GENERAL INSTRUCTIONS

GENERAL INSTRUCTIONS

INTRODUCTION

INTRODUCTION

This document outlines the course of action to be taken when dealing with the majority of offences encountered by DVSA examiners. All road traffic and construction & use offences are laid down in the appropriate legislation and these form the basic standard for all DVSA's enforcement activities. All infringements, regardless of severity, identified by examiners should be brought to the attention of the driver or operator.

This document provides the policy framework within which DVSA examiners will work thus ensuring a consistent and best practice approach. This is not a legal document and must not be treated as an interpretation of the relevant legislation, which only the courts can provide. It lists the most common offences enforced by DVSA; however, it is not exhaustive.

In many cases, examiners will deal with offences found during roadside inspections by the issue of prohibition and/or fixed penalty notices requiring no further action. In cases where the nature, number, or seriousness of the offence(s), indicates that there is systemic failure in the management of the operation, or abuse of regulations, examiners will make appropriate investigations with the vehicle operator to obtain further evidence and where appropriate report offenders for prosecution and to the Traffic Commissioner. In such cases other lesser offences may be considered for inclusion in the prosecution case. Details of when to take follow up action are contained within this document. It may be necessary to address offending of non-licensed operators by prosecution; such circumstances are detailed in this document.

Certain policies apply to Great Britain (GB) vehicles or drivers whereas others will apply to United Kingdom (UK) vehicles or drivers. It is important to understand this distinction as actions may be dependent upon where the driver lives or where the operator is based.

Complex Cases

Where cases involve fraudulent activity, these matters, accompanied by any less serious matters that are discovered, will be reported for prosecution. This can include offences under the Fraud Act 2006, Criminal Law Act 1977, Criminal Justice Act 1987 and Proceeds of Crime Act 2002. These are not covered in this document in detail and would normally require senior management involvement in decisions on proceeding.

Such cases will benefit from governance arrangements during their investigation to track progress and input effort – and to enable decisions on other enforcement agency or police involvement as necessary, as part of these considerations, the need to ensure that road safety concerns can be dealt with in a timely manner – through Traffic Commissioners – will be part of the decision-making process.

ENFORCEMENT SANCTIONS POLICY – JANUARY 2025

GENERAL INSTRUCTIONS

SANCTIONS

The Enforcement Sanction Policy specifies the appropriate sanction and/or procedure for each offence type. The sanctions that can be applied are as follows:

VERBAL WARNING

Verbal Warnings will be issued by Examiners at the time that the offence is identified. This is appropriate only for minor infringements and those that fall outside of the policy for the issue of historical fixed penalty notices. Examiners will also give guidance on how to avoid repetition of the offence.

PROHIBITION NOTICES

The purpose of a prohibition notice is to remove the risk to road safety, and it is not to be regarded as a penalty (historical drivers hours offences will never attract a prohibition notice). The different types and categories of prohibition currently issued are listed below. During a roadside inspection there may be more than one prohibition issued per vehicle depending on the offences or defects found. In such cases there should only be one of each type of prohibition notice (although there may be continuation pages). In the case of vehicles found in breach of regulations relating to the carriage of dangerous goods separate notices will be issued for each individual breach to comply with the requirements of the Health and Safety Executive.

NOTICES COMING INTO FORCE IMMEDIATELY

Traffic Enforcement:

- Prohibition Notice TE 160 and TE 160DH are issued to UK vehicles
- Prohibition Notice GV 170 is issued to non-UK vehicles.

Roadworthiness:

For defects where driving of the vehicle would involve a risk of injury to any person:

- Prohibition Notice PG9 issued to UK vehicles (indicated by PG9I in action column)
- Prohibition Notice GV 171 are issued to non-UK vehicles

Note: In the case of defects which, if found on a UK vehicle, would attract a delayed prohibition an immediate prohibition will be issued to non-UK vehicles.

NOTICES COMING INTO FORCE UP TO 10 DAYS FROM THE DATE OF INSPECTION

UK vehicles found by an Examiner to have roadworthiness defects where, in the Examiner's opinion the vehicle is, or likely to become unfit for service and there is no risk of injury to any person. The prohibition will come into force at the specified time and date which will be up to 10 days from the date of the inspection:

- Prohibition Form PG9 (indicated by PG9D in action column)

Examiners will normally select one of the following periods of delay, which have been grouped together into three bands according to the number and severity of the defects listed on the prohibition notice (PG9).

- Maximum of 10 days - less than 5 defects in non-critical areas
- 4 to 7 days - 1 defect in a safety critical area, or 5 more defects in non-critical areas
- Up to 3 days - more than 1 defect in a safety critical area of the vehicle

Safety critical defects or systems are those that could affect the control or directional stability of the vehicle.

