Executive summary

On 24 February 2022, Russia launched a full-scale land, sea and air invasion of Ukraine. The war is ongoing with the heaviest fighting taking place in regions within closest proximity to the Ukraine-Russia border, together with periodic missile strikes on civilian and military infrastructure across the country.

The incidence of civilian fatalities has fallen since the start of the conflict. United Nations data indicates 11,973 civilian deaths between 24 February 2022 and 30 September 2024, with 72% of these deaths occurring during the first 11 months of the war.

The war is mainly concentrated in the east of Ukraine. In the 6-month period between 19 April 2024 and 18 October 2024, ACLED data indicates a total of 25,981 conflict events, and 947 civilian deaths with 8 of the country's 27 administrative divisions accounting for over 97% of total conflict events and 89% of civilian deaths. These 8 regions - Donetsk, Kharkiv, Zaporizhzhia, Kherson, Luhansk, Sumy, Dnipropetrovsk and Chernihiv - are all located in the East, Southeast and Northeast parts of the country.

In the areas of Ukraine outside of the main areas of conflict, a person is, in general, unlikely to face a real risk of serious harm resulting from indiscriminate violence in a situation of armed conflict. However, while the conflict is ongoing, the situation remains fluid and decision makers will need to consider up-to-date information.

Freedom of movement is generally not restricted in areas under government control, and movement continues into and out of the country. A person is likely to be able to internally relocate to a part of Ukraine away from the main conflict area.

There is a functioning law enforcement system and there has been no general breakdown of law and order in areas under Ukrainian government control.

Ukraine is listed as a designated state under section 94 of the Nationality, Immigration and Asylum Act 2002. However, due to the ongoing conflict, where a claim is refused, it is unlikely to be certifiable as 'clearly unfounded'.

All cases must be considered on their individual facts, with the onus on the person to demonstrate they face persecution or serious harm.

Assessment

Section updated: 5 November 2024

About the assessment

This section considers the evidence relevant to this note – that is the [country information](#), refugee/human rights laws and policies, and applicable caselaw – and provides an assessment of **whether, in general**:

- the security situation is such that there are, or are not, substantial grounds for believing there is a real risk of serious harm because there exists a serious and individual threat to a civilian’s life or person by reason of indiscriminate violence in a situation of international or internal armed conflict as within [paragraphs 339C and 339CA\(iv\) of the Immigration Rules](#)
- internal relocation is possible or not possible, to avoid serious harm
- a claim, if refused, is likely or not to be certified as ‘clearly unfounded’ under [section 94 of the Nationality, Immigration and Asylum Act 2002](#).

Decision makers **must**, however, consider all claims on an individual basis, taking into account each case’s specific facts.

[Back to Contents](#)

1. Material facts, credibility and other checks/referrals

1.1 Credibility

- 1.1.1 For information on assessing credibility, see the instruction on [Assessing Credibility and Refugee Status](#)
- 1.1.2 Decision makers must also check if there has been a previous application for a UK visa or another form of leave. Asylum applications matched to visas should be investigated prior to the asylum interview (see the [Asylum Instruction on Visa Matches, Asylum Claims from UK Visa Applicants](#)).
- 1.1.3 Decision makers must also consider making an international biometric data-sharing check (see [Biometric data-sharing process \(Migration 5 biometric data-sharing process\)](#)).
- 1.1.4 In cases where there are doubts surrounding a person’s claimed place of origin, decision makers should also consider language analysis testing, where available (see the [Asylum Instruction on Language Analysis](#)).

Official – sensitive: Not for disclosure – Start of section

The information in this section has been removed as it is restricted for internal Home Office use.

Official – sensitive: Not for disclosure – End of section

[Back to Contents](#)

1.2 Exclusion

- 1.2.1 Decision makers must consider whether there are serious reasons for considering whether one (or more) of the exclusion clauses is applicable. Each case must be considered on its individual facts.
- 1.2.2 If the person is excluded from the Refugee Convention, they will also be excluded from a grant of humanitarian protection (which has a wider range of exclusions than refugee status).
- 1.2.3 For guidance on exclusion and restricted leave, see the Asylum Instruction on [Exclusion under Articles 1F and 33\(2\) of the Refugee Convention, Humanitarian Protection](#) and the instruction on [Restricted Leave](#).

Official – sensitive: Not for disclosure – Start of section

The information in this section has been removed as it is restricted for internal Home Office use.

Official – sensitive: Not for disclosure – End of section

[Back to Contents](#)

2. Convention reason(s)

- 2.1.1 A severe security situation does not in itself give rise to a well-founded fear of persecution for a Refugee Convention reason.
- 2.1.2 In the absence of a link to one of the 5 Refugee Convention grounds necessary to be recognised as a refugee, the question to address is whether the person will face a real risk of serious harm in order to qualify for Humanitarian Protection (HP).
- 2.1.3 However, before considering whether a person requires protection because of the general security situation, decision makers must consider if the person faces persecution for a Refugee Convention reason. Where the person qualifies for protection under the Refugee Convention, decision makers do not need to consider if there are substantial grounds for believing the person faces a real risk of serious harm meriting a grant of HP.
- 2.1.4 For further guidance on the 5 Refugee Convention grounds, see the Asylum Instruction, [Assessing Credibility and Refugee Status](#). For guidance on HP see the Asylum Instruction, [Humanitarian Protection](#).

[Back to Contents](#)

3. Risk

- 3.1.1 In general, in areas where Ukrainian forces are not directly engaging with the Russian military, or facing frequent missile attacks, the level of indiscriminate violence is **not** at such a high level to mean that, within the meaning of Paragraphs 339C and 339CA(iv) of the Immigration Rules, there are substantial grounds for believing there is a real risk of serious harm to a civilian's life or person solely by being present there.
- 3.1.2 At the time of writing, the war in Ukraine is concentrated in the eastern,

southeastern and northeastern parts of the country, the regions within closest proximity to Russia. However, the situation remains fluid as the conflict is ongoing. Decision makers should consult sources and tools such as [ACLEd's Ukraine Conflict Monitor](#) for ongoing and near real-time information when considering cases.

- 3.1.3 In areas where Ukrainian forces are currently, directly engaging with the Russian military, namely Donetsk, Kharkiv, Zaporizhzhia, Kherson, Chernihiv and Luhansk - or where there are frequent missile attacks, including Sumy, Dnipropetrovsk and Mykolaiv - the level of indiscriminate violence is at such a high level that, within the meaning of Paragraphs 339C and 339CA(iv) of the Immigration Rules, there are substantial grounds for believing that a civilian would, solely on account of their presence in those regions, face a real risk of serious harm (see [Conflict between armed forces](#) and [Location and nature of conflict events](#)).
- 3.1.4 Even where there is not in general a real risk of serious harm by reason of indiscriminate violence in a situation of armed conflict, a person may still face a real risk of serious harm if they can show there are specific reasons over and above simply being a civilian affected by indiscriminate violence.
- 3.1.5 Paragraphs 339C and 339CA (iv) of the Immigration Rules **only** apply to civilians who must be non-combatants. This could include former combatants who have genuinely and permanently renounced armed activity.
- 3.1.6 On 24 February 2022 Russia launched a full-scale land, sea and air invasion of Ukraine, entering across Ukraine's southern, eastern and northern borders (see [Russian invasion of Ukraine](#)). After failing to take Kyiv in the first few months, Russian attacks focused on the south and east of the country. Fighting continues along several fronts in the east of Ukraine as well as periodic missile attacks on civilian and military infrastructure across the country (see [Territorial control](#) and [Location and nature of conflict events](#)).
- 3.1.7 The invasion precipitated large population movements. The United Nations estimated Ukraine's population dropped from 44.3 million in 2021 to 41 million in 2022 and 37.7 million in 2023. In December 2024, World Population Review estimated the population of Ukraine to be 38.2 million based on projections of the latest UN data. Most of those who left Ukraine were women and children (see [Population](#)).
- 3.1.8 Movement in and out of the country has continued. From 24 February 2022 to 15 October 2024, over 40 million cross-border movements (not individuals) **from** Ukraine were recorded and over 36.9 million cross-border movements (not individuals) **into** Ukraine were recorded by the UNHCR and the Government of Ukraine. In February 2024, the UNHCR reported more than one million movements in each direction, from and to Ukraine, each month, during 2023 (see [Displacement](#)).
- 3.1.9 The invasion caused mass internal displacement from the south and east to safer locations in the central and western regions, as well as internal displacement within eastern Ukraine. In October 2024, the International Organisation for Migration (IOM) identified approximately 3.6 million internally displaced persons (IDPs) in Ukraine, mainly from the eastern oblasts (regions). The IOM reported the largest number of IDPs moved to

the eastern oblasts of Dnipropetrovsk (509,000, 14% of the total IDP population) and Kharkiv (440,000, 12%). In addition, 374,000 (11%) moved to Kyiv City and 304,000 (9%) to the surrounding Kyiv Oblast (see [Displacement](#)).

- 3.1.10 Data on conflict-related events and casualties varies by source. However, all sources acknowledge incomplete data due to difficulties gaining access to conflict areas, meaning numbers of conflict events and casualties may be higher. Between 24 February 2022 and 18 October 2024, the Armed Conflict Location & Event Data Project (ACLED) recorded 128,110 conflict-related events, including battles, explosions, and violence against civilians, recording 8,609 civilian deaths as of 18 October 2024. As of 30 September 2024, the UN Office of the High Commissioner for Human Rights (OHCHR) reported 37,916 civilian casualties (11,973 killed and 25,943 injured) since the invasion began. Action on Armed Violence (AOAV) recorded 27,479 civilian casualties (7,001 killed and 20,478 injured) from explosive attacks between 24 February 2022 and 23 September 2024 (see [All Conflict-related events: number, location and period](#) and [Civilian fatalities and injuries](#)). All sources are consistent in their reporting that most civilian fatalities and injuries are the result of explosive weapons (see Weapon and incident type).
- 3.1.11 In the six-month period between 19 April 2024 and 18 October 2024, ACLED recorded 25,981 conflict events, an average of 143 per day. The 8 worst affected of Ukraine's 27 administrative divisions, (according to the number of events recorded), are in the east of the country, including southeastern and northeastern border areas. These oblasts are Donetsk, Sumy, Kharkiv, Kherson, Zaporizhzhia, Chernihiv, Luhansk and Dnipropetrovsk and they account for over 97% (25,345) of conflict events. Donetsk alone accounts for 36% (9,351) of conflict events during the same period (see [All Conflict-related events: number, location and period](#)).
- 3.1.12 ACLED data indicates 947 civilian fatalities in the six-month period between 19 April 2024 and 18 October 2024, mainly occurring in the east of the country, including southeastern and northeastern border areas. The 8 oblasts with the highest number of conflict events, account for 89% (844) of civilian fatalities (Donetsk (287), Sumy (80), Kharkiv (183), Kherson (155), Zaporizhzhia (44), Chernihiv (5), Luhansk (10) and Dnipropetrovsk (80). During this period there were 36 civilian deaths in Odesa and 34 in Kyiv City (see [Geographical variation](#)).
- 3.1.13 The incidence of civilian deaths has fallen over time. OHCHR data indicates 8,622 civilian deaths in the first 11 months of the war (before the start of February 2023). This represents 72% of the 11,973 civilian deaths OHCHR recorded between the start of the war and 30 September 2024. ACLED data indicates over 5,400 civilian deaths during the first 12 months of the war, representing 63% of the 8,609 ACLED recorded over the 32-month period between the invasion on 24 February 2022 and 18 October 2024 (see [Variation over time](#)).
- 3.1.14 ACLED has developed a measure called 'conflict exposure', which estimates the number of people affected by the conflict by combining conflict event locations with local population data. According to ACLED, in the 6 months from 19 April 2024 to 18 October 2024, the conflict exposure in Ukraine is

12,848,096 people, or 35% of the population. It should be considered that ACLED notes that this measure may be less accurate due to displacement and it does not distinguish between individuals exposed to single or multiple conflict events (see [Conflict exposure](#)).

