authority may make an urgent modification.¹⁵⁹ That decision must be approved within three working days by a designated senior official on behalf of the Secretary of State or the Scottish Ministers.¹⁶⁰ A Judicial Commissioner must be notified as soon as is reasonably practicable after the senior official makes the decision and the Secretary of State or member of Scottish Government will also be notified personally.
- 5.126 In the event that the senior official refuses to approve the urgent modification, the activity conducted under the urgent modification up to that point remains lawful. The senior official in the warrant granting department may authorise further interference, but only in the interest of ensuring that anything being done is stopped as soon as possible (further detail is provided in paragraph 5.97 onwards).¹⁶¹ The Secretary of State or Scottish Minister where appropriate must be informed of any additional interference that has been authorised.¹⁶²
- 5.127 For warrants issued to law enforcement agencies, the relevant law enforcement chief or an appropriate delegate may make an urgent modification to a targeted equipment interference warrant. The decision to make the modification must then be approved by a Judicial Commissioner within three working days.¹⁶³
- 5.128 In the event that the Judicial Commissioner does not approve the decision, the activity conducted under the urgent modification remains lawful. In such circumstances the Judicial Commissioner may authorise further interference, but only in the interest of ensuring that anything being done by virtue of the modification is stopped as soon as possible (further detail is provided in paragraph 5.97 onwards).¹⁶⁴ Where a Judicial Commissioner refuses to approve the urgent modification, that decision cannot be referred to the Investigatory Powers Commissioner.

Warrants and modifications ceasing to have effect and authorisation of further interference

- 5.129 Where a decision to issue an urgent warrant or to make an urgent modification is not approved, the equipment interference authority must, so far as is reasonably practicable, secure that anything in the process of being done under the warrant or modification stops as soon as possible.¹⁶⁵

¹⁵⁹ Section 119(2); see subsection (4) for the meaning of “a person holding a senior position”.

¹⁶⁰ Subsection (3) to (5) of section 122.

¹⁶¹ Section 122(8).

¹⁶² Section 122(9).

¹⁶³ Section 124(3).

¹⁶⁴ Section 124(5) and (6).

¹⁶⁵ In respect of urgent warrants, see section 110(2); in respect of urgent modifications, see section 122(7) or 124(4) as the case may be.

- 5.130 Where any such action cannot be stopped without further interference, the Act permits the person who refused to approve the urgent warrant or modification to authorise further interference for the purpose of enabling the person to whom the warrant was addressed to secure that anything in the process of being done under the warrant, or modification, stops as soon as possible.¹⁶⁶
- 5.131 In order to seek authorisation for further interference the equipment interference authority may make representations to the person who refused to approve the urgent warrant or modification.
- 5.132 When considering whether to authorise further interference the person who refused to approve the urgent warrant or modification should consider whether further interference will result in an overall reduction to the amount of intrusion into privacy. They may consider how long further interference should be permitted for and exactly what interference is to be permitted.
- 5.133 If the person who refused to approve the urgent warrant or modification determines that further interference is appropriate, they should communicate their decision to the equipment interference authority in writing, setting out exactly what further interference the authority is authorised to undertake, for how long it is able to carry out the further interference and under what circumstances the further interference should cease. The written authorisation will make lawful any further interference conducted by the agency in accordance with that authorisation. There are no provisions for extending, modifying or renewing authorisations of further interference. A record of any further interference carried out in reliance on the written authorisation should be kept by the equipment interference authority.

Example 1: An equipment interference authority has sought an urgent targeted equipment interference warrant in order to install a piece of software on a suspected terrorist's mobile phone. The person issuing the warrant authorises the urgent warrant, so the equipment interference authority begins the operation. Two working days later the Judicial Commissioner considers the urgent warrant application and determines that they will not approve the decision to issue the warrant. The activity being carried out must cease as soon as is reasonably practicable, but the equipment interference authority are unable to remove the software without further interference. In the interest of minimising ongoing interference with privacy arising from the presence of the software on the individual's device, the Judicial Commissioner may make lawful such further interference as is necessary to remove the software in accordance with the provisions of the Act and code.

¹⁶⁶ In respect of urgent warrants, see section 110(3); in respect of urgent modifications, see section 122(8) or 124(5) as the case may be.

- 5.134 Any further interference authorised in this way must not equate to activity authorised by an equipment interference warrant as defined in section 99(2) of the Act in that the main purpose of the interference being considered must not be to obtain communications, equipment data or other information. However, if the obtaining of communications, equipment data or other information is necessary for the purpose of securing that anything in the process of being done under the warrant or modification stops as soon as possible, then that conduct can be authorised as the obtaining of such material is necessary in order to fulfil the intended purpose of the further interference. The Judicial Commissioner, Secretary of State, Scottish Minister where appropriate or senior official may dictate whether such information is destroyed and may impose conditions on its use.

Example 2: The equipment interference authority in 'Example 1' has been authorised to proceed with further interference in order to remove software from a mobile phone. The equipment interference authority explained to the Judicial Commissioner that in order to remove the software they would inevitably receive a small amount of equipment data from the mobile phone. As the purpose of the interference is to remove the software, and not to gather new intelligence, the further interference was correctly authorised without the need for a new equipment interference warrant.

- 5.135 Where a Judicial Commissioner refuses to approve an urgent warrant they may direct that any of the material obtained under the warrant is destroyed and may impose conditions as to the use or retention of any of that material.¹⁶⁷ The equipment interference authority and the person who issued the warrant may make representations to the Judicial Commissioner which the Judicial Commissioner must consider before making a direction for destruction or imposing conditions on use or retention.¹⁶⁸ The person who issued the warrant may refer the Judicial Commissioner's decision to the Investigatory Powers Commissioner.¹⁶⁹

Warrant cancellation

- 5.136 A warrant may be cancelled at any time by the person who issued it or, in the case of a warrant issued by the Secretary of State or the Scottish Ministers, by a senior official acting on their behalf.
- 5.137 A warrant must be cancelled if it is no longer necessary on any relevant grounds, or the conduct authorised by the warrant is no longer proportionate to what is sought to be achieved by it. Equipment interference authorities therefore will need to keep their warrants under review and must notify the person who issued the warrant if the equipment interference authority assesses that the warrant is no longer necessary or proportionate.

¹⁶⁷ See section 110(3).

¹⁶⁸ Section 110(5) and (6).

¹⁶⁹ Section 110(7).

- 5.138 In practice, in the case of the intelligence services and the Ministry of Defence (Defence Intelligence), the power to cancel a warrant will be normally exercised by a senior official in the warrant granting department on behalf of the Secretary of State. The equipment interference authority should take steps to cease the interference as quickly as possible if they consider that the warrant is no longer necessary or proportionate – they should not wait until the necessary cancellation instrument has been signed.
- 5.139 In the case of law enforcement, a law enforcement chief may cancel any warrant, including a warrant issued by an appropriate delegate. However, an appropriate delegate is not able to cancel a warrant issued by a law enforcement chief or by another delegate. If the duty to cancel a warrant is engaged but it is not reasonably practicable for the law enforcement chief immediately to cancel it, the appropriate delegate must take steps to ensure that any interference ceases pending formal cancellation of the warrant by the law enforcement chief.
- 5.140 The Act requires the person to whom a warrant is addressed to ensure that anything in the process of being done under the warrant stops as soon as possible upon cancellation, so far as is reasonably practicable.¹⁷⁰ Typically a warrant will authorise the removal of any means of interference together with any conduct required to cease all elements of the interference. In such circumstances, it will not be appropriate to cancel the warrant until all authorised conduct has ceased as long as the activity continues to be necessary and proportionate.

Example: A targeted equipment interference warrant authorised an equipment interference authority to place a piece of software on a known terrorist's device for the purpose of obtaining communications and other information about plans to attack the UK. The equipment interference authority subsequently notices a change in the use of the device and believe that no further relevant material is on the device. Before cancelling the warrant, the equipment interference authority carry out further interference on the device to remove the software to limit interference.

- 5.141 The cancellation instrument should be addressed to the person to whom the warrant was issued and should include the reference number of the warrant. A copy of the cancellation instrument should be sent to everyone on whom the warrant was served since it was issued or last renewed, unless there is no activity required to be undertaken which would need to be ceased upon notification of cancellation, or unless that person has agreed that they may be notified of the cancellation without a cancellation instrument being sent.

Combined warrants

- 5.142 Schedule 8 to the Act provides for combined warrants and sets out the various combinations, who may apply for them, and who may issue them. Part 4 of the Schedule sets out the relevant procedural requirements in each case.

¹⁷⁰ Section 125(5).

- 5.143 Combining warrant applications is not mandatory, but provides the option for grouping warrant and authorisation for the same investigation/operation together so that the issuing authority and Judicial Commissioner can consider the full range of actions that may be undertaken in relation to the investigation. It allows a more informed decision about the necessity and proportionality of the totality of the action being undertaken and may be more efficient for the equipment interference authority applying for the warrant as it reduces duplication of identical information across warrant applications. Any application for a combined warrant or authorisation must include a statement that it is a combined application and must set out the warrants and authorisations it includes.

Example 1: An equipment interference authority wishes to conduct equipment interference to acquire private information from a computer and intercept an online video call in the course of its transmission. This activity constitutes both equipment interference and interception. The interception cannot be authorised as incidental conduct so a combined interception and equipment interference warrant, or separate authorisations must be obtained. A combined warrant may be issued by the Secretary of State or Scottish Minister where appropriate and approved by a Judicial Commissioner.

Example 2: An equipment interference authority wishes to conduct an operation which involves directed surveillance in order observe a subject's activity (provided for under Part II of RIPA) and targeted equipment interference in order to acquire the subject's communications. Under Schedule 8 the authority may wish to combine these applications. For a warrant issued to the head of an intelligence service the combined warrant would be issued by the Secretary of State and approved by a Judicial Commissioner. For a law enforcement agency, the relevant law enforcement chief would issue the combined warrant. This combined warrant would also require approval by a Judicial Commissioner.

- 5.144 Where an equipment interference authority wishes to conduct equipment interference, but not all of the proposed conduct can properly be authorised under an equipment interference warrant, additional warrants or authorisations will be required. The equipment interference authority may either obtain a combined warrant or may obtain separate warrants/authorisations.

Example 1: An equipment interference authority wishes to covertly enter residential premises to download material from a device within the premises. The obtaining of material from the device constitutes equipment interference. The sole purpose of the entry to the premises is to obtain communications, equipment data or other information from the device. There is no intention to search the premises for other physical evidence. This activity only requires a targeted equipment interference warrant as the intention is to download the device; the trespass is incidental to this and there is no intrusive surveillance other than that incidental to the authorised conduct. Even if it was necessary to search the premises to locate the device then the search would still fall as incidental conduct.

Example 2: An equipment interference authority wishes to covertly enter residential premises to search the property for evidence, and also to download material from any relevant devices within the property. The covert search of the premises for evidence constitutes property interference, and the obtaining of material from the devices constitutes equipment interference. The covert search of the property is an aim in itself aside from the location and interference with any relevant devices. The property interference is therefore not incidental to the equipment interference. These activities require a property warrant against the residential property, and a targeted equipment interference warrant to authorise the downloading of material from any relevant device within the property.

- 5.145 For combinations of warrants which include a Part 2 warrant, the authorisation process set out at paragraph 5.2 will apply. In some cases this will necessitate a higher authorisation process than individual warrant or authorisation applications. Where one of the constituent parts of a warrant or authorisation within a combined warrant is cancelled under the procedures set out at paragraphs 5.83 and 5.84, the remaining warrant(s) or authorisation(s) continues to be valid as long as it still meets the conditions relevant to the particular warrant or authorisation. For example, if conduct required for an operation was authorised by a combined interception warrant with a property interference authorisation and the property interference was no longer necessary and proportionate, the property interference authorisation must be cancelled and but the interception warrant would remain in place, for the remaining period to cover the interception as long as it is still necessary and proportionate. Where the warrant application is being renewed (as a three month renewal) and there is only one part of the combined warrant left, it can still be renewed as a combined warrant. Combined warrants may also be applied for on an urgent basis.
- 5.146 Where one of the constituent parts of the warrant or authorisation within a combined warrant is cancelled under the procedures set out at paragraph 5.104, the remaining warrant(s) or authorisation(s) continues to be valid as long as it still meets the conditions relevant to the particular warrant or authorisation. For example, if conduct required for an operation was authorised by a combined equipment interference with a property interference authorisation, and the property interference was subsequently considered no longer necessary and proportionate, the property interference authorisation element of the combined warrant must be cancelled but the equipment interference warrant element would remain in place to cover the equipment interference as long as it is still necessary and proportionate.
- 5.147 Combined warrants may also be applied for on an urgent basis.

- 5.148 Where warrants of different durations are combined, the normal rule is that the shortest duration applies.¹⁷¹ An exception to this is for combined warrant issued on the application of the head of an intelligence service, and with the approval of a Judicial Commissioner, which includes an authorisation for directed surveillance – in this case, the duration of the warrant is six months.
- 5.149 The requirements that must be met before a warrant can be issued apply to each part of a combined warrant. So, for example, where a combined warrant includes a targeted equipment interference warrant, all the requirements that would have to be met for a targeted equipment interference warrant to be issued must be met by the combined warrant.
- 5.150 The duties imposed by section 2 (general duties in relation to privacy) apply to combined warrants as appropriate. The considerations that apply when deciding whether to issue, renew, cancel or modify a targeted equipment interference warrant will apply when such a warrant forms part of a combined warrant. So the targeted equipment interference element of a combined warrant cannot be issued without having regard to privacy in accordance with section 2.
- 5.151 Paragraph 30 of Schedule 8 provides that it is possible only to serve the part of a combined warrant that is an equipment interference warrant. For example, if a combined warrant included a targeted equipment interference warrant and an authorisation for directed surveillance, and the targeted equipment interference required the assistance of a third party to give effect to the warrant, it is possible to serve just the part of the warrant that relates to targeted equipment interference on that third party, without serving the other authorisation. Paragraph 20 of Schedule 8 provides that various rules regarding warrants apply separately to the relevant part of a combined warrant. The duty of operators to give effect to a warrant applies separately in relation to each part of a combined warrant. So, for example, section 128 (duty of telecommunications operators to assist with implementation) would apply to the targeted equipment interference part of a combined warrant but only to that part.
- 5.152 Similarly, safeguards also apply to individual parts of a combined warrant. For instance, where a combined targeted equipment interference and intrusive surveillance warrant has been issued, the safeguards that apply to a targeted equipment interference warrant apply to the part of the combined warrant that is a targeted equipment interference warrant. Section 132 (duty not to make unauthorised disclosures) and 134 (the offence of making unauthorised disclosures) apply to the targeted equipment interference part of a combined warrant.

¹⁷¹ See paragraph 27 of Schedule 8.

- 5.153 The exclusion of matters from legal proceedings (section 56) continues to apply to an interception warrant that is part of a combined warrant.¹⁷² However, when an equipment interference warrant is combined with an interception warrant the material derived from equipment interference may still in principle be used in legal proceedings if required. If material derived from equipment interference authorised by a combined warrant reveals the existence of an interception warrant the material is excluded from use in legal proceedings according to section 56 of the Act.
- 5.154 Should the exclusion from legal proceedings mean that there may be difficulties in disclosing any material obtained under a combined warrant that included an interception warrant, equipment interference authorities may wish to consider the possibility of seeking individual warrants instead.

Combined warrants available to the intelligence services

- 5.155 Paragraph 1 of Schedule 8 sets out that the Secretary of State may issue a warrant that combines a targeted interception warrant issued under section 19 with a targeted equipment interference warrant. Such warrants will only be available to agencies that can apply for equipment interference warrants and interception warrants.
- 5.156 Paragraph 8 of Schedule 8 sets out that the Secretary of State may issue a warrant that combines a targeted equipment interference warrant under section 102 with one or more of the following:
- a targeted examination warrant under section 19(2) or section 102(3);
 - a directed surveillance authorisation under section 28 of RIPA;
 - an intrusive surveillance authorisation under section 32 of RIPA;
 - a property interference warrant under section 5 of the 1994 Act.
- 5.157 Paragraph 4 of Schedule 8 sets out that a Scottish Minister may issue a warrant combining a targeted interception warrant under section 21 with a targeted equipment interference warrant and/or a targeted examination warrant under section 103.
- 5.158 Paragraph 10 of Schedule 8 sets out that a Scottish Minister may issue a warrant that combines a targeted equipment interference warrant under 103(1) with:
- A targeted examination warrant under section 103(2).
 - A targeted examination warrant under section 21(2).
 - A property interference warrant under section 5 of the 1994 Act.

¹⁷² See paragraph 31 of Schedule 8.

5.159 The Secretary of State's decision to issue a combined warrant requires the approval of a Judicial Commissioner in the same way as the decision to issue an equipment interference warrant. The double lock applies to combined warrants. However, where a warrant under section 5 of the Intelligence Services Act forms part of the combined warrant, paragraph 21(3) of Schedule 8 sets out that the Judicial Commissioner does not have the same role in relation to that part of the application.

Example: An intelligence service wishes to conduct an operation which involves property interference (provided for under section 5 of the Intelligence Services Act) and targeted equipment interference. Under Schedule 8 they may wish to combine these applications, so that the combined warrant is issued by the Secretary of State. In approving the decision to issue the warrant, the Judicial Commissioner would only consider the application for targeted equipment interference.

Combined warrants available to the Chief of Defence Intelligence

5.160 Paragraph 2 of Schedule 8 sets out that the Secretary of State may, on an application made by or on behalf of the Chief of Defence Intelligence, issue a warrant that combines a targeted interception warrant with a targeted equipment interference warrant.