ENFORCEMENT SANCTIONS POLICY – JANUARY 2025

GENERAL INSTRUCTIONS	
<p>PROHIBITION NOTICES</p> <p>CONT</p>	<p>NOTICES ENDORSED</p> <p>Against each defect it is necessary to categorise its significance in roadworthiness compliance and maintenance.</p> <ul style="list-style-type: none"> • ‘S’ for significant failure of roadworthiness compliance, • ‘-‘ (Blank) for defects which may or may not be attributable to poor maintenance and • ‘X’ where the defect is no reflection on the maintenance system <p>Roadworthiness prohibitions both immediate and delayed, will be endorsed ‘S’ if, in the Examiner’s opinion, any of the defects which led to the prohibition was an indicator that there is significant failure of roadworthiness compliance. . These are defects that the operator and / or driver should have been aware of through any or all of the following:</p> <ul style="list-style-type: none"> • Long standing defect that should have been detected and repaired at the last safety check. • The defect or issue should have been detected at the first use/daily walk round check. • Performance, handling and/or warning systems would have made the defect obvious to the driver. • Poor workmanship should have been apparent to repairer. • The nature of the defect(s) observed at annual test were such that they should have been found before the vehicle was presented for test. • The number and nature of defects present on this notice indicates a significant failure in maintenance. <p>Defects(s) NOT considered to be maintenance related – ‘X’</p> <p>Appropriate for defects of an entirely random failure nature such as a lighting bulb failure or a new fracture in a road spring leaf, having arisen through a random failure of a component, and where it is also apparent that it would not have been noticed by the driver.</p> <p>Unable to determine whether a defect is attributable to poor maintenance:</p> <p>If it is not possible to determine whether or not the operator, driver or the maintenance arrangements are culpable, then the defect is not endorsed.</p>
<p>INSPECTION NOTICE</p>	<p>Where Examiners find roadworthiness defects not serious enough to warrant prohibition, they will advise the driver (user) using a Vehicle Inspection Notice (PG35EC). This notice is advisory only and does not in itself prevent further use of the vehicle.</p>
<p>OFFENCE RECTIFICATION NOTICES</p>	<p>For certain offences Examiners will issue an offence rectification notice (ORN) to the driver at the roadside, a copy of which will be sent to the operator. The notice states that if the offence is rectified within a set period of time and documentary evidence is produced to this effect, then no further action will be taken. If, however the operator fails to respond within the time period then Examiners will conduct follow up enquiries.</p>

GENERAL INSTRUCTIONS

FIXED PENALTY AND DEPOSIT NOTICES

Fixed Penalty Notices may be issued to any driver of a vehicle irrespective of where the vehicle is registered or based, where we know, or have reasonable cause to suspect, that the vehicle is used in conjunction with a trade or business. Any privately used vehicle will not be subject to the Fixed Penalty sanction.

Fixed Penalty Notices allow DVSA to enforce regulations against non-UK based drivers, and UK drivers without a satisfactory address, more effectively. They will be offered for routine offences detected only during roadside inspections. Serious offences such as using a vehicle in a dangerous condition, falsified records and any element of fraud or where there is more than one endorsable offence continue to be liable for prosecution through the courts. Some minor offences may be dealt with collectively and further details can be found later in the guide.

In cases where the vehicle is GB registered a fixed penalty notice will only be issued to the driver where the driver is partly or solely culpable for the offence.

Some driver's hours' and overloading offences are graduated depending on the severity of offending, so for example, a driver exceeding the daily driving limit by 30 minutes would receive a lower level fixed penalty than a driver exceeding it by 2 hours. Fixed penalty notices are based on the severity of the offence as follows: –

- Level 1 - £50
- Level 2 - £100
- Level 3 - £200
- Level 4 - £300

With the introduction of Community Drivers' Hours Offences (Enforcement) Regulations 2018, it is now possible to issue fixed penalty notices for driver's hours offences committed in the last 28 days or to the last control.

DRIVERS HOURS HISTORICAL OFFENCES – fixed penalty and prosecution procedure

Examiners should look for historical drivers' hour's offences in the proceeding 28 days records, or to the last drivers' hours enforcement check as evidenced by the digital record, tachograph stamp, or any other document issued during such an inspection (any offences previous to 28 days will require conventional prosecution for all).

To qualify for fixed penalties historical offences must be severe (Band 4), or if of lesser severity (band 1-3), must be numerous (more than 3). See table on page 11.

Dealing with the operator

Follow-up Requirements - If the encounter triggers historical fixed penalty action then a follow up will be required, see page 14 for further information. For any historical driver's hours offences dealt with by fixed penalty an analysis of operator's systems will assess operator culpability. Where there is such evidence and/or further offences are found prosecution should be considered and a report will be submitted to the TC (in other cases an advisory letter may be appropriate). This ensures DVSA have a robust system in place to investigate operators whose drivers have committed serious or serial offences.

Where it is apparent that a driver had committed numerous drivers' hours' offences but avoids fixed penalty action due to the enforcement policy,

GENERAL INSTRUCTIONS

**FIXED PENALTY
AND DEPOSIT
NOTICES CONT**

For example, a driver is encountered and found to have committed three drivers' hours offences, which fall outside the historical policy, i.e. all band 2 offences. The examiner correctly records / deals with these offences and issues the driver with a verbal warning. A further encounter with the same driver 10 days later also reveals two further offences, all band 3, which again falls outside of the policy.

In this case, the individual encounters did not meet enforcement policy. However, it indicates that the driver has failed to adhere to previous verbal warning, so FUE / prosecution action is then required for the offences detected during the most recent encounter.

