Part II. Certification
Animal Health

I, the undersigned official veterinarian, hereby certify, that the animal casings described in Part I of this certificate:

AH/P202 Product requirements

are derived from bovine, ovine, caprine or porcine animals that are not from a premises under restriction for a notifiable disease

AH/P607 Product requirements (for casings derived from animals other than bovine, ovine, caprine or porcine animals)

have been cleaned, scraped and:

- (*) **EITHER** [salted with NaCl for 30 days;]
- (*) **AND/OR** [bleached;]
- (*) **AND/OR** [dried after scraping;]

AH/P716 Product requirements

- (*) **EITHER** [they are processed from bladders and/or intestines obtained from bovine, ovine, caprine or porcine animals from territories/zones with code which is/are eligible for imports of fresh meat of the relevant species without any supplementary guarantees for that species, except supplementary guarantee 'G', indicated in column 5 of the document relating to 'fresh meat of ungulates' published on GOV.UK, in accordance with Regulation (EU) No 206/2010.(†);]

II.a. Certificate reference no.	II.b.
---------------------------------	-------

- (*)**OR** [have been processed from bladders and/or intestines obtained from (*)[bovine], (*)[ovine and/or caprine], (*)[porcine animals] and during their processing have been:]
- (*)**EITHER** [salted with sodium chloride (NaCl), either dry or as saturated brine ($aw < 0.80$), for a continuous period of 30 days or longer, at temperature of 20°C or above;]
- (*)**OR** [salted with phosphate supplemented salt containing 86.5% NaCl, 10.7% Na₂HPO₄ and 2.8% Na₃PO₄ (weight/weight/weight), either dry or as saturated brine ($aw < 0.80$), for a continuous period of 30 days or longer, at a temperature of 20°C or above;]

AH/P903 Product requirements

have undergone all precautions to avoid recontamination after treatment;

Public Health

I hereby certify that the animal casings described in Part I of this certificate:

PH/D007 Bovine spongiform encephalopathy (BSE)

(*)[if containing material from bovine, ovine or caprine animals the following conditions must be met:

- (*)**EITHER** (1) [the country or region is classified with a negligible BSE risk and;
- (a) the animals from which the products were derived passed ante and post-mortem inspections;
 - (*)[(b) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning;]
 - (*)[(c) the product does not contain and is not derived from specified risk material in compliance with GB regulations;]
 - (*)[(d) if the product contains or is derived from bovine, ovine or caprine mechanically separated meat that it complies with GB regulations; and]
 - (*)[(e) if the animals originate from a country or region classified with an undetermined BSE risk and:
 - (i) they have not been fed with meat-and-bone meal or greaves, and
 - (ii) the product was produced and handled in compliance with GB regulations with regard to contamination with nervous and lymphatic tissues;]]
- (*)**AND/OR** (2) [the country or region is classified with a controlled BSE risk and;
- (a) the animals from which the products were derived passed ante and post-mortem inspections;
 - (b) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning; and
 - (*)[(c) the product does not contain and is not derived from specified risk material or mechanically separated meat in compliance with GB regulations;]
 - (*)[(d) the intestines were sourced from a country or region with negligible BSE risk and are derived from animals that were born, continuously reared and slaughtered in a country with negligible BSE risk that passed ante and post-mortem inspections, and
 - (*)**EITHER** (i) if the intestines were sourced from a country where there have been BSE indigenous cases, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced;]
 - (*)**OR** (ii) if the intestines were sourced from a country where there have been BSE indigenous cases, the meat products do not contain and are not derived from specified risk material in accordance with GB regulations;]]]]

II.a. Certificate reference no.	II.b.
---------------------------------	-------

- (*) **AND/OR (3)** [the country or region is classified with an undetermined BSE risk and;
- (a) the animals from which the products are derived were not fed meat-and-bone meal or greaves derived from ruminants and passed ante and post-mortem inspections;
 - (b) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning; and
 - (*)[(c) the product does not contain and is not derived from specified risk material, nervous and lymphatic tissues exposed during the deboning process; or mechanically separated meat. in compliance with GB regulations;]
 - (*)[(d) the intestines were sourced from a country or region with negligible BSE risk and are derived from animals that were born, continuously reared and slaughtered in a country with negligible BSE risk that passed ante and post-mortem inspections, and
 - (*) **EITHER** (i) if the intestines were sourced from a country where there have been BSE indigenous cases, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced;]
 - (*) **OR** (ii) if the intestines were sourced from a country where there have been BSE indigenous cases, the meat products do not contain and are not derived from specified risk material in accordance with GB regulations;]]]]

(*) Keep as appropriate.

Official Veterinarian

By signing this certificate, I certify that the requirements laid out above and in the accompanying notes for completion have been met.

Name (in capital letters):

Qualification and title:

Date:

Signature:

Stamp:

Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been assimilated in Great Britain (assimilated EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

Part I

- Box reference I.15: The registration number(s) of railway wagons or lorry and the name of the ship should be given as appropriate. If known, the flight number of the aircraft. In case of transport in containers or boxes, the total number, their registration and seal numbers, if present, should be indicated under point I.23.
- Box reference I.28: Treatment that has been applied from the options listed in the Animal Health attestation in AH/P607 or AH/P716.