- 3.1.15 The proportion of conflict-related civilian casualties (deaths and injuries) overall remains relatively low with 0.099% of the population injured or killed since the start of the invasion (based on OHCHR figures, the highest of the available estimates, up to 30 September 2024 (37,916) and a current population of 38.2 million). Assuming the number of civilian fatalities is at the level of the highest estimate (from OHCHR) of 11,973, this represents 0.03% of the population. The population and casualty figures vary over time and, as previously mentioned, all sources acknowledge incomplete data meaning numbers of casualties may be higher, but even if the 0.03% was increased ten-fold, this is not illustrative of a generalised real risk (see [Population and Civilian fatalities and injuries](#)).
- 3.1.16 There is a functioning law enforcement system and there has been no general breakdown of law and order in areas under Ukrainian government control (see [Law and order](#)).
- 3.1.17 For guidance on considering serious harm where there is a situation of indiscriminate violence in an armed conflict, including consideration of enhanced risk factors, see the Asylum Instruction, [Humanitarian Protection](#).
- 3.1.18 For further guidance on assessing risk, see the Asylum Instruction on [Assessing Credibility and Refugee Status](#).

[Back to Contents](#)

4. Internal relocation

- 4.1.1 Ukraine is the second largest country in Europe with an estimated population of 38 million. The population density is estimated to be 65.35 people per square km, based on UN data. It has 27 administrative divisions; 24 oblasts (regions), one Autonomous Republic (Crimea) and two cities with special status (Kyiv and Sevastopol) (see [Geography and Demography](#)).
- 4.1.1 A person is likely to be able to internally relocate to escape serious harm. This is because, in general, there are parts of Ukraine (such as Kyiv, or the western oblasts furthest from direct conflict, for example Chernivtsi, Zakarpattia, Ternopil, Rivne, Ivano-Frankivsk, Lviv or Volyn) where it will be reasonable to expect a person to relocate. Decision makers must consider each case on its facts using up-to-date information on the conflict (see [Location and nature of conflict events](#) and [ACLED Ukraine Conflict Monitor](#)).
- 4.1.2 Freedom of movement is allowed for in law. Since the outbreak of the conflict, freedom of movement has been limited due to conflict-related risks close to the frontline and legal restrictions imposed under martial law. However, the restrictions on movement are proportionate and freedom of movement is generally not restricted in areas under government control.
- 4.1.3 For further guidance on considering internal relocation and factors to be taken into account see the Asylum Instruction on [Assessing Credibility and Refugee Status](#).

[Back to Contents](#)

5. Certification

- 5.1.1 Ukraine is listed as a designated state under section 94 of the Nationality, Immigration and Asylum Act 2002. However, due to the ongoing conflict, where a claim is refused, it is unlikely to be certifiable as 'clearly unfounded'.
- 5.1.2 For further guidance on certification, see [Certification of Protection and Human Rights claims under section 94 of the Nationality, Immigration and Asylum Act 2002 \(clearly unfounded claims\)](#).

[Back to Contents](#)

Country information

About the country information

This section contains publicly available or disclosable country of origin information (COI) which has been gathered, collated and analysed in line with the [research methodology](#). It provides the evidence base for the assessment.

The structure and content follow a [terms of reference](#) which sets out the general and specific topics relevant to the scope of this note.

This document is intended to be comprehensive but not exhaustive. If a particular event, person or organisation is not mentioned this does not mean that the event did or did not take place or that the person or organisation does or does not exist.

The COI included was published or made publicly available on or before 5 November 2024. Any event taking place or report published after this date will not be included.

Decision makers must use relevant COI as the evidential basis for decisions.

[Back to Contents](#)

6. Russian invasion of Ukraine

6.1.1 In March 2014, Russia took control of Crimea, which it illegally annexed after a 'sham' referendum¹.

6.1.2 Below is a map of Ukraine prior to the February 2022 invasion showing Crimea under Russian control and the regions (oblasts) of Donetsk and Luhansk in the east of the country held by Russian-backed separatists²:

6.1.3 In May 2024, the Center for Preventive Action, part of the Council on Foreign Relations (CFR), an independent think-tank³, noted:

¹ FCDO, [Seventh anniversary of Russia's illegal annexation of Crimea: UK statement](#), 4 March 2021

² BBC News, [Ukraine in maps: Tracking the war with Russia](#), 17 May 2023

³ CFR, [Center for Preventive Action | Council on Foreign Relations](#), no date

'The crisis heightened ethnic divisions, and two months later, pro-Russian separatists in the eastern Ukrainian regions of Donetsk and Luhansk held their own independence [referendums](#).

'Armed conflict in the regions quickly broke out between Russian-backed forces and the Ukrainian military. Russia denied military involvement, but both Ukraine and the North Atlantic Treaty Organization (NATO) [reported](#) the buildup of Russian troops and military equipment near Donetsk and Russian cross-border shelling immediately following Crimea's annexation. The conflict transitioned to an active stalemate, with regular [shelling](#) and skirmishes occurring along frontlines separating Russian- and Ukrainian-controlled eastern border regions...

'In mid-December 2021, Russia's foreign ministry called on the United States and NATO to cease military activity in Eastern Europe and Central Asia, commit to no further NATO expansion toward Russia, and prevent Ukraine from joining NATO in the future. The United States and other NATO allies rejected these demands and threatened to impose severe economic [sanctions](#) if Russia took aggressive action against Ukraine...

'In early February 2022, satellite imagery [showed](#) the largest deployment of Russian troops to its border with Belarus since the end of the Cold War. Negotiations between the [United States](#), Russia, and European powers—including [France](#) and [Germany](#)—failed to bring about a resolution... President Putin then [ordered](#) troops to Luhansk and Donetsk, [claiming](#) the troops served a "peacekeeping" function.⁴

On 23 February 2022, the Ukraine parliament declared a state of emergency across Ukraine⁵.

- 6.1.4 CFR reported, 'On 24, February 2022... Putin announced the beginning of a full-scale land, sea, and air invasion of Ukraine, targeting Ukrainian military assets and cities across the country. Putin claimed that the goal of the operation was to demilitarize and denazify Ukraine and end the alleged genocide of Russians in Ukrainian territory.'⁶
- 6.1.5 Following the invasion, Ukrainian President Volodymyr Zelenskyy ordered the general mobilisation (call for active military service) of the population⁷, which was approved by parliament on 3 March 2022⁸ (see also [Martial law](#), and for more information on mobilisation, see the [Country Policy and Information Note on Ukraine: Military Service](#))⁹.
- 6.1.6 For a timeline of events from February 2014 to February 2024 see [The history of Russia's aggression in Ukraine](#), administered by Brand Ukraine NGO in cooperation with the Ministry of Foreign Affairs (MFA) Ukraine.¹⁰
- 6.1.7 For an overview of the war so far, see [Ukraine conflict: An overview - House](#)

⁴ CFR, [War in Ukraine | Global Conflict Tracker](#), updated 20 May 2024

⁵ Brand Ukraine, [The history of Russia's aggression in Ukraine](#), 20 February 2024

⁶ CFR, [War in Ukraine | Global Conflict Tracker](#), updated 20 May 2024

⁷ Deutsche Welle, [Ukraine president orders general mobilization](#), 25 February 2022

⁸ Interfax, [President's decree on general mobilization approved by Rada, it starts...](#), 3 March 2022

⁹ UK Government, [Country Policy and Information Note on Ukraine: Military Service](#), June 2022

¹⁰ Brand Ukraine, [The history of Russia's aggression in Ukraine](#), 20 February 2024

[of Commons Library \(parliament.uk\)](#)¹¹.

- 6.1.8 In June 2024, the US Congressional Research Service (CRS) noted:
'The war has led to hundreds of thousands of killed or wounded, according to U.S. and other estimates, and the displacement of more than 9 million people as of May 2024, according to international humanitarian organizations. In 2024, Russia has conducted multiple offensives, seizing some additional Ukrainian towns and settlements. Ukraine continues to wage defensive operations, bolstered by military assistance mainly from the United States and Europe.¹² (see [Civilian fatalities and injuries](#) and [Displacement](#)).
- 6.1.9 For further details on the conflict see [Conflict in Ukraine](#) and [Location and nature of conflict events](#).

[Back to Contents](#)

7. Geography and demography

7.1 Map of Ukraine

- 7.1.1 Ukraine has 27 administrative divisions; 24 oblasts (regions), one Autonomous Republic (Crimea) and two cities with special status (Kyiv and Sevastopol). Below is a United Nations (UN) map of Ukraine indicating the country's 24 oblasts and the Autonomous republic of Crimea.¹³

¹¹ UK House of Commons Library, [Ukraine conflict: An overview](#) , 9 July 2024

¹² CRS, [Russia's War on Ukraine: U.S. Policy and the Role of Congress](#), 10 June 2024

¹³ UN, [Ukraine](#), 1 March 2014

7.1.2 See also [Territorial control](#) and [Location and nature of conflict events](#) for conflict-related mapping.

[Back to Contents](#)

7.2 Population

7.2.1 On 9 September 2024, World Population Review estimated the population of Ukraine to be 38,185,964 and population density to be 65.35 people per square km based on projections of the latest UN data¹⁴.

7.2.2 The same source estimated the population to have dropped from 44.3 million in 2021 to 41 million in 2022 and 37.7 million in 2023¹⁵.

7.2.3 The UN Office for the Coordination of Humanitarian Affairs (OCHA) [Ukraine Data Explorer](#) interactive map gave the estimated population in each oblast (region) of Ukraine, as of 21 March 2022¹⁶.

[Back to Contents](#)

7.3 Displacement

7.3.1 In October 2024, the UNHCR recorded over 6.7 million refugees globally (defined by UNHCR as 'all individuals having left Ukraine due to the war'). Nearly 6.2 million had fled across Europe and just over half a million, beyond Europe. This includes 2.7 million people who applied for asylum, temporary

¹⁴ UN World Population Review, [Ukraine Population 2024 \(Live\)](#), 4 December 2024

¹⁵ UN World Population Review, [Ukraine Population 2024 \(Live\)](#), 4 December 2024

¹⁶ OCHA, [Ukraine Data Explorer](#) (Population), 21 March 2022

protection or similar national protection schemes¹⁷. The majority of those who fled were women and children¹⁸.