Prosecution Procedure

Drivers with a verifiable UK address

Fixed Penalties, or Conditional Offers as they are called in Scotland, are issued to any driver found committing offences who has a UK verifiable address where a summons can be served, up to a maximum of five offences per Examiner per encounter. Any more than five offences per Examiner per encounter or more than one endorsable offence per driver will result in a report for prosecution.

Drivers have 28 days to pay the penalty amount or request a court hearing. Failure to either pay or request a court hearing within the time limit will result in the amount(s) being increased by 50% and being registered as a court fine at the offender's nearest court. Failure to pay a Conditional Offer or request a court hearing in the 28 days' period does not increase the penalty by 50% but will result in a report to the Procurator Fiscal who will then decide what action to take.

In cases where some of the offences found are to be reported for prosecution but there are others which could be dealt with by Fixed Penalty notices then all the offences found will be reported for prosecution and no Fixed Penalty notices will be issued.

Drivers without a verifiable UK address

If more than five offences are found fixed penalty notices will be issued for the five most serious offences.

Prosecution action will be taken for summary only offences which do not require an investigative interview.

Prosecution of offences involving falsification, or some other type of fraudulent activity are to be pursued only where the assistance of the Police can be secured. So, where possible the offender will be arrested by Police. Where this is not possible, and only where there is sufficient evidence available, then fixed penalty notices will be issued for alternative offences.

In cases where a fixed penalty notice is to be issued and the driver is unable to provide a verifiable UK address then a deposit is required immediately from the offender, as a summons cannot be served. Regardless of whether a deposit has been secured or not, the rights of appeal would be the same and a deposit would be refunded should the driver be found not guilty.

If the driver cannot or refuses to pay a fixed penalty deposit, the vehicle will be prohibited for non-payment and will not be able to continue on its journey. It may also be immobilised until payment has been received or the case has been disposed of by the court.

GENERAL INSTRUCTIONS

FIXED PENALTY AND DEPOSIT NOTICES CONT

Pre-agreed table that DfT, DVSA and industry have agreed to target serious or serial offenders

Current GFPD Offences >>>>	Six offences	Court referral required / FUE / Prosecute											
	Five offences							5 x current GFPD					
	Four offences							4 x current GFPD	4 x current GFPD + Historical GFPD if band 4

	Nil							NFA	Historical GFPD if band 4	Historical GFPD if band 4	Historical GFPD if band 4	GFPD all offences (any band)	GFPD all offences (any band)
	Nil							One offences	Two offences	Three offences	Four offences	Five offences	Six offences
Historical GFPD offences >>>>													

GENERAL INSTRUCTIONS

FURTHER ACTION

VEHICLES SUBJECT TO OPERATOR LICENSING

Any Fixed Penalty Notices issued to drivers for current offences will affect the Operator Compliance Risk Score (OCRS) of the operator of that vehicle. Historical offences committed up to 28 days prior will **not** affect the Operator Compliance Risk Score (OCRS).

Where a driver is being prosecuted for either a serious offence, e.g. fraudulent activity, or for more than five Fixed Penalty Offences Examiners will carry out an analysis of the operator’s systems to assess operator culpability. Where there is such evidence of culpability and / or further offences are found, prosecution should be considered, and a report will be submitted to the Traffic Commissioner

No Further Action (NFA)

Where Examiners are unable to prove an offence, further enquiries reveal no offence has been committed or a valid defence has been established then the offender(s) should be informed by letter that the matter will not be pursued.

Advisory Letter

Where on reviewing the outcome of further enquiries in conjunction with the offender(s) history, a decision is reached that no report is to be submitted either to the Traffic Commissioner or for prosecution the offender should be advised accordingly and informed that the offence has been noted and may be referred to if further offences are committed in the future.

Formal Warning Letters

Where a Public Inquiry, Driver Conduct Hearing or prosecution is not deemed appropriate because of the nature or number of the offences or because of the Operator or driver’s overall performance a recommendation may be made to the Traffic Commissioner that a formal warning letter should be sent. In this guide advisory letter and warning letter sanctions are combined with the former being the norm.

Prosecution or referral to the Traffic Commissioner

Following any prosecution (unless dealt with by fixed penalty notices for current offences or by an advisory or warning letter) a report will be submitted to the Traffic Commissioner for possible disciplinary action at a Public Inquiry or Driver Conduct hearing.

Categorisation of serious infringements and Most Serious Infringements (MSIs)

Regulation EC 1071/2009 and regulation EU 2016/403 categorises offences, which are deemed as Serious Infringements, the relevant individual offences are detailed in this document. MSI procedures will always be followed regardless of any other action taken, offences detailed as VSI and SI are for examiner information, Mobile Compliance will record these offences automatically, which may lead to an operator visit if levels are reached that require investigation. Those infringements recorded against non-UK vehicles will be sent to the home member state for investigation.

