Subject: Re: Mobile browsers and cloud gaming - Provisional Decision
Date: 13 December 2024 15:28:01

Dear Browsers and Cloud Team,

We fully support the findings in the CMA's Provisional Decision on Mobile Browsers and Cloud Gaming, including the recommendation to prioritize designating Mobile Ecosystems under the DMCCA. Additionally, we agree that the scope of such SMS investigations should include the supply of mobile browsers, browser engines, and in-app browsing technology.

We strongly believe there will be material benefits for consumers and for business users if investigations into the designation of Search Engines are commenced concurrently to those for Mobile Ecosystems, including the supply of Mobile Browsers, since many of the relevant Conduct Rules will be complimentary.

Once again, we thank you for your work in this areas and encourage you to move forward with implementing the remedies proposed in the Provisional Decision report as quickly as possible.

Best regards

DuckDuckGo Team