5.161 Paragraph 9 of Schedule 8 sets out that the Secretary of State may, on an application made by or on behalf of the Chief of Defence Intelligence, issue a warrant that combines a targeted equipment interference warrant with one or more of the following:

- A directed surveillance authorisation under section 28 of RIPA.
- An intrusive surveillance authorisation under section 32 of RIPA.

Combined warrants available to relevant law enforcement agencies

5.162 Paragraph 11 of Schedule 8 sets out that the law enforcement chief may issue a warrant that combines a targeted equipment interference warrant with one or more of the following:

- a directed surveillance authorisation under section 28 of RIPA;
- an intrusive surveillance authorisation under section 32 of RIPA;
- a property interference authorisation under the 1997 Act.

5.163 The above considerations do not preclude equipment interference authorities from obtaining separate warrants where appropriate. This may be required in order to preserve sensitive techniques, or may be more efficient if other authorisations are already in place.

Example: An equipment interference authority is monitoring a subject under the authority of a directed surveillance authorisation. An opportunity is identified to conduct equipment interference on the subject's device. It is necessary to continue to monitor the subject to ensure the equipment interference can be conducted covertly and to minimise the risk of compromise. Provided this continued surveillance is authorised under the existing directed surveillance authorisation, a further surveillance authorisation would not be required and therefore a combined warrant is not likely to be appropriate and a separate equipment interference authorisation could be obtained.

Collaborative working

- 5.164 Any person applying for an equipment interference warrant should consider whether there are any relevant sensitivities in the local community where the interference is taking place which could impact on the deployment of equipment interference capabilities. Equipment interference authorities must also take reasonable steps to de-conflict (as relevant) with other relevant services or law enforcement agencies. Where a person applying for a warrant considers that conflicts might arise with another equipment interference authority, they should consult a senior colleague within the other equipment interference authority.
- 5.165 Where possible, equipment interference authorities should seek to avoid duplication of warrants as part of a single investigation or operation. For example, where two police forces are conducting equipment interference as part of a joint operation, only one warrant is required. Duplication of warrants does not affect the lawfulness of the activities to be conducted, but may create an unnecessary administrative burden.
- 5.166 Where a person or organisation outside of the public authority is acting under direction of an equipment interference authority, any activities they conduct which comprises equipment interference for the purposes of the Act should be considered for authorisation under the Act.
- 5.167 Any equipment interference warrant that specifically authorises the activity of multiple equipment interference authorities should specify any relevant restrictions on the sharing of information derived from the interference between such agencies.
- 5.168 Where an equipment interference authority requires an international partner– who is not therefore an equipment interference authority as defined by the Act – to undertake an action authorised by an equipment interference warrant, this must be specified within the warrant application, including why the assistance of an international partner is required. Once a warrant is issued, an equipment interference authority may work collaboratively with an international partner to carry out equipment interference in accordance with that warrant by virtue of section 99(5)(b) of the Act.

Collaborative working – law enforcement agencies

- 5.169 There are two further important considerations with regard to collaborative working relevant to law enforcement agencies:

- Applications for equipment interference warrants by police forces must only be made by a member or officer of the same force as the law enforcement chief responsible for issuing the warrant, unless the chief officers of the forces in question have made a collaboration agreement under the Police Act 1996 and the collaboration agreement permits applicants and law enforcement chiefs to be from different forces.
- Applications for equipment interference warrants by law enforcement agencies other than police forces must only be made by a member or officer of the same force or agency as the law enforcement chief responsible for issuing the warrant, regardless of which force or agency is to conduct the activity.

5.170 Without limiting the ability of equipment interference authorities to work collaboratively, as outlined above, applications for equipment interference warrants may only be issued to a member of the same law enforcement agency who made the application, except where specified law enforcement agencies have entered into a relevant collaboration agreement under the Police Act 1996 which permits this rule to be varied.¹⁷³

5.171 This exception only applies to police forces and the National Crime Agency where they are able to enter into collaboration agreements under the Police Act 1996. The collaboration agreement must permit the law enforcement chief of one collaborating law enforcement agency to issue a warrant to an applicant from another collaborating law enforcement agency.

5.172 Where, pursuant to a collaboration agreement, the Director General (or a Deputy Director General) of the National Crime Agency is the law enforcement chief for an application made by a member of a collaborative police force, the Director General may only issue the warrant if he considers there is a British Islands connection.¹⁷⁴ This reflects the general restriction that warrants should only be issued to police forces where there is a British Islands Connection (see further at paragraph 3.33).

5.173 In cases where one law enforcement agency is acting on behalf of another, the tasking agency should obtain the equipment interference warrant. For example, where equipment interference is carried out by a police force in support of NCA, the warrant would usually be sought by the NCA. Where the operational support of other agencies (in this example, the police) is foreseen, this should be reflected in the warrant application and specified in the warrant. However, where a law enforcement agency considers it would be more appropriate for another agency to obtain the warrant that other agency must obtain the equipment interference warrant. For example, where a police force considers that there is not sufficient resource available to ensure the protection of a sensitive technique, it may approach the NCA to obtain the warrant.

¹⁷³ For further details of the provisions in relation to collaboration agreements as they related to targeted equipment interference warrants, see Part 3 of Schedule 6.

¹⁷⁴ As set out in section 107(3).

5.174 When collaboration between equipment interference authorities is expected to be required for an operation from the outset the person applying for the warrant must name each authority in the warrant application. The application should set out why the involvement of each additional authority is required and to what extent they are intended to be involved in the proposed equipment interference. The warrant application should describe specifically the equipment interference that each individual authority is required to conduct. This does not prohibit an equipment interference authority working with other persons or organisations where such assistance was not foreseen.

6 Bulk equipment interference warrants

- 6.1 This Chapter is about bulk equipment interference warrants. These warrants are issued under Chapter 3 of Part 6 of the Act and may only be issued to the intelligence services. The main purpose of a bulk equipment interference warrant is the acquisition of overseas-related communications, equipment data and/or information.¹⁷⁵ This means that bulk equipment interference warrants cannot be issued with the primary purpose of obtaining communications between people in the British Islands, equipment data about those communications, or information about people in the British Islands.
- 6.2 A bulk equipment interference warrant authorises or requires the person to whom it is addressed to secure interference with equipment for the purpose of obtaining the communications, equipment data or other information described in the warrant. It may also authorise or require the selection for examination and/or disclosure of such material. A bulk equipment interference warrant must set out specified operational purposes (see also paragraph 6.21). No material may be selected for examination unless doing so is necessary for one or more of the operational purposes specified on the warrant.

Bulk equipment interference in practice

- 6.3 Bulk equipment interference warrants are described in section 176 of the Act. The power to issue a bulk equipment interference warrant is set out in section 178, including the grounds on which a warrant may be issued. The decision to issue a bulk equipment interference warrant must be taken by the Secretary of State personally and must be approved by a Judicial Commissioner.
- 6.4 The subsequent examination of any material collected under a bulk warrant is controlled by additional statutory access controls (e.g. operational purposes, necessity and proportionality tests). Further safeguards are applied to the examination of communications and private information of individuals within the British Islands – a separate targeted examination warrant, subject to the full “double-lock” authorisation process, is required to examine this material.
- 6.5 Bulk warrants will usually only be appropriate for large scale operations, and are only available for operations for the obtaining of overseas related communications, overseas-related information or overseas-related equipment data.

¹⁷⁵ Overseas-related communications, equipment data and information are defined in section 176 of the Act.

- 6.6 A bulk warrant is fundamentally different to a thematic warrant. A thematic warrant is a species of targeted warrant that is used in circumstances in which it is not possible exhaustively to identify at the time the warrant is issued all of the equipment in respect of which conduct is to be authorised. Instead the warrant is issued on the basis of a particular subject-matter and the warrant is then capable of being modified so that the equipment to which it relates may be added, varied or removed over time.
- 6.7 A bulk warrant is used in circumstances in which it is not possible to identify the equipment in question in order to target the equipment interference. Instead the warrant authorises the collection of data in a way that is less targeted than would be acceptable in the case of a thematic warrant, but from the data collected it will be possible to select for examination specific data of intelligence interest. The selection for examination of data within a bulk dataset is therefore subject to statutory safeguards, with the additional safeguard of a targeted examination warrant if the selection of data relating to a person in the British Islands is sought.
- 6.8 To determine whether a thematic or bulk warrant is appropriate, regard must be given in particular to whether the Secretary of State is able to foresee the extent of all of the interferences to a sufficient degree to properly and fully assess necessity and proportionality at the time of issuing the warrant. This includes consideration of interferences in relation to all those individuals affected, whether the intended target of the interference or those affected incidentally.
- 6.9 Where this can be done, usually due to the specific identity of the target being known in advance or a specific identifier relating to the target individuals' communications or devices, a thematic warrant is likely to be most appropriate. This is because the additional access controls of the bulk regime are not required if a greater degree of targeting, or the filtering or processing of data at or soon after the point of collection, can limit interference such that the Secretary of State and the Judicial Commissioner can adequately address all of those considerations (e.g. necessity and proportionality, purpose, protection for UK persons' content) from the outset.
- 6.10 The following example demonstrates the difference between thematic and bulk equipment interference:

Example: Intelligence suggests that a terrorist cell in a particular location in the Middle East is plotting an imminent bomb attack against UK interests in the region. Little is known about the individual members of the terrorist cell. However, it is known that a particular software package is commonly – but not exclusively – used by some terrorist groups. After using equipment interference to obtain equipment data from a large number of devices in the specified location, officers apply analytical techniques to the data, starting with a search term ('selector') related to the known software package, to find common factors that indicate a terrorist connection. A series of refined searches of this kind, using evolving factors that are uncovered during the course of the analytical process, gradually identify devices within the original 'pot' of data collected that belong to the terrorist cell. Their communications (including content) can then be retrieved and examined.

As the cell members can only be identified through a series of refined searches that cannot all be assessed in advance at the time the warrant is issued, second stage access controls are required to govern all of the data selection within the operation. Accordingly, a bulk equipment interference warrant is suitable.

The selection for examination of material obtained under a bulk equipment interference warrant

- 6.11 When issuing a bulk equipment interference warrant, the Secretary of State must be satisfied that examination of material obtained under the warrant is or may be necessary for each of the operational purposes specified in it. It is highly likely that a bulk equipment interference warrant will specify the full range of operational purposes (in accordance with section 183(6)); this is explained in more detail in the "Examination Safeguards" section of this Chapter.
- 6.12 In addition, other than in exceptional circumstances, it will always be necessary for all the operational purposes included in the central list of operational purposes maintained by the heads of the intelligence services to be specified in relation to the selection for examination of any material obtained under a bulk equipment interference warrant that is not protected material.
- 6.13 When an authorised person within the equipment interference authority selects material for examination, a record must be created that explains why that selection is necessary for one or more of the operational purposes specified on the warrant, and why it is proportionate. This process is subject to internal audit and external oversight by the Investigatory Powers Commissioner.
- 6.14 Where an authorised person wishes to select for examination protected material of a person in the British Islands obtained under a bulk equipment interference warrant, additional safeguards will apply and a separate application will need to be made for a targeted examination warrant (see also paragraph 5.44).

Format of warrant applications

6.15 An application for a bulk equipment interference warrant is made to the Secretary of State. As set out at section 178 of the Act, bulk equipment interference warrants are only available to the intelligence services. In this chapter, reference to an 'application' for a warrant includes the application form and the draft warrant (including the draft instrument and any draft schedules). An application for a bulk equipment interference warrant therefore may only be made by or on behalf of the following persons:

- the Director General of the Security Service;
- the Chief of SIS;
- the Director of GCHQ.

6.16 Bulk equipment interference warrants, when issued, are addressed to the person who submitted the application or on whose behalf it was submitted. A copy may then be served on any person who may be able to provide assistance in giving effect to that warrant.¹⁷⁶

6.17 Prior to submission, each application should be subject to a review within the intelligence service making the application. This involves scrutiny by more than one official, who will consider whether the warrant is necessary for one or more of the permitted statutory purposes (in the interests of national security, for the purpose of preventing or detecting serious crime or in the interests of the economic well-being of the United Kingdom so far as those interests are also relevant to the interests of national security). A bulk warrant must always be necessary in the interests of national security.¹⁷⁷ The scrutiny of the application will also include whether the equipment interference proposed is both necessary and proportionate and whether the examination of the material to be acquired is or may be necessary for each of the operational purposes specified.

6.18 Each application, a copy of which must be retained by the applicant, should contain the following information:

- background to the application;
- a general description of the equipment to be interfered with and the communications, information and equipment data that is to be (or may be) obtained;
- description of the conduct to be authorised, the main purpose of which must be the obtaining of overseas-related communications, overseas-related information or overseas-related equipment data, as well as any conduct it is expected will be

¹⁷⁶ See section 190 (implementation of warrants).

¹⁷⁷ See section 178(1)(b).

necessary to undertake in order to carry out what is authorised or required by the warrant;

- an assessment of the consequences (if any) and potential consequences of the conduct, including any risk of compromising the security of any equipment directly or indirectly involved with the interference and, in particular, whether this may enable further intrusion into privacy or impact on critical national infrastructure;
- the operational purposes for which the material obtained may be selected for examination and an explanation of why examination is or may be necessary for those operational purposes proposed in the warrant;
- consideration of whether material obtained under the warrant (excluding intelligence reports) may be made available to any other intelligence service or an international partner, where it is necessary and proportionate to do so;
- an explanation of why the conduct to be authorised is considered to be necessary for one or more of the statutory purposes, which must always include an explanation of why the equipment interference is necessary in the interests of national security;
- consideration of why the conduct to be authorised by the warrant is proportionate to what is sought to be achieved by that conduct, explaining why what is sought to be achieved by the warrant could not reasonably be achieved by other less intrusive means;
- an assurance that the material obtained under a warrant will be selected for examination only so far as it is necessary for one or more of the operational purposes specified on the warrant and that it meets the other requirements of section 193 of the Act;
- where an application is urgent, the supporting justification; and
- an assurance that all material will be kept for no longer than necessary and handled in accordance with the safeguards required by section 191 of the Act.

Authorisation of a bulk equipment interference warrant

- 6.19 A bulk equipment interference warrant may only be issued if the Secretary of State considers that the main purpose of the warrant is to obtain overseas-related communications, overseas-related information or overseas-related equipment data.

Necessity

- 6.20 Before a bulk equipment interference warrant can be issued, the Secretary of State must consider that the warrant is necessary for one or more of the statutory grounds, as at 178(1)(b) and (2). One of these statutory grounds must always be in the interests of national security. If the Secretary of State is not satisfied that the warrant is necessary in the interests of national security, then it cannot be issued.
- 6.21 Before a bulk equipment interference warrant can be issued, the Secretary of State must also consider each of the specified operational purposes is a purpose for which the examination of material obtained under the warrant is or may be necessary, and that the examination of material for which each such purpose is necessary on any of the grounds on which the Secretary of State considers the warrant to be necessary.¹⁷⁸
- 6.22 Setting out the operational purposes on the face of the warrant limits the purposes for which material collected under the warrant can be selected for examination. For example, if a bulk equipment interference warrant is issued in the interests of national security and for the purpose of preventing or detecting serious crime, the selection for examination for each specified operational purpose on that warrant must be necessary for one or both of these two broader grounds. In cases where it is necessary and proportionate for material obtained under the warrant to be made available to another of the intelligence services or an international partner, the operational purposes specified in the warrant may include operational purposes relating to that third party providing the tests in section 178(1)(d) are met.
- 6.23 The Secretary of State has a duty to ensure that satisfactory arrangements are in force for ensuring compliance with the statutory safeguards concerning retention, examination and disclosure (including disclosure overseas). These safeguards must secure that only material which it has been considered necessary to examine for one or more purposes of the warrant, and which meets the conditions set out in section 193, is in fact selected for examination.

Proportionality

- 6.24 In addition to the consideration of necessity, the Secretary of State must be satisfied that the conduct authorised by the warrant is proportionate to what is sought to be achieved by that conduct.
- 6.25 In considering whether a bulk equipment interference warrant is necessary and proportionate, the Secretary of State must take into account whether what is sought to be achieved under the warrant could reasonably be achieved by other less intrusive means.¹⁷⁹

¹⁷⁸ see section 178(1)(d).

¹⁷⁹ See the general duty in relation to privacy in section 2, in particular section 2(2).

Safeguards

- 6.26 Before deciding to issue a warrant, the Secretary of State must consider that satisfactory arrangements are in force in relation to the warrant, covering the copying, disclosure and retention of material obtained under a warrant. These safeguards are explained in Chapter 9 of this code. The Investigatory Powers Commissioner is under a duty to review the adequacy of those arrangements.

Authorisation of a bulk equipment interference warrant: senior officials

- 6.27 As with targeted equipment interference warrants issued by the Secretary of State, the Act requires decisions to issue bulk equipment interference warrants to be taken personally by the Secretary of State.¹⁸⁰ However, and as with targeted warrants, the Act provides for a designated senior official to sign a bulk equipment interference warrant if it is not reasonably practicable for the Secretary of State to do so. Typically this scenario will arise where the appropriate Secretary of State is not physically available to sign the warrant because, for example, they are on a visit or in their constituency. The Secretary of State must still personally and expressly authorise the issue of the warrant.
- 6.28 When seeking authorisation, the senior official must explain the case, either in writing or orally, to the Secretary of State and this explanation should include considerations of necessity and proportionality and should cover all the information that would be included on an application form as set out at paragraph 5.34-9. Where the case is being explained orally, the senior official must keep a written record of the conversation. Once the issue of the warrant has been authorised the warrant must be signed by a senior official. If the Secretary of State refuses to authorise the issuing of the warrant, the warrant must not be issued.
- 6.29 When a warrant is signed by a senior official the warrant instrument must contain a statement to that effect.¹⁸¹ Except in urgent cases the decision to issue the warrant must then be approved by a Judicial Commissioner before the warrant is issued.