GENERAL INSTRUCTIONS

FURTHER ACTION

CONT

Roadworthiness prohibition notices

The relevant Area Office will assess all ‘S’ endorsed immediate or delayed prohibition notices. The number and seriousness of the defects will determine what action will be taken ranging from NFA at that time, an advisory letter, a letter requesting an explanation, a visit to the operator to analyse systems which may include checking further vehicles or further roadside inspections. Any adverse findings will be reported to the Traffic Commissioner.

VEHICLES NOT SUBJECT TO OPERATOR LICENSING OR VEHICLES OPERATING ILLEGALLY (UNAUTHORISED USE)

The following procedures will apply to UK vehicles used for commercial purposes, which are either not subject to Operators Licensing or that are committing the offence of unauthorised use. Any offences or defects found in relation the use of private vehicles will not be subject to these procedures but may be subject to prohibition notices in order to remove any risks to road safety.

No Further Action (NFA)

Where Examiners are unable to prove an offence, if further enquiries reveal no offence has been committed or a valid defence has been established then the offender(s) should be informed by letter that the matter is will not be pursued

Advisory Letter

Where, on reviewing the outcome of further enquiries in conjunction with the offender(s) available history, a decision is reached that the public interest would not be served by taking prosecution action then the offender should be advised accordingly and informed that the offence has been noted in our records and may be referred to if further offences are committed in the future.

Prosecution Action

In circumstances where there is sufficient evidence to warrant prosecution then such action must be taken in relation to vehicles which are not subject to operator licensing as it is not possible for Traffic Commissioners to deal with such offences.

NON-GB VEHICLES

Whilst DVSA is unable to take any direct action against non-GB operator’s sanctions will be imposed via the drivers of such vehicles by the issue of fixed penalty notices and prohibition notices. Any offences, which are considered serious infringement (SI), very serious infringement (VSI), or most serious offence (MSI) will automatically be reported back to the appropriate member state via the European Register of Road Transport Undertakings (ERRU).

GENERAL INSTRUCTIONS

ACTION KEY CODES

AL: Advisory Letter.

IN: Inspection Notice (PG35EC).

ORN: Offence Rectification Notice – issued to UK vehicles for minor offences.

PG9(D): Prohibition Notice (Delayed) - issued to UK vehicles for roadworthiness offences.

PG9(I): Prohibition Notice (Immediate) - issued to UK vehicles for roadworthiness offences.

TE160: Prohibition Notice - issued to UK vehicles for offences other than drivers hours/records or roadworthiness

TE160(DH): Prohibition Notice - issued to UK vehicles for drivers' hours / records offences.

GV170: Prohibition Notice issued to foreign vehicles.

DG01: Uniform Monitoring Form for the checking of vehicles carrying hazardous goods.

DG02: Prohibition issued to vehicles carrying hazardous goods (Health & Safety at Work Act 1974).

GV171: Immediate Prohibition Notice - issued to foreign vehicles for roadworthiness offences.

PN: Prohibition notice issued under the Health & Safety at Work Act 1974.

FP LEVEL: Fixed Penalty Notice – level is dependent on the seriousness of the defect or offence (**E:** Endorsable offence or defect).

FP # - Drivers of **GB** registered vehicles will only be issued with the fixed penalty notice if they have culpability for this offence.

FUE: Follow Up Enquiries - Further action will be dependent upon outcome of further enquiries **but in any case:**

- If the offence is an **MSI** offences,
- Where a driver:
 - (a)** is issued fixed penalty notices for historical drivers' hours offence; **or**
 - (b)** is being prosecuted for an offence; **or**
 - (c)** intimates that the operator instructed them to commit offences; **or**
 - (d)** receives a fixed penalty for one or more driver's hours offences which fall into these categories:
 - driving of 70 hours or more in a fixed week;
 - driving of 114½ hours or more in any two consecutive fixed weeks;
 - driving for 15 hours or more without taking a qualifying 45-minute break
- or**
- (e)** Where it is apparent that a driver had committed numerous level 1-3 drivers' hours' offences but avoids fixed penalty action due to the historical offences enforcement policy. then an analysis of the operator's systems shall be carried out to assess operator culpability. Where there is such evidence and / or further offences are found prosecution should be considered and a report will be submitted to the TC.
- For any historical driver's hours, offences dealt with by fixed penalty notices an analysis of the operator's systems will assess operator culpability. Where there is such evidence and/or further offences are found prosecution should be considered and a report will be submitted to the TC. See section 4
- Where an operator is deemed solely culpable for an offence any necessary further evidence will be obtained and considered for prosecution then reported to the TC. A warning letter can be issued if deemed more suitable. Failure to comply with an ORN may result in the matter being reported to the TC.

All other matters to be reported to TC unless minor enough to be dealt with by advisory or warning letter.

P: Prosecution. Court deposit to be taken where offender has no verifiable UK address.

X: Where possible the offender will be arrested by Police. Where this is not possible, and only where there is sufficient evidence available, then fixed penalty notices will be issued for alternative offences.

MSI / VSI / SI: Any offence deemed to be a Most Serious Offence, regardless of any action taken for any such offences during a vehicle encounter an investigation will be carried out to establish any shortcomings in the operators system and the outcome will be reported to the Traffic Commissioner. This process applies to GB licensed vehicles only. VSI and SI offences will also be collated by DVSA

N/A: Not Applicable.

