

# Developer Remediation Contract Data Release: 31 October 2024

This release reports on the performance of developers who signed a Developer Remediation Contract with government against their contractual obligations. It draws on data submitted by those developers which is correct as at 31 October 2024, except for one developer (Fraser's Property) who did not submit data within the deadline. For this developer, the data reported in this release uses the data they submitted as at 31 July 2024.

The release is split into six sections:

1. **Responsibility for remediation**, indicating the number of buildings in England over 11 metres for which each developer is responsible as a result of the contract, the number of buildings being remediated under a government remediation scheme (such as the Building Safety Fund (BSF) or ACM Cladding Remediation Fund (ACM Fund)) and are being reimbursed by the developer, the number of buildings that developers are or will be remediating directly, the number of buildings where it remains to be determined whether remediation is required, the number of buildings where it is known that no remediation is required, and the number of buildings for which the developer has submitted a clause 5.4d(i) or d(ii) declaration.
2. **Remediation status**, showing the number and proportion of buildings to be remediated by the developer directly, and the number of those where remediation is yet to start, is in progress, or has been completed.
3. **Start dates**, showing the number and proportion of buildings that have not yet started remediation, where the developer has identified a date to start on site (within the next 12 months, after the next 12 months or where the date is unclear). This section also shows buildings due to start by financial year and the remediation status of the buildings due to start in the last quarter.
4. **Completion dates**, showing the number and proportion of buildings that have not yet completed remediation where the developer has identified a date to complete on (within the next 12 months, after the next 12 months or where the date is unclear). This section also shows buildings due to complete by financial year and the remediation status of the buildings due to be completed in the last quarter.
5. **Communication**, showing the number and proportion of buildings for which developers report having made contact with the leaseholders, freeholders and residents about remedial works on their buildings, and how they were contacted.

Previous releases included a table showing the number of buildings for which each developer had some form of assessment. As this covered a wider range of assessments than are valid under the Developer Remediation Contract, and did not show whether the developer had all the assessments required for a building, it is no longer included in this release. Table 1 should instead be used to

review the progress that each developer is making towards determining whether each of the buildings for which they are responsible requires remedial work.

## Developer-level data notes:

- 12 developers have five or fewer buildings (which may or may not require works). They are grouped together in the 'Other (combined total for all developers with five or fewer buildings each)' row in the data table to avoid inadvertently identifying buildings with life-critical fire safety defects. This row shows a single combined total for the following developers: Abbey Developments, Allison Homes, Bloor, CG Fry, Croudace, Emerson Group (Jones Homes), Hopkins, Keepmoat Homes, Rowland, Story Homes, Strata, William Davis. These developers remain in the data tables, and data that has been suppressed is indicated by an asterisk by their name (\*) in the table.
- The data table and narrative are based on quarterly data returns which have been submitted by the 54 developers' who have signed the developer remediation contract. The data is correct as at 31 October 2024, except for one developer (Frasers Property) who did not submit data within the deadline. For this developer, the data reported in this release uses the data they submitted as at 31 July 2024.
- Data for one developer that has gone into administration are not included in this release.

## 1. Responsibility for remediation

### Table 1: Buildings and remediation totals by developer

This table shows six metrics, by developer:

- The total number of buildings in England over 11m for which the developer has accepted responsibility under the contract. This includes buildings they built directly, as well as those built by other companies they have subsequently acquired. This is not the total number of buildings that need remediation: it also includes buildings that require no remediation and buildings where this is still to be determined.
- The number of buildings that are being remediated solely in a government remediation scheme and for which taxpayers will be reimbursed by the developer. These are buildings for which cladding defects are, or have been, remediated through the BSF or ACM Fund. If developers subsequently conduct assessments which also confirm the presence of non-cladding life-critical fire-safety defects (Other Non-External Wall Systems defects), these buildings will move to being reported under buildings which will be remediated by the developer directly.

