## Public sector finances, UK: January 2025

How the relationship between UK public sector monthly income and expenditure leads to changes in deficit and debt.

Coverage: United Kingdom

Date: 21 February 2025

Theme: Economy

Next release: 21 March 2025

Contact: Public sector finances team

Email: [public.sector.inquiries@ons.gov.uk](mailto:public.sector.inquiries@ons.gov.uk)

Telephone: +441633 456402

### 1. Main points

- Each January, tax receipts are always higher than in other months, because of receipts from self-assessed taxes; this often leads to a surplus whereby income exceeds expenditure rather than borrowing.
- Initial estimates show that the public sector was in surplus by £15.4 billion in January 2025; this was a £0.8 billion larger surplus than last year, and the highest January surplus since monthly records began in 1993.
- The current budget balance – receipts less the cost of day-to-day public sector activities – was in surplus by £24.6 billion in January 2025; this was a £0.7 billion larger surplus than last year and the highest January budget surplus since monthly records began in 1997.
- Combined self-assessed income and Capital Gains Tax receipts were provisionally estimated at £36.2 billion in January 2025, £3.8 billion more than a year earlier, and the highest January receipts since monthly records began in 1999.
- Borrowing in the financial year to January 2025 was £118.2 billion; this was £11.6 billion more than at the same point in the last financial year and the fourth-highest financial year-to-January borrowing since monthly records began in 1993.
- Public sector net debt excluding public sector banks was provisionally estimated at 95.3% of gross domestic product (GDP) at the end of January 2025; this was 0.1 percentage points more than at the end of January 2024, and remains at levels last seen in the early 1960s.
- Public sector net financial liabilities excluding public sector banks were provisionally estimated at 82.7% of GDP at the end of January 2025; this was 2.0 percentage points more than at the end of January 2024, but 12.6 percentage points less than for public sector net debt.
- Central government net cash requirement (excluding UK Asset Resolution Ltd and Network Rail) was in surplus by £15.2 billion in January 2025, a £4.3 billion smaller surplus than in January 2024; see Annington Homes in Section 11: Data sources and quality.

## 2. January 2025 indicators at a glance

### Public sector net borrowing

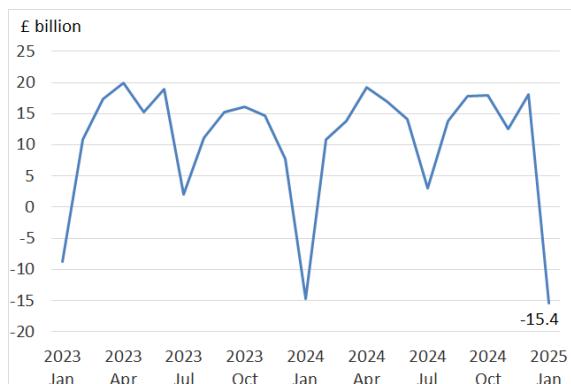

Dataset identifier code: [J5II](#)

Since January 2024: ↓ £0.8 bn

Since January 2023: ↓ £6.8 bn

In January 2025, the public sector received more in taxes and other income than it spent, leading to a surplus of £15.4 billion.

Source: ONS

### Total public sector spending

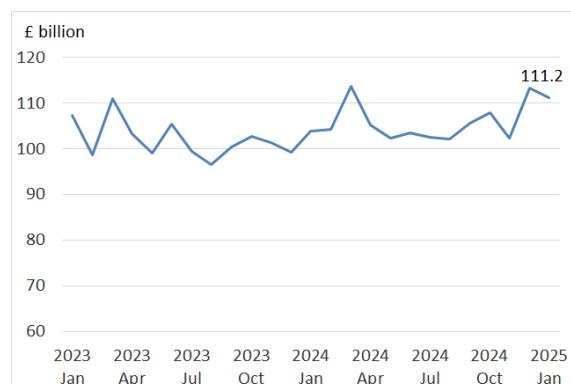

Dataset identifier code: [KX5Q](#)

Since January 2024: ↑ £7.3 bn

Since January 2023: ↑ £3.8 bn

Spending on public services, benefits and debt interest all increased compared with January 2024.