Judicial Commissioner Approval

- 6.30 The normal rule is that, the Secretary of State's decision to issue a bulk equipment interference warrant must be approved by a Judicial Commissioner before it can be issued.

¹⁸⁰ Section 182 (decisions to issue warrants to be taken personally by Secretary of State).

¹⁸¹ See section 182(4).

- 6.31 The Judicial Commissioner will have access to the same application for the warrant as the Secretary of State (details of what should be included in a warrant application can be found at paragraph 6.48 for a bulk equipment interference warrant). Section 179 of the Act sets out the test that a Judicial Commissioner must apply when considering whether to approve the decision. The Judicial Commissioner will review the Secretary of State's conclusion as to whether the warrant is necessary and whether the conduct it authorises is proportionate to what is sought to be achieved. The Judicial Commissioner will also review the Secretary of State's conclusions as to whether each of the operational purposes specified on the warrant is a purpose for which selection is or may be necessary.
- 6.32 In reviewing these conclusions, the Judicial Commissioner will apply the same principles as would apply on an application for judicial review. The Judicial Commissioner must review the conclusions with a sufficient degree of care as to ensure that the Judicial Commissioner complies with the duties imposed by section 2 (general duties in relation to privacy).
- 6.33 In accordance with the investigation and information gathering powers at section 235(2) of the Act, there is an obligation on the intelligence service and warrant granting department to provide the Judicial Commissioner with information if the Commissioner seeks clarification in relation to a warrant application. Where a Judicial Commissioner is seeking additional information this should be sought via the warrant granting department in order to determine whether the requested information would also need to be considered by the person who issued the warrant.
- 6.34 If the Judicial Commissioner refuses to approve the decision to issue a warrant the Judicial Commissioner must provide written reasons for doing so. The Secretary of State may either:
- accept the decision and therefore not issue the warrant; or
 - refer the matter to the Investigatory Powers Commissioner for a decision (unless the Investigatory Powers Commissioner has made the original decision). An urgent warrant which is not approved by a Judicial Commissioner cannot be appealed to the Investigatory Powers Commissioner.
- 6.35 If the Investigatory Powers Commissioner refuses to approve the decision to issue a warrant the Secretary of State must not issue the warrant. There is no further avenue of appeal available in the Act.

Urgent authorisation of bulk equipment interference warrants

- 6.36 The Act makes provision for cases in which there is an urgent need to issue a bulk equipment interference warrant. Urgency is determined by whether it would be reasonably practicable to seek the Judicial Commissioner's approval to issue the warrant in the time available to meet an operational or investigative need. Accordingly, urgent warrants can authorise bulk equipment interference to take place when issued and without prior approval from a Judicial Commissioner.
- 6.37 Urgent warrants should fall into at least one of the following categories:
- imminent threat to life or serious harm – for example, if a terrorist attack is imminent which could be prevented or mitigated using bulk equipment interference;
 - an intelligence gathering or investigative opportunity with limited time to act – for example, a terrorist group are known to be operating from a certain region, but are likely to relocate imminently.
- 6.38 The decision by the Secretary of State to issue an urgent warrant must be reviewed by a Judicial Commissioner within three working days following the day of issue.¹⁸² In the case of warrants signed by a senior official, the Judicial Commissioner's review should be on the basis of a written record, including any contemporaneous notes, of any oral briefing (and any questioning or points raised by the Secretary of State) of the Secretary of State by a senior official.
- 6.39 If the Judicial Commissioner approves the Secretary of State's decision to issue the urgent warrant, and it is still considered necessary and proportionate by the warrant requesting agency, renewal of the urgent warrant may be sought. A warrant issued under the urgency procedure lasts for five working days following the day of issue unless renewed.¹⁸³ If it is renewed it expires after six months, in the same way as non-urgent bulk equipment interference warrants.
- 6.40 The diagram in Annex B illustrates the bulk equipment interference urgent authorisation process.

¹⁸² See section 180 (approval of warrants issued in urgent cases).

¹⁸³ See section 184(2)(a).

Warrants and modifications ceasing to have effect and authorisation of further interference

- 6.41 Where a decision to issue an urgent warrant or to make an urgent modification is not approved, the intelligence service must, so far as is reasonably practicable, secure that anything in the process of being done under the warrant or modification stops as soon as possible.¹⁸⁴
- 6.42 Where this is not possible, the Act permits the person who refused to approve the urgent bulk equipment interference warrant or modification to authorise further interference for the purpose of enabling the person to whom the warrant was addressed to secure that anything in the process of being done under the warrant, or modification, stops as soon as possible.
- 6.43 In order to seek authorisation for further interference the intelligence service may make representations to the person who refused to approve the urgent bulk equipment interference warrant or modification.
- 6.44 When considering whether to authorise further interference the person who refused to approve the urgent bulk equipment interference warrant or modification should consider whether further interference will result in an overall reduction to the amount of intrusion into privacy. They may consider how long further interference should be permitted for and exactly what interference is to be permitted.
- 6.45 If the person who refused to approve the urgent bulk equipment interference warrant or modification determines that further interference is appropriate, they should communicate their decision to the intelligence service in writing, setting out exactly what further interference the intelligence service is authorised to undertake, for how long the intelligence service is able to carry out the further interference and under what circumstances the further interference should cease. The written authorisation will make lawful any further interference conducted by the intelligence service in accordance with that authorisation. There are no provisions for extending, modifying or renewing authorisations of further interference. A record of any authorised further interference carried out in reliance on the written authorisation should be kept by the intelligence service in accordance with paragraph 9.9 of this code.

¹⁸⁴ In respect of urgent warrants, see section 181 (failure to approve warrant issued in urgent case); in respect of urgent major modifications, see section 188 (approval of major modifications made in urgent cases).

- 6.46 Any further interference authorised in this way must not equate to activity authorised by a bulk equipment interference warrant as defined in section 176(1) of the Act, in that the main purpose of the interference being considered must not be to obtain overseas-related communications, equipment data or other information. However, if the obtaining of such communications, equipment data or other information is necessary for the purpose of securing anything in the process of being done under the warrant or modification stops as soon as possible, then that conduct can be authorised as the obtaining of such material is necessary in order to fulfil the intended purpose of the interference. The Judicial Commissioner may dictate whether such information is destroyed and may impose conditions on its use.
- 6.47 Where a Judicial Commissioner refuses to approve an urgent warrant they may direct that any of the material obtained under the warrant is destroyed and may impose conditions as to the use or retention of any of that material. The intelligence service may make representations to the Judicial Commissioner which the Judicial Commissioner must consider before making a direction for destruction or imposing conditions on use or retention. The person who issued the warrant may refer the Judicial Commissioner's decision to the Investigatory Powers Commissioner.

Format of a bulk equipment interference warrant

- 6.48 A bulk equipment interference warrant will comprise a warrant instrument signed by the Secretary of State and may also include a schedule or set of schedules. Where relevant, a copy of the warrant may then be served on any person who may be required to provide assistance in giving effect to the warrant. The warrant will include the following:¹⁸⁵
- a statement that it is a bulk equipment interference warrant;
 - the person to whom it is addressed, which will be the head of the intelligence service by whom, or on whose behalf, the application was made;
 - a description of the conduct authorised by the warrant;
 - the operational purposes for which any material obtained under the warrant may be selected for examination;
 - the date the warrant was issued; and
 - the warrant reference number.

¹⁸⁵ See section 183 (requirements that must be met by warrants).

Duration of bulk equipment interference warrants

- 6.49 Bulk equipment interference warrants issued using the standard procedure are valid for an initial period of six months.¹⁸⁶ Warrants issued under the urgency procedure are valid for five working days following the date of issue unless renewed by the Secretary of State.
- 6.50 Upon renewal, all warrants are valid for a further period of six months. This period begins on the day after the day of which the warrant would have expired, had it not been renewed.
- 6.51 Where modifications to a bulk equipment interference warrant are made, the warrant expiry date remains unchanged.

Renewal of a bulk equipment interference warrant

- 6.52 The Secretary of State may, with the approval of a Judicial Commissioner, renew a bulk equipment interference warrant within the period of 30 days ending with the day at the end of which the warrant would otherwise cease to have effect (known as the “renewal period”).¹⁸⁷
- 6.53 Applications for renewals are made to the Secretary of State and must contain an update of the matters outlined in paragraph 6.18 above. The applicant must give an assessment of the value of the equipment interference activity to date and explain why it is considered that the interference continues to be necessary in the interests of national security as well as, where applicable, either or both of the purposes in section 178(2), and why it is considered that the conduct authorised by the warrant continues to be proportionate.
- 6.54 In deciding to renew a bulk equipment interference warrant, the Secretary of State must also consider that each of the specified operational purposes is a purpose for which the examination of material obtained under the warrant continues to be or may be necessary, and that the examination of material for which each such purpose continues to be necessary on any of the grounds on which the Secretary of State considers the warrant to be necessary.
- 6.55 In the case of a renewal of a bulk equipment interference warrant that has been modified so that it no longer authorises or requires the acquisition of material, it is not necessary for the Secretary of State to consider that the acquisition of such material continues to be necessary before making a decision to renew the warrant.

¹⁸⁶ Section 184 (duration of warrants).

¹⁸⁷ Section 185 (renewal of warrants).

- 6.56 Where the Secretary of State is satisfied that the warrant continues to meet the renewal conditions in section 185 of the Act, the Secretary of State may renew it. The renewed warrant is valid for six months from the day after the day at the end of which the warrant would have ceased to have effect if it had not been renewed. For example, where a warrant is due to expire on 1 January, and the Secretary of State and Judicial Commissioner are satisfied that it should be renewed, the renewed warrant will have effect from 2 January.
- 6.57 In those circumstances where the assistance of a telecommunications operator or other person has been sought, a copy of the warrant renewal instrument (or part of that instrument that is relevant to the particular telecommunications operator or other person) will be forwarded to all those on whom a copy of the original warrant instrument has been served, providing they are still actively providing assistance in giving effect to the warrant. A renewal instrument will include the reference number of the warrant or warrants being renewed under this single instrument.

Modification of a bulk equipment interference warrant

- 6.58 A bulk equipment interference warrant may be modified at any time by an instrument issued by the person permitted to do so under section 186 of the Act. The modifications that can be made to a bulk equipment interference warrant are either major modifications or minor modifications.
- 6.59 A major modification is a modification:
- to add, or vary any operational purpose specified on the warrant, for which material obtained under the warrant may be selected for examination; and
 - to add to or vary any part of the description of the conduct authorised by the warrant.
- 6.60 A minor modification is a modification:
- to remove any operational purpose specified on the warrant, for which material obtained under the warrant may be selected for examination; and
 - to remove any part of the description of the conduct authorised by the warrant.
- 6.61 In the case of **major modifications**, the modification must be made by a Secretary of State. The decision to modify must be approved by a Judicial Commissioner before the modification has effect (unless there is an urgent need to make it). The considerations set out in paragraphs 6.20 to 6.25 apply to a major modification as they do to the issuing of a new warrant.

- 6.62 The major modification process for bulk equipment interference warrants requires the same level of authorisation as an application for a new bulk equipment interference warrant. When applying to modify an existing warrant, both the person applying for the modification and Secretary of State should consider whether the requested modification to the warrant remains within the scope of the original warrant. If the modification is considered to be outside of the scope of the original warrant then a new warrant should be sought.
- 6.63 When it is not reasonably practicable for the Secretary of State to sign a major modification instrument the Act provides that a designated senior official may sign it on their behalf. Typically this scenario will arise where the Secretary of State is not physically available to sign the warrant because, for example, they are on a visit or in their constituency. The Secretary of State must still personally and expressly authorise the modification.
- 6.64 In circumstances where a modification is being made to add or vary an operational purpose, once the modification has come into force, the added or varied operational purpose may be used to select for examination any material obtained under the warrant, including material that was obtained prior to the addition or variation of the operational purpose.
- 6.65 In the case of **minor modifications**, the modification may be made by the Secretary of State or by a senior official acting on their behalf. If a minor modification is made by a senior official, the Secretary of State must be notified personally of the modification and the reasons for making it.
- 6.66 If at any time the Secretary of State, or a senior official acting on their behalf, considers that a specified operational purpose is no longer a purpose for which the examination of material obtained under the warrant is or may be necessary, they must modify the warrant to remove that operational purpose.
- 6.67 As to the removal of any part of the description of the conduct authorised by the warrant, there will be limited circumstances where it may no longer be necessary, or possible, to continue acquisition of material. In such circumstances, it may continue to be necessary and proportionate to select for examination the material already collected under that warrant. The Act therefore provides that a bulk equipment interference warrant can be modified such that it no longer authorises the acquisition of material but continues to authorise selection for examination of material already obtained under the warrant.
- 6.68 Such a modification is a **minor modification** and may be made by the Secretary of State or by a senior official acting on their behalf. In circumstances where such a modification is being made by a senior official, the Secretary of State must be notified personally of the modification and the reasons for making it.

- 6.69 In accordance with section 186(14) of the Act, an intelligence service is permitted to amend a warrant as long as such an amendment does not alter the conduct that is authorised by that warrant. An example of this would be to correct incorrect spelling.

Urgent modification of a bulk equipment interference warrant

- 6.70 In urgent cases a major modification can be made by a Secretary of State without the prior approval of a Judicial Commissioner. An example of an urgent case may be where a sudden terrorist incident requires the urgent selection for examination of the data already held for an operational purpose not listed on the warrant, or where a very limited window of opportunity to act requires a modification to the conduct authorised by the warrant.
- 6.71 Where a major modification is made in an urgent case, a statement of that fact must be included on the modifying instrument. The Secretary of State must personally and expressly authorise the modification and sign the modification instrument.
- 6.72 Where it is not reasonably practicable for the Secretary of State to sign then the modification instrument may be signed by a senior official. In such cases section 186 of the Act requires the modification instrument to contain a statement confirming that it was not reasonably practicable for the instrument to be signed by the Secretary of State, and that the Secretary of State has personally and expressly authorised the making of the modification.
- 6.73 A Judicial Commissioner must be informed that an urgent modification has been made and their approval sought.¹⁸⁸ The Judicial Commissioner must, before the end of the third working day after the day on which the modification was made, decide whether or not to approve the decision to make it. If the Judicial Commissioner refuses to approve the decision to make the modification, the modification will cease to have effect. The person to whom the warrant is addressed must secure that anything being done under the warrant by virtue of the modification stops as soon as possible. The refusal does not affect the lawfulness of anything done between the modification being made and the Judicial Commissioner reviewing and refusing the modification.
- 6.74 The Judicial Commissioner may approve further interference (see paragraph 6.52), but only in the interest of ensuring that anything being done by virtue of the modification is stopped as soon as possible.
- 6.75 Where a Judicial Commissioner refuses to approve the decision to make an urgent modification, the Secretary of State may not refer the case to the Investigatory Powers Commissioner.

¹⁸⁸ Section 188 (approval of major modifications made in urgent cases).

Warrant cancellation

- 6.76 Section 189 of the Act provides that the Secretary of State, or a senior official acting on their behalf, may cancel a bulk equipment interference warrant at any time.
- 6.77 A warrant must be cancelled if, at any time before its expiry date, the Secretary of State, or a senior official acting on their behalf, considers that any of the cancellation conditions set out in section 189(3) is met. There are three cancellation conditions:
- the warrant is no longer necessary in the interests of national security;
 - the conduct authorised by the warrant is no longer proportionate to what is sought to be achieved by it;
 - examination of material acquired under the warrant is no longer necessary for any of the operational purposes specified on the warrant.
- 6.78 Intelligence services will therefore need to keep their warrants under regular review and must notify the Secretary of State if they assess that any of the cancellation conditions apply. In practice, the power to cancel a warrant will be exercised by a senior official in the warrant granting department on behalf of the Secretary of State.
- 6.79 When a warrant is cancelled, the Act requires the person to whom a warrant is addressed to secure that anything in the process of being done under the warrant stops as soon as possible, so far as is reasonably practicable. They should not wait until the necessary cancellation instrument has been signed. Typically a warrant will authorise the removal of any means of interference to ensure that any further interference necessary to cease all elements of interference can be completed. In such circumstances it will not be appropriate to cancel the warrant until all authorised conduct has ceased as long as the activity continues to be necessary and proportionate.
- 6.80 The cancellation instrument will be addressed to the intelligence service to whom the warrant was issued. A copy of the cancellation instrument should be sent to everyone on whom the warrant was served since it was issued or last renewed, unless there is no activity required to be undertaken which would need to be ceased upon notification of cancellation, or unless that person has agreed that they may be notified of the cancellation without a cancellation instrument being sent.

Examination safeguards

Safeguards when selecting for examination material obtained under a bulk equipment interference warrant

- 6.81 Section 193 of the Act provides specific safeguards relating to the selection for examination of material acquired through a bulk equipment interference warrant. Further guidance on these safeguards is provided below.

