Responsible AI FAQs

Q: Is it possible for FCDO to select a portfolio of projects that could contribute rather than only one?

A: The way we have set up the call for proposals is for one project at the value to be selected.

Q: The proposal talks about collaborating with stakeholders, does this require formal collaboration?

A: Collaboration is key to deliver this work, this will involve engaging with a range of stakeholders, but does not involve a formal relationship with this breadth of stakeholders.

Q: Does this cover military use of AI?

A: No this is restricted to how humanitarian actors use AI.

Q: Is there a percentage limit on overhead costs?

A: There's no limit, but it would need to be reasonable. Non-programme attributable costs should be substantiated. No profit can be included.

Q: The call is for non-profits, but can for-profit organisations apply if there is a non-profit as the lead organisation?

A: Yes, a for-profit organisation can be part of a consortium as long as there is no profit charged/flow through cost of profit