Source: ONS

### Total public sector receipts

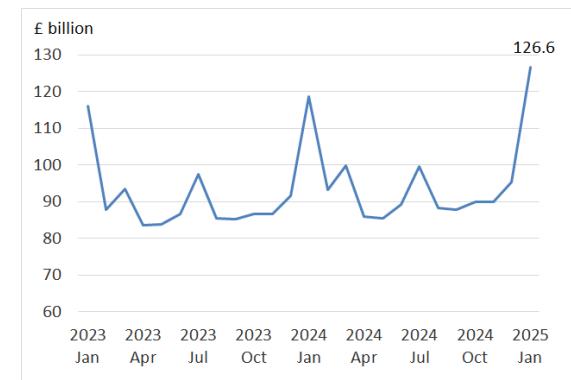

Dataset identifier code: [JW2O](#)

Since January 2024: ↑ £8.1 bn

Since January 2023: ↑ £10.5 bn

Each January, tax receipts are always higher than in other months because of receipts from self-assessed taxes. This month saw the highest January amount on record for combined self-assessed income and capital gains tax receipts.

Source: ONS

### Public sector net debt as a % of GDP

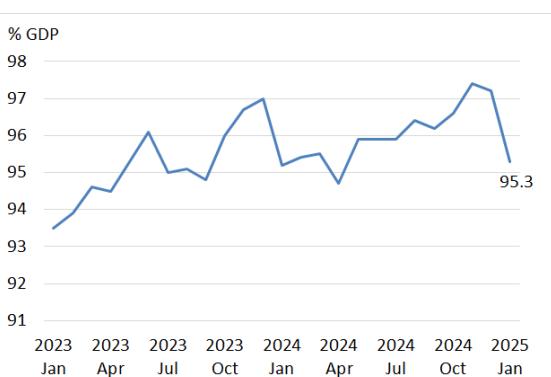

Dataset identifier code: [HF6X](#)

Since January 2024: ↑ 0.1 ppts

Since January 2023: ↑ 1.8 ppts

Debt was provisionally estimated at 95.3% of GDP at the end of January 2025 and remains at levels last seen in the early 1960s.

Source: ONS

### 3. Borrowing in January 2025

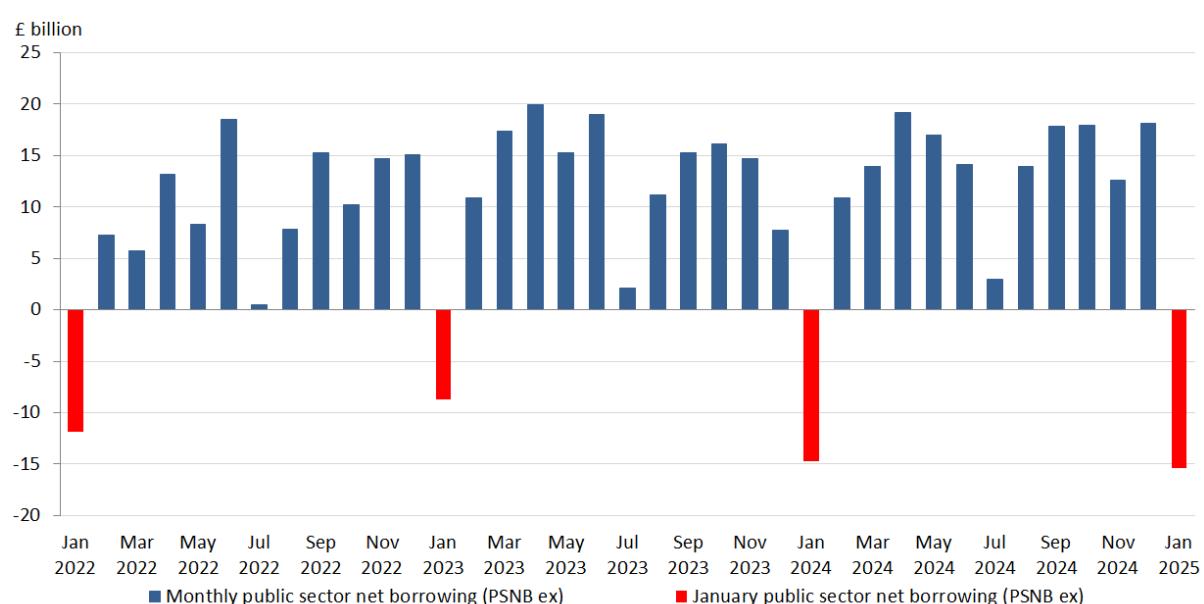

In January 2025, initial estimates show that the public sector received more in taxes and other income than it spent, leading to a surplus of £15.4 billion.

This was a £0.8 billion greater surplus than in January 2024 and the highest January surplus since monthly records began in January 1993.