- 6.82 Sections 193(1) and (2) make clear that selection for examination may only take place for one or more of the operational purposes that are specified on the warrant, in line with section 183 of the Act. Operational purposes limit the purposes for which data collected under the warrant can be selected for examination. As well as being necessary for one of the operational purposes, any selection for examination of material must be necessary and proportionate. Also, material selected for examination for an operational purpose can, where it is necessary and proportionate to do so, be disclosed, copied and retained on any relevant ground.
- 6.83 The intelligence services need to retain the operational agility to respond to developing and changing threats and the range of operational purposes that may need to be specified on a bulk warrant needs to reflect this. New operational purposes will be required over time. Section 183 of the Act makes clear that the heads of the intelligence services must maintain a central list of all of the operational purposes, separate to individual bulk warrants, which they consider are purposes for which material may be selected for examination. The maintenance of this list will ensure the agencies are able to assess and review all of the operational purposes that are, or could be, specified across the full range of their bulk warrants at a particular time to ensure these purposes remain up to date, relevant to the current threat picture and, where applicable, the intelligence priorities set by the National Security Council.
- 6.84 The central list of operational purposes will not be limited to operational purposes relevant to bulk equipment interference warrants. This list must provide a record of all of the operational purposes that are specified, or could be specified, on any bulk interception, bulk acquisition, bulk equipment interference or bulk personal dataset warrant and, as far as possible, the operational purposes specified on the list should be consistent across these capabilities. Some operational purposes on the central list will be consistent across all three services, although some purposes will be relevant to a particular intelligence service or two of the three, reflecting differences in their statutory functions.
- 6.85 Section 183 also makes clear that an operational purpose may not be specified on an individual bulk warrant unless it is a purpose that is specified on the central list maintained by the heads of the intelligence services. Before an operational purpose may be added to that list, it must be approved by the Secretary of State. In practice, the addition of one operational purpose to the list will often require the approval of more than one Secretary of State. For example, where an operational purpose is being added to the list that is likely to be specified on bulk warrants issued to each of the three intelligence services, that operational purpose will need to be approved by both the Home Secretary and Foreign Secretary.

- 6.86 Section 178 makes clear that the operational purposes specified on a bulk warrant must relate to one or more of the statutory purposes specified on that warrant. However, section 183 makes clear that it is not sufficient for any operational purpose simply to use the wording of one of the statutory grounds. The Secretary of State may not approve the addition of an operational purpose to the central list – and therefore to any bulk warrants – unless he or she is satisfied that the operational purpose is specified in a greater level of detail than the relevant statutory grounds. Operational purposes must describe a clear requirement and contain sufficient detail to satisfy the Secretary of State that material may only be selected for examination for specific reasons.
- 6.87 Section 186 of the Act provides for a bulk equipment interference warrant to be modified such that the operational purposes specified on it can be added to or varied. Such a modification is categorised as a major modification and must be made by the Secretary of State and approved by a Judicial Commissioner before the modification may take effect. In such circumstances, and as outlined above, the provisions at section 183 also require that the operational purpose must be approved by the Secretary of State for addition to the central list. If the Secretary of State does not approve the addition of the purpose to the list, the modification to the warrant (to add a new operational purpose) may not be made.
- 6.88 The Act therefore creates a strict approval process in circumstances where an intelligence agency identifies a new operational purpose, which the service considers needs to be added to a bulk warrant. The Secretary of State must agree that the operational purpose is a purpose for which selection for examination may take place, and that it is described in sufficient detail such that it should be added to the central list. In addition, the Secretary of State must consider that the addition of that purpose to the relevant bulk warrant is necessary, taking into account the particular circumstances of the case, before making the modification, and the decision to add the operational purpose must also be approved by a Judicial Commissioner.
- 6.89 In addition to the requirement that the central list of operational purposes be approved by the Secretary of State, section 183 makes clear that the list must also be reviewed on an annual basis by the Prime Minister and that it must be shared every three months with the Intelligence and Security Committee of Parliament.

- 6.90 Although bulk equipment interference warrants are authorised for the purpose of acquiring overseas-related communications, overseas-related equipment data, and/or overseas-related information, section 176(5) of the Act makes clear that a bulk equipment interference warrant can authorise the acquisition of material that is not overseas-related to the extent this is necessary in order to acquire the overseas-related data to which the warrant relates. Operational purposes specified on the central list maintained by the heads of the intelligence services – and on individual bulk equipment interference warrants – may therefore include purposes that enable the selection for examination of protected material or other data of individuals in the UK. The safeguards in section 193 of the Act ensure that where protected material is selected for examination by any criteria referable to an individual known to be in the British Islands at that time, a targeted examination warrant must be obtained under Part 5 of the Act authorising the selection for examination of that protected material (see also Chapter 5).¹⁸⁹
- 6.91 More than one operational purpose may be specified on a single bulk warrant; this may, where necessary, include all the operational purposes currently specified on the central list maintained by the heads of the security and intelligence services.
- 6.92 Other than exceptional circumstances, it will be necessary for every warrant application to require the full range of operational purposes to be specified in relation to the selection for examination of any material obtained under a bulk equipment interference warrant that is not protected material.
- 6.93 The analysis of bulk systems data and identifying data is the primary means by which the intelligence services are able to discover and assess threats to the UK. This can only be achieved effectively through the aggregation of systems data and identifying data from a wide range of sources acquired under multiple bulk warrants. Such analysis allows the intelligence service to draw together fragments of information into coherent patterns, which allow for the identification of those threats while at the same time minimising intrusion into privacy.

¹⁸⁹ Where there is a change of circumstances such that a person whose communications' content is being selected for examination enters, or is discovered to be in the British Islands, sections 193(5) and (6) provide for a continuity arrangement.

- 6.94 No data may be selected for examination other than in accordance with the specified operational purposes. In general, automated systems should, where technically possible, be used to effect the selection for examination. A limited number of officials may also be permitted to access the system during the processes of filtering, processing and selection for examination, for example to check system health. Such access must itself be necessary on the grounds specified in sections 178(1)(b) and (2) and where such access involves selection for examination of communications, equipment data or other information it must be necessary for an operational purpose specified on the warrant. Intelligence service arrangements for such access will be kept under review by the Investigatory Powers Commissioner during his or her inspections.
- 6.95 Material obtained under a bulk equipment interference warrant should be selected for examination only by authorised persons who receive mandatory training regarding the provisions of the Act and specifically the operation of section 193 and the requirements of necessity and proportionality. These requirements and procedures must be set out in internal guidance provided to all authorised persons and the attention of all authorised persons must be specifically directed to the statutory safeguards. All authorised persons must be appropriately security cleared.
- 6.96 In addition, arrangements must be put in place to provide for the creation and retention of documentation (for the purposes of subsequent examination or audit) outlining why access to the material by authorised persons is necessary and proportionate and the applicable operational purposes. Systems should, to the extent possible, prevent access to the material unless such documentation has been created. The documentation must also record the reasons why any collateral intrusion into privacy is considered proportionate and any steps to minimise it. All documentation must be retained in accordance with agreed policy for the purposes of subsequent examination or audit.
- 6.97 Authorised persons may be granted access to systems containing material obtained under a bulk equipment interference warrant only for defined periods of time, after appropriate training, and where it is necessary for them to have access. Access may be renewed where these conditions continue to be met.
- 6.98 Periodic audits should be carried out to ensure that the requirements set out in section 193 of the Act are being met. These audits must include checks to ensure that the documentation justifying selection for examination has been correctly compiled, and in particular, that selection for examination of material was for an operational purpose for which the Secretary of State considered examination was necessary. Any mistakes or procedural deficiencies should be notified to management, and remedial measures undertaken. Any serious deficiencies should be brought to the attention of senior management and any breaches of safeguards must be reported to the Investigatory Powers Commissioner (please see paragraph 10.27).

- 6.99 The Secretary of State must ensure that the safeguards are in force before any interference under a bulk equipment interference warrant can begin. The Investigatory Powers Commissioner is under a duty to review the adequacy of the safeguards.
- 6.100 The Secretary of State and Prime Minister must approve any application to select for examination the communications or private information of a member of a relevant legislature obtained under a bulk equipment interference warrant.
- 6.101 The prior approval of the Prime Minister must also be obtained if an intelligence service intends to select for examination protected content relating to a member of a relevant legislature who is outside the British Islands at the time of the selection for examination. Such approval should only be obtained once the Secretary of State has approved such examination.

Selection for examination of protected material and the section 193(4) prohibition

- 6.102 Section 193(4) prohibits the selection of protected material for examination using criteria referable to an individual known to be in the British Islands for the purpose of identifying communications from or to that individual or information relating to them.
- 6.103 Protected material may nevertheless be selected for examination notwithstanding the prohibition if:
- a targeted examination warrant has been issued under Part 5 authorising the examination of the protected material; or
 - the selection for examination is authorised by section 193(5).
- 6.104 Section 193(5) addresses cases where there is a change of circumstances such that a person whose material is being selected for examination enters or is discovered to be in the British Islands, for example where a member of an international terrorist or organised crime group travels to the British Islands. To enable the selection for examination to continue, sections 193(5) and 193(6) of the Act provide for a senior official to give a written authorisation for the continued selection for examination of protected material relating to that person for a period of five working days. Any selection for examination after that point will require the issue of a targeted examination warrant, issued by the Secretary of State and approved by a Judicial Commissioner. Where selection for examination is undertaken in accordance with section 193(5), the Secretary of State must be notified.

Offence of breaching examination safeguards

- 6.105 Material obtained under a bulk equipment interference warrant may only be selected for examination in accordance with the safeguards in sections 193 and 194 of the Act. Section 196 of the Act makes it an offence for a person to deliberately select such material for examination in breach of these safeguards where that person knows or believes such selection does not comply with the safeguards.

7 Implementation of warrants and operator compliance

- 7.1 After a warrant has been issued, it will be forwarded to the person to whom it is addressed – i.e. the equipment interference authority which submitted the application.
- 7.2 Section 126 of the Act then allows equipment interference authorities to carry out authorised conduct, and/or to require the assistance of other persons in giving effect to the warrant.
- 7.3 Section 126(3) makes clear that the warrant may be served on any person, inside or outside the UK, who may be able to provide such assistance in relation to that warrant. The same process applies for bulk equipment interference warrants and is set out at section 190 of the Act.
- 7.4 Section 127 of the Act¹⁹⁰ provides that service of a copy of a warrant on a person outside the UK may (in addition to electronic or other means of service) be effected in any of the following ways:
- By serving it at the person's principal office within the UK or, if the person does not have an office in the UK, at any place in the UK where the person carries on business or conducts activities.
 - At an address in the UK specified by the person for service.
 - By making it available for inspection at a place in the UK (if neither of the above two methods, or any other means, are reasonably practicable). The equipment interference authority must take steps to bring the contents of the warrant to the attention of the relevant person.

Provision of reasonable assistance to give effect to a warrant

- 7.5 An equipment interference authority may work together with such persons that the authority requires to assist in giving effect to an equipment interference warrant. A warrant can only be served on a person who the equipment interference authority considers may be capable of providing the assistance required by the warrant. For the avoidance of doubt, in appropriate circumstances, this does not prevent equipment interference authorities and other persons working co-operatively together (without the need for service of a copy of an equipment interference warrant in accordance with section 127).

¹⁹⁰ By virtue of section 190 of the Act, section 127 (service of warrants) applies in relation to bulk equipment interference warrants as it applies in relation to targeted warrants.

- 7.6 Equipment interference authorities should endeavour to work co-operatively with persons providing assistance in giving effect to warrants, and should seek to implement warrants on a collaborative basis. Assistance sought will typically comprise (but may not be limited to) the provision of infrastructure by a relevant telecommunications operator, or details about the technical specification of relevant equipment.

Duty of telecommunication operators to assist with implementation

- 7.7 Where a copy of an equipment interference warrant has been served on anyone offering or providing a telecommunications service to a person in the UK, or who has control of, or provides a telecommunications system which is wholly or partly in the UK or controlled from the UK, that person is under a duty to take all such steps for giving effect to the warrant as are notified to the person by or on behalf of the equipment interference authority. This applies to any company offering or providing services to persons in the UK, irrespective of where the company is based. Section 128 sets out the means by which that duty may be enforced.
- 7.8 In the case of the intelligence agencies and the Ministry of Defence (Defence Intelligence), section 128 of the Act places an enforceable legal duty on operators served with a targeted equipment interference warrant, issued by the Secretary of State or the Scottish Ministers, to take all reasonably practicable steps for giving effect to the warrant as are notified to them. Section 128 also applies in respect of bulk equipment interference warrants by virtue of section 190(5).
- 7.9 In the case of law enforcement agencies, only those law enforcement agencies specified at section 128(3) of the Act, are able to apply for an equipment interference warrant which imposes a duty on operators to assist with implementation, namely – the NCA, His Majesty's Revenue and Customs, the Police Services of Scotland and Northern Ireland and the Metropolitan Police Service.
- 7.10 Where a telecommunications operator has been served with a targeted equipment interference warrant issued to one of these law enforcement agencies, they are required to take all such steps for giving effect to the warrant as were approved by the Secretary of State, (or Scottish Ministers where applicable), and as are notified to the operator by or on behalf of the law enforcement officer to whom the warrant is addressed. Section 128(2) and (4) ensures that the steps that operators are required to take are limited to those that the Secretary of State or Scottish Minister where appropriate has expressly approved as necessary and proportionate to what is sought to be achieved by them.

- 7.11 Where a law enforcement officer believes that it is necessary to impose a duty on a telecommunications operator to assist with the implementation of a warrant, they must seek the approval of the Secretary of State, or Scottish Minister where appropriate. The law enforcement officer should first follow the normal procedure of seeking approval from the relevant law enforcement chief. If the law enforcement chief agrees to issue the warrant, then approval should be sought from the Secretary of State, or Scottish Minister where appropriate for any elements of the activity that require assistance from operators. The Secretary of State, or Scottish Minister where appropriate will only consider the elements of the proposed activity that relate to the obligations to be placed on operators, however, the person applying for the warrant should consider whether the Secretary of State, or Scottish Minister where appropriate will require additional contextual information in order to make their determination. Approval from the Secretary of State, or Scottish Minister where appropriate should be sought prior to sending the warrant application to a Judicial Commissioner, to ensure that all the required elements of the operation can proceed before Judicial Commissioner approval for those steps is sought.
- 7.12 If the Secretary of State, or Scottish Minister where appropriate approves the steps relating to operators, the law enforcement chief should proceed to seek Judicial Commissioner approval as described in paragraph 5.60. Should the Secretary of State, or Scottish Minister where appropriate refuse to approve the relevant steps, the person applying for the warrant may need to withdraw the application and consider whether to submit a new application omitting the relevant steps. The Secretary of State, or Scottish Minister where appropriate may request additional information should they feel this is required in order to make their decision.
- 7.13 If it is determined that the assistance of an operator is required after a warrant has been issued, then the relevant law enforcement officer should seek approval for those steps from the Secretary of State, or Scottish Minister where appropriate before proceeding.
- 7.14 When requesting assistance that would involve employees of a telecommunications operator, the equipment interference authority and the Secretary of State, or Scottish Minister where appropriate should consider during the authorisation process:
- what measures should be taken by the equipment interference authority to best instruct and support any telecommunications operator employees required to assist with implementation; and
 - what measures should be taken to minimise any impact upon the telecommunications operator and their employees so far as is practicable.
- 7.15 In some cases equipment interference authorities may consider that the same material can be acquired either with assistance of a telecommunications operator or independently. The equipment interference authority and person issuing the warrant should consider the merits of either approach in the context of the specific operation. This should include the consideration of the criteria in paragraph **Error! Reference source not found.** of this code.

- 7.16 The steps which may be required by a telecommunications operator are limited to those which it is reasonably practicable to take (section 128(5)). A decision regarding what is reasonably practicable will depend on the particular circumstances of the case, recognising that what is reasonably practicable for one operator may not be for another. This decision will take into account any consultation between the telecommunications operator and the equipment interference authority. Such consultation is likely to include discussion of a number of factors including, but not limited to, the technical feasibility and likely cost of complying with any steps notified to the telecommunications operator. As part of the consultation the telecommunications operator may raise any other factor that they consider relevant to whether the taking of such steps is reasonably practicable. If no agreement can be reached it will be for the Secretary of State, to decide whether to proceed with civil proceedings.
- 7.17 A copy of the warrant must be served in such a way as to bring the contents of the warrant to the attention of the person or telecommunications operator who the equipment interference authority considers can provide assistance in relation to it. The equipment interference authority may provide the following to the person or telecommunications operator:
- a copy of the signed and dated warrant with the omission of any schedule contained in the warrant; and/or
 - a copy of one or more schedules contained in the warrant with the omission of the remainder of the warrant.
- 7.18 An optional covering document from the equipment interference authority (or the person acting on behalf of the equipment interference authority) may also be provided to notify the telecommunications operator of steps they are required to take to give effect to the warrant and specifying any other details as may be necessary. Contact details with respect to the equipment interference authority will either be provided in this covering document or will be made available in further guidance provided to all telecommunications operators who maintain a technical capability. The telecommunications operator should be provided with enough information to enable them to carry out authorised conduct in relation to their system(s) but will not necessarily be provided with all the information contained in the warrant.
- 7.19 Sections 99(5)(b) and 176(5)(b) of the Act make lawful any conduct undertaken by a person in pursuance of requirements imposed by or on behalf of a person to whom an equipment interference warrant is addressed. This therefore authorises activity taken by telecommunications operators in giving effect to a warrant that would otherwise constitute an offence under the CMA, Data Protection legislation or other relevant legislation.
- 7.20 Where assistance is required that but for sections 99(5) (b) or 176(5) (b) would constitute an offence, the equipment interference authority should consider ways in which the warrant can be executed so as to minimise such activity and the need to rely on section 99(5)(b) or 176(5)(b).

