

NOIDs WEEKLY REPORT

STATUTORY NOTIFICATIONS OF INFECTIOUS DISEASES

in ENGLAND and WALES

WEEK 2025/6 week ending 09/02/2025

CONTENTS

Table 1	Statutory notifications of infectious diseases in the past 6 weeks with totals for the current year compared with corresponding periods of the 2 preceding years
Table 2	Statutory notifications of infectious diseases for diseases for WEEK 2025/6 by UKHSA region, county, local and unitary authority including additional diseases notifiable from 6 April 2010

Registered Medical Practitioner in England and Wales have a statutory duty to notify a Proper Officer of the local authority, often the CCDC (Consultant in Communicable Disease Control), of suspected cases of certain infectious diseases:

Acute encephalitis	Haemolytic uraemic syndrome *	Rubella
Acute infectious hepatitis	Infectious bloody diarrhoea *	SARS *
Acute meningitis	Invasive group A Streptococcal disease	Scarlet fever **
Acute poliomyelitis	Legionnaires disease *	Smallpox
Anthrax	Leprosy	Tetanus
Botulism *	Malaria	Tuberculosis
Brucellosis *	Measles	Typhus
Cholera	Meningococcal septicaemia	Viral haemorrhagic fever
Covid-19	Mpox ***	Whooping cough
Diphtheria	Mumps	Yellow fever
Enteric fever (typhoid or paratyphoid)	Plague	
Food poisoning	Rabies	

* Notifiable from 6 April 2010

Notifications of infectious diseases, some of which are later microbiologically confirmed, prompt local investigation and action to control the diseases. Proper officers are required every week to inform the UK Health Security Agency (UKHSA) (formerly the Registrar General) anonymised details of each case of each disease that has been notified. UKHSA has responsibility of collating the weekly returns from proper officers and publishing analyses of local and national trends.

See Appendix A for details about impacts as a result of the new case management system

**** See Appendix B for details about Scarlet Fever Reporting**

***** See Appendix C for details about Mpox**

Table 1 Statutory notifications of infectious diseases in the past 6 weeks, with totals for the current year compared with corresponding periods of the preceding 2 years.

England and Wales
including Port Health Authorities

	Weekly Totals					2025/ 06 Feb 09	Cumulative Totals

Notifications not shown or not shown separately in the main table

Diseases not shown here or on main table may be presumed to have no cases this week

N	District/UA	County/UA
2	Acute infectious hepatitis (thought or known to be due to Hepatitis A presumed contracted in GB)	
1	Mansfield	Nottinghamshire
1	Wiltshire	Wiltshire
1	Acute infectious hepatitis (thought or known to be due to Hepatitis A not known where contracted)	
1	County Durham	Durham
1	Acute infectious hepatitis (thought or known to be due to Hepatitis B presumed contracted abroad)	
1	Stoke-on-Trent	Stoke-on-Trent
8	Acute infectious hepatitis (other cause or cause unknown not known where contracted)	
1	Barnet	Outer London
1	County Durham	Durham
1	Dudley	West Midlands
1	Gateshead	Tyne and Wear
1	Newark and Sherwood	Nottinghamshire
1	North Tyneside	Tyne and Wear
1	Sutton	Outer London
1	Swindon	Swindon
1	Brucellosis	
1	Erewash	Derbyshire
3	Enteric fever (typhoid or paratyphoid fever) (Typhoid fever - not known where contracted)	
1	Redbridge	Outer London
1	Tameside	Greater Manchester
1	Tower Hamlets	Inner London
11	Infectious bloody diarrhoea	
1	Blackpool	Blackpool
1	Camden	Inner London
1	County Durham	Durham
1	Epping Forest	Essex
1	Havant	Hampshire
1	Horsham	West Sussex
1	Mansfield	Nottinghamshire
1	Rushmoor	Hampshire
1	Southwark	Inner London
1	Swale	Kent
1	Tower Hamlets	Inner London
11	Invasive group A streptococcal disease	
1	Blaenau Gwent	Blaenau Gwent
1	Bromley	Outer London
1	Greenwich	Outer London
1	Lambeth	Inner London
1	Leeds	West Yorkshire
1	Merton	Outer London
1	Mole Valley	Surrey
1	Oldham	Greater Manchester
1	Staffordshire Moorlands	Staffordshire
1	Tendring	Essex
1	Westminster	Inner London
4	Legionnaires' Disease	
2	Cardiff	Cardiff
1	Carmarthenshire	Carmarthenshire
1	Middlesbrough	Middlesbrough
2	Meningococcal septicaemia	
1	Stoke-on-Trent	Stoke-on-Trent
1	Swansea	Swansea