However, this was a £5.1 billion smaller surplus than the £20.5 billion forecast for January 2025 by the Office for Budget Responsibility in October 2024.

**Figure 1: Each January tax receipts are always higher than in other months owing to receipts from self-assessed taxes; this often leads to a surplus**

Public sector net borrowing excluding public sector banks, £ billion, UK, January 2022 to January 2025

**Source:** Public sector finances from the Office for National Statistics

**Notes:**

1. Dataset identifier code: -J5II.
2. Positive numbers indicate a deficit; negative numbers a surplus.

Public sector borrowing consists of two broad components: the current budget and net investment.

The current budget, which is usually in deficit, can be considered as borrowing to fund day-to-day public sector activities. Initial estimates show that in January 2025, the current budget was in surplus by £24.6 billion. This was a £0.7 billion greater surplus than in January 2024 and the highest January surplus since monthly records began in 1997.

The public sector's net (capital) investment was £9.1 billion in January 2025, £0.1 billion less than in January 2024.

**Table 1: Public sector net borrowing by subsector: January**

Public sector net borrowing by subsector January 2025 compared with January 2024, £ billion, UK

Sub-sector	Dataset identifier code	January (£ billion)		Change on a year ago

Source: Public sector finances from the Office for National Statistics

**Notes**

1. Public sector excluding Bank of England and the public sector-controlled banks.
2. Public sector excluding the public sector-controlled banks.
3. Excludes Network Rail Limited and UK Asset Resolution Limited.
4. The data in this table correspond to those published in Table PSA2 of our [Public sector finances tables 1 to 10: Appendix A dataset](#).
5. Extremely large percentage changes are not included in this table.
6. There are no institutions classified as public sector banks as of June 2024.

A breakdown of net borrowing by subsector and a summary of central government receipts and expenditure data are presented in Tables 1 to 3 in our [Public sector finances summary tables: Appendix M dataset](#).

### Central government borrowing

Central government forms the largest part of the public sector and includes government departments such as HM Revenue and Customs, the Department of Health and Social Care, the Department for Education, and the Ministry of Defence, as well as other government agencies.

The relationship between central government's receipts and expenditure is an important determinant of public sector net borrowing. Central government was in surplus by £13.8 billion in January 2025, around 90% of the £15.4 billion surplus of the whole public sector.

## **Central government current receipts**

Central government's receipts were £117.6 billion in January 2025, £7.8 billion more than in January 2024. Of this £7.8 billion increase in income:

- central government tax receipts increased by £7.7 billion to £97.0 billion; this included increases of £6.9 billion in Income Tax and £0.4 billion in Corporation Tax, with Value Added Tax (VAT) receipts largely unchanged
- compulsory social contributions decreased by £0.2 billion to £14.5 billion

A detailed breakdown of central government income is presented in our [Public sector current receipts: Appendix D dataset](#).

## **Self-assessed tax receipts**

Each January, accrued receipts are always higher than in other months, because of self-assessed (SA) taxes.

In January 2025, SA Income Tax receipts have been provisionally estimated at £25.9 billion, £4.2 billion more than in January 2024, but £3.0 billion less than the £28.9 billion forecast by the Office for Budget Responsibility (OBR) in October 2024.

SA Capital Gains Tax receipts have been provisionally estimated at £10.3 billion, £0.3 billion less than in January 2024 and £1.1 billion less than the £11.4 billion forecast by the OBR in October 2024.

Tax payments made close to the deadline, and the time taken for those to then appear in administrative data, mean that the proportion of self-assessed taxes recorded in January and February can vary year-on-year. Therefore, it is advisable to consider these two months together when making annual comparisons.

Further detail is available in [HMRC tax receipts and National Insurance contributions for the UK](#) on the GOV.UK website.

## **Central government current expenditure**

Central government spending data for January 2025 are provisional. There is uncertainty around these estimates until more detailed departmental information becomes available later in the financial year.

Central government's total expenditure was £103.8 billion in January 2025, £1.8 billion more than in January 2024. Of this overall £1.8 billion increase in spending:

- central government departmental spending on goods and services increased by £2.6 billion to £36.8 billion, as pay rises and inflation increased running costs
- net social benefits paid by central government increased by £2.5 billion to £26.2 billion, largely caused by inflation-linked increases in many benefits and pensions
- interest payable on central government debt increased by £2.0 billion to £6.5 billion, largely because the interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI)
- payments to support the day-to-day running of local government increased by £0.8 billion to £11.5 billion; these intra-government transfers are both central government spending and a local government receipt, so they have no effect on overall public sector borrowing

## **Central government net investment**

Central government net investment was £13.7 billion in January 2025, £6.2 billion less than in January 2024.

