Introductory note

This introductory note does not form a part of the notice

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. Only the variations specified in schedule 1 are subject to a right of appeal.

The schedules specify the changes made to the permit.

This variation authorises the following changes:

To incorporate the addition of a waste operation (Non-hazardous household, commercial, and industrial waste transfer station). The activity will be undertaken within a fully enclosed building and will have a treatment capacity of 100,000 tonnes per year. There are no point source emissions from the new activity.

The limits for the landfill activities are not changing as a result of this variation. The site plan has been updated to show the location of the MRF building.

This variation has consolidated the original permit.

The permit consists of installation activity for a non-hazardous landfill and directly associated activities as described in table S1.1.

The status log sets out the permitting history, including any changes to the permit reference number.