NFA: No Further Action.

VW: Verbal Warning. Examiners will give advice on how to prevent committing the offence.

TC: Traffic Commissioner.

DVLA: Driver and Vehicle Licensing Agency.

VRO: Vehicle Registration Office.

HSE: Health and Safety Executive.

RMTD: Radioactive Materials Transport Division.

CLE 2/7T: Vehicle Excise Offences Report.

SECTION 1 – DEFECTS & DIMENSIONS

GUIDANCE NOTES

ROADWORTHINESS PROHIBITION NOTICES

The Categorisation of Defects details the circumstances under which a roadworthiness prohibition notice will be issued. It can be found in PDF format on the internet.

FIXED PENALTY NOTICES FOR ROADWORTHINESS OFFENCES

Drivers of GB registered vehicles

A fixed penalty Notice may be issued when an Immediate Prohibition Notice is issued in accordance with the Categorisation of Defects and is **also 'S' endorsed** for a significant failing of the maintenance system in relation to defects which:

- have obviously been present for some time (but not necessarily since the last safety check) and should have been spotted by the person responsible for carrying out the daily walk round check/first use inspection, or
- would have been obvious to the driver due to the vehicle's performance or handling or were visible or audible to the driver or because the vehicle's warning systems showed their presence

Where it is evident that the immediate defects found have only just arisen due to random failure of the component e.g. bulb, broken spring, a prohibition notice should be issued. Where the Examiner is satisfied that the defect could have occurred since the driver conducted the daily walk round check or would not have been obvious in the driving/use of the vehicle then no fixed penalty notice should be issued.

Drivers of non-GB registered vehicles

As drivers of such vehicles are regarded to be acting as agents for non-GB Operators, they will receive a Fixed Penalty Notice when a Prohibition Notice is issued for any immediate defect, as detailed in the Categorisation of Defects. Unless the defect is likely to have occurred since last walk round check and would not have been apparent through driving the vehicle. There is no requirement for the driver to be culpable in any way for either notice to be issued.

Privately used vehicles

In the case of offences which are prohibitable the appropriate prohibition notices will be issued in order to address the road safety issue. No Fixed Penalty Notice will be issued nor will the offender be reported for prosecution. The user of the vehicle should however be advised on how to avoid a repetition of the offence.

SECTION 1 – DEFECTS & DIMENSIONS

SECTION 1 GUIDANCE NOTES CONT

TYPES OF ROADWORTHINESS OFFENCES

Within Section 1 there are two types of roadworthiness offences listed. These are **specific** offences which relate to brakes, steering or tyres and **non-specific**.

SPECIFIC OFFENCES – SECTION 41A

These are offences where the Construction and Use Regulations detail the presence, maintenance or condition of a specific component relating to brakes, steering-gear or tyres. So, for example, Regulation 18 requires that “every part of every braking system and the means of operation thereof fitted to a vehicle shall be maintained in good and efficient working order and be properly adjusted”.

Any failure to comply with one of these requirements is an offence under section 41A of the Road Traffic Act 1988. These offences are endorsable.

NON-SPECIFIC OFFENCES – SECTION 42

For defects other than brakes, steering-gear or tyres, Section 42 of the Road Traffic Act 1988 makes it an offence to fail to comply with any construction and use requirements that being Regulation 100(1) of the Road Vehicles (Construction and Use) Regulations 1986 which requires motor vehicles and trailers to be in such condition that no danger or likelihood of danger is caused.

These offences are not endorsable.

SECTION 40A

Although in the majority of cases non-specific offences will be dealt with under Section 42, and by the issue of Fixed Penalty notices, Examiners may take prosecution action under Section 40A of the Road Traffic Act 1988 where in their opinion the overall condition of the vehicle, taking into account all of the defects found, is such that a danger has either been caused or is being caused.

Fixed Penalty Notices will not be issued for Section 40A offences as these offences are endorsable and carry a discretionary disqualification.

For further details on Regulation 100 and Section 40A please see the separate page later in the guidance notes.

PSVAR

Unless a Special Authorisation has been issued, it is an offence under Section 175 (1) of the Equality Act 2010 for an operator to use a ‘Regulated Public Service Vehicle’ on a Scheduled Service or a Local Service if the vehicle does not comply with the Public Service Vehicle Accessibility Regulations 2000.

The sanction for using a ‘Regulated Public Service Vehicle’ in contravention of these regulations is under Section 175 (2) of the Equality Act 2010, the operator of the vehicle is guilty of an offence and liable on summary conviction to a fine not exceeding level 4 on the standard scale (at this time £2500*)

SECTION 1 – DEFECTS & DIMENSIONS

SECTION 1 GUIDANCE NOTES CONT

SPEED LIMITERS

General notes

The Table of RSL Thresholds which can be found in the Categorisation of Defects.

Examiners should bear in mind the defences in subsection 13 of Regulation 36A and subsection 14 of Regulation 36B of the Road Vehicles (Construction and use) Regulations 1986.

Comparison between the speed trace on the tachograph record sheet and the set speed on the speed limiter plate [taking into account Regulation 36B(11A)] may reveal cause for further examination or follow up enquiries.