- The number of buildings that will be fixed by the developer directly (rather than by reimbursing the government for work carried out by a government remediation fund). These are referred to as '*buildings being remediated by the developer directly*'. Please note that this includes some buildings which are being completed through the BSF and/or ACM programmes but have other life-critical fire safety defects (Other Non-External Wall Systems defects) which the developer is remediating themselves.
- The number of buildings where it is still to be determined whether remediation is required. This accounts for buildings for which the response to the question '*Does this building require works, as per the contract?*' was either left blank or given as either 'Don't Know – no assessment made', or 'Don't Know'. The greater the number of unknown buildings, the more likely it is that the number of buildings requiring works for the developer will increase in future. As assessments are carried out on more buildings, we expect this number to decrease.
- The number of buildings where it has been found to not require remediation, based on the data report question '*Does this building require works, as per the contract?*'.
- The number of buildings in England over 11m for which the developer has submitted a clause 5.4d(i) or d(ii) declaration, as per the contract.

A developer who has signed the developer remediation contract can rely on Clause 5.4D(i) or Clause 5.4D(ii) in the contract if it has no reasonable concerns that there are any fire-safety defects related to a building. The developer is obliged to include a declaration in its data report that it is not aware of information (including claims, issues and concerns) raised by any person (including leaseholders, residents, users, lenders or insurers) that there are or may be any defects relating to the building or any part of it.

**The data reported in this table for Frasers Property uses data reported as at 31 July 2024. For all other developers the data in this table uses data reported as at 31 October 2024.**

Where a row in this table is blank, this may reflect that the relevant developer has no buildings above 11m in height that are in scope, and/ or no buildings which require works.

## 2. Remediation status

### Table 2: Progress with remediation

**This table only includes buildings that have been assessed and found to require remediation and which will be remediated by the developer directly (*'buildings being remediated by the developer directly'*), rather than works being completed through a government fund and paid for by the developer.**

This table shows, by developer, the number and proportion of buildings that developers will directly remediate where:

- remediation has not started;
- remediation has started or completed;
- remediation has started;
- remediation has been completed and awaiting building sign-off control; and

- remediation has been completed

The data reported in this table for Frasers Property uses data reported as at 31 July 2024. For all other developers the data in this table uses data reported as at 31 October 2024.

Where a row in this table is blank, this may reflect that the relevant developer has no buildings above 11m in height that are in scope, and/ or no buildings which require works.

### 3.Start dates

#### Table 3: Start dates for remediation works

**This table only includes buildings that have been assessed and found to require remediation and which will be remediated by the developer directly (*'buildings being remediated by the developer directly'*), rather than works being completed through a government fund and paid for by the developer. Of those buildings, this section includes only those buildings which have not yet started, as per Table 2.**

It shows, by developer, the number and proportion of buildings where works have not yet started (as per the subset of buildings in Table 2) but where:

- The developer has indicated a forecast start date to be within the next 12 months (from 1 November 2024 – 31 October 2025)
- The developer has indicated a forecast start date to be after the next 12 months (after 31 October 2025)
- The start date is unclear from the data return. This is either because a date has not been provided or the date is reported to be in the past i.e., prior to the date of the data return

The data reported in this table for Frasers Property uses data reported as at 31 July 2024. For all other developers the data in this table uses data reported as at 31 October 2024.

Where a row in this table is blank, this may reflect that the relevant developer has no buildings above 11m in height that are in scope, and/ or no buildings which require works, and/ or no buildings that require works that have not started.

**Table 5: Progress on remediating buildings where works were due to start between 1 August 2024 – 31 October 2024.**

**This table only includes buildings that have been assessed and found to require remediation and which will be remediated by the developer directly (*'buildings being remediated by the developer directly'*), rather than works being completed through a government fund and paid for by the developer.**

It shows, by developer, the buildings reported by the developer as forecast to start in the last quarter (1 August 2024 – 31 October 2024) as defined by the previous data return the:

- Number of buildings that were forecast to start between 1 August 2024 – 31 October 2024; and
- Number and proportion of buildings that were forecast to start between 1 August 2024 – 31 October 2024, which have not yet started remediation; and
- Number and proportion of buildings that were forecast to start between 1 August 2024 – 31 October 2024, which have started as per the 31 October 2024 data return

The data reported in this table for Frasers Property uses data reported as at 31 July 2024. For all other developers the data in this table uses data reported as at 31 October 2024.