- 7.21 Section 237 provides that disclosures can be made to the Investigatory Powers Commissioner. This includes disclosures made by telecommunication operators who can contact the Commissioner at any time to request advice and guidance.
- 7.22 For guidance on the provision for telecommunications operators to be able to publish information in relation to the number of warrants they have given effect to, see paragraph 9.4.

Contribution of costs for giving effect to an equipment interference warrant

- 7.23 Section 249 of the Act recognises that telecommunications operators incur costs in complying with requirements in the Act, including equipment interference in response to requests under Part 5 and Chapter 3 of Part 6 of the Act. The Act, therefore, requires the Secretary of State to have in place arrangements to ensure that operators receive an appropriate contribution to these costs.
- 7.24 Public funding and support is made available to telecommunications operators to ensure that they can provide, outside of their normal business practices, an effective and efficient response to public authorities' necessary, proportionate and lawful requirements in support of their investigations and operations to protect the public and to bring to justice those who, for example, commit serious crime or are involved in acts of terrorism. The provision of public funding may be subject to terms and conditions determined by the Secretary of State.
- 7.25 It is legitimate for a telecommunications operator to seek contributions towards its costs which may include an element of funding towards those general business overheads required in order to facilitate the timely implementation of an equipment interference warrant. This is especially relevant for telecommunications operators that employ staff specifically to manage compliance with the requirements made under the Act, supported by bespoke systems. Further guidance with respect to cost recovery will be made available to all telecommunications operators who maintain an equipment interference capability.
- 7.26 Contributions may also be appropriate towards costs incurred by a telecommunications operator which needs to update its systems to maintain, or make more efficient, its processes. Similarly, contributions may be appropriate where the provision of new services will require investment in technology in order to comply with requirements for the interference.
- 7.27 Any telecommunications operator seeking to recover appropriate contributions towards its costs should make available to the Secretary of State such information as the Secretary of State requires in order to provide assurance that proposed cost recovery charges represent an appropriate contribution to the costs incurred by the telecommunications operator.

- 7.28 Any telecommunications operator that has claimed contributions towards costs may be required to undergo any audit that may be reasonably required before contributions are made. This is to ensure that expenditure has been incurred for the stated purpose. An audit may include visits to premises, the inspection of equipment, access to relevant personnel, and the examination of documents or records.

8 Safeguards (including legally privileged or confidential information)

- 8.2 Before issuing a warrant, the person doing so must consider that satisfactory arrangements are in place for the purposes of those statutory requirements. All material obtained under an equipment interference warrant must be handled in accordance with these arrangements.
- 8.3 The arrangements are approved by the relevant Secretary of State and are subject to annual review and approval to ensure that they arrangements remain suitable.
- 8.4 The arrangements are made available to the Investigatory Powers Commissioner. Breaches of these safeguards must be reported to the Investigatory Powers Commissioner in a fashion agreed with him or her.
- 8.5 The equipment interference authorities must keep their internal safeguards under annual review to ensure that they remain up-to-date and effective. During the course of such annual reviews, the equipment interference authorities must consider whether more of their internal arrangements might safely and usefully be put into the public domain. The equipment interference authorities must seek the approval of the relevant issuing authority before any changes are made to these safeguards.

Safeguards relating to retention and disclosure

- 8.6 Both Part 5 and Chapter 3 of Part 6 require that disclosure, copying and retention of material obtained under the warrant is limited to the minimum necessary for the authorised purposes. Something is necessary for the authorised purposes if¹⁹¹:
- it is, or is likely to become, necessary for any of the grounds referenced in section 129(7) for targeted warrants or section 178(1)(b) and 178(2) for bulk warrants. The relevant grounds vary depending on the equipment interference authority seeking the warrant, but include the interests of national security, for the purpose of preventing or detecting serious crime, in the interests of the economic well-being of the UK so far as those interests are relevant to national security or in the interest of the prevention of death or injury;¹⁹²
 - it is necessary for facilitating the carrying out of the functions under the Act of the issuing authority or the person to whom the warrant is addressed;

¹⁹¹ See section 129(3) and 191(3)

¹⁹² Equipment interference obtained for one purpose can, where there is a lawful basis and where it is necessary and proportionate to do so, be disclosed, copied and retained for another purpose.

- it is necessary for facilitating the carrying out of any functions of the Judicial Commissioners or the Investigatory Powers Tribunal;
- it is necessary for the purposes of legal proceedings; or
- it is necessary for the performance of the functions of any person by or under any enactment.

8.7 For the avoidance of doubt, when an intelligence service obtains material under a bulk equipment interference warrant and selects for examination that material in accordance with the specified operational purposes, the selected material may be retained, copied, processed and disseminated on any relevant ground under section 178 of the Act.

Duty not to make unauthorised disclosure and excepted disclosures

8.8 The Act imposes a duty on those individuals listed in section 132(3) not to disclose the following in relation of an equipment interference warrant unless the disclosure is an “excepted disclosure”:

- the existence or contents of the warrant,
- details of the issue of the warrant or any renewal or modification of the warrant,
- the existence or contents of any requirement to provide assistance in giving effect to the warrant,
- steps taken in pursuance of the warrant or
- any material obtained under the warrant.

8.9 Section 134 sets out the offence for an individual who makes an unauthorised disclosure. This offence applies in both targeted and bulk equipment interference warrants.

8.10 The meaning of “excepted disclosure” and the circumstances in which disclosure made in relation to a warrant is permitted is set out in section 133. Section 133 is broken down into a number of types of circumstances (or “heads”) in which disclosure would be an “excepted disclosure”.

8.11 **Head 1** includes where it is authorised by the warrant, authorised by the person to whom the warrant is addressed or authorised by the terms of any requirement to provide assistance in giving effect to the warrant.

8.12 **Head 2** provides for disclosures to or authorised by a Judicial Commissioner and disclosure to the Independent Office for Police Conduct or the Intelligence and Security Committee of Parliament for the purpose of carrying out its functions.

- 8.13 **Head 3** provides for disclosure in contemplation of or in connection with any legal proceedings, or disclosure by a professional legal adviser to his or her client, or vice versa, for the purpose of giving advice about relevant provisions of the Act.
- 8.14 **Head 4** provides for disclosure of statistics by telecommunications operators in accordance with regulations made by the Secretary of State. The regulations may allow the publication of statistics relating to the number of warrants to which they have given effect. Head 4 also includes when a disclosure is made, not in relation to a particular warrant but in relation to equipment interference warrants in general.
- 8.15 Disclosure may also be subject to other duties of confidentiality, for example, from contractual agreements. In particular, the exceptions in section 133 do not override duties imposed by the Official Secrets Act 1989 or other requirements of vetting. In practice, this means that any disclosure to or by lawyers under this section will require reasonable measures to be taken to ensure that sensitive material is properly protected. An example of an “excepted disclosure” is where a law enforcement officer may be authorised by the person to whom an equipment interference warrant is addressed to disclose material acquired by equipment interference in order to carry out their functions.

Disclosures authorised by the warrant or the person to whom the warrant is addressed

- 8.16 Head 1 (see paragraph 8.11) sets out that disclosures may be authorised by the warrant, by the person to whom the warrant is addressed or by the terms of any requirement to provide assistance in giving effect to a warrant. If the person issuing the warrant or the person to whom the warrant is addressed intends to authorise a disclosure under this section they must first consider any requirements imposed by section 129 or section 191, as the case may be, and chapter 9 of this code.
- 8.17 The person issuing the warrant, or the person to whom a warrant is addressed, may consider it is appropriate to authorise a disclosure where, for example, a telecommunications operator requests the ability to disclose the existence of a warrant to a relevant regulator for audit or regulatory purposes. In this case the person issuing the warrant or the person to whom the warrant is addressed may consider that such a disclosure would be in the public interest, would not risk the viability of any equipment interference techniques and that the requirements of section 129 (or section 191) would be met.

Offence of making unauthorised disclosure

- 8.18 Section 134 of the Act makes it a criminal offence to make unauthorised disclosure in breach of the duty in section 132 which the person knows is in breach of that duty. A disclosure is not unauthorised, and so the offence is not committed, if the disclosure is an excepted disclosure according to section 133.

- 8.19 An individual does not commit an offence where they are unaware that the disclosure of the material in question would be in breach of the duty not to make unauthorised disclosures. This could be because they are not aware that the material they are disclosing is derived from equipment interference, as it may not be identifiable as the product of equipment interference.

Use of material as evidence

- 8.20 Subject to the provisions in this chapter of the code, material obtained through equipment interference may be used as evidence in criminal proceedings. The admissibility of evidence is governed primarily by the common law, the Criminal Procedure and Investigations Act 1996, the Criminal Procedure Rules, section 78 of the Police and Criminal Evidence Act 1984¹⁹³ and the Human Rights Act 1998.
- 8.21 Ensuring the continuity and integrity of evidence is critical to every prosecution. Accordingly, considerations as to evidential integrity are an important part of the disclosure test applied under the Criminal Procedure and Investigations Act 1996 and these considerations will apply to any material acquired through equipment interference that is used in evidence. When information obtained under the authority of an equipment interference warrant is used evidentially, the equipment interference authority should be able to demonstrate how the evidence has been obtained, to the extent required by the relevant rules of evidence and disclosure.
- 8.22 Where the product of equipment interference could be relevant to pending or future criminal or civil proceedings, it should be retained in accordance with established disclosure requirements for a suitable further period, commensurate to any subsequent review. For law enforcement equipment interference authorities, consideration should be had to the requirements of the code of practice issued under the Criminal Procedure and Investigations Act 1996.
- 8.23 The heads of the intelligence services and law enforcement agencies are also under a duty to ensure that arrangements are in force to secure: (i) that no information is obtained except so far as necessary for the proper discharge of their functions; and (ii) that no information is disclosed except so far as is necessary for those functions, for the purpose of any criminal proceedings, and, in the case of SIS and the Security Service, for the other purposes specified.

¹⁹³ And section 76 of the Police and Criminal Evidence (Northern Ireland) Order 1989.

Reviewing warrants

- 8.24 Regular reviews of all warrants should be undertaken during their life time to assess their continued necessity and the continued proportionality of the conduct. Particular attention should be given to the need to review warrants frequently where the interference involves a high level of intrusion into private life or significant collateral intrusion. This is also the case where particularly sensitive information is likely to be obtained. As set out at section 2(2)(b) of the Act, at the point the equipment interference authority is considering applying for a warrant, it must have regard to whether the level of protection to be applied in relation to information obtained under the warrant is higher because of the particular sensitivity of that information.
- 8.25 In each case, unless specified by the person issuing the warrant, the frequency of reviews should be determined by the equipment interference authority. This should be as frequently as is considered necessary and proportionate.
- 8.26 In the event that there are any significant and substantive changes to the nature of the interference during the currency of the warrant, the equipment interference authority should consider whether it is necessary to apply for a new warrant.

Dissemination of material obtained under an equipment interference warrant

- 8.27 Material obtained under an equipment interference warrant will need to be disseminated both within and between the equipment interference authorities, as well as to consumers of intelligence (which includes the Secretary of State) and oversight bodies, where necessary in order for action to be taken on it. The number of persons to whom any of the material is disclosed, and the extent of disclosure, is limited to the minimum that is necessary for the authorised purposes.. This safeguard applies equally to disclosure to additional persons within an equipment interference authority, and to disclosure outside an equipment interference authority.
- 8.28 This safeguard is enforced by prohibiting disclosure to persons who have not been appropriately vetted and also by the need-to-know principle: material acquired by virtue of equipment interference must not be disclosed to any person unless that person's duties, which must relate to one of the authorised purposes, are such that he or she needs to know about the material to carry out those duties. In the same way, only so much of the material may be disclosed as the recipient needs. For example, if a summary of the material will suffice, no more than that should be disclosed.

- 8.29 In accordance with the requirements set out in paragraph 8.27, it may be necessary for an intelligence service to disseminate material acquired through equipment interference obtained under a bulk equipment interference warrant to another intelligence service or to an England and Wales police force (as defined in section 80), the Police Service of Scotland, the Police Service of Northern Ireland or HMRC in response to a request for assistance in relation to a domestic or overseas focused investigation or operation.
- 8.30 These requests for assistance may require the selection for examination of material acquired through bulk equipment interference either for target discovery to generate leads, or to further investigate existing leads relating to individuals in the UK. This is likely to be necessary for counter terrorism purposes, in support of MI5 and police work to identify and investigate terrorist threats to the UK. In order to respond to such a request, the intelligence service may disclose material acquired through bulk equipment interference relating to individuals who are within the British Islands¹⁹⁴ (see paragraph 6.90 for further information). This well-established intelligence sharing process ensures the effective investigation of terrorism and serious crime in circumstances where an operation may otherwise cease due to a lack of intelligence available to the relevant intelligence service or law enforcement agency.

Example: Law enforcement are aware of activities of a paedophile overseas who is grooming children in the UK. However they cannot identify the offender or any victims. They approach an intelligence service for help in identifying and locating the offender. Due to anonymisation and a plethora of online accounts the intelligence service can only trace the offender by analysing the grooming activity with the UK victims. Law enforcement may also need help in tracing UK victims via the images of them appearing online. It may be necessary for the intelligence service to examine material obtained through bulk equipment interference in order to trace victims who can only be identified via the images of them appearing online. The intelligence service may want to trace associates of a known offender who may be located in the UK.

- 8.31 A law enforcement agency may only make such a request if:
- the law enforcement agency has exhausted all other means of progressing the operation or investigation, including through the use of powers available to that agency under the Act, such that the request for assistance is consistent with, and does not circumvent, the objectives of the Act; and
 - the request is otherwise necessary and proportionate in all the circumstances.
- 8.32 Where such a request is made by a law enforcement agency, the intelligence service may only provide assistance if:

¹⁹⁴ See section 176(5)(a)

- the law enforcement agency has furnished the intelligence service with such supporting material as the intelligence service may require to determine whether it is necessary and proportionate to provide assistance in relation to the request;
- the requirements of section 193 (safeguards relating to examination of material etc) are met in relation to the material obtained under a warrant; and
- any disclosure of material by the intelligence service would comply with the requirements of section 191 (safeguards relating to retention and disclosure of material) and the arrangements in force under that section, and this code.

8.33 The obligations outlined in paragraph 8.27 apply not just to the original equipment interference authority that discloses the material, but also to anyone to whom the material is subsequently disclosed. In some cases this will be achieved by requiring the recipient to obtain the original equipment interference authority's permission before disclosing the material further. In other cases, explicit safeguards are applied to secondary recipients.

Copying

8.34 Material obtained under a warrant may only be copied to the extent necessary for the authorised purposes set out in sections 129(3) and 191(3) of the Act. Copies include not only direct copies of the whole of the material, but also extracts and summaries which identify the material as having been obtained under a warrant, and any record referring to the interference and which is a record of the identities of the persons to whom the material relates.

Storage

8.35 All copies, extracts and summaries of material obtained under an equipment interference warrant must be handled and stored securely, so as to minimise the risk of loss or theft. They must be held so as to be inaccessible to persons without the required level of security clearance. This requirement to store material securely applies to all those who are responsible for handling it, including those assisting with the implementation of a warrant.

8.36 In particular, each equipment interference authority must apply the following protective security measures:

- physical security to protect any premises where the information may be stored or accessed;
- IT security to minimise the risk of unauthorised access to IT systems; and
- a security clearance regime for personnel which is designed to provide assurance that those who have access to this material are reliable and trustworthy.

- 8.37 The details of what such a requirement will mean in practice for any telecommunications operators that are required to provide assistance will be set out in the discussions they have with the equipment interference authority before being asked to give effect to a warrant (see chapter 7 of this code).

Destruction

- 8.38 Material acquired under an equipment interference warrant, and all copies, extracts and summaries of material which can be identified as the product of an equipment interference warrant, must be scheduled for deletion and securely destroyed as soon as possible, once no longer needed for any of the authorised purposes. In this context, destroying material means taking such steps as might be necessary to make access to the data impossible.¹⁹⁵ If material is retained, it should be reviewed at appropriate intervals to confirm that the justification for its retention is still valid under section 129(3) or, in the case of a bulk warrant, section 191(3) of the Act.
- 8.39 Where an intelligence service undertakes equipment interference under a bulk warrant, the intelligence service must specify (or must determine on a system by system basis) maximum retention periods for different categories of the data which reflect the nature of the data and the intrusiveness of continuing to retain it. The specified periods should normally be no longer than two years, and should be agreed with the Investigatory Powers Commissioner. Where material is stored on a system, it will not be stored for the purpose of Investigatory Powers Commissioner oversight beyond the retention period already set for that system.
- 8.40 Data may only be retained for longer than the specified maximum retention periods if prior authorisation is obtained from a senior official within the particular intelligence service on the basis that continued retention of the data has been assessed to be necessary and proportionate. If continued retention of any such data is thereafter assessed to no longer meet the tests of necessity and proportionality, it must be deleted.
- 8.41 So far as possible, all retention periods should be implemented by a process of automated deletion, which is triggered once the applicable maximum retention period has been reached for the data at issue.
- 8.42 Any collateral material that has been acquired over the course of a testing or training exercise should normally be destroyed as soon as reasonably possible when the purpose of the testing or training exercise has been fulfilled. For example, it may take a period of time to go through the data to check whether the equipment has worked properly. It may also be appropriate in some cases to retain test data and re-run this rather than cause further intrusion by carrying out further interference.

¹⁹⁵ For example, by taking reasonable steps to make the data unavailable or inaccessible to authorised persons. No further steps are required, such as physical destruction of hardware.