- 7.3.2 From 24 February 2022 to 15 October 2024, over 40 million cross-border movements (not individuals) **from** Ukraine were recorded by the UNHCR and over the same period, over 36.9 million cross-border movements (not individuals) **into** Ukraine were recorded¹⁹.
- 7.3.3 In February 2024, the UNHCR 'Ukraine population movements factsheet' notes that there were 'more than one million monthly movements from and to Ukraine (each) during 2023'.²⁰
- 7.3.4 In October 2024, the International Organisation for Migration (IOM), which describes itself as 'part of the United Nations System as the leading inter-governmental organization promoting since 1951 humane and orderly migration'²¹ published 'Ukraine Internal Displacement Report'. The report identified approximately 3.6 million internally displaced persons (IDPs) in Ukraine.²² It shows that the Eastern oblasts continued to be the main origin areas of internally displaced people in Ukraine²³.
- 7.3.5 Note: The IOM displacement report defined IDPs as, 'individuals who have been forced to flee or to leave their homes or who are staying outside their habitual residence in Ukraine due to the full-scale invasion in February 2022, regardless of whether they hold registered IDP status.'²⁴
- 7.3.6 Note: The October 2024 report is based on data collected from 40,002 respondents in Round 18 of a rapid representative survey of the general population in Ukraine, between 12 August and 15 October 2024, including, 'all of Ukraine, excluding the Crimean peninsula and occupied areas of Donetsk, Luhanska, Khersonska and Zaporizka Oblasts'²⁵
- 7.3.7 The IOM displacement report states, '...the main oblasts of origin of IDPs were all located along or near the frontline and included areas previously or currently occupied by forces of the Russian Federation. These oblasts are the origin of 77 per cent of the total IDP population, equivalent to 2,746,000 people.'²⁶
- 7.3.8 The report lists the top five oblasts of origin for IDPs as: Donetsk (28%), Kharkivska (19%), Khersonska (12%), Zaporizka (11%) and Luhanska (7%). with the remaining 23% of IDPs coming from 'other oblasts'.²⁷
- 7.3.9 The number of IDPs from the top ten oblasts of origin (in October 2024) is shown in the table below. (IOM data compiled by CPIT)²⁸:

Oblast or region of origin	Estimated number of IDPs
Donetska	984,000
Kharkivska	689,000
Khersonska	422,000
Zaporizka	384,000
Luhanska	264,000
Kyiv city	143,000
Dnipropetrovska	129,000
Mykolavska	124,000
Sumska	117,000
Kyivska	80,000
Other	219,000

7.3.10 The October 2024 IOM displacement report describes the main areas that people had moved to. It states, ‘The primary oblast of displacement was Dnipropetrovska Oblast, hosting 14 per cent of estimated IDPs [509,000], followed by Kharkivska Oblast (12%) [440,000], Kyiv City (11%) [374,000], and Kyivska Oblast (9%) [304,000].’²⁹

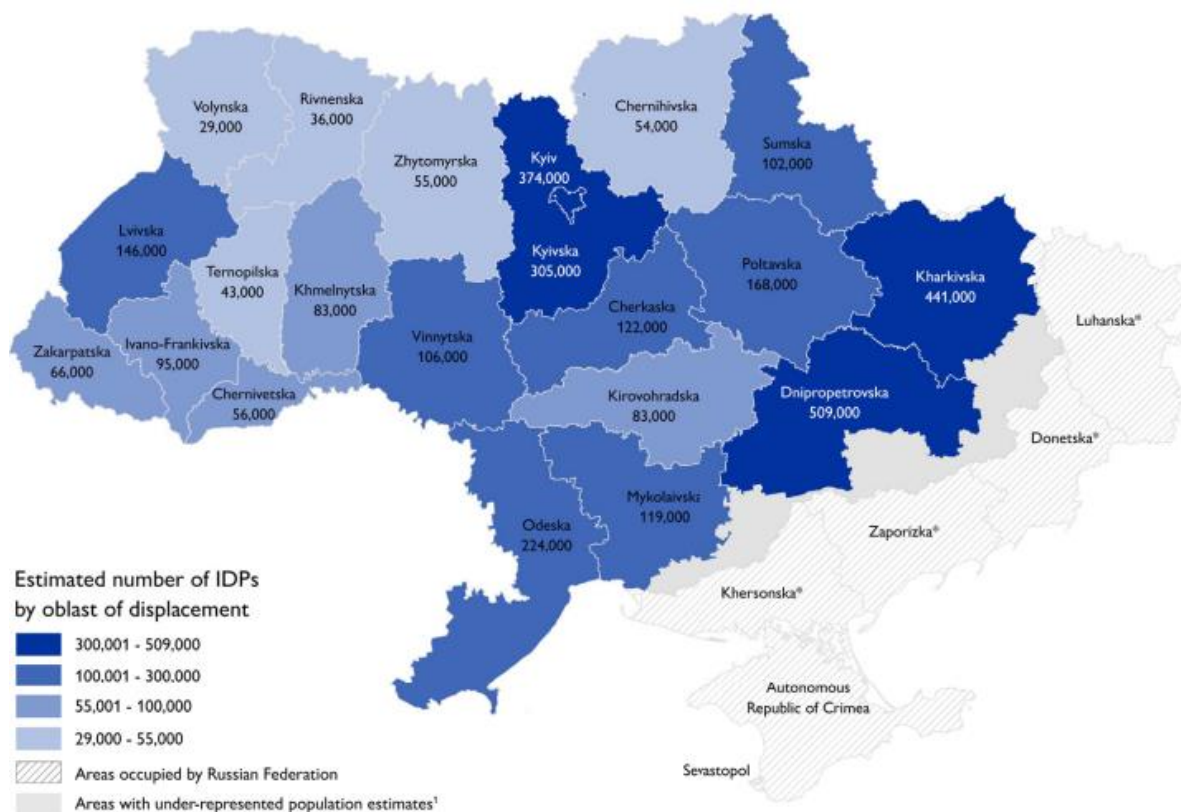

7.3.11 While 72% of IDPs were displaced outside their oblast of origin, 27% moved within their usual oblast. The oblasts with the largest proportion of IDPs originating within the same oblast were Kherson (93%), Donetsk (86%) and Kharkiv (83%)³⁰.

7.3.12 The distribution of IDPs across Ukraine is shown by the IOM map below which indicates the estimated number of IDPs in each oblast. The highest numbers of IDPs (in dark blue), as of October 2024, are in Kharkiv and Dnipropetrovsk oblasts near the frontline and also in Kyiv City and its surrounds³¹.

²⁹ IOM, [Internal Displacement Report – Displacement Tracking Matrix](#), (page 4). October 2024

³⁰ IOM, [Internal Displacement Report – Displacement Tracking Matrix](#), (page 4). October 2024

³¹ IOM, [Internal Displacement Report – Displacement Tracking Matrix](#), (page 3). October 2024

7.3.13 In the same source, IOM comments on the long-term nature of internal displacement. It states, ‘In October 2024, 59 per cent of IDPs reported having been displaced for two years or more. This prolonged displacement, affecting over half of those surveyed, reflects the protracted nature of the crisis in Ukraine.’³²

7.3.14 The IOM survey asked participants about their intentions regarding location. The displacement report states:
 ‘When asked about their plans for short-term movement, most IDPs (88%) expressed their intention to remain in their current location within the next three months, while 6 per cent reported considering leaving. Sumska Oblast hosted the largest share of IDPs planning to leave their current location within the next three months (16%), and 13 per cent of IDPs were unsure about their mobility intentions in the short period, reflecting the uncertainty of the situation in the frontline oblast.’³³

7.3.15 The same source reports, ‘Thirteen per cent of IDPs intend to return to their oblast of origin beyond the next three months, and 4 per cent intend to move elsewhere. Kyiv and Zaporizka Oblasts hosted the highest proportion of IDPs intending to remain in their current location in the long-term (75% and 76%, respectively), followed by Odeska, Poltavska, and Kyivska Oblasts, all at 73 per cent.’³⁴

7.3.16 The August 2024 IOM displacement report notes ‘The security situation represented both the main driver of displacement (80%) and the key factor

³² IOM, [Internal Displacement Report – Displacement Tracking Matrix](#), (page 5). October 2024

³⁴ IOM, [Internal Displacement Report – Displacement Tracking Matrix](#), (page 6). October 2024

for selecting a new location (35%). Specifically, perceptions regarding the favourable security situation (35%), followed by closer proximity to family and friends (31%), served as the primary reasons overall for IDPs choosing their current place of residence.³⁵

8. Conflict in Ukraine

8.1 Military casualties

8.1.1 Estimates of the number of military personnel killed during the war vary greatly depending on the source, as illustrated by the range presented in the country information below. In addition, sources do not always specify whether 'casualties' relates to numbers injured, numbers killed, or both.

8.1.2 In February 2023, an article in [The American Conservative](#), a non-profit, non-partisan publication based in Washington D.C.,³⁶ states, 'just how calamitous the conflict has been in human terms, those killed or wounded, remains unknown.'³⁷

8.1.3 The same article compared casualty figures suggested by different sources and noted 'The last official tally of Russian fatalities in Ukraine from the Russian government was announced by Russian Defence Minister Sergei Shoigu in September. According to Shoigu, only 5,937 Russian military personnel had been killed in the invasion...'³⁸

8.1.4 The same article reported that in January 2023, US General Mark Milley had said 'well over 100,000 now have been killed or wounded for each side.'³⁹

8.1.5 In an article published on 5 March 2023 in Forbes, the American-based global media company's business magazine⁴⁰, Vikram Mittal, an associate professor at the US Military Academy, considered that the actual number of Ukrainian and Russian military casualties were likely to be fewer than the hundreds of thousands often stated. Mittal explored data from [Oryxspioenkop.com](#), a website that tracks and analyses images of destroyed military equipment posted on social media⁴¹. By compiling the number of crew members for all ground vehicle losses, Mittal estimates the loss of 13,440 Ukrainian soldiers and 45,170 Russian soldiers, although he noted that this figure did not account for dismounted operations⁴².

8.1.6 In February 2024, BBC News reported:

'Volodymyr Zelensky says 31,000 Ukrainian soldiers have been killed during Russia's full-scale invasion...

⁴¹ Oryxspioenkop, [Oryxspioenkop.com, 19 September 2023](#)

⁴² Forbes, [Military Casualties In Russia-Ukraine War Are Likely Less Than...](#), 5 March 2023

‘...It is rare for Ukraine to provide a military death toll, and other estimates suggest a much higher number.

‘US officials in August [2023] put the [number of Ukrainian soldiers killed at 70,000 and as many as 120,000 injured](#).