When examining tachograph record sheets there must be clear evidence that the vehicle is exceeding its legal limited speed and care must be taken that the excess speed is not due to over-run or an isolated incident. It may be necessary to check more than one record sheet to show sustained periods of excess speed (sustained period is in excess of 5 minutes, excess speed must be in excess of 10km/h of legal limited speed).

If there is evidence that the speed limiter effectiveness has been impaired deliberately or the defect is of longstanding (since the previous working week) identified from tachograph record sheets, then an 'S' marking on the prohibition would be justified

Frequent incidents of excess speeding should be reported to the Traffic Commissioner for possible action against the Operator Licence Statement of Intent.

Instrumented Check

Instrumented checks by Examiners can only be carried out on analogue equipment. A prohibition issued for a defect in relation to this item only can be removed by submission of satisfactory evidence (not a photocopy) from an authorised sealing agent.

Digital Tachograph Overspeed Setting

Please note that the overspeed setting within a digital tachograph has no effect on the functionality of the speed limiter. For further advice on overspeed settings please go to the notes at the start of Section 4 – Drivers' Hours and Tachographs.

SECTION 1 – DEFECTS & DIMENSIONS

SECTION 1 GUIDANCE NOTES CONT

REGULATION 100

Within this Regulation there are three distinct elements, namely, likely to be a danger, likely to be a nuisance and the unsuitability of the vehicle, and proof for each is equally distinct.

The three sub-sections to this offence are: -

- **100(1)** – Requires that all parts and accessories of vehicles / trailers shall at all times be in such condition, the number and manner of passengers carried, the weight, distribution, the packaging and the adjustment of the load shall at all times be such, that no danger is caused or is likely to be caused to any person in or on the vehicle or trailer or on a road.
- **100(2)** – Requires that the load carried shall at all times be so secured, if necessary, by physical restraint other than by its own weight, and in such a position that no danger or nuisance is likely to be caused (either to property or persons). Only likelihood to cause danger or nuisance needs to be proved.
- **100(3)** - Vehicle is unsuitable for the purpose that it is being used for. Only likelihood to cause danger or nuisance needs to be proved.

SECTION 40A

Section 40A of the Road Traffic Act 1988 is a free-standing section not dependent on there being a breach of Construction & Use Regulations. Section 40A prohibits the use etc of a motor vehicle or trailer when the condition or purpose or the number of passengers carried, or its load is such that the use involves a danger of injury to any person. The offence carries discretionary disqualification and an obligatory endorsement.

SECTION 4 – DRIVERS’ HOURS & TACHOGRAPHS – EC or AETR REGULATED JOURNEYS

GUIDANCE NOTES

EC 561/2006

On the 11th April 2007 EC Regulation 561/2006 replaced EEC Regulation 3820/85 and the GB regulations amending section 96(11A) of the Transport Act 1968 (i.e. The Community Drivers’ Hours and Recording Equipment Regulations 2007) came into force on the 2nd July 2007

AETR

As of 20 September 2010, the AETR provisions were aligned with EC 561/2006.

EU 165/2104

This is the regulation relating to tachograph recording equipment and record keeping. It came fully into effect on 2 March 2016 and replaced EEC 3821/85

Annex IB is not directly included in EU 165/2014 (in the same way that Annex I) but by virtue of the transition measures at Article 46 of EU 165/2014 Annex IB remains in force. The following regulations are therefore still pertinent:

- EC 2135/98 - Inclusion of Annex IB
- EC 1360/2002 - Amendments to Annexes IB and II
- EC 432/2004 - Amendments to IB
- EC 68/2009 – Amendments to Annex IB
- EC 1266/2009 – Amendments to Annex IB including changes to the calculation of driving time (the “one minute” issue) and tachographs activated from 1/10/12 to be tamper-proof against simple magnets and have a second motion sensor.
- EU 2016/799 Annex IC

SECTION 99

Section 99 of the Transport Act 1968 was amended by The Passenger and Goods Vehicles (Recording Equipment) Regulations 2005 (S.I.2005/1904). The main

change was to introduce sub-sections 99ZA to 99ZF which relate to the powers to inspect records and equipment required under EU 165/2014 and the related offences.

DIGITAL TACHOGRAPH EQUIPMENT

A vehicle in-scope of EC Regulation 561/06 put into service for the first time on or after the 1st May 2006 is required to be fitted with recording equipment which conforms to the requirements of Annex 1B of EU 165/2014 (digital).

A vehicle in-scope of EC Regulation 561/2006 put into service for the first time on or after the 15th June 2019 is required to be fitted with recording equipment which conforms to the requirements of Annex IC of (EU) 2016/799.

AETR Agreement has not adopted Annex IC tachographs.

DIGITAL TACHOGRAPH OVERSPEED SETTING

The overspeed setting contained within the digital tachograph calibration parameters has no effect on the functioning of the speed limitation device fitted to the vehicle. The setting is used to trigger the production of an 'Overspeed Event' should the vehicle exceed the authorised speed of the vehicle for a period greater than one minute. The overspeed setting should be set to the maximum stabilised speed of the vehicle concerned.