Safeguards relating to disclosure of material overseas

- 8.43 Where material obtained under an equipment interference warrant is to be disclosed to the authorities of a country or territory outside the UK, the person issuing the warrant must ensure that the material is only handed over to the authorities if the following requirements are met:¹⁹⁶
- it appears to the person issuing the warrant that the requirements corresponding to the statutory requirements¹⁹⁷ relating to minimising the extent to which material is disclosed, copied, distributed and retained will apply to the extent (if any) that the person issuing the warrant considers appropriate;
 - where unselected data obtained under a bulk warrant is disclosed to overseas authorities, it appears to the Secretary of State that requirements corresponding to the statutory requirements¹⁹⁸ relating to the examination of material will also apply to the extent (if any) that the Secretary of State considers appropriate;
- 8.44 As outlined at paragraph 8.33, the Act places a requirement on the person issuing the warrant to consider the extent to which safeguards corresponding to those in the Act should apply where material obtained under a bulk equipment interference warrant is being shared with an overseas authority.
- 8.45 In most circumstances, intelligence sharing will take place with authorities in countries with which the United Kingdom has long and well established intelligence sharing relationships and which apply corresponding safeguards to equipment interference material as those provided in the Act. But there will also be occasions where material derived from equipment interference may need to be shared with the authorities of a country or territory with whom the United Kingdom does not have an existing intelligence sharing relationship and whose authorities do not apply safeguards to equipment interference material corresponding to those in the Act.
- 8.46 Issuing authorities must consider the arrangements that should be in place to regulate such disclosure. These arrangements should require the person considering authorising such a disclosure to balance the risk that the material will not be subject to the same level of safeguards that it would be in this country, against the risks to national security if material is not shared.

¹⁹⁶ See section 130 and 192

¹⁹⁷ See section 129(2) and (5) for Part 5 warrants or 191(2) and (5) for bulk warrants

¹⁹⁸ See section 193 (safeguards relating to the examination of material)

Safeguards applicable to the handling of material obtained as a result of a request for assistance

- 8.47 Where material is obtained by an equipment interference authority as a result of a request to an international partner to undertake equipment interference on its behalf, the material must be subject to the same internal rules and safeguards that would apply to the same categories of material had it been obtained directly by the authority under an equipment interference warrant.

Confidential or legally privileged information

- 8.48 Particular consideration should be given to the acquisition of material or the selection for examination of material where individuals might reasonably assume a high degree of confidentiality. This includes where the material contains information that is legally privileged (see paragraphs 9.45 to 9.70); confidential journalistic material or where material identifies a journalist's source (see paragraphs 9.71 to 9.85); where material contains confidential personal information or communications between a member of a relevant legislature and another person on constituency business.

Confidential personal information and communications between a member of a relevant legislature and another person on constituency business, information or communications

- 8.49 Confidential personal information is information held in confidence concerning an individual (whether living or dead) who can be identified from it, and the material in question relates to his or her physical or mental health or to spiritual counselling. Such information can include both oral and written communications. Such information as described above is held in confidence if it is held subject to an express or implied undertaking to hold it in confidence, or is subject to a restriction on disclosure or an obligation of confidentiality contained in existing legislation. For example, confidential personal information might include consultations between a health professional and a patient, or information from a patient's medical records.
- 8.50 Persons with access to material derived from equipment interference in the equipment interference authorities should receive appropriate training on the safeguards regarding confidential or privileged information, (only if deemed necessary to do so).

- 8.51 Spiritual counselling is defined as conversations between an individual and a professional spiritual counsellor, where the spiritual counsellor is acting in an official capacity, and in the course of which the spiritual counsellor provides counsel relating to the resolution of an individual's conscience (including, for example, where the individual being counselled is seeking or the professional spiritual counsellor is imparting, forgiveness or absolution with the authority of the divine being(s) of their faith). In order to be considered spiritual counselling, the counselling must be within the logic of a belief system, held by a group of adherents, which claims to explain humanity's place in the universe and ultimate purpose, and to teach its adherents how they are to live their lives in conformity with the understanding associated with the belief system. Spiritual counsellors therefore include clergy and clergy equivalents (including equivalents in humanist or atheistic congregations) but does not include more informal counselling services not associated with a belief system, such as 'life coaches'.
- 8.52 Confidential constituent information is information held in confidence relating to communications between a member of a relevant legislature and a constituent in respect of constituency business. Such information is held in confidence if it is held subject to an express or implied undertaking to hold it in confidence or it is subject to a restriction on disclosure or an obligation of confidentiality contained in existing legislation.
- 8.53 In the case of a targeted equipment interference warrant, additional safeguards apply to where the purpose of the warrant is to authorise or require the use of equipment interference to obtain communications sent by, or intended for, a person who is a Member of Relevant Legislatures (MRL), or in the case of a target examination warrant, where the purpose of the warrant is to authorise the selection for examination of the content of such communications.¹⁹⁹
- 8.54 Where the intention is to acquire confidential personal information, the reasons should be clearly documented and the necessity and proportionality of doing so should be carefully considered. If the information is exchanged with the intention of furthering a criminal purpose – for example, if purported spiritual counselling involves incitement to murder or to acts of terrorism – then the information will not be considered confidential for the purposes of the Act. Any possible mitigation steps should be considered and, if none is available, consideration should be given to whether special handling arrangements are required within the equipment interference authority.
- 8.55 Where confidential personal or constituency business information is retained and disseminated to an outside body, reasonable steps should be taken to mark the disseminated information as confidential.

¹⁹⁹ Section 111 (1) of the Act

- 8.56 Where there is any doubt as to the requirements to be met for the lawful handling or dissemination of confidential information, advice should be sought from a legal adviser within the relevant equipment interference authority and before any further dissemination of the material takes place.
- 8.57 Any case where confidential personal or constituency business information is retained, other than for the purposes of destruction, and dissemination records should be kept of materials retained and made available to the Investigatory Powers Commissioner as soon as reasonably practicable or on the basis of agreement with the Commissioner.
- 8.58 The safeguards set out above also apply to any material obtained under a bulk equipment interference warrant which is selected for examination, which constitutes confidential or constituency business information, and which is retained other than for the purpose of its destruction, and disseminated

Items subject to legal privilege

- 8.59 The concept of legal privilege applies to the provision of professional legal advice by a member of the legal profession, such as advocates, barristers, solicitors or Chartered Legal Executives. Legal privilege can also apply in relation to communications not involving a lawyer, where the communication involves a repetition of legal advice that has been provided and confidentiality has been maintained.
- 8.60 Section 10 of the Police and Criminal Evidence Act 1984 describes those matters that are subject to legal privilege in England and Wales. In Scotland, those matters subject to legal privilege are defined in Section 263 of the Investigatory Powers Act. With regard to Northern Ireland, Article 12 of the Police and Criminal Evidence (Northern Ireland) Order 1989 should be referred to.
- 8.61 Legal privilege does not apply to material held with the intention of furthering a criminal purpose (whether the legal adviser is acting unwittingly or culpably). Privilege is not lost where a professional legal adviser is advising a person who is suspected of having committed a criminal offence.
- 8.62 For the purposes of this code, a warrant requesting agency should consider if and how section 112 applies to any communication, but particularly between a lawyer and client, or between a lawyer and another person for the purpose of actual or contemplated litigation (whether civil or criminal). For example, where it is plain that the items do not form part of a professional consultation of the lawyer, or there is clear and compelling evidence that the ‘furthering a criminal purpose’ exemption applies. Where there is doubt as to whether the items are subject to legal privilege or over whether the items are not subject to legal privilege due to the ‘in furtherance of a criminal purpose’ exception, advice should be sought from a legal adviser within the relevant equipment interference authority.

- 8.63 Sections 112 and 194 of the Act provide special protections for legally privileged items. Acquiring such items (or examining items subject to legal privilege acquired under a bulk equipment interference warrant) is particularly sensitive and may give rise to issues under Article 6 (right to a fair trial) of the ECHR as well as engaging Article 8.
- 8.64 The acquisition of items subject to legal privilege (whether deliberately obtained or otherwise) is therefore subject to additional safeguards. Section 112 provides for three different circumstances where legally privileged items will or may be obtained or selected for examination. They are; i) where legally privileged material is likely to be obtained or selected for examination; ii) where legally privileged material is intentionally sought, or selected for examination; and iii) where the purpose or one of the purposes is to obtain items subject to legal privilege that, if they were not made or held with the intention of furthering a criminal purpose, would be subject to privilege. Further guidance is set out in paragraphs 8.69 to 8.72 below as to what should be done in each of those cases

Application process for targeted warrants that are likely to result in acquisition of items subject to legal privilege

- 8.65 Section 112 of the Act sets out the processes that must be followed when an application is being made for a warrant either to obtain or to select for examination items subject to legal privilege. Different processes apply depending on whether obtaining or examining items subject to legal privilege is the purpose²⁰⁰ (or one of the purposes) of the warrant, or whether it is not the purpose but is nevertheless likely.
- 8.66 Subsections (8) and (9) of section 112 set out the process where an application is being made for a warrant that would authorise or require the acquisition or selection for examination of items subject to legal privilege even though it is not the purpose of the warrant to obtain or examine such items . In such cases the warrant application must be clear that the warrant would authorise the acquisition of material likely to include items subject to legal privilege and it must include an assessment of how likely it is that items which are subject to legal privilege will be obtained. This is in addition to the application setting out the reasons why it is considered necessary for acquisition or examination to take place.
- 8.67 In the application, the relevant equipment interference authority should confirm that any items that are subject to legal privilege that are inadvertently obtained will be treated in accordance with the safeguards set out in this chapter and that reasonable and appropriate steps will be taken to minimise access to the items subject to legal privilege.

Application process for targeted warrants where the purpose, or one of the purposes, is to obtain or examine items subject to legal privilege

²⁰⁰ For the avoidance of doubt, “purpose” in Section 112 has the same meaning as “purpose” in Section 111. For further guidance, see 8.41.

- 8.68 Where the intention is to acquire items subject to legal privilege, the warrant application must contain a statement that the purpose, or one of the purposes, of the warrant is to obtain legally privileged material.
- 8.69 Section 112(4) provides that the warrant may only be issued if the person issuing the warrant is satisfied that there are exceptional and compelling circumstances that make the warrant necessary and if the Judicial Commissioner approves the decision to issue the warrant. Section 112 also sets out that circumstances cannot be exceptional and compelling unless certain conditions are met.
- 8.70 Exceptional and compelling circumstances will arise only in a very restricted range of cases. The exceptional and compelling test can only be met when the public interest in obtaining the information sought outweighs the public interest in maintaining the confidentiality of legally privileged material, and when there are no other reasonable means of obtaining the required information. The interference must be reasonably regarded as likely to yield the intelligence necessary to counter the threat.
- 8.71 Section 112(6) states that a warrant to target such material can only be issued for the purpose of preventing death or significant injury or in the interests of national security. Such a warrant may not be issued if it is only considered necessary in the interests of the economic well-being of the United Kingdom, so far as those interests are also relevant to national security (see section 112 (5)).

Example: An equipment interference authority may need to deliberately target legally privileged communications where the legal consultation might yield intelligence that could prevent harm to a potential victim or victims. For example, if they have intelligence to suggest that an individual is about to conduct a terrorist attack and the consultation may reveal information that could assist in averting the attack (e.g. by revealing details about the location and movements of the individual) then they might need to target the legally privileged communications.

- 8.72 Further, in considering any such application, the person issuing the warrant and Judicial Commissioner must be satisfied that the proposed conduct is proportionate to what is sought to be achieved and must have regard to the public interest in the confidentiality of items subject to privilege. They will wish to consider carefully whether the activity or threat being investigated is of a sufficiently serious nature to override the public interest in preserving the confidentiality of legally privileged communications, and the likelihood that the information sought will have a positive impact on the investigation.

- 8.73 The person issuing the warrant will take into account both the public interest in preserving the confidentiality of those particular items and the broader public interest in maintaining the confidentiality of items subject to legal privilege more generally. The person issuing the warrant must consider that there are exceptional and compelling circumstances that make it necessary to issue the warrant and must be satisfied that there are appropriate arrangements in place for the handling, retention, use and destruction of legally privileged items, and the Judicial Commissioner must approve the decision. In such circumstances, the person issuing the warrant will be able to impose additional requirements such as regular reporting arrangements, so as to keep the warrant under review more effectively.
- 8.74 Where there is a renewal application in respect of a warrant which has resulted in the obtaining of legally privileged items, that fact should be highlighted in the renewal application.

Application process for warrants where the requesting equipment interference authority considers that the items are likely to be created or held to further a criminal purpose

- 8.75 Where an application for a warrant is made where the purpose or one of the purposes is to obtain items that, if they were not created or held with the intention of furthering a criminal purpose, would be subject to legal privilege and where the requesting equipment interference authority considers that the items are likely to be created or held to further a criminal purpose, the application must include a statement to that effect and the reasons for believing that the items are likely to be created or held to further a criminal purpose. For example, if the requesting equipment interference authority had reliable intelligence that a criminal fugitive was seeking advice from a lawyer in order to obtain a false alibi or to assist them in evading arrest, then this may provide grounds for an assessment that the communications with the lawyer will not be legally privileged, notwithstanding the fugitive appeared to be seeking advice from a lawyer in a professional capacity, and this information should be set out in the application.
- 8.76 The requirement to ensure the case for a warrant is presented in the application in a fair and balanced way, including information which supports or weakens the case for the warrant which applies to warrant applications applies in these circumstances as it does elsewhere. For example, information which may undermine the assessment that material is likely to be created or held to further a criminal purpose must also be included in the application to ensure the person issuing the warrant can make an informed assessment about the nature of the material. The warrant can only be issued where the person issuing the warrant considers that the targeted items are likely to be created or held with the intention of furthering a criminal purpose.
- 8.77 In a case where section 112 (items subject to legal privilege) applies in relation to making a modification to a warrant, the same safeguards will apply as apply when a warrant is issued.

Selection for examination of legally privileged protected material under a bulk equipment interference warrant: requirement for prior approval by independent senior official

- 8.78 Where the material obtained under a bulk equipment interference warrant is to be selected for examination according to criteria that are intended to, or are likely to result in, identifying items subject to legal privilege, the enhanced procedure described at paragraph 8.88 to 8.90 applies.²⁰¹ This only applies where the individual is outside the British islands, otherwise the relevant targeted examination warrant application would address these considerations as described in paragraphs 8.96 to 8.78.
- 8.79 An authorised person in a public authority must notify a senior official²⁰² before using criteria to select any protected material for examination, where this will, or is likely to, result in the identification of legally privileged items. The notification must address the same considerations as described in paragraph 8.65. The senior official, who must not be a member of the equipment interference authority to whom the bulk equipment interference warrant is addressed, must in any case where the intention is to acquire items subject to legal privilege, apply the same tests and considerations as described in paragraph 8.80 to 8.85 (including where there are exceptional and compelling circumstances). The authorised person is prohibited from accessing the items until he or she has received approval from the senior official authorising the selection for examination of the items subject to legal privilege.
- 8.80 In the event that legally privileged items are inadvertently and unexpectedly selected for examination (and where the enhanced procedure in paragraph 8.88 to 8.90 has consequently not been followed), any item so obtained must be handled strictly in accordance with the requirements of section 194 (additional safeguards for items subject to legal privilege) and the provisions of this chapter set out at paragraphs 8.84 to 8.86. No further legally privileged items may be selected for examination by reference to those criteria unless approved by the senior official as set out in paragraph 8.80.

²⁰¹ See section 194 of the Act

²⁰² Senior official is defined in section 135 of the Act as “senior official” means a member of the Senior Civil Service or a member of the Senior Management Structure of His Majesty’s Diplomatic Service.

Lawyers' material

- 8.81 Where a person to whom a targeted equipment interference warrant or targeted examination warrant relates is a lawyer acting in a professional capacity, or where the material is to be selected for examination using criteria referable to such a person, it is possible that a substantial proportion of the material which will be obtained or selected for examination will be subject to legal privilege. Therefore, in any case where the subject of a targeted equipment interference warrant or a targeted examination warrant, or the subject of examination, is known to be a lawyer acting in that professional capacity the equipment interference authority must assume that section 112 or 194 applies. Equipment interference authorities should provide internal guidance to their staff in relation to determining whether a target is a lawyer acting in a professional capacity.
- 8.82 The equipment interference authority will therefore need to consider which of the three circumstances apply and what processes should therefore be followed. In other words, they will need to consider whether the purpose, or one of the purposes, is to obtain, select for examination or identify items subject to legal privilege, whether that is not the purpose but is nevertheless likely, or whether the purpose or one of the purposes, is to obtain or select for examination material that, if it was not created or held with the intention of furthering a criminal purpose, would be subject to legal privilege. This paragraph does not prevent an application being made on the grounds that the lawyer is under investigation for serious criminal offences, in which case, the application or notification must be made on the basis that it is likely to acquire items subject to legal privilege and the additional considerations set out at paragraph 8.80 will apply.
- 8.83 Any such case should also be notified to the Investigatory Powers Commissioner during his or her next inspection and any material which has been retained should be made available to the Commissioner on request.

Handling, retention and deletion

- 8.84 In addition to safeguards governing the handling and retention of material as provided for in sections 129 and 191 of the Act, authorised persons who analyse material obtained by equipment interference should be alert to any communications or items which may be subject to legal privilege. Sections 131 and 194 of the Act set out the additional arrangements that apply to legally privileged items where the intention is to retain them for a purpose other than their destruction.