‘In terms of Russian losses, Mr Zelensky said 180,000 Russian soldiers have been killed and tens of thousands more injured. BBC Russian, in a joint project with the Mediazona website, has established the names of [more than 45,000 Russian servicepeople who had died](#). But it estimates the total number to be greater than that.

‘In February, the UK's defence ministry estimated that 350,000 Russian troops had been killed or injured.’⁴³

8.1.7 In April 2024, BBC News reported, ‘Russia's military death toll in Ukraine has now passed the 50,000 mark, the BBC can confirm.’⁴⁴

8.1.8 The BBC explained the methodology behind its estimate, stating, ‘BBC Russian, independent media group Mediazona and volunteers have been counting deaths since February 2022. New graves in cemeteries helped provide the names of many soldiers. Our teams also combed through open-source information from official reports, newspapers and social media...’⁴⁵

8.1.9 The BBC report added, ‘Our analysis does not include the deaths of militia in Russian-occupied Donetsk and Luhansk - in eastern Ukraine. If they were added, the death toll on the Russian side would be even higher.’⁴⁶

[Back to Contents](#)

8.2 Territorial control

8.2.1 On 9 July 2024, the House of Commons Library published a research briefing, [Ukraine conflict: An overview - House of Commons Library \(parliament.uk\)](#) based on a range of sources, providing an overview of Russia's invasion of Ukraine. It stated, ‘After failing to take Kyiv in the first few months of the conflict, Russian forces have largely focused on eastern and southern Ukraine, with the aim of taking full control of the Donbas region and establishing, and sustaining, a land corridor through Kherson and Zaporizhzhia Oblasts, to Crimea in the south.’⁴⁷

8.2.2 The same source described Russia's attempted annexation of territory:

‘At the end of September 2022, Russian-backed authorities in Donetsk, Luhansk, Kherson and Zaporizhzhia called urgent referendums on joining Russia, even though those regions were not totally under Russian control.

‘...According to the Kremlin the four occupied regions voted overwhelmingly in support of accession to the Russian Federation. In a speech on 30 September 2022, President Putin announced Russia's intention to annex those regions and recognise, and defend, them as part of the Russian

⁴³ BBC News [Zelensky says 31,000 troops killed](#) 25 February 2024

Federation.

‘Those treaties of accession were signed into Russian law in early October 2022. Despite Russian attempts at annexation, all four regions were still not entirely under Russian control.’⁴⁸

8.2.3 For two reports from the House of Commons Library, providing a more detailed examination of the impact of Russia’s attempt to annex these regions see [‘Implications of the Russian-backed referendums in Ukraine’](#) and [‘The UN General Assembly condemns Russia: But what can it actually do?’](#)

8.2.4 The July 2024 House of Commons Research Briefing reported continued challenges in counteroffensive operations by Ukraine during 2023 and 2024:

‘Ukraine launched its counteroffensive in early June 2023. However, deeply entrenched Russian positions to the south of the Dnipro River in Kherson and Zaporizhzhia Oblasts made progress difficult and slow. Going into the winter of 2023, Ukraine’s counteroffensive had not achieved as much as some had hoped, with many talking of a “stalemate” in the conflict. Despite the lack of success in the ground counteroffensive, Ukraine has however made gains elsewhere, most notably in the Black Sea.

‘...Delays in military assistance from allies in the first half of 2024, in particular from the United States, have given Russia the opportunity to make tactical gains along the frontline in eastern Ukraine. Since February 2024 Ukraine has withdrawn its forces from several key positions in the Donetsk region, including the strategic towns of Avdiivka, and Chasiv Yar, and established defensive lines further west.’⁴⁹

8.2.5 In November 2024 the BBC published a set of maps from the Institute for the Study of War (ISW) showing changes in military control in Ukraine since February 2022.

⁴⁸ UK HoC Library, [Ukraine conflict: An overview - House of Commons](#), (page 3), 9 July 2024

9. Location and nature of conflict events

9.1 All conflict-related events: number, location and period

9.1.1 According to data from the [ACLED Ukraine Conflict Monitor](#), based on reports in traditional and social media, reports by international organisations and NGOs, and local partner data, there were 128,110 conflict events (defined as battles, riots, explosions/remote violence and violence against civilians), between 24 February 2022 and 18 October 2024⁵¹.

Note: ACLED data is updated daily so numbers may vary depending on the date when it is accessed. For further details on ACLED methodology, see

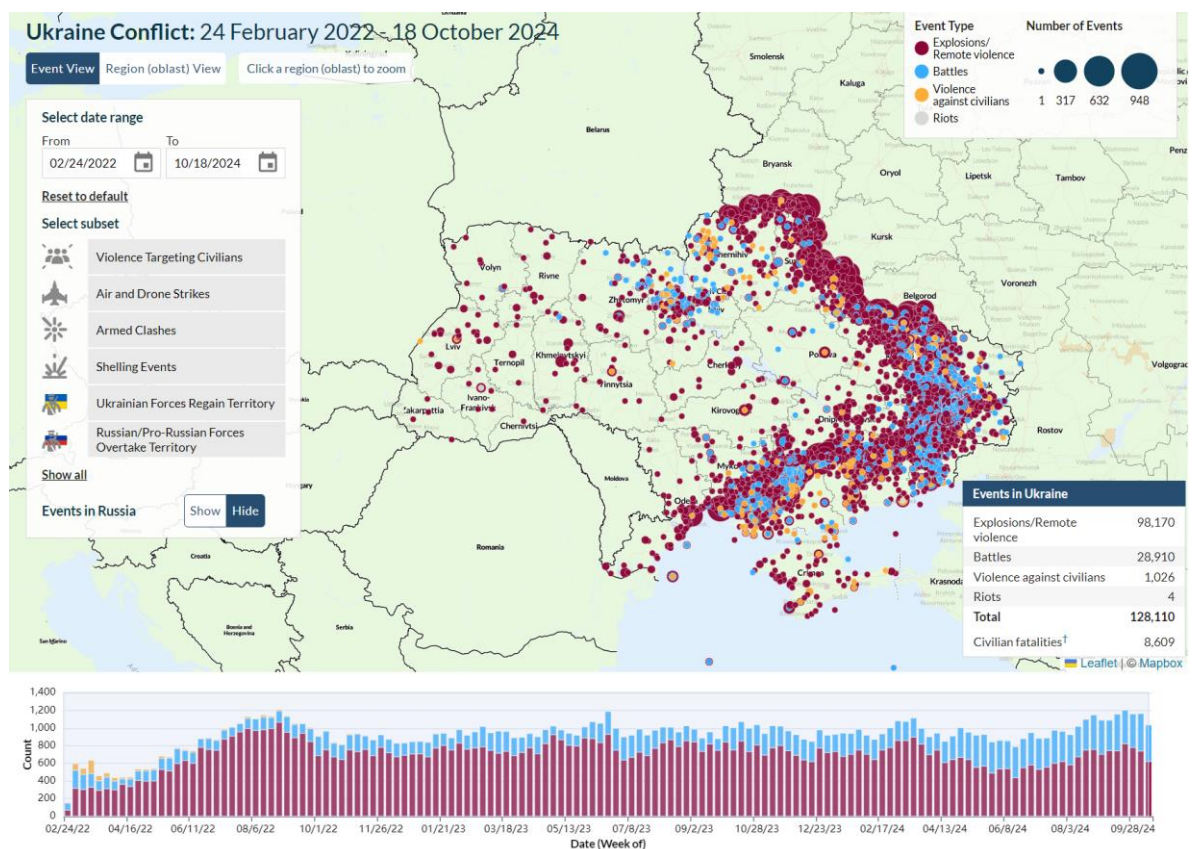

⁵⁰ BBC News Europe, [Ukraine in maps: Tracking the war with Russia](#), 19 November 2024

⁵¹ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](#), 28 October 2024

[Resource Library - ACLED.](#)

9.1.2 According to ACLED, as of 18 October 2024, there have been 128,110 conflict events since the war began on 24 February 2022. In the 6 months between 19 April 2024 and 18 October 2024, most (but not all) conflict events have been primarily concentrated along the Eastern border and frontline areas. Over 97%, (25,345 of the total 25,981 conflict events in this 6-month period), were in 8 oblasts; Donetsk, Sumy, Kharkiv, Kherson, Zaporizhzhia, Chernihiv, Luhansk and Dnipropetrovsk, in the east of the country.

9.1.3 The ACLED Interactive Ukraine Conflict Map⁵² below shows the location of the 128,110 conflict events recorded in Ukraine from 24 February 2022 to 18 October 2024. The bar chart below the map shows the number of conflict events each week during the same period:

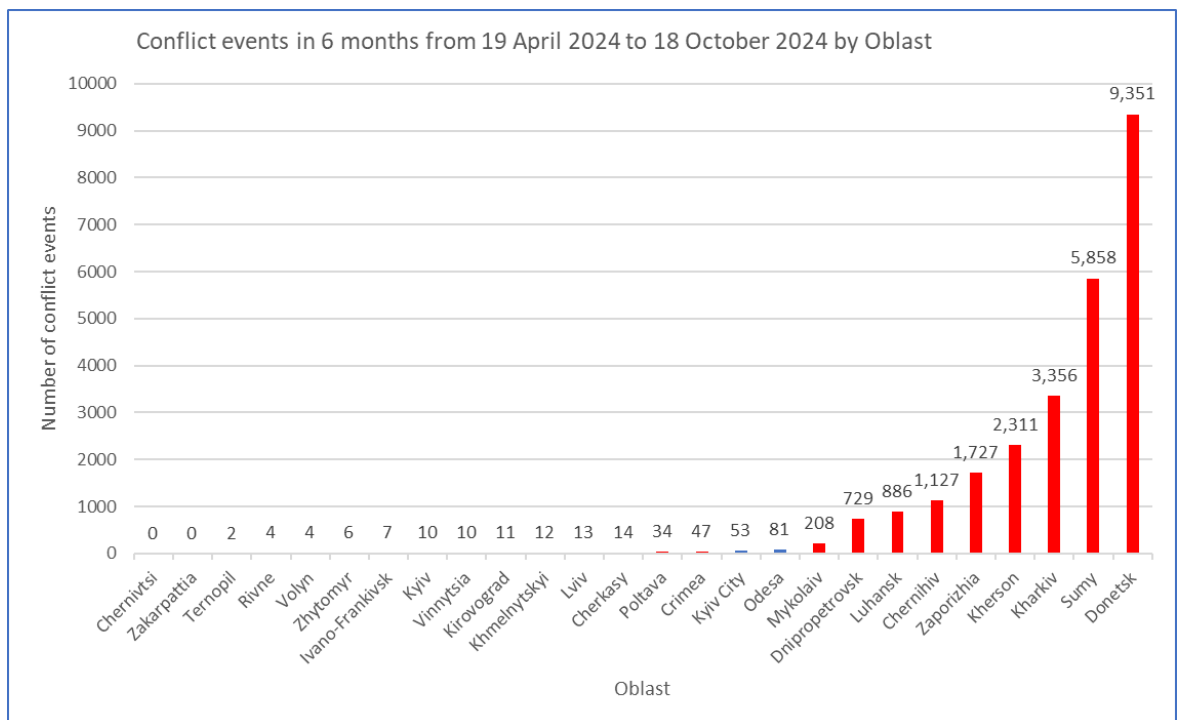

9.1.4 The ACLED Interactive Ukraine Conflict Map⁵³ below shows the location of the 25,981 conflict events in the 6 months from 19 April 2024 to 18 October 2024, primarily concentrated in areas of Eastern Ukraine, compared with events earlier in the war.