Where a row in this table is blank, this may reflect that the relevant developer has no buildings above 11m in height that are in scope, and/ or no buildings which require works, and/ or no buildings that were due to start in the relevant time period that have not started.

## 4. Completion dates

**Table 6: Completion dates for remediation works**

**This table only includes buildings that have been assessed and found to require remediation and which will be remediated by the developer directly (*'buildings being remediated by the developer directly'*), rather than works being**

**completed through a government fund and paid for by the developer. Of those buildings, this section includes only those building which have not yet completed, as per Table 2.**

It shows, by developer, the number and proportion of buildings with works that have not yet completed (as per the subset of buildings in Table 2), where:

- The developer has indicated a forecast completion date to be within the next 12 months (from 1 November 2024 – 31 October 2025).
- The developer has indicated a forecast completion date to be after the next 12 months (after 31 October 2025)
- The completion date is unclear from the data return. This is either because a date has not been provided or the date is reported to be in the past i.e., prior to the date of the data return

**The data reported in this table for Frasers Property uses data reported as at 31 July 2024. For all other developers the data in this table uses data reported as at 31 October 2024.**

Where a row in this table is blank, this may reflect that the relevant developer has no buildings above 11m in height that are in scope, and/ or no buildings which require works, and/ or no buildings that required works that have not completed.

### Table 7: Completion dates by Financial Year

This table only includes buildings that have been assessed and found to require remediation and which will be remediated by the developer directly (*'buildings being remediated by the developer directly'*), rather than works being completed through a government fund and paid for by the developer. Of those buildings, this section includes only those building which have not yet completed, as per Table 2.

It shows, by developer, the number of buildings with works that have not yet completed (as per the subset of buildings in Table 2), where:

- The developer has indicated a forecast completion date, by financial year.
- No completion date has been provided.

The data reported in this table for Frasers Property uses data reported as at 31 July 2024. For all other developers the data in this table uses data reported as at 31 October 2024.

Where a row in this table is blank, this may reflect that the relevant developer has no buildings above 11m in height that are in scope, and/ or no buildings which require works, and/ or no buildings that required works that have not completed.

## 5.Communication

### Table 9: Communication with residents and responsible entities

**This table only includes buildings that have been assessed and found to require remediation and which will be remediated by the developer directly (*'buildings being remediated by the developer directly'*), rather than works being completed through a government fund and paid for by the developer. This section also excludes all buildings which have completed remediation, as per Table 2.**

It shows, by developer, of those buildings remediated by the developer, excluding completed buildings (including completed buildings awaiting building control sign-off) the:

- Number and proportion of buildings requiring works, excluding those that have completed remediation, where the developer reports that all relevant parties have been contacted either: directly, via the Responsible Entity, both directly and via Responsible Entity, or by an undisclosed method.
- Number of buildings that the developer reports are due to receive communication.
- Proportion of communication across all buildings that the developer reports are due to be contacted.

**The data reported in this table for Frasers Property uses data reported as at 31 July 2024. For all other developers the data in this table uses data reported as at 31 October 2024.**

Where a row in this table is blank, this may reflect that the relevant developer has no buildings above 11m in height that are in scope, and/ or no buildings which require works, and/ or no buildings that required works that have not completed.

**Table 9: Communication with residents and responsible entities**

Developer	Number of buildings where the developer or 'responsible entity' has reportedly engaged with leaseholders, freeholders, residents, occupiers and other users regarding buildings being remediated directly by the developer, excluding completed buildings...								Number of buildings that have not completed remediation but are expected to have communication	Total sum of contact (%)
	... via Responsible Entity	(%)	.. directly	(%)	... directly and via Responsible Entity	(%)	... unconfirmed how	(%)