- 8.85 A legal adviser in the equipment interference authority must be consulted when it is believed that material which attracts privilege is to be retained other than for the purpose of destruction. The legal adviser is responsible for determining that material is legally privileged rather than an officer who is involved in an investigation. In cases where there is doubt as to whether material is legally privileged or not, the equipment interference authority may seek advice from the Investigatory Powers Commissioner. Where it is discovered that legally privileged material has been obtained inadvertently, an early assessment must be made of whether it is necessary and proportionate to retain it for one or more of the authorised purposes set out in section 129(3). If not, the material should not be retained, other than for the purpose of its destruction.
- 8.86 Material which has been identified as legally privileged (and is being retained for purposes other than its destruction) should be clearly marked as subject to legal privilege and the Investigatory Powers Commissioner must be notified of the retention of the items as soon as reasonably practicable. Paragraph 8.88 provides more detail on reporting legally privileged items to the Commissioner. Such material should be retained only where it is necessary and proportionate to do so for one or more of the authorised purposes set out in section 129(3). Legally privileged items must be securely destroyed when their retention is no longer needed for those purposes. If such material is retained, there must be adequate information management systems in place to ensure that continued retention, for purposes other than their destruction, remains necessary and proportionate for the authorised statutory purposes.

Reporting to the Commissioner

- 8.87 In those cases where legally privileged items have been acquired (or in the case of items acquired in bulk, selected for examination) and retained following its examination for a purpose other than destruction, the matter should be recorded and reported to the Investigatory Powers Commissioner as soon as reasonably practicable or on the basis of agreement with the Commissioner.

- 8.88 Section 131 provides that the Commissioner must order the destruction of the item or impose conditions on its use or retention unless the public interest in retaining the item outweighs the public interest in the confidentiality of items subject to legal privilege, and retaining the item is necessary in the interests of national security or for the purpose of preventing death or significant injury. Even if retention is necessary and the public interest in its retention outweighs the public interest in the confidentiality of items subject to legal privilege, the Commissioner may still impose conditions as he considers necessary to protect the public interest in the confidentiality of items subject to privilege. It may be the case in some circumstances that privileged items can be retained when its retention does not outweigh the public interest in the confidentiality of items subject to privilege. This includes, for example, where it is not possible to separate a privileged item from those that are not legally privileged and of intelligence value and where the retention is necessary and proportionate for one or more of the authorised purposes set out in section 129(3). In these circumstances, the Commissioner must impose conditions on the use or retention of the items.
- 8.89 The Investigatory Powers Commissioner will make an assessment of whether the public interest in retaining the item outweighs the public interest in the confidentiality of items subject to legal privilege, and of whether retaining the item is necessary in the interests of national security or for the purpose of preventing death or significant injury. If both of those conditions are met, then the Commissioner may impose conditions as to the use or retention of the items, but the Commissioner is not obliged to do so. If those conditions are not met, the Commissioner must direct that the item is destroyed, or must impose one or more conditions as to the use or retention of the items. The Commissioner must have regard to any representations made by the equipment interference authority about the proposed retention of legally privileged items or conditions that may be imposed.

Dissemination

- 8.90 In the course of an investigation, an equipment interference authority will not act on or further disseminate legally privileged items unless it has first informed the Investigatory Powers Commissioner that the items have been obtained or selected for examination, except in urgent circumstances. Where there is an urgent need to take action and it is not reasonably practicable to inform the Investigatory Powers Commissioner that the material has been obtained, or selected for examination before taking action, the equipment interference authority may take action before informing the Investigatory Powers Commissioner. In such cases, the equipment interference authority should, wherever possible, consult a legal adviser. An equipment interference authority must not disseminate legally privileged items if doing so would be contrary to a condition imposed by the Investigatory Powers Commissioner in relation to those items.

- 8.91 The dissemination of legally privileged material to an outside body should be accompanied by a clear warning that it is subject to legal privilege, where doing so would not breach the duty not to disclose the existence or contents of a warrant in section 132 (see paragraph 8.18). It should be safeguarded by taking reasonable steps to remove the risk of it becoming available, or its contents becoming known, to any person whose possession of it might prejudice any criminal or civil proceedings to which the information relates, including law enforcement authorities. In this regard civil proceedings includes all legal proceedings before courts and tribunals that are not criminal in nature. Neither the Crown Prosecution Service lawyer nor any other prosecuting authority lawyer with conduct of a prosecution should have sight of any legally privileged material, held by the relevant equipment interference authority, with any possible connection to the proceedings. In respect of civil proceedings, there can be no circumstances under which it is proper for any public authority to have sight of or seek to rely on legally privileged material in order to gain a litigation advantage over another party in legal proceedings.
- 8.92 In order to safeguard against any risk of prejudice or accusation of abuse of process, equipment interference authorities must also take all reasonable steps to ensure that lawyers or other officials with conduct of legal proceedings should not see legally privileged material relating to those proceedings (whether the privilege is that of the other party to those proceedings or that of a third party). If such circumstances do arise, the equipment interference authority must seek independent advice from Counsel and, if there is assessed to be a risk that sight of such material could yield a litigation advantage, the direction of the Court must be sought.

Applications to acquire material relating to confidential journalistic material and journalists' sources

- 8.93 There is a strong public interest in protecting a free press and freedom of expression in a democratic society, including the willingness of sources to provide information to journalists anonymously.
- 8.94 Section 264 of the Act defines confidential journalistic material as:
- In the case of material contained in a communication, journalistic material which the sender of the communication:
 - Holds in confidence, or
 - Intends the recipient, or intended recipient, of the communication to hold in confidence;
 - In any other case, journalistic material which a person holds in confidence.

- 8.95 Confidential journalistic material includes material acquired or created for the purposes of journalism and held subject to an undertaking to hold it in confidence, as well as communications resulting in information being acquired for the purposes of journalism and held subject to such an undertaking.
- 8.96 Section 264(7) sets out when a person holds material in confidence. This is if a person holds material subject to an express or implied undertaking to hold it in confidence or the person holds the material subject to a restriction on disclosure or an obligation of secrecy contained in an enactment. Confidentiality can continue to attach to confidential journalistic material when it is sent to or held by a person who is neither the journalist nor the source (for example, a news editor who has been sent some notes by a journalist).
- 8.97 Section 113 sets out the safeguards which apply when an equipment interference authority applies for a warrant under Part 5 where the purpose, or one of the purposes, of the warrant is to authorise the acquisition or the selection for examination of material which the equipment interference authority believes will be confidential journalistic material. The warrant application must contain a statement to that effect. The person to whom the application is made may issue the warrant only if they consider that appropriate safeguards relating to the handling, retention use and disclosure of the material are in place.
- 8.98 A source of journalistic information is an individual who provides material intending the recipient to use it for the purpose of journalism or knowing that it is likely to be so used. Throughout this code any reference to sources should be understood to include any person acting as an intermediary between a journalist and a source. Equipment data alone may not be sufficient to identify a source - consequential action and other information is likely to be required. For example, identifying communications addresses does not in itself provide sufficient information to determine the nature of a relationship. However, where a warrant is applied for that would authorise only the obtaining of equipment data, and not the acquisition of communications or private information, but one of the purposes of that warrant is to use the equipment data obtained as part of the assessment of the identity of a source, the safeguards outlined at section 114 should be applied to that warrant application.
- 8.99 Section 114 sets out the safeguards which apply when an equipment interference authority applies for a warrant under Part 5 where the purpose, or one of the purposes is to identify or confirm a source of journalistic information. Where a targeted equipment interference warrant or a targeted examination warrant to select for examination is sought to determine the source of journalistic information, the public interest requiring such selection must override any other public interest. The application must contain a statement confirming that this is the purpose (or one of the purposes) for the application. The person to whom the application is made may issue the warrant only if they consider that appropriate safeguards relating to the handling, retention, use and disclosure of the material are in place.

- 8.100 An assessment of whether someone is a journalist (for the purposes of the Act) should be made on all the facts and circumstances available at the time. Consideration should be given, in particular, to the frequency of the individual's relevant activities, the level of personal rigour they seek to apply to their work, the type of information that they collect, the means by which they disseminate that information and whether they receive remuneration for their work. This approach will take into account the purpose of the provisions contained within the Act which is to protect the proper exercise of free speech, and reflect the role that journalists play in protecting the public interest.
- 8.101 The acquisition and examination of material under Part 5 and Chapter 3 of Part 6 of the Act will be a justifiable interference with an individual's human rights under Articles 8 (right to respect for private and family life) and, in certain circumstances, 10 (freedom of expression) of the ECHR only if the conduct being authorised is necessary, proportionate and in accordance with law.
- 8.102 Where material is created or acquired with the intention of furthering a criminal purpose, section 264(5) states that the material is not to be regarded as having been created or acquired for the purpose of journalism. For example if a terrorist organisation creates videos for the promotion or glorification of terrorism (according to the UK law), the material cannot be regarded as journalistic material for the purposes of the Act and will not attract the safeguards set out in sections 113, 114 and 195. Once material has been broadcast, no confidentiality can attach to the material so it is not confidential journalistic material. The fact that a person uses social media tools to communicate does not, in itself, indicate that that person is a journalist or that he or she is likely to be holding confidential journalistic material as defined in the Act.
- 8.103 Where confidential journalistic material, or that which identifies the source of journalistic information, is retained and disseminated to an outside body, reasonable steps should be taken to mark the disseminated information as confidential. Where there is any doubt as to the lawfulness of the proposed handling or dissemination of such information, advice should be sought from a legal adviser within the relevant equipment interference authority and before any further dissemination of the content takes place.

Approval from the Commissioner

- 8.104 In circumstances where an authorised person in an equipment interference authority intends to use criteria to select for examination material obtained under a bulk equipment interference warrant with the intention to, or where it is highly likely to lead to, the selection for examination of confidential journalistic material (CJM) or material which identifies a source of journalistic material (SJM), authorisation is required from the Commissioner before those criteria can be used.

- 8.105 The Commissioner may give approval for the use of relevant criteria, if they consider that the public interest in obtaining the information that would be obtained by the selection of the material for examination, outweighs the public interest in confidentiality of confidential journalist material or sources of journalistic material (“the public interest test”) and there are no less intrusive means by which the information may reasonably be obtained.
- 8.106 In circumstances in which there is an urgent need to use criteria to select material for examination, a senior official acting on behalf of the Secretary of State may authorise the use of that criteria. If such an authorisation is given, the Secretary of State must, as soon as reasonably practicable, inform the Commissioner about that authorisation. The Commissioner must then consider whether the public interest test is met in relation to the use of those criteria. If the Commissioner decides that the public interest test is not met, the Commissioner must notify the Secretary of State of that decision.
- 8.107 On receipt of that notification the senior official’s authorisation ceases to have effect and the Secretary of State must inform the equipment interference authority of this notification as soon as possible, if they have not already been informed. In such circumstances, anything that is in the process of being done as a result of the authorisation must, so far as is reasonably practicable, cease to be done.
- 8.108 The following are examples of where an urgent authorisation under s.195(2)(b) may be appropriate:
- Imminent threat to life or serious harm, for example, if an individual has been kidnapped and it is assessed that their life is in imminent danger.
 - An intelligence-gathering or investigative opportunity with limited time to act.

Notification to the Commissioner where material has been retained²⁰³

- 8.109 Where the equipment interference authority wishes to retain (other than for the purposes of destruction) material obtained under a bulk equipment interference warrant that contains CJM or SJM, following its examination, that authority must inform the Commissioner of this retention as soon as reasonably practicable.
- 8.110 The Commissioner must direct destruction of the material unless the benefits of retention outweigh the public interest in confidentiality of confidential journalist material or sources of journalist material (“the public interest test”).

²⁰³ See section 195(4)-(10).

- 8.111 The Commissioner may impose such conditions upon the retention of the material as they consider necessary for the purpose of protecting the public interest in the confidentiality of CJM or SJM. The Commissioner may request representations from the equipment interference authority about how the Commissioner should exercise their functions of deciding on retention or condition-making about retention. The Commissioner must have regard to any representations received in relation to the exercise of such functions.
- 8.112 An equipment interference authority will not act on or further disseminate CJM or SJM unless it has first informed the Investigatory Powers Commissioner that the items have been retained (other than for the purposes of destruction), except in urgent circumstances. Where there is an urgent need to take action and it is not reasonably practicable to inform the Investigatory Powers Commissioner that the material has been retained before taking action, the agency may take action before informing the Investigatory Powers Commissioner. An equipment interference authority must not disseminate items containing CJM or SJM if doing so would be contrary to a condition imposed by the Investigatory Powers Commissioner in relation to those items.

9 Record keeping and error reporting

Records

- 9.1 Records must be available for inspection by the Investigatory Powers Commissioner and retained to allow the Investigatory Powers Tribunal to carry out its functions. The Tribunal will consider complaints made up to one year after the conduct to which the complaint relates and, where it is equitable to do so, may consider complaints made more than one year after the conduct to which the complaint relates (see section 67(5) of RIPA), particularly where continuing conduct is alleged. Although records are only required to be retained for at least three years, it is therefore desirable, if possible, to retain records for up to five years. The following information relating to all warrants for equipment interference should be centrally retrievable for at least three years:
- all applications made for targeted equipment interference, targeted examination and bulk equipment interference warrants, and applications made for the renewal of such warrants or modifications to those warrants;
 - all warrant instruments, associated schedules and indexes, renewal instruments and copies of modification instruments (if any);
 - all warrantry related records including submissions and cover advice;
 - where any application is refused, the grounds for refusal as given by the person issuing the warrant or Judicial Commissioner;
 - the dates on which the equipment interference activity started and stopped;
 - the result of periodic reviews of the warrants; and
 - any directions to destroy material and/or conditions as to use or retention of material issued by a Judicial Commissioner on refusal to approve an urgent warrant or urgent modification.
- 9.2 Records should also be kept of the arrangements for securing that only material which has been determined as necessary is, in fact, read, looked at or listened to. Records should be kept of the arrangements by which the requirements of sections 129(2) and 191(2) (minimisation of copying and distribution of material) and sections 129(5) and 191(5) (destruction of material) are to be met.
- 9.3 The person issuing the warrant must keep records of the warrant authorisation process. This will include:

- all advice provided to the Secretary of State or law enforcement chief to support their consideration as to whether to issue or renew the targeted equipment interference warrant, targeted examination warrant or bulk equipment interference warrant; and
- where the decision to issue a warrant is not approved by the Judicial Commissioner, the written response for refusal as given by the Judicial Commissioner; and
- a record of whether, following a refusal to approve a decision to issue or renew a warrant by a Judicial Commissioner, there is an appeal to the Investigatory Powers Commissioner. Each relevant equipment interference authority must also keep a record of the information below to assist the Investigatory Powers Commissioner in carrying out the Commissioner's statutory functions.

Targeted Warrants

9.4 For the purpose of these record keeping requirements, a targeted warrant should be taken as referring to a targeted equipment interference warrant or a targeted examination warrant, issued under Part 5 of the Act. In recording this information, each relevant equipment interference authority must also keep a record of the information below for every calendar year to assist the Investigatory Powers Commissioner in carrying out their statutory functions:

- The number of applications made by or on behalf of the equipment interference authority for a targeted warrant;
- The number of applications for a targeted warrant that were refused by an person issuing the warrant;
- The number of decisions to issue a targeted equipment interference warrant that were refused by a Judicial Commissioner;
- The number of occasions that a referral was made by an person issuing the warrant to the Investigatory Powers Commissioner, following the decision of a Judicial Commissioner to refuse to approve the decision to issue a targeted warrant;
- The number of occasions where a targeted warrant was refused by the Investigatory Powers Commissioner, following a referral from the person issuing the warrant;
- The number of targeted warrants issued by the person issuing the warrant and approved by a Judicial Commissioner;
- The number of targeted warrants issued by the person issuing the warrant in an urgent case;
- The number of targeted warrants issued by the person issuing the warrant in an urgent case where a Judicial Commissioner subsequently refused to approve a decision to issue the warrant;

- The number of targeted warrants issued where the purpose, or one of the purposes, of the warrant is to acquire, or select for examination, items subject to legal privilege;
- The number of targeted warrants issued where the equipment interference authority considers that the relevant material is likely to include items subject to legal privilege;
- The number of targeted warrants issued where the purpose, or one of the purposes, of the warrant is to obtain communications or other information that the equipment interference authority believes contain journalistic material, or select for examination content which the equipment interference authority believes is confidential journalistic material;
- The number of targeted warrants issued where the purpose, or one of the purposes, of the warrant is to identify or confirm a source of journalistic information;
- The number of targeted warrants where the purpose, or one of the purposes, is to acquire communications sent by or intended for a member of a relevant legislature, or the selection for examination of the content of such communications;
- The number of targeted warrants that were renewed;
- The number of targeted warrants that the person issuing the warrant or Judicial Commissioner refused to approve the renewal of;
- The number of targeted warrants that were cancelled; and
- The number of targeted warrants extant at the end of the calendar year.

9.5 In the case of targeted equipment interference warrants that were issued without the approval of a Judicial Commissioner, or a modification that was issued without the approval of the person issuing the warrant, senior official or Judicial Commissioner, a record of any further interference authorised by that person should be kept should they fail to approve the urgent warrant or modification (see paragraph 5.123).