⁵² ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](https://acleddata.com), 28 October 2024

⁵³ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](https://acleddata.com), 28 October 2024

9.1.5 The below graph created by CPIT using ACLED data shows the number of conflict events, by region, in the 6 months between 19 April 2024 to 18 October 2024. The oblasts with red data columns are all located in the eastern side of Ukraine.⁵⁴

9.1.6 The below chart, created by CPIT using ACLED data, shows the number of conflict events by oblast between 24 February 2022 to 31 October 2024. For meaningful comparison, the time period is divided into periods of 6 months (with the exception of one shorter period at the start of the war and another from June to October 2024)⁵⁵:

[Back to contents](#)

9.2 Conflict between armed forces

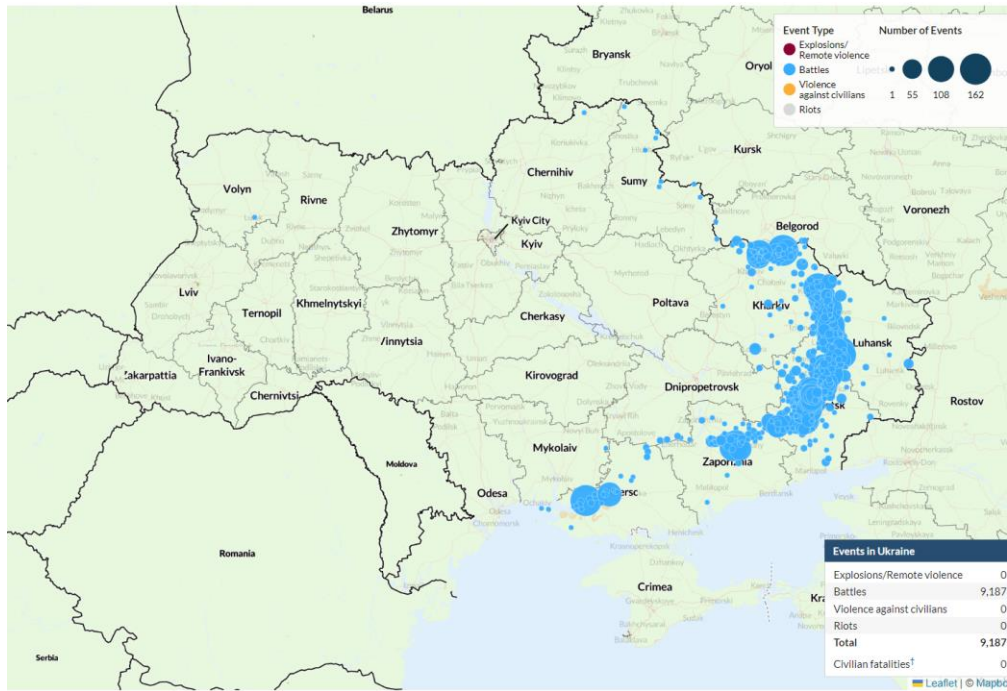

9.2.1 ACLED data from 24 February 2022 to 18 October 2024 indicated a total of 28,111 armed clashes, (or battles, between armed forces) in Ukraine⁵⁹.

9.2.2 The below ACLED map shows locations of the 9,187 armed clashes in the 6 months between 19 April 2024 and 18 October 2024⁶⁰:

⁵⁸ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](#), 28 October 2024

⁵⁹ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](#), 28 October 2024

⁶⁰ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](#), 28 October 2024

For further information on conflicts between armed forces, see also [Territorial control](#).

- 9.2.3 In February 2024, Cable News Network (CNN) published [The war in Ukraine in 12 key moments](#), listing major events in armed conflict in the first two years of the war⁶¹.
- 9.2.4 For a list of key armed conflict events in the Russia-Ukraine conflict, updated daily, see [Al Jazeera: Russia-Ukraine war](#)⁶².
- 9.2.5 Radio Free Europe/Radio Liberty's (RFERL) [Live Briefing](#)⁶³ also publishes daily updates reporting on the latest developments of the conflict.

[Back to Contents](#)

9.3 Conflict events targeting civilians

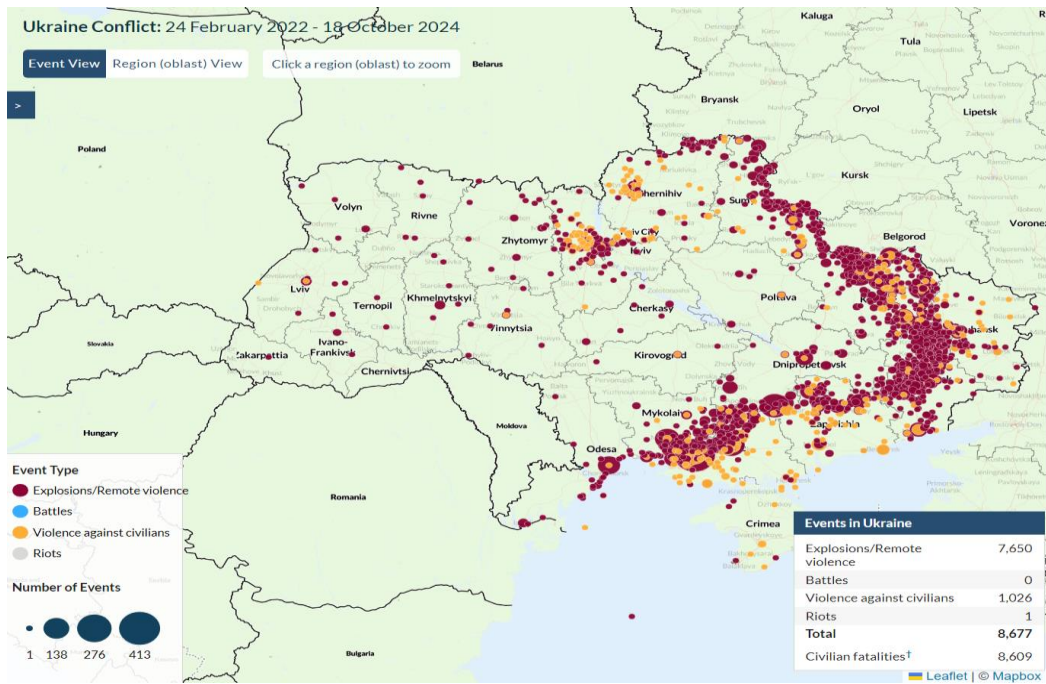

- 9.3.1 Considering conflict events directly targeting civilians, ACLED data indicates there were 8,677 events during the period from 24 February 2022 to 18 October 2024, resulting in 8,609 civilian fatalities. The map below shows that the majority of these events were located along the eastern frontline and northern border with Russia, in Chernihiv and in and around Kyiv City⁶⁴:

⁶¹ CNN [The war in Ukraine in 12 key moments](#) | CNN 24 February 2024.

⁶³ RFERL, '[Live Briefing: Russia Invades Ukraine](#)', daily updates

⁶⁴ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](#), 28 October 2024

9.3.2 In comparison, the ACLED map below shows the location of conflict events targeting civilians in the six-month period from 19 April 2024 to 18 October 2024. There were 1,749 such events, resulting in 947 civilian fatalities. Most of these events were concentrated along the eastern frontline and northern border with Russia and in Odesa and Kyiv city⁶⁵:

[Back to Contents](#)

⁶⁵ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](https://acleddata.com), 28 October 2024

10. Civilian fatalities and injuries

10.1 Data sources

10.1.1 Data on civilian casualties varies due to differences in definitions and methodology. This section contains data from 3 main sources:

- the Office of the UN High Commissioner for Human Rights ([OHCHR](#))
- [ACLED](#)
- Action on Armed Violence ([AOAV](#))

10.1.2 OHCHR data is based on information collected by the UN Human Rights Monitoring Mission in Ukraine (HRMMU). OHCHR explained its methodology:

‘HRMMU collects information about civilian harm from conflict-related violence from a wide range of sources, including through interviews with victims, their relatives, and witnesses; open-source information, including photo and video material; forensic records and reports; criminal investigation materials; court documents; reports by international and national non-governmental organisations; public reports by law enforcement and military actors; data from medical facilities and local authorities.’⁶⁶

10.1.3 ACLED uses reports from traditional and social media, international organisations and NGOs, and local partner data to estimate fatalities. For further details on ACLED methodology, see [Fatalities - ACLED](#).⁶⁷

10.1.4 ACLED stated in a report published in March 2023, ‘exact figures [on the number of civilians killed or injured] are hard to come by while swathes of Ukraine are still under Russian occupation. Tight informational controls in those areas do not allow for a clear understanding of the treatment of civilians.’⁶⁸

10.1.5 AOAV, a London-based charity⁶⁹, provides data on the number of civilians killed or injured by explosive weapon use, based on incident-specific reporting in English language media. AOAV explained that it did not claim to record every incident or casualty of explosive violence⁷⁰. They also stated in a report on Ukraine’s civilian casualties, ‘AOAV’s casualty figures represent the lowest of estimations in terms of the number of people killed and injured by explosive weapon use.’⁷¹

[Back to Contents](#)

10.2 Total numbers

10.2.1 On 11 October 2024, the OHCHR published an update of [Protection of Civilians in Armed Conflict — September 2024](#) covering the period from 24 February 2022 to 30 September 2024. This document recorded 37,916

⁶⁶ OHCHR, [Protection of Civilians in Armed Conflict — September 2024](#), (page 4) 11 October 2024

⁶⁷ ACLED, [Fatalities - ACLED \(acleddata.com\)](#), updated 7 May 2024

⁶⁸ ACLED, [War in Ukraine – One Year On, Nowhere Safe](#), 1 March 2023

⁶⁹ AOAV, [What do we do? - AOAV](#), no date

⁷⁰ AOAV, [Methodology](#), no date

⁷¹ AOAV, [Ukraine: AOAV explosive violence data on harm to civilians](#), 23 September 2024

civilian casualties (11,973 killed and 25,943 injured)⁷².