For example, in the case of a maximum weight articulated vehicle these values are currently, 85kmh for the speed limiter setting with the stabilised speed not to exceed 90 kmh. Therefore, the overspeed setting for this type of vehicle must be no greater than 90 kmh.

If the 'overspeed' file or the 'technical data' file shows the overspeed setting to be higher than the permitted value, then the procedure to be followed is that appropriate to a vehicle with a tachograph that has not been correctly fitted (offence 4-20).

SECTION 4 – DRIVERS HOURS & TACHOGRAPHS – EC or AETR REGULATED JOURNEYS

SECTION 4 GUIDANCE NOTES CONT

The Trade and Cooperation Agreement (TCA) between the EU and UK provides that the AETR rules will not apply on journeys between UK and EU territory. The TCA specifies that the drivers hours and tachograph rules to be applied under the agreement are the equivalent of EC 561/2006 and EU 165/2014, which directly applies the technical specifications for Annex I, IB and IC tachographs. The UK's mechanism for applying the requirements of the TCA will be via the retained versions of EC 561 and EU 165. The retained regulations will also apply to journeys on UK territory to which those regulations previously applied prior to 1/1/21.

The AETR rules will continue to be applied by the UK as they were previously, that being for journeys to, from or through non-UK or EU territory. The only change is that journeys to, from or through Norway, Lichtenstein and Iceland will no longer be under EU rules and will be under AETR rules instead, as the UK ceased to be an EEA member on 31/1/20. Please note that this change does not apply to journeys between EU territory and these three countries and they will still be under EU rules.

DVSA notices will therefore continue to reference EC561/2006 and EU165/2014 and their Articles, as these are the corrected legislative references for the retained regulations.

SECTION 10 – OVERLOADING

GUIDANCE NOTES

WEIGHING EQUIPMENT

Whatever type of weighing equipment is used, Examiners must ensure that all relevant requirements of the Consolidated Code of Practice for the Enforcement Weighing of Vehicles are complied with in full. Also, an overloading guidance leaflet should be handed to all drivers.

GRADUATION OF FIXED PENALTY NOTICES

£100 FP -- 5% to 10% or over 1 tonne on axle, gross or train if less than 5%

£200 FP -- Over 10% and up to 15%

£300 FP -- Over 15% and up to 30%

Prosecute over 30% or over 5 tonnes on axle, gross or train if under 30%

*This may be a single axle or compensating axles where the individual axle weights are added together for the purposes of calculating an overload and which are therefore counted a single axle.

In situations where there are multiple overload offences only one overloading prohibition notice will be issued per vehicle or vehicle/trailer combination. Further detail may however be shown on a continuation page.

For multiple overload offences only one fixed penalty notice will be issued in respect of the most serious overload offence.

NON-COMMERCIAL DRIVERS

In genuine cases of ignorance e.g. moving house, and where the offence is unlikely to be repeated, a prohibition should be issued, and an overloading guidance leaflet handed to the driver. To take into account the Public Interest Test no Fixed Penalty Notice should be issued in these circumstances.

SECTION 11 – PSV MISCELLANEOUS OFFENCES

NOTES FOR OFFENCES 11.21 – 11.39

The Public service Vehicle Accessibility Regulations 2000 define the standards or equipment required of public service vehicles in relation to disabled passengers. The regulations apply to buses and coaches, **which have a capacity exceeding 22 passengers and used to provide local or scheduled services only.**

Vehicles are certified in accordance with Schedules 1, 2 & 3

All single and double deck buses - must comply with Schedules 1 & 2.

All single and double deck coaches - must comply with Schedules 1 & 3

SCHEDULE 1 – Wheelchair accessibility requirements.

SCHEDULE 2 – General accessibility requirements for single deck and double deck buses.

SCHEDULE 3 – General accessibility requirements for single deck and double deck coaches.

EXEMPTIONS – Off-road vehicles, vehicle used under section of Transport Act 1985, secure transport of persons (e.g. prisoners), carriage of sick or injured persons, Crown vehicles, visiting forces vehicles or a vehicle registered more than 20 years ago and which is not used for more than 20 days in any year on a local/scheduled service. – Regulation 4 of PSV Accessibility Regulations 2000 for more detail.

OFFENCES – Where an operator has made arrangements that either only the driver or only the conductor is responsible for fulfilling a particular duty then only that person is deemed responsible.

PSVAR - Unless a Special Authorisation has been issued it is an offence under Section 175, paragraph (1) of the Equality Act 2010 for an operator to use a 'Regulated Public Service Vehicle' for a Scheduled Service or a Local Service if the vehicle does not comply with the Public Service Vehicle Accessibility Regulations 2000. The sanction for using a 'Regulated Public Service Vehicle' in contravention of these regulations is under Section 175, paragraph (1) of the Equality Act 2010, the operator of the vehicle is guilty of an offence and liable on summary conviction to a fine not exceeding level 4 on the standard scale (at this time £2500)

SECTION 14 – CARRIAGE OF DANGEROUS GOODS

GUIDANCE NOTES

The following guidance indicates how DVSA Policy can be applied under the **CARRIAGE OF DANGEROUS GOODS AND USE OF TRANSPORTABLE PRESSURE EQUIPMENT REGULATIONS 2009**

Category 1 = highest - in most (but not all) cases level 1 should result in a PN (immediate prohibition).