9.6 For each targeted warrant issued by the person issuing the warrant and approved by a Judicial Commissioner (including warrants issued and approved in urgent cases), the relevant public authority must also keep a record of the following:

- the statutory grounds(s) specified on the warrant
- the details of modifications made to the warrant

Bulk Equipment Interference Warrants

9.7 In the case of warrants issued under Chapter 3 of Part 6 of the Act each intelligence service must keep a record of:

- the number of applications made for a bulk equipment interference warrant;

- the number of applications for a bulk equipment interference warrant that were refused by a Secretary of State;
- the number of decisions to issue a bulk equipment interference warrant that a Judicial Commissioner refused to approve;
- the number of occasions that a referral was made by the Secretary of State to the Investigatory Powers Commissioner, following the decision of a Judicial Commissioner to refuse to approve the decision to issue a bulk equipment interference warrant;
- the number of occasions where a bulk equipment interference warrant was refused by the Investigatory Powers Commissioner, following a referral from the Secretary of State;
- the number of bulk equipment interference warrants issued by the Secretary of State and approved by a Judicial Commissioner;
- the number of bulk equipment interference warrants that were renewed;
- the number of bulk equipment interference warrants that the Secretary of State or Judicial Commissioner refused to approve the renewal of;
- the number of bulk equipment interference warrants that were cancelled; and
- the number of bulk equipment interference warrants extant at the end of the year.

9.8 For each bulk equipment interference warrant issued by the Secretary of State and approved by a Judicial Commissioner, the relevant equipment interference authority must also keep a record of the following:

- The section 178(1)(b) and 178(2) purpose(s) specified on the warrant;
- the operational purposes specified on the warrant;
- the number of modifications made to add, vary or remove an operational purpose from the warrant;
- the number of modifications made to add or vary an operational purpose that were made on an urgent basis;
- the number of decisions to issue a modification to add or vary an operational purpose (including on an urgent basis) that the Judicial Commissioner refused to approve; and
- the number of occasions that a referral was made by the Secretary of State to the Investigatory Powers Commissioner, following the decision of a Judicial Commissioner to refuse to approve the decision modify a bulk equipment interference warrant.

- 9.9 In the case of a bulk equipment interference warrant that was issued without the approval of a Judicial Commissioner, or a modification that was issued without the approval of the Judicial Commissioner, a record of any further interference authorised by the Judicial Commissioner should be kept should they fail to approve the warrant or modification.
- 9.10 A subset of these records must be sent in written or electronic form to the Investigatory Powers Commissioner, as specified and as requested by the Commissioner. Those records that are not requested by the IPC should continue to be retained by the Public Authorities as set out in this chapter . Records may also be requested by the Home Office to assess the use of equipment interference and Public Authorities should share accordingly and in line with their own data sharing policy. Guidance on record keeping may be issued by the Investigatory Powers Commissioner. Guidance may also be sought from the Commissioner by equipment interference authorities.

Errors

- 9.11 This section provides information regarding errors. Proper application of the Investigatory Powers Act 2016 and thorough procedures for operating its provisions, including for example the careful preparation and checking of warrants, modifications and schedules, should reduce the scope for making errors whether by a public authority, telecommunications operator or other persons assisting in giving effect to a warrant.
- 9.12 Wherever possible, technical systems should incorporate functionality to minimise errors. A person holding a senior position within each equipment interference authority must undertake a regular review of errors and a written record must be made of each review.
- 9.13 The following provides a non-exhaustive list of possible relevant errors that would amount to an error by the public authority in complying with the requirements imposed on it and that would fall within the descriptions provided at paragraph 10.15:
- Equipment interference without lawful authority has occurred.
 - There has been a failure to adhere to the additional safeguards set out at sections 111 to 131 and sections 191 and 195 of the Act.
 - Human error which leads to material from the wrong device being obtained.
 - Warranted equipment interference has taken place but the material obtained does not in the event relate to the intended equipment where information held by the equipment interference authority at the time of seeking a warrant could reasonably have indicated this.
 - Failure to take all reasonably practicable steps to secure that anything in the process of being done under the warrant stops as soon as possible after the warrant is cancelled.

- A breach of the relevant safeguard section caused by software or hardware errors.
 - Selection for examination of material acquired under a bulk equipment interference warrant without a valid operational purpose.
 - Retention of data when it is no longer necessary for the authorised purposes.
 - Selection for examination of material by criteria referable to an individual known to be in the British Islands that is not authorised by a targeted examination warrant or written authorisation under s193(5).
 - An equipment interference authority fails to inform the Investigatory Powers Commissioner that it has obtained, or has selected for examination, an item which is legally privileged or which contains confidential journalistic material, and intends to retain it for purposes other than its destruction.
 - An equipment interference authority discloses material from a bulk equipment interference warrant to an overseas authority other than in accordance with section 192(1).
- 9.14 Errors can have very significant consequences on an affected individual's rights and, in accordance with section 235(6) of the Act, all relevant errors must be reported to the Investigatory Powers Commissioner by the public authority or telecommunications operator that is aware of the error.
- 9.15 When a relevant error has occurred, the public authority that made the error must notify the Investigatory Powers Commissioner as soon as reasonably practicable, and no later than ten working days after it has been established by appropriate internal governance processes that a relevant error has occurred. Such internal governance processes are subject to review by the Investigatory Powers Commissioner. Where the full facts of the error cannot be ascertained within that time, an initial notification must be sent with an estimated timescale for the error being reported in full and an explanation of the steps being undertaken to establish the full facts of the error.
- 9.16 From the point at which the public authority identifies that a relevant error may have occurred, they must take steps to confirm the fact of an error as quickly as it is reasonably practicable to do so. Where it is subsequently confirmed that an error has occurred and that error is notified to the Investigatory Powers Commissioner, the equipment interference authority must also inform the Commissioner of when it was initially identified that an error may have taken place.

- 9.17 Section 235(6) of the Act also places a requirement on telecommunications operators to report to the Investigatory Powers Commissioner any relevant error, of which they become aware. In such circumstances, the process for reporting the error to the Commissioner at paragraphs 9.15 and 9.16 above applies to telecommunications operators as it applies to public authorities. In addition, the telecommunications operator should inform the relevant public authority as soon as they become aware that the authority may have made an error. The telecommunications operator may then work in conjunction with the public authority to confirm the fact of the error and report it to the Commissioner.
- 9.18 A full report must be sent to the Investigatory Powers Commissioner as soon as reasonably practicable in relation to any relevant error, including details of the error and, where it has not been possible to provide the full report within ten working days of establishing the fact of the error, the reasons this is the case. Where the report is being made by the public authority that made the error that report should also include: the cause of the error; the amount of material obtained or disclosed; any unintended collateral intrusion; any analysis or action taken; whether the material has been retained or destroyed; and a summary of the steps taken to prevent recurrence.
- 9.19 As set out at section 231(9) of the Act, the Investigatory Powers Commissioner will keep under review the definition of relevant errors. The Investigatory Powers Commissioner may also issue guidance as necessary, including guidance on the format of error reports. Equipment interference authorities must have regard to any guidance on errors issued by the Investigatory Powers Commissioners.
- 9.20 An error that falls within the descriptions provided at paragraph **Error! Reference source not found.** but is committed either by a telecommunications operator or any other person providing assistance with giving effect to a warrant is not a relevant error, given that section 231(9)(a) makes clear that a relevant error must be one that is made by a public authority. However, such errors may still cause a significant interference with an individual's rights. As such, in addition to the requirement in the Act to report relevant errors to the Commissioner, a public authority or telecommunications operator should also report to the Commissioner any other error of which they become aware that meets the criteria at paragraph **Error! Reference source not found.** of this section. The reporting of such errors will help to draw attention to those aspects of the process that require improvement to eliminate further errors and the undue interference with any individual's rights.
- 9.21 If a public authority discovers a telecommunications operator error (which cannot therefore be a relevant error) they should notify the Investigatory Powers Commissioner and the telecommunications operator of the error straight away to enable the telecommunications operator to investigate the cause of the error and report it themselves. For example, if an equipment interference authority have instructed a telecommunications operator to cease interference and have cancelled their warrant but the telecommunications operator has not terminated the activity.

- 9.22 If a Telecommunications Operator becomes aware of a Personal Data Breach²⁰⁴ that has occurred relating to a warrant issued under Part 5 of the Act, and which would normally be notified to the Information Commissioner save for a relevant restriction²⁰⁵, the Telecommunications Operator must, without undue delay, report the Personal Data Breach to the Investigatory Powers Commissioner. A Telecommunications Operator should consult with the Public Authority that the authorisation or notice relates to before reporting the breach to the IPC or notifying the ICO to ensure consistent reporting. The notification to the Investigatory Powers Commissioner should be appropriately classified and transmitted on the appropriate security system and should consist of a factual description of the Personal Data Breach including the quantity of data involved and any other relevant details. A Judicial Commissioner must then disclose information about the breach to the Information Commissioner (via the appropriate system and at the appropriate classification), ensuring the IC has sufficient information so that they can appropriately investigate the breach and consider whether the breach is serious. Should the IC require further information to investigate the breach, the IC should inform the IPC who will in turn discuss with the relevant Public Authority before authorising the disclosure of any further information in respect of the Personal Data Breach. If the Information Commissioner considers that the breach is serious, the Information Commissioner must notify the Investigatory Powers Commissioner, who will in turn notify the affected individual, if it is determined to be in the public interest to do so.
- 9.23 In deciding whether it is in the public interest for the person concerned to be informed of the Personal Data Breach, the Investigatory Powers Commissioner must consider:
- the seriousness of the breach and its effect on the individual concerned; and
 - the extent to which disclosing the error would be contrary to the public interest or prejudicial to:
 - national security;
 - the prevention or detection of serious crime;
 - the economic well-being of the United Kingdom; or
 - the continued discharge of the functions of any of the intelligence services.
- 9.24 Before making his or her decision, the Investigatory Powers Commissioner must give the relevant Public Authority and Secretary of State the opportunity, if they wish, to make submissions on the matters concerned.

²⁰⁴ As defined in regulation 2(1) of the Privacy and Electronic Communications (EC Directive) Regulations 2003 (SI/2003/2426) (the 2003 Regulations).

²⁰⁵ ^s As defined in section 235A of the Act, read with regulation 29(1)(a)(i) of the 2003 Regulations) i.e. section 132(1) (duty not to make unauthorised disclosures) (including as applied by section 197) of the Act.

- 9.25 When informing a person of a serious Personal Data Breach, the Investigatory Powers Commissioner must inform the person of any rights that the person may have to apply to the Investigatory Powers Tribunal, and provide such details of the Personal Data Breach as the Investigatory Powers Commissioner considers to be necessary for the exercise of those rights.
- 9.26 The Memorandum of Understanding²⁰⁶ between the IC and the IPC establishes how the IPC and the IC work together and share information, including in relation to Personal Data Breaches relating to a warrant issued under Part 5 of the Act.
- 9.27 In addition to errors, as described in this section, situations may arise where a warrant under Part 5 of the Act has been obtained or modified as a result of the relevant equipment interference authority having been provided with details of equipment which later proved to be incorrect due to an error on the part of the person providing the information, but on which the relevant equipment interference authority relied in good faith. Whilst these actions do not constitute a relevant error on the part of the equipment interference authority which acted on the information, such occurrences should be brought to the attention of the Investigatory Powers Commissioner. Where reporting such circumstances to the Investigatory Powers Commissioner, the process outlined at 9.15 apply as they apply to the reporting of a relevant error.

Serious errors

- 9.28 Section 231 of the Act states that the Investigatory Powers Commissioner must inform a person of any relevant error relating to that person if the Commissioner considers that the error is a serious error and that it is in the public interest for the person concerned to be informed of the error. The Commissioner may not decide that an error is a serious error unless he or she considers that the error has caused significant prejudice or harm to the person concerned. The fact that there has been a breach of a person's Convention rights (within the meaning of the Human Rights Act 1998) is not sufficient by itself for an error to be a serious error.
- 9.29 In deciding whether it is in the public interest for the person concerned to be informed of the error, the Commissioner must in particular consider:
- the seriousness of the error and its effect on the person concerned; and
 - the extent to which disclosing the error would be contrary to the public interest or prejudicial to:
 - national security;
 - the prevention or detection of serious crime;

²⁰⁶ <https://ico.org.uk/media/about-the-ico/mou/2619387/ipco-ico-mou.pdf> - December 2020

- the economic well-being of the United Kingdom; or
 - the continued discharge of the functions of any of the intelligence services.
- 9.30 Before making his or her decision, the Commissioner must ask the equipment interference authority which has made the error to make submissions on the matters concerned. Equipment interference authorities must take all reasonably practicable steps notified to them by the Investigatory Powers Commissioner to identify the subject of a serious error.
- 9.31 When informing a person of a serious error, the Commissioner must inform the person of any rights that the person may have to apply to the Investigatory Powers Tribunal, and provide such details of the error as the Commissioner considers to be necessary for the exercise of those rights.

10 Oversight

- 10.1 The Investigatory Powers Act provides for an Investigatory Powers Commissioner ('the Commissioner'), whose remit includes providing comprehensive oversight of the use of the powers contained within the Act and adherence to the practices and processes described by this code. The Commissioner will be, or will have been, a member of the senior judiciary and will be entirely independent of His Majesty's Government or any of the public authorities authorised to use investigatory powers. The Commissioner will be supported by inspectors and others, such as technical experts and legal experts, qualified to assist the Commissioner in his or her work. The Commissioner will also be advised by the 'Technology Advisory Panel'.
- 10.2 The Commissioner, and those that work under the authority of the Commissioner, will ensure compliance with the law by inspecting public authorities and investigating any issue which they believe warrants further independent scrutiny. The Investigatory Powers Commissioner may undertake these inspections, as far as they relate to the Commissioner's statutory functions, entirely on his or her own initiative. Section 236 of the 2016 Act provides for the Intelligence and Security Committee of Parliament to refer a matter to the Commissioner with a view to carrying out an investigation, inspection or audit.

- 10.3 The Commissioner will have unfettered access to all locations, documentation and information systems as necessary to carry out their full functions and duties. In undertaking such inspections, the Commissioner must not act in a way which is contrary to the public interest or prejudicial to national security, the prevention or detection of serious crime, or the economic well-being of the UK (see section 229 (6)). A Commissioner must in particular not jeopardise the success of an intelligence, security or law enforcement operation, compromise the safety or security of those involved, nor unduly impede the operational effectiveness of an intelligence service, a police force, a government department or His Majesty's forces (see section 229 (7)).
- 10.4 All relevant persons using investigatory powers must, provide all necessary assistance to the Commissioner and anyone who is acting on behalf of the Commissioner. Here, a relevant person includes, among others, any person who holds, or has held, an office, rank or position with a public authority (see section 235 (7)).
- 10.5 Anyone, including anyone working for a public authority, or a telecommunications operator, who has concerns about the way that investigatory powers are being used may report their concerns to the Commissioner. In particular, any person who exercises the powers described in the Act or this code must, in accordance with the procedure set out in Chapter 10 of this code, report to the Commissioner any relevant error of which they are aware. This may be in addition to the person raising concerns through the internal mechanisms within the public authority, or as an alternative to raising a concern internally through a disclosure to IPCO, as enabled by the information gateway set out in section 237 of the IPA.²⁰⁷
- 10.6 Should the Commissioner uncover, or be made aware of, what they consider to be a serious error relating to a person who has been subject to an investigatory power then, if it is in the public interest to do so, the Commissioner is under a duty to inform the person affected. Further information on errors can be found in Chapter 10 of this code. The public authority who has made the relevant error will be able to make representations to the Commissioner before the Commissioner decides it is in the public interest for the person to be informed. Section 231(6) states that the Commissioner must also inform the affected person of any rights that the person may have to apply to the Investigatory Powers Tribunal (see Chapter 11 for more information on how this can be done).
- 10.7 The Commissioner must report annually on the findings of their audits, inspections and investigations. This report will be laid before Parliament and will be made available to the public, subject to any necessary redactions made in the public interest. Only the Prime Minister will be able to make redactions to the Commissioner's report.

- 10.8 The Commissioner may also report, at any time, on any of his or her investigations and findings as they see fit. Public authorities and telecommunications operators may seek general advice from the Commissioner on any issue which falls within the Commissioner's statutory remit. The Commissioner may also produce whatever guidance they deem appropriate for public authorities on how to apply and use investigatory powers.
- 10.9 Further information about the Investigatory Powers Commissioner, their office and their work may be found at: www.ipco.org.uk

11 Complaints

- 11.1 The Investigatory Powers Tribunal (IPT) has jurisdiction to consider and determine complaints regarding public authority use of certain investigatory powers, including those covered by this code, as well as conduct by or on behalf of any of the intelligence services and is the only appropriate tribunal for human rights claims against the intelligence services. Any complaints about the use of powers as described in this code should be directed to the IPT.
- 11.2 The IPT is entirely independent from His Majesty's Government and the public authorities who use investigatory powers. It is made up of members of the judiciary and senior members of the legal profession. Following receipt of a complaint or claim from a person, the IPT can undertake its own enquiries and investigations and can demand access to all information necessary to establish the facts of a claim and to reach a determination. A 'person' for these purposes includes an organisation and association or combination of persons (see section 81(1) of RIPA), as well as an individual.
- 11.3 This code does not cover the exercise of the Tribunal's functions. Should you wish to find out more information about the IPT or make a complaint, then full details of how to do so are available on the IPT website: <https://investigatorypowerstribunal.org.uk/>. Alternatively information on how to make a complaint can be obtained from the following address:
- The Investigatory Powers Tribunal
PO Box 33220
London
SW1H 9ZQ
- 11.4 If you have received a determination or decision from the IPT that you are not satisfied with then, in certain circumstances, you may have a right of appeal. The IPT will inform you when you have that right of appeal and which court you should apply to in order for your appeal application to be considered.

Annex A

Urgent authorisation of a targeted equipment interference warrant

Annex B

Urgent authorisation of a bulk equipment interference warrant