- 10.2.2 OHCHR noted, 'The actual extent of civilian harm - both casualties and infrastructure damage - is likely to be considerably higher as many reports of civilian harm...have not been possible to verify due to the large number of reports and the lack of access to relevant areas.'⁷³
- 10.2.3 ACLED data indicated there were an estimated 8,609 civilian fatalities between 24 February 2022 and 18 October 2024.⁷⁴
- 10.2.4 ACLED noted that this was, 'a conservative estimate of civilian fatalities, limited to events where civilians are targeted directly.'⁷⁵
- 10.2.5 AOA V reported 27,479 civilian casualties from explosive violence (7,001 people killed and 20,478 people injured), from 24 February 2022 to 23 September 2024 ⁷⁶
- 10.2.6 For regular OHCHR updates on civilian casualties, 'Ukraine: protection of civilians in armed conflict', see [Publications](#).

[Back to Contents](#)

10.3 Variation over time

- 10.3.1 In February 2024 ACLED reported, 'The initial shock of [Russia's invasion](#) exacted a high toll on civilians — more than 5,400 reportedly died in the first year [12 months] of the war, resulting from over 3,600 violent events in which civilians were the sole or main target ... Over three-quarters of these civilian deaths occurred in the first six months. In contrast, over the course of the second year, ACLED records over 1,600 reported civilian deaths and a nearly 35% decrease in civilian targeting.'⁷⁷
- 10.3.2 The below ACLED graph shows violent events targeting civilians and civilian fatalities in the first 2 years of the war contrasted with civilian fatalities in the second year of the war, demarking an overall decline⁷⁸:

⁷² OHCHR, [Protection of Civilians in Armed Conflict — September 2024](#), (page 3) 11 October 2024

⁸¹ OHCHR, [Protection of Civilians in Armed Conflict — September 2024](#), (page 3) 11 October 2024

10.4 Geographical variation

10.4.1 AOVAV reported the number of civilian casualties between 24 February 2022 and 23 September 2024 in the '5 most impacted regions';

- Donetsk (8,210 civilian casualties)
- Kharkiv (4,712)
- Kherson (4,192)
- Dnipropetrovsk (2,192)
- Zaporizhzhia (1,725)⁸².

10.4.2 The below chart created by CPIT using ACLED data shows the estimated number of civilian fatalities by oblast in 6 months from 19 April 2024 to 18 October 2024. The oblasts with red data columns are all located in the eastern side of Ukraine.⁸³

10.4.3 The below chart created by CPIT using ACLED data shows the number of civilian fatalities by oblast between 24 February 2022 to 31 October 2024, divided into periods of 6 months (with the exception of one shorter period at the start of the war and another from July to October 2024).⁸⁴

10.5 Weapon and incident type

10.5.1 ACLED data indicates that most (7,650) of the 8,677 conflict events categorised as ‘violence targeting civilians’ between 24 February 2022 and 18 October 2024 were explosions or remote violence. 1,026 events were described as ‘violence against civilians’ and one was a ‘riot’.⁸⁵

10.5.2 The below OHCHR graph shows the number of civilian casualties by type of

⁸⁵ ACLED, [Ukraine Conflict Monitor \(acleddata.com\)](https://acleddata.com), 28 October 2024

weapon/incident between 24 February 2022 and 30 September 2024 ⁸⁶:

10.5.3 Between 24 February 2022 and 23 September 2024, AOVAV recorded 27,479 civilian casualties from explosive weapon use, specifically noting 7,001 killed and 20,478 injured⁸⁷.

10.5.4 According to AOVAV, between 24 February 2022 and 23 September 2024, 'Ground-launched explosive weapons (missile strikes, artillery shelling, and rockets) have caused 63% (17,186) of civilian casualties.

'Air-launched explosive weapons have caused 18% (4,829) of civilian casualties, 5% (1,404) of civilian casualties have been caused by multiple types of explosive weapons, and 2% (519) of civilian casualties have been caused by naval-launched weapons, IEDs, and landmines.'⁸⁸

10.5.5 AOVAV stated, '95% (26,002) of civilian casualties have occurred in populated areas.'⁸⁹

10.5.6 The same source reported the '6 most impacted locations' were;

- urban residential areas (10,151 civilian casualties)
- multiple urban locations (8,092)
- villages (3,289)
- no information (1,114)
- entertainment venues (798)
- town centres (493)⁹⁰.

11. Conflict exposure

11.1.1 ACLED have combined data on the locations of conflict events and estimates, produced by ‘WorldPop’ research programme at the University of Southampton⁹¹, of the population living within a specific radius of those locations to produce an estimate of ‘conflict exposure’, or ‘the number of people exposed to conflict’⁹².

11.1.2 ACLED stated:

“Conflict exposure” is a measure of the number of people living within 1 kilometer, 2 km, and 5 km of each conflict incident or demonstration... To be exposed to conflict means that the population is living in an area of active disorder or unrest. People are harmed by this exposure in different ways: they may be directly injured; they may find themselves in active conflict; they and their group may be targeted; or they may be affected by the destruction of their village, neighborhood, or town.’⁹³

11.1.3 A specific distance from the conflict event can be chosen (1km, 2km or 5km) for calculating conflict exposure or, as ACLED states, ‘A ‘best’ estimate can also be generated, which changes the boundary distance based on the type and intensity of the event. For example, for each explosion event, the ‘best’ estimate of the population exposed is set at 5 km encircling the specific location; however, the ‘best’ estimate for those exposed to a protest is 1 km.’⁹⁴

11.1.4 In its methodology, ACLED warns that accurate estimates of population may be difficult. It states, ‘Conflict often results in population displacement and migration and these are likely not captured in many settings due to the process of top-down disaggregation of census and projection data... uncertainties in exposure measures will be especially high where large-scale displacements have taken place.’⁹⁵

11.1.5 [The Austrian Centre for Country of Origin and Asylum Research and Documentation](#) (ACCORD) highlights aspects of the measure in their blog. For example, they state:

‘To avoid double counting, multiple security-related incidents documented in the same location within one single reporting period do not result in an increase of the exposure measure. It only increases when an additional time period or location is added. This means that if, for example, 10,000 people are exposed to a security-related incident documented for location X, and there are 5 such incidents at that location in the corresponding reporting period, the exposed population is still counted as 10,000 people, not 50,000 people. A person who is affected by several incidents in their neighbourhood

⁹¹ Worldpop, [Contact Us - WorldPop](#), 2024

⁹² ACLED, [Conflict Exposure - ACLED \(acleddata.com\)](#), no date

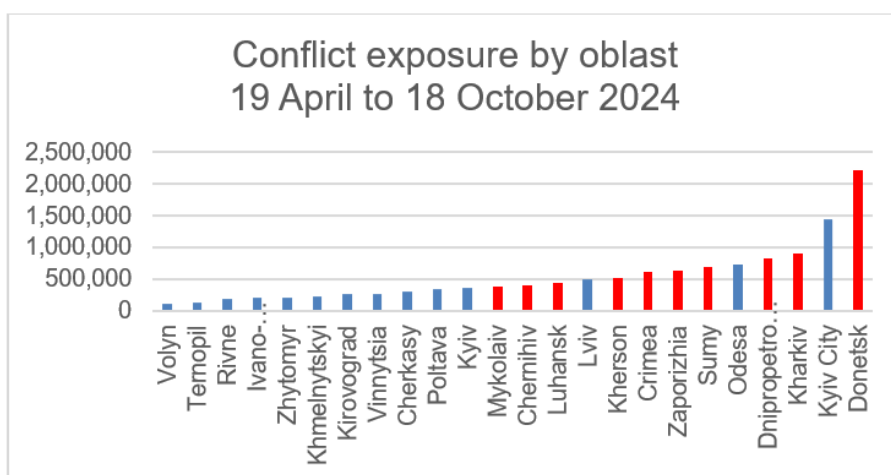

⁹³ ACLED, [Conflict Exposure - ACLED \(acleddata.com\)](#), (overview). No date

⁹⁴ ACLED, [Conflict Exposure - ACLED \(acleddata.com\)](#), (methodology). No date

⁹⁵ ACLED, [Conflict Exposure - ACLED \(acleddata.com\)](#), (methodology). No date

within a reporting period is thus always only counted once for that period.⁹⁶

- 11.1.6 This point, (that the frequency of conflict incidents is not reflected in the conflict exposure measure), is important to note as it results in the same ‘weight’ being given to exposure to a single conflict event as to multiple events in the same location over the same period of time. This may cause the impact of events on civilians during a period to be overestimated or underestimated, particularly when a longer rather than a shorter period of time is used for assessment.
- 11.1.7 For more details and methodology see [Conflict Exposure - ACLED](#) and for commentary on the measure see ACCORD’s [ACLED’s Conflict Exposure – One Measure to Describe a Conflict - Blog - ecoi.net](#)
- 11.1.8 According to ACLED’s ‘best’ estimates, in the 6 months from 19 April 2024 to 18 October 2024, the conflict exposure in Ukraine was 12,848,096 people, or 35% of the population of Ukraine. There were 25,856 conflict events during that period⁹⁷.
- 11.1.9 The below chart created by CPIT using ACLED data shows conflict exposure, by oblast, for the 6 months from 19 April 2024 to 18 October 2024, using the ‘best’ distance. The oblasts with red data columns are all located in the eastern side of Ukraine⁹⁸:

11.1.10 The below chart created by CPIT using ACLED data shows conflict exposure by oblast for 6 months from 19 April 2024 to 18 October 2024⁹⁹:

Conflict exposure in 6 months between 19 April and 18 October 2024

12. Attacks on public infrastructure

12.1.1 In its 2024 World Report, published in January 2024, covering events in 2023, Human Rights Watch (HRW) reported, ‘Russian forces continued to carry out attacks using explosive weapons in populated areas, heightening risks for civilians. The attacks impacted civilian infrastructure, including residential buildings, hospitals, and schools. Russia’s attacks on energy-related infrastructure caused electricity blackouts and obstructed access to health, education, and other essential services for millions, including people with disabilities.’¹⁰⁰

[Back to contents](#)

12.2 Energy and transport

12.2.1 The Ukraine Crisis Media Center (UCMC), a Ukrainian communications NGO¹⁰¹, reported 702 objects of critical infrastructure had been damaged, including gas pipelines, electric substations and bridges, with 35,000 objects damaged in total, as of 9 January 2023¹⁰².