Part II

Animal Health

AH/P202 Product requirements

No further notes for completion.

AH/P607 Product requirements (for casings derived from animals other than bovine, ovine, caprine or porcine animals)

No further notes for completion.

AH/P716 Product requirements

No further notes for completion.

AH/P903 Product requirements

No further notes for completion.

Public Health

PH/D007 Bovine spongiform encephalopathy (BSE)

The following must be certified if the intestines used in the preparation of casings contain material from bovine, ovine or caprine animals, depending on the BSE category of the country of origin:

- (1) This must be certified when the import is from a country or region classified as a country or region posing a negligible BSE risk in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) 999/2001.^(‡)
 - (a) The animals, from which the products of bovine, ovine and caprine origin were derived, have passed ante-mortem and post-mortem inspections.
 - (b) The animals, from which the products of bovine, ovine and caprine animal origin were derived have not been slaughtered after stunning by means of gas injected into the cranial cavity or killed by the same method or slaughtered by laceration after stunning of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, except if the

Casings (CAS)
GBHC370

animals from which the products of bovine, ovine and caprine animal origin are derived, were born, continuously reared and slaughtered in a country or region classified in accordance with Regulation (EC) No 999/2001 as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001.^(‡)

- (c)** The products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to this Regulation.

The removal of specified risk material is not required if the products of bovine, ovine and caprine animal origin derive from animals born, continuously reared and slaughtered in a third country or region of a third country classified in accordance with Regulation (EC) No 999/2001 as posing a negligible BSE risk as set out in a document relating to 'BSE risk status'.^(‡)

- (d)** If the products of bovine, ovine and caprine animal origin contain or are derived from mechanically separated meat (MSM) obtained from bones of bovine, ovine and/or caprine animals, they have been obtained from animals of those species which were born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk in a document relating to 'BSE risk status' published on GOV.UK^(‡), in accordance with Regulation (EC) No 999/2001, and in which there have been no BSE indigenous cases.

If the above conditions are not met, then the meat products must not contain or be derived from MSM from those species.

- (e)** This attestation is applicable when condition (i) below in relation to bovine, ovine and/or caprine animals is met. In that case conditions (ii) and (iii) must also be met:
- (i)** the animals, from which the products are derived, originate from a country or region classified as posing an undetermined BSE risk as set out in a document relating to "BSE risk status" published on GOV.UK^(‡), in accordance with Regulation (EC) No 999/2001;
 - (ii)** the animals, from which the products are derived, have not been fed with meat-and-bone meal or greaves, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health;
 - (iii)** the products were produced and handled in a manner which ensures that they do not contain and were not contaminated with nervous and lymphatic tissues exposed during the deboning process.

- (2)** This must be certified when the import is from a country or region classified as posing a controlled BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001.^(‡)

- (a)** The animals, from which the products of bovine, ovine and caprine origin were derived, have passed ante-mortem and post-mortem inspections.
- (b)** The animals from which the products of bovine, ovine and caprine animal origin destined for export were derived have not been killed, after stunning, by laceration of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity.
- (c)** The products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001, or mechanically separated meat obtained from bones of bovine, ovine or caprine animals.

The removal of specified risk material is not required if the products of bovine, ovine and caprine animal origin derive from animals born, continuously reared and slaughtered in a third country or region of a third country classified in accordance with Regulation (EC) No 999/2001 as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK.^(‡)

- (d)** In the case of intestines originally sourced from a country or a region with a negligible BSE risk, imports of treated intestines shall be subject to the presentation of an animal health certificate attesting that:

**Casings (CAS)
GBHC370**

- (i) the country or region is classified in accordance with Regulation (EC) No 999/2001 as posing a controlled BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK; (‡)
 - (ii) the animals from which the products of bovine, ovine and caprine animal origin were derived were born, continuously reared and slaughtered in the country or region with a negligible BSE risk and passed ante mortem and post mortem inspections;
 - (iii) if the intestines are sourced from a country or region where there have been BSE indigenous cases:
 - the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced; or
 - the products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001.
- (3) This must be certified when the import is from a country or region that is classified as a country or region with an undetermined BSE risk, in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001. (‡)
- (a) The animals from which the products of bovine, ovine and caprine animal origin were derived have not been fed meat-and-bone meal or greaves derived from ruminants, as defined in the WOA (formerly OIE) Terrestrial Animal Health Code, and passed ante mortem and post mortem inspections.
 - (b) The animals from which the products of bovine, ovine and caprine animal origin were derived have not been killed, after stunning, by laceration of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity.
 - (c) No further notes for completion.
 - (d) In the case of intestines originally sourced from a country or a region with a negligible BSE risk, imports of treated intestines shall be subject to the presentation of an animal health certificate attesting that:
 - (i) the country or region is classified in accordance with Regulation (EC) No 999/2001 as posing an undetermined BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK; (‡)
 - (ii) the animals from which the products of bovine, ovine and caprine animal origin were derived were born, continuously reared and slaughtered in the country or region with a negligible BSE risk and passed ante mortem and post mortem inspections;
 - (iii) if the intestines are sourced from a country or region where there have been BSE indigenous cases:
 - the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced; or
 - the products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to this Regulation.
