No:

EXPORT OF HATCHING EGGS OF POULTRY⁽¹⁾ TO THE UNITED STATES OF AMERICA
HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM (GREAT BRITAIN & NORTHERN IRELAND)

ISSUING COMPETENT AUTHORITY: (*)APHA (GB) / (*)DAERA (N. IRELAND)

FOR COMPLETION BY: OFFICIAL VETERINARIAN

I. Number and identification of the hatching eggs

a)

Number	Identification	Breed

b) United States of America (USA) Import Permit No:

II. Origin of the hatching eggs

a) Name and address of exporter:

b) Address(es) of all flock(s) of origin:

III. Destination of the hatching eggs

a) Name and address of consignee in USA:

b) Means of transportation:

IV. Health Information

I, the undersigned, certify that the hatching eggs described above meet the following requirements:

a) During the 90 days prior to export the flocks of origin of the hatching eggs to be exported were:

- i. as far as it has been possible to determine, not exposed to **highly pathogenic avian influenza** (HPAI) or **Newcastle disease** (avian paramyxovirus-1);
- ii. not in any country, region or zone established because of the detection of Newcastle disease or HPAI in poultry;
- iii. inspected on the premises of origin prior to movement of the eggs for export and were found to be clinically free of signs of communicable diseases of poultry;

b) on (date), being within 30 days prior to the date of shipment, fresh environmental samples were collected at random within the shed in which the flock(s) of origin were housed and were tested bacteriologically for the presence of **Salmonella enteritidis** at a laboratory approved under a national control programme for salmonella implementing European Council Regulation 2160/2003, and the samples gave a negative result in every case and there was no evidence or knowledge of Salmonella enteritidis present in the flock;

c)* (delete in the case of hatching eggs from turkeys) within 90 days prior to the date of export at least 5 percent, or a minimum of 150 birds in each flock of origin were tested for **egg drop syndrome (EDS, or adenovirus 127)** with negative results in each case;

d)* (delete in the case of hatching eggs from waterfowl species) The flock(s) of origin of the hatching eggs were tested negative within the previous 90 days for **Avian Metapneumovirus** [also known as Turkey Rhinotracheitis (TRT), Avian Rhinotracheitis, or Swollen Head]; tested by using 30 birds per house by any of the following methods: *rRT-PCR, or *ELISA, or *serology. The flock(s) of origin ***are/are not vaccinated** against this disease;

Name of vaccine manufacturer and date of vaccination (if applicable):

e) The flocks of origin have not been vaccinated against subtypes H5 or H7 or any other subtype of **avian influenza**;

f) **EITHER*** (i) the flocks of origin have been vaccinated against **Newcastle disease** (avian paramyxovirus) at least 21 days prior to export, using vaccines that do not contain any velogenic strains of Newcastle disease.

No:

Name of vaccine manufacturer and date of vaccination:

OR* (ii) the flocks of origin have not been vaccinated against Newcastle disease.

g) The hatching eggs have been cleaned and **sanitized** as soon as possible after collection using an approved-for-use sanitizing agent in accordance with the manufacturer's instructions. Hatching eggs have been packed in clean or appropriately sanitized shipping materials.

h) The hatching eggs of poultry did not originate at the time of collection (flock of origin) from any zones within the APHIS-defined European Poultry Trade Region (EPT^R)⁽²⁾, AND based on the information received, ***did not travel / *did travel under official seal**⁽³⁾ through a restricted zone in the EPT^R established because of detection of HPAI or Newcastle disease in poultry from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the country, or until 90 days after depopulation of all affected premises, followed by cleaning and disinfection of the last affected premises, in that zone, whichever is later.

i) the hatching eggs were not commingled with other hatching eggs that have, at any time, been in any region or zone of lesser health status than described in this health certificate.

* Delete whichever is not applicable

V. This certificate is valid for 30 days.