12.2.2 In February 2024, the [Third Rapid Damage and Needs Assessment](#) (RDNA3), commissioned jointly by World Bank, the Government of Ukraine, the European Union and the United Nations, assessed damage to Ukraine’s infrastructure during the period February 2022 to December 2023. It stated:

¹⁰⁰ HRW, [World Report 2024 Book \(hrw.org\)](#), page 655, 2024

¹⁰¹ UCMC, [Who we are - Uacrisis.org](#), no date

¹⁰² UCMC, [‘Number of the Day’](#), 9 January 2023

'The UN RDNA3 estimates that up to US\$152 [£117.44¹⁰³] billion... in direct damage to buildings and infrastructure has resulted from nearly two years of war. The most affected sectors have been housing (almost US\$56 [£43.26¹⁰⁴] billion, or 37 percent of total damage), transport (almost US\$34 [£26.26¹⁰⁵] billion, or 22 percent), commerce and industry (almost US\$16 [£12.36¹⁰⁶] billion, or 10 percent), energy (almost US\$11 [£8.49¹⁰⁷] billion, or 7 percent), and agriculture (US\$10 [£7.72¹⁰⁸] billion, or ...7 percent). In the transport sector, damaged or destroyed assets include 8,400 km of motorways, highways, and other national roads; over 140 bridges on the national road network and 150 bridges on the oblast and village roads; and more than 50km of railways lines, 83 railways bridges, and over 1,400km of railways catenary lines have been damaged or destroyed. Across sectors, Donetska, Kharkivska, Luhanska, Zaporizka, Khersonska, and Kyivska oblasts have sustained the greatest damage.'¹⁰⁹

- 12.2.3 In June 2024, The Royal United Services Institute for Defence and Security Studies (RUSI), a UK-based, independent institution producing evidence-based research, publications and events¹¹⁰ reported on the impact of Russian attacks on Ukraine's energy infrastructure:

'Russian strikes had cumulatively destroyed [9 gigawatts](#) (GW) of Ukraine's domestic power generation by mid-June 2024. Peak consumption during the winter of 2023 was 18 GW, which means that half of Ukraine's production capacity has been destroyed. At least [80% of Ukraine's](#) thermal power and one third of its hydroelectric power generation has been destroyed. Most recently, Russia has continued targeting the remaining hydroelectric power stations, and has even [targeted](#) the substations linked to solar farms.'¹¹¹

- 12.2.4 The same source reported, 'Most Ukrainians already experience daily blackouts, and backup power storage is common in many homes. This is manageable in the summer, but Ukraine relies on thermal power plants to generate heating for homes as well as power during its long winter months... Ukraine is already working to repair its infrastructure and to restore as much capacity as possible. However, it is estimated that there will be at least a 35% deficit in capacity come winter.'¹¹²

- 12.2.5 In June 2024, the BBC reported, 'Russia has renewed its campaign of strikes on Ukrainian energy targets over spring and early summer, causing frequent blackouts across the country. President ... Zelensky recently said Moscow had destroyed half of his country's electricity-generating capacity since it began pummeling its energy facilities in late March.'¹¹³

12.3 Healthcare

12.3.1 A joint report, published in February 2023, by eyeWitness to Atrocities¹¹⁴, Insecurity Insight¹¹⁵, the Media Initiative for Human Rights¹¹⁶, Physicians for Human Rights (PHR)¹¹⁷, and the Ukrainian Healthcare Center¹¹⁸ described ‘... the staggering toll that Russia’s aggression has had on Ukraine’s health care system since February 2022. Using 10 case studies and a joint dataset of attacks, this report shows how Russia appears to be violating international humanitarian law by deliberately and indiscriminately targeting Ukraine’s health care system as part of a broader attack on its civilian population and infrastructure.’¹¹⁹

12.3.2 The same source noted that between 24 February and 31 December 2022, a total of 707 attacks on Ukraine’s healthcare system were recorded, including:

- 292 attacks that damaged or destroyed 218 hospitals and clinics
- 65 attacks on ambulances
- 181 attacks on other health infrastructure, such as pharmacies, blood centres, dental clinics and research centres
- 86 attacks on healthcare workers, killing 62 and injuring 52¹²⁰.

12.3.3 The same report stated, ‘One in 10 of Ukraine’s hospitals have been directly damaged from attacks, with the heaviest destruction in the eastern oblasts of Kharkivska, Donetsk, and Luhanska, and also in Khersonska and Kyivska.’¹²¹

12.3.4 The same source produced a map showing the number of attacks on hospitals, split by oblast, as of 31 December 2022¹²²:

- 12.3.5 On 27 January 2023, UCMC reported that, according to Viktor Liashko, Minister of Healthcare of Ukraine, around 1,000 medical establishments had been damaged and nearly 200 had been destroyed since 24 February 2022¹²³.
- 12.3.6 The World Health Organisation (WHO) surveillance system reported between 24 February 2022 and 4 December 2024, there were 2,176 attacks on healthcare, including 1,834 which impacted healthcare facilities¹²⁴.
- 12.3.7 In April 2024, OCHA reported:
 ‘Continuous attacks on ...medical facilities have had far-reaching consequences, making access to essential health care... ever more challenging. In the first three months of 2024, the World Health Organization (WHO) verified more than 70 attacks impacting health-care providers, supplies, facilities, warehouses and transport in Ukraine... The impact is especially devastating in front-line areas where health-care facilities have already been heavily impacted...medical facilities were impacted in front-line areas and other locations further from active ground fighting, such as Lviv City in the west, hindering access to essential health care...’¹²⁵
- 12.3.8 In August 2024, the UN Human Rights Monitoring Mission in Ukraine (HRMMU) reported attacks on health facilities between 24 February 2022 and 31 July 2024. It reported 68 attacks causing destruction and 478 causing damage¹²⁶.
- 12.3.9 For the World Health Organisation (WHO) Health Resources and Services Availability Monitoring System (HeRAMS) report on availability of health services, as of August 2024, see, [HeRAMS Ukraine verification snapshot: May - August 2024](#).

12.4 Educational facilities

12.4.1 According to Ukraine's Ministry of Education and Science (MoES), 2,619 educational institutions had been damaged and 406 completely destroyed, as of 23 December 2022¹²⁷.

12.4.2 HRW's 2024 World Report, covering events of 2023 noted, 'Throughout the year, Russian forces continued to attack schools and other educational facilities across Ukraine. The Ukrainian government reported that 3,790 educational facilities were damaged or destroyed from February 2022 to September 2023.'¹²⁸

12.4.3 In April 2024, UNOCHA reported, 'Continuous attacks on schools...have had far-reaching consequences, making access to...education ever more challenging... according to the Education Cluster, nearly 90 education facilities have been impacted by attacks across Ukraine since the start of 2024. Educational...facilities were impacted in front-line areas and other locations further from active ground fighting, such as Lviv City in the west, hindering access to ...education.'¹²⁹

12.4.4 In August 2024, HRMMU reported attacks on educational facilities between 24 February 2022 and 31 July 2024. It reported 294 attacks which destroyed educational facilities and 1,012 which caused damage¹³⁰.

[Back to contents](#)

12.5 Housing

12.5.1 On 2 August 2022, Ukraine's Ministry of Defence tweeted that at least 140,000 residential buildings had been damaged or destroyed and that the number of civilians made homeless exceeded 3.5 million¹³¹.

12.5.2 On 24 January 2023, the Kyiv School of Economics reported that in the period from the start of the war up to December 2022, '... a total of 149,300 residential buildings were damaged or destroyed, including: 131,400 private houses, 17,500 apartment buildings and 280 dormitories.'¹³²

12.5.3 In April 2024, UNHCR reported, 'The war in Ukraine has damaged or destroyed more than two million housing units, according to the third Rapid Damage and Needs Assessment, and consequently left millions of Ukrainians in need of various forms of housing support.'¹³³

13. Law and order

13.1 Law enforcement

13.1.1 The EU has supported law enforcement in Ukraine through programmes which were originally established prior to the war, and which have continued. The stated mission of the European Union Advisory Mission (EUAM) Ukraine¹³⁴, which formally began operations from Kyiv in 2014, is, 'To assist relevant Ukrainian authorities in achieving sustainable reform of the civilian security sector through strategic advice and practical support for specific reform measures based on EU standards and international principles of good governance and human rights.'¹³⁵

13.1.2 The PRAVO Police Programme 'Support for Rule of Law Reforms in Ukraine in the Areas of Police and Public Prosecution and Good Governance'¹³⁶ was funded by the EU and implemented by the UN Office for Project Services (UNOPS) with EUAM Ukraine between 2017 and 2022¹³⁷.

13.1.3 The EUAM website stated:

'Its [PRAVO's] overall objective is to contribute to promoting the rule of law in Ukraine and to aligning law-enforcement agencies' functioning with the best EU and international practices. Following the Russian Federation's invasion of Ukraine, PRAVO Police was reprogrammed to provide emergency assistance to rule of law institutions and support them in continuing to exercise their mandates of providing safety and security to the Ukrainian people. To this end, Ukrainian law enforcement agencies received essential means of transportation and communication as well as personal protective items worth over EUR 8,000,000 in the several months following 24 February 2022.'¹³⁸

13.1.4 At the close of the PRAVO programme in August 2022, the press release from EUAM stated:

'Thanks to support from the European Union, Ukraine made significant steps towards bringing its law enforcement system in alignment with best European and international practices.

'...Ukraine's rule of law sector became more effective and more responsive to citizens' needs, adopting a philosophy where law enforcement is seen as a critical public service. The Programme also reinforced the police and other agencies in their ability to address wartime realities by procuring critically needed items in the few months following February 2022.

'...The Programme budget of 36 million Euros was used to provide Ukrainian law enforcement agencies with expert consultations, specialised training in a range of topics, forensic equipment, personal protective items, vehicles, ICT equipment and professional software.'¹³⁹

13.1.5 The PRAVO Police Programme was followed by the project, 'Strengthening

Ukrainian Law Enforcement Agencies During War and Post-War Period', running for 24 months from 1 January 2023 to 31 December 2024¹⁴⁰.

13.1.6 According to the Council of Europe webpage for the project, 'The Project objective is to assist the Ukrainian law enforcement agencies to create the necessary preconditions to better implement standards and apply practices that strengthen effectiveness of investigations of human rights violations, including in the context of the ongoing war.'¹⁴¹

13.1.7 The same source lists the 'project focus and expected results' as;

- 'Representatives of law-enforcement agencies have better capacity to align relevant regulatory, institutional, strategic, and practical frameworks closer with the Council of Europe standards and address systemic problems as identified by respective ECtHR judgements with regard to the law-enforcement sector in Ukraine;
- 'Representatives of law enforcement agencies have an increased capacity to effectively investigate gross human rights violations in the context of war, including violations of international humanitarian law;
- 'Professional and operational capacities of law enforcement officers regarding prevention and effective investigation of torture and ill-treatment is enhanced.'¹⁴²

13.1.8 For a list of projects led by the Council of Europe to support human rights and governance in Ukraine see [Programmes - Council of Europe Office in Ukraine](#).

13.1.9 In March 2024, the Council of Europe Office in Ukraine reported:

'The Council of Europe has joined the development of the draft Action Plan for the implementation of the Overarching Strategic Reform Plan for law enforcement agencies.