N	District/UA	County/UA
1	Not specified	
1	Birmingham	West Midlands
1	Shiga toxin-producing Escherichia Coli (STEC)	
1	Brent	Outer London
1	Flu A	
1	Herefordshire, County of	Herefordshire, County of
1	Yersinia	
1	Liverpool	Merseyside
1	Streptococcal - Group A - non-invasive	
1	Wandsworth	Inner London
2	Typhus	
1	East Lindsey	Lincolnshire
1	Tower Hamlets	Inner London

Appendix A

In 2024, UKHSA rolled out a new case and incident management system to support the function and capabilities of our health protection teams. UKHSA paused publication of Notifiable Diseases: weekly reports after week 26 2024 while data checks were carried out. These have now been completed and the NOIDs weekly report were reinstated in week 44 2024.

Due to changes in the way in which the data are now processed and mapped, including local authority codes which have been updated to the latest geographies, it would be inaccurate to compare data since week 27 2024 to historic reports.

Further refinements to the way in which data are displayed and processed will be carried out over time and its overall quality improved. Public health action is taken on notifications as we receive them and is not impacted by the change in system.

Causative agent reporting has been unaffected by this.

Transition to the new case and incident management system has been effective from a different date in each region of England, spanning weeks 27 to 39 of 2024. The specific transition dates are included below and impact on the comparability of the statistics either side of these points:

- South East – 2 July 2024 – week 27
- South West – 9 July 2024 – week 28
- East of England – 11 July 2024 – week 28
- Yorkshire & Humber – 16 July 2024 – week 29
- North East – 18 July 2024 – week 29
- West Midlands – 23 July 2024 – week 30
- London – 30 July 2024 – week 31
- East Midlands – 17 September 2024 – week 38
- North West – 24 September 2024 – week 39

In some weeks it has been necessary to discard records relating to particular days because data has not been supplied in the required format. This impacts the totals in the following weeks:
2024 - 27, 32, 35, 36, 37, 41, 43, 46 and 50
2025 - 1, 4, 5

Appendix B - Scarlet fever and group A streptococcus reporting

Cases of scarlet fever are taking longer to appear in our published data after initial processing and review. Our teams are working at pace to ensure published data reflects all formal notifications received and local authority data will be updated once full data entry has occurred. In the meantime, our real-time [GP Syndromic Surveillance data](#) reflects current trends.

UKHSA teams continue to manage outbreaks of scarlet fever, irrespective of whether it has been entered into NOIDs, and have carried out all necessary public health interventions needed to reduce further transmission in outbreaks, especially in vulnerable settings such as schools and nurseries.

For scarlet fever notifications that are published, it is inaccurate to compare data since week 27 2024 to historic reports due to a change in the way that notifications are processed.

Appendix C - Mpox

This figure refers to clinical suspicion of mpox, not a specific clade. Confirmed cases of clade IIb mpox can be found here: <https://www.gov.uk/government/publications/monkeypox-outbreak-epidemiological-overview>

Confirmed cases of clade Ib mpox can be found here: <https://www.gov.uk/government/news/ukhsa-detects-first-case-of-clade-ib-mpox>