Category 2 = medium - a deferred prohibition

Category 3 = lowest - verbal/written warning.

The appropriate risk category must be recorded on DG01 checklist & where applicable on prohibition issued.

ENFORCEMENT SANCTIONS POLICY – JANUARY 2025

SECTION 14 – CARRIAGE OF DANGEROUS GOODS						
PLS CODE	OFFENCE DESCRIPTION	FURTHER GUIDANCE	RISK CATEGORY	ACTION	NOTES	REG
PROVISION OF INFORMATION						
14-4	NO OR INAPPROPRIATE DETAILS OF THE NATURE AND QUANTITY OF DANGEROUS GOODS CARRIED	The information specified in ADR 5.4 & 5.5 where relevant should form part of the transportation document	1	PN	<p>MSI OFFENCE The word inappropriate is open to interpretation. A PN is appropriate if the information is so lacking that the Examiner is unable to identify what is being carried.</p> <p>Risk: Emergency services and others would not be able to act correctly in the event of an emergency.</p> <p>Because: The transport documentation on the vehicle does not include relevant information about the dangerous goods being carried</p>	Regulation 5 5.4.1 5.5
14-3	INSTRUCTIONS IN WRITING	<p>None</p> <p>Inadequate: -</p> <p>- not in ADR format</p> <p>- in language the driver does not understand</p>	2 2 2	Deferred PN Deferred PN Deferred PN	<p>Risk: The driver & others could not take appropriate action in the event of emergency</p> <p>Because: The Transport documentation on the vehicle does not include information on measures to be taken by the driver in the event of an accident or emergency concerning the goods beings carried</p> <p>The purpose of “Instructions in Writing” is to give information to the driver. So long as required text and symbols are legible all four pages may be reproduced onto two sides of A4 as a minimum. Similarly, a company or other logo is acceptable. If not in colour treat as Risk Category 3 (advice/written warning).</p>	Regulation 5 5.4.3 8.1.2

ENFORCEMENT SANCTIONS POLICY – JANUARY 2025

SECTION 14 – CARRIAGE OF DANGEROUS GOODS						
PLS CODE	OFFENCE DESCRIPTION	FURTHER GUIDANCE	RISK CATEGORY	ACTION	NOTES	REG
14-2	NO INDICATION OF PRESENCE OF DANGEROUS GOODS	Carriage of DG without any indication in documents of their presence	1	PN	<p>MSI OFFENCE Risk: Emergency services and others would not be able to act correctly in the event of an emergency.</p> <p>Because: The transport documentation on the vehicle does not include relevant information about the dangerous goods being carried</p>	Regulation 5 5.4.1 8.1.2
14-22	<p>ADR (9.1.3) APPROVAL CERTIFICATE NOT CARRIED</p> <p>- FOR TANK VEHICLES OR PACKAGED EXPLOSIVES</p>		2	Deferred PN	<p>Risk: Driver and others are at risk of personal injury because the vehicle is inadequate to ensure that dangerous goods are carried properly and in accordance with the law.</p> <p>Because: The vehicle is not complying with the requirement of regulations.</p> <p>Note 1 - Care needed to distinguish between the failure to carry the certificate and the possible unsuitability of the vehicle. If the vehicle is clearly unsuitable treat as Risk Cat 1.</p> <p>Photocopies acceptable for GB vehicles on GB journeys. Check certificate for type appropriate to UN number of load. A reduction in size is acceptable so long as document is legible.</p> <p>FOR TANK VEHICLES ONLY - where either the tank vehicle <u>or</u> the trailer was manufactured before 10/5/04 and on a domestic journey there is no need for such certificates.</p>	Regulation 5 8.1.2

DRIVER TRAINING						
14-20	NO ADR TRAINING CERTIFICATE	Driver has none or is not carrying it irrespective of his knowledge of the nature of the risks and actions to be taken*	1	PN	<p>VSI OFFENCE Risk: Driver and others are at risk of personal injury because the driver has inadequate training to ensure that dangerous goods are carried properly and in accordance with the law.</p>	Regulation 5 8.2
		No awareness, function specific or safety training – applicable to small loads only**	1	PN or Deferred PN	<p>Because: The driver of the vehicle has not received adequate instruction and training to comply with the law and/or would not be able to take proper action to in an emergency</p> <p>*Small vehicle exemption no longer exists. If load is in scope, then a valid ADR training certificate must be held</p> <p>**Level of driver knowledge in such cases is bound to be subjective. Except in the grossest cases a deferred PN id appropriate. Refer any concerns to DG Operations.</p> <p>If it has been possible to establish that the driver has been issued with a training certificate and the operator has been informed of the failure to carry the certificate, then this can be dealt with by verbal or written warning. If the issue of a certificate cannot be verified, then a PN is appropriate until it can be produced</p> <p>All relevant trade associations have been advised of this policy. (For Waste Batteries carried in Bulk see relevant entry in HSE CG Manual).</p>	1.3 8.2.3