'The draft Action Plan ...for 2023-2027 was developed by the Interdepartmental Working Group coordinated by the Office of the Prosecutor General of Ukraine. The Working Group included representatives of prosecutorial bodies, law enforcement, and international organizations. The development of the Action Plan was based on the Overarching Strategic Plan approved by the President of Ukraine on May 11, 2023. Its adoption is one of the requirements of the European Commission for Ukraine as a candidate state.'¹⁴³

13.1.10 Linked to the Action Plan reported by the Council of Europe, EUAM announced a new 3-year mandate starting in June 2024. It stated, 'Under the new mandate, EUAM Ukraine will concentrate on four key priorities to support the reform of Ukraine's civilian security sector and build the capacity to respond to wartime challenges and post-war needs.'¹⁴⁴

13.1.11 EUAM listed its priorities as;

¹⁴⁰ Council of Europe, [Strengthening Ukrainian Law Enforcement](#), no date

¹⁴¹ Council of Europe, [Strengthening Ukrainian Law Enforcement](#), no date

¹⁴² Council of Europe, [Strengthening Ukrainian Law Enforcement](#), no date

¹⁴³ Council of Europe Office in Ukraine [Reform Plan for law enforcement agencies](#) 15 March 2024

¹⁴⁴ EUAM, [New Three-Year Mandate — EUAM Ukraine](#), paragraph 2. 1 June 2024

- Civilian security sector reform
- International crimes
- Integrated border management
- Supporting stabilisation efforts across liberated and adjacent territories¹⁴⁵.

13.1.12 For more details of EUAM's mandate see, [EUAM Ukraine Commences Operations Under New Three-Year Mandate](#).

13.1.13 In September 2024, the OCHA Ukraine Protection Monitoring Tool (an interview survey running since November 2022), interviewed 2,189 key informants (KIs) across 23 oblasts during Round 17¹⁴⁶.

13.1.14 The survey asked, 'How would you describe the efficiency of law enforcement mechanisms which protect civilians against violence and violations?' Respondents answered:

- 'very good' (3.84% or 84 respondents),
- 'good' (64.73% or 1417),
- 'sufficient' (29.92% or 655),
- 'bad' (1.42% or 31),
- 'very bad' (0.09% or 2).¹⁴⁷

13.1.15 In 2024, the USSD report on Human Rights in Ukraine for 2023 (USSD HR report 2023) listed severe and widespread human rights abuses by Russian forces in Russian-controlled areas¹⁴⁸.

13.1.16 The same report stated, 'There were also significant human rights issues involving Ukrainian government officials, although not comparable to the scope of Russia's abuses... Some of these human rights issues stemmed from martial law, which continued to curtail democratic freedoms, including freedom of movement, freedom of the press, freedom of peaceful assembly, and legal protections.'¹⁴⁹

13.1.17 The USSD HR report 2023 stated, 'Although the [Ukraine] constitution and law prohibited torture and other cruel and unusual punishment, there were reports law enforcement authorities engaged in such abuse.'¹⁵⁰ The report then described two incidents of such abuse during 2023 which both resulted in the suspected perpetrators facing charges¹⁵¹.

13.1.18 The same report described monitoring of human rights abuses in areas controlled by the Ukrainian government. It reported:

'A number of domestic and international human rights groups generally operated without government restriction to monitor or investigate human

13.2 Martial law

- 13.2.1 The US Library of Congress (LoC) noted that the Law on the Legal Regime of Martial Law, 'converts civilian authorities into military administrations at all levels of government.'¹⁵³

- 13.2.2 The same source described some of the provisions of the law:

'The imposition of military control over the country envisages the call of capable citizens for public works in support of the armed forces, other military formations, law enforcement, and civic protection, if the citizens were not mobilized for defense activities or reserved as essential employees for enterprises. The law allows the government to use the capacities and workforce resources of public and private enterprises for defense needs. A curfew can be ordered, and individuals may be subjected to a "special screening regime." (Art. 8, paras. 1–6.)

'This "screening regime" allows for restricting freedom of movement; conducting stricter ID checks; and inspecting belongings, vehicles, luggage, cargo, and residential and business premises. (Art. 8, paras. 6–10.) During the period of martial law, amending the Constitution, conducting referendums, organizing strikes, and holding public demonstrations and other mass gatherings are prohibited. (Art. 19.) Among other measures, the law gives the government the right to control the media; ban the sale of weapons, alcoholic beverages, and other toxic substances; regulate the production of medicines; and seize radioactive materials. (Art. 8, paras. 11–15.)

'The law prohibits male citizens of Ukraine ages 18–60 from leaving their place of permanent residency without the approval of the local military administration. (Art. 8, para. 16.)'¹⁵⁴

- 13.2.3 Martial law was declared by President Zelenskyy on 24 February 2022, restricting some constitutional rights and freedoms, in particular Articles 30 to 34, 38, 39, 41 to 44 and 53 of the [Constitution of Ukraine](#)¹⁵⁵. This was initially for 30 days¹⁵⁶, but has since been extended several times, along with

the extension of general mobilisation^{157 158 159 160}. Martial law was extended again for 90 days from 10 November to 7 February 2025 and was in place at the time of writing¹⁶¹.

13.2.4 In April 2024, Euronews reported a further expansion of martial law in Ukraine. It stated:

‘Kyiv notified the Council of Europe of changes to its martial law, in effect since February 2022.

‘Ukrainian President Volodymyr Zelenskyy signed a decree confirming the parliament's decision to expand the country's martial law as Kyiv prepares for a renewed push by Moscow's forces in the east and south.

‘The decree, issued on 23 April [2024], includes the creation of military districts in frontline regions, some of which include occupied areas, where the state now has the power to temporarily seize property for military purposes...

‘...Earlier in April, Ukraine notified the Council of Europe of the partial suspension of some clauses of the European Convention on Human Rights and Freedoms in connection to recent changes in its martial law.

‘According to the application, Ukraine will stop observing such provisions of the convention as inviolability of housing, confidentiality of correspondences, non-interference in personal and family life, freedom of movement and free choice of residence, and to use and dispose of one's property.

‘While these changes are in line with typical applications of martial law, Ukraine is currently going through reforms in line with its EU membership application and is required to highlight policies that could run counter to human rights guarantees.

‘The new decree also includes limitations on the consular services that can be accessed by Ukrainians abroad if their military registration documents are not updated. This particularly affects men of conscription age and could affect whether their passports and other documents can be renewed while they are abroad.’¹⁶²

13.2.5 On 19 October 2022, Al Jazeera reported that martial law was declared by Russian President Vladimir Putin in Donetsk, Luhansk, Kherson and Zaporizhzhia¹⁶³, oblasts which Russia annexed in September 2022¹⁶⁴.

13.2.6 For information on mobilisation, see the [Country Policy and Information Note on Ukraine: Military Service](#).

13.3 Freedom of movement

13.3.1 In 2024, the USSD HR report covering 2023, stated:

‘The constitution and civil code provided citizens with rights to freedom of internal movement, foreign travel, emigration, and repatriation. The government, however, restricted these rights, particularly in the eastern part of the country near the zone of conflict. Under martial law, men ages 18 to 60 were prohibited from leaving the country.

‘In-country Movement: The government and Russia’s forces strictly controlled movement between government-controlled areas and Russia occupied areas. Crossing the line of contact was arduous, with Russia’s forces at times reportedly indiscriminately firing on civilian vehicles.¹⁶⁵

13.4 Safety and security

13.4.1 In September 2024, the OCHA Ukraine Protection Monitoring Tool (an interview survey running since November 2022), asked 2,163 key informants across 735 communities in 23 oblasts the question, ‘How would you rate the safety of this location?’¹⁶⁶. Over 80% (1,767) of respondents said their overall level of safety was ‘safe’ (62.04%) or ‘sufficient’ (19.65%), whilst 8.78% (190) felt ‘very safe’. The remainder felt ‘unsafe’ (8.32% or 180) or ‘very unsafe’ (1.2% or 26)¹⁶⁷.

13.4.2 In the same survey the five most commonly reported ‘Main security issues’ were;

- the destruction of civilian property, (cited by 342 respondents)
- the destruction of public infrastructure, (cited by 306)
- attacks on residential areas by shelling, missiles or drones, (258)
- landmines or unexploded ordinance (UXO) contamination, (184)
- civilian death or injury caused by shelling, missiles or drones (144)¹⁶⁸.

13.4.3 For regularly updated survey information on perceptions of safety and security, including by oblast (although respondent numbers are small at this level so may not be representative of people in the oblast), see [Ukraine Protection Monitoring Tool Dashboard](#).

Research methodology

The country of origin information (COI) in this note has been carefully selected in accordance with the general principles of COI research as set out in the [Common EU \[European Union\] Guidelines for Processing Country of Origin Information \(COI\)](#), April 2008, and the Austrian Centre for Country of Origin and Asylum Research and Documentation's (ACCORD), [Researching Country Origin Information – Training Manual](#), 2024. Namely, taking into account the COI's relevance, reliability, accuracy, balance, currency, transparency and traceability.

Sources and the information they provide are carefully considered before inclusion. Factors relevant to the assessment of the reliability of sources and information include:

- the motivation, purpose, knowledge and experience of the source
- how the information was obtained, including specific methodologies used
- the currency and detail of information
- whether the COI is consistent with and/or corroborated by other sources

Commentary may be provided on source(s) and information to help readers understand the meaning and limits of the COI.

Wherever possible, multiple sourcing is used, and the COI compared to ensure that it is accurate and balanced, and provides a comprehensive and up-to-date picture of the issues relevant to this note at the time of publication.

The inclusion of a source is not, however, an endorsement of it or any view(s) expressed.

Each piece of information is referenced in a footnote.

Full details of all sources cited and consulted in compiling the note are listed alphabetically in the [bibliography](#).

[Back to Contents](#)

Terms of Reference

The 'Terms of Reference' (ToR) provides a broad outline of the issues relevant to the scope of this note and forms the basis for the [country information](#).

The following topics were identified prior to drafting as relevant and on which research was undertaken:

- Background and timeline to conflict
- Geography and demography
 - Population and displacement
- Military operations
 - Actors
 - Territorial control
 - Military casualties
- Levels and nature of violence
 - Conflict events
 - Attacks on infrastructure
 - Civilian casualties – fatalities and injuries
 - Types of attack
 - Geographical attacks
- Law and order

Changes from last version of this note

Updated COI with particular focus on recent locations of military conflict and conflict events such as explosions from missiles and how this is affecting civilians in terms of displacement, fatalities and injuries, broken down by locations and timeframe as far as possible.

The assessment has been revised in line with the more recent evidence. While there is still a real risk of serious harm by reason of indiscriminate violence in some regions of the country, there are other areas to which it is now generally considered reasonable to relocate. As before, ability to relocate may depend on individual circumstances and the situation is fluid while the conflict is ongoing.

Independent Advisory Group on Country Information

The [Independent Advisory Group on Country Information](#) (IAGCI) was set up in March 2009 by the Independent Chief Inspector of Borders and Immigration to support them in reviewing the efficiency, effectiveness and consistency of approach of COI produced by the Home Office.

The IAGCI welcomes feedback on the Home Office's COI material. It is not the function of the IAGCI to endorse any Home Office material, procedures or policy. The IAGCI may be contacted at:

Independent Advisory Group on Country Information
Independent Chief Inspector of Borders and Immigration
1st Floor
Clive House
70 Petty France
London

SW1H 9EX

Email: chiefinspector@icibi.gov.uk

Information about the IAGCI's work and a list of the documents which have been reviewed by the IAGCI can be found on the Independent Chief Inspector's pages of the [gov.uk website](#).
