

Application for a community bus permit

About this form

You should complete this form if you wish to apply for a permit under section 22 of the Transport Act 1985. **Note: a single legal entity cannot hold both a permit under the Transport Act 1985 and an operator's licence under the Public Passenger Vehicles Act 1981.**

Section 22 Permits

Section 22 permits are issued to bodies concerned for the social and welfare needs of one or more communities. A permit allows the holder to operate vehicles to provide community bus service services for hire or reward without the need for a public service vehicle (PSV) operator's licence, provided the services are carried without a view to profit, either on the part of that body or of anyone else.

Community bus services are 'local bus services' and can carry the general public. Local bus services are defined as services using public service vehicles for the carriage of passengers by road at separate fares on which passengers may travel for less than 15 miles.

Vehicles adapted to carry 9 or more passengers (excluding the driver) may be used under a community bus permit. This includes large buses adapted to carry 17 or more passengers. As a permit holder you have a responsibility to make sure that your services are operated within the law, with vehicles properly maintained and using drivers with the appropriate qualifications.

Only organisations which meet at least one of the following exemptions can apply for a section 22 permit.

Exemptions

- Non-commercial purposes – An applicant should be satisfied that its overall purpose in providing road passenger transport and all of those services are exclusively non-commercial.
- Main occupation – In order to meet this exemption an applicant's road passenger transport operation must be ancillary or complementary to another activity, which must demonstrably be their main occupation.
- Short distance – Only applicants engaged exclusively in national transport operations and which have only a minor impact on the transport market because of the short distances involved can rely upon this exemption. Short distance is generally regarded as those services within a ten-mile radius or length, although longer distances can be considered in certain circumstances.