This decrease was largely because of a £5.8 billion reduction in the quarterly payment from HM Treasury to the Bank of England (BoE) Asset Purchase Facility (APF) Fund compared with a year earlier.

These intra-public sector transfers have no impact on overall public sector borrowing because they are recorded as both central government spending and Bank of England receipts.

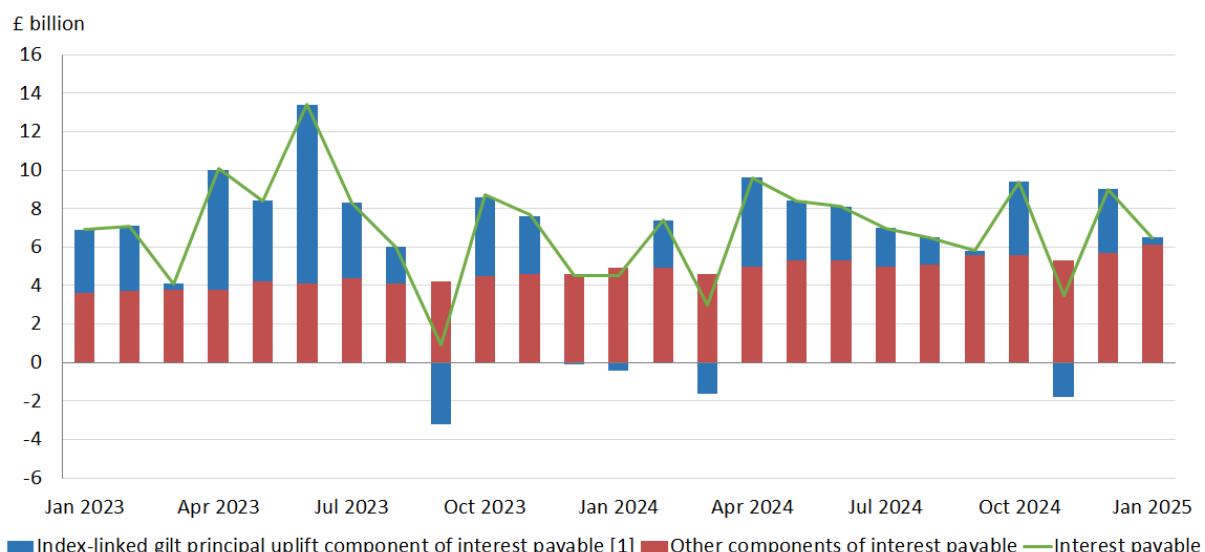

## Interest payable on central government debt

The interest payable on central government debt was £6.5 billion in January 2025.

This was £2.0 billion more than in January 2024 and was the highest January interest payable since 2023, when it was £6.9 billion, and the second-highest January figure since monthly records began in 1997.

**Figure 2: The interest payable on index-linked gilts rises and falls with the Retail Prices Index, adding volatility to central government debt interest costs**

Central government debt interest payable, £ billion, UK, January 2023 to January 2025

Source: Public sector finances from the Office for National Statistics

### Notes

1. Net of redemption proceeds.
2. Dataset identifier codes: NMFX, JNYY and JNYX.

The large monthly changes in the Retail Prices Index (RPI) since early 2021 have led to considerable volatility in debt interest payable, with the largest three months on record occurring in 2022 and 2023. The additional interest caused by RPI inflation is described as “capital uplift” and affects the value of the gilt principal.

Capital uplift was £0.4 billion in January 2025, largely reflecting the 0.1% increase in the RPI between October and November 2024. This increased the capital uplift on the three-month lagged index-linked gilts, which make up around 95% of the index-linked gilt stock, as described by the UK Debt Management Office.

A monthly time series of capital uplift on the index-linked gilts in issue is available as series identifier code JNYY. Figure 2 shows this series as the blue (lighter) portion of each bar and excludes the uplift payable at the time of an index-linked gilt redemption. These redemption payments are already recorded as accrued interest payable across the life of each index gilt.

For further details of our approach, see our methodology article on Calculation of interest payable on government gilts.

#### 4. Borrowing in the financial year to January 2025

Monthly receipts and expenditure figures can be volatile, so the year-to-date position provides a better indicator of progress against previous years and the forecast.

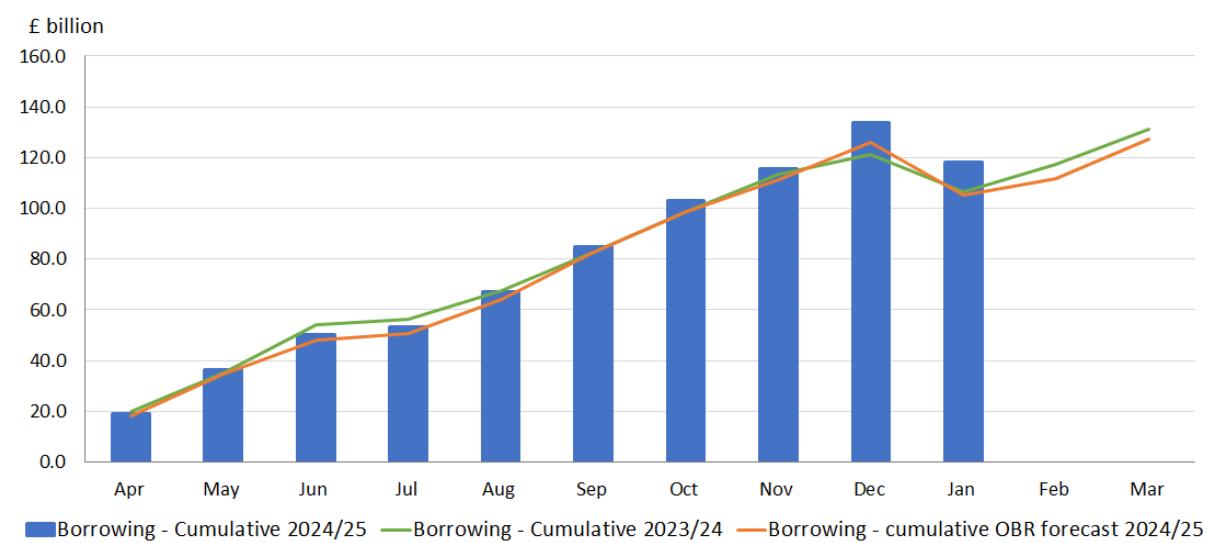

The public sector spent more than it received in taxes and other income in the financial year (FY) to January 2025. Initial estimates show it was required to borrow £118.2 billion, £11.6 billion more than was borrowed in the FY to January 2024.

This was the fourth-highest FY to January borrowing since monthly records began in 1993, behind those of the equivalent 10-month period of the FY to January 2021 during the coronavirus (COVID-19) pandemic, and in the FY to January 2010 and the FY to January 2011 following the global financial downturn.

Borrowing in the FY to January 2025 was £12.8 billion more than the £105.4 billion forecast by the Office for Budget Responsibility in October 2024. Of this, central government and local government borrowing were, respectively, £8.1 billion and £4.2 billion above OBR forecast amounts.

**Figure 3: Borrowing in the financial year to January 2025 was higher than the official forecast and the same ten-month period a year earlier**

Cumulative public sector net borrowing excluding public sector banks, £ billion, UK, financial year (FY) to January 2025

**Source:** Public sector finances from the Office for Budget Responsibility and Office for National Statistics

**Notes:**

1. Dataset identifier code: -J5II.
2. This chart uses forecast data published in the [Economic and fiscal outlook – October 2024 and monthly profiles published January 2025](#).

Within public sector borrowing in the FY to January 2025, the current budget deficit was £64.8 billion, £3.8 billion more than in the same period a year ago.

Public sector net investment increased by £7.8 billion to £53.4 billion for the same 10-month period.

**Table 2: Public sector net borrowing by subsector: financial year to January**

Public sector net borrowing by subsector, financial year to January 2025 compared with the financial year to January 2024, UK

Sub-sector	Dataset identifier code	Financial year to date (£ billion)		Change on a year ago

Memo: Central government net cash requirement [note 3]	M98R	151.6	121.9	29.7	24.4

Source: Public sector finances from the Office for National Statistics

Notes

1. Public sector excluding Bank of England and the public sector-controlled banks.
2. Public sector excluding the public sector-controlled banks.
3. Excludes Network Rail Limited and UK Asset Resolution Limited.
4. The data in this table correspond to those published in Table PSA2 of our [Public sector finances tables 1 to 10: Appendix A dataset](#).
5. Extremely large percentage changes are not included in this table.
6. There are no institutions classified as public sector banks as of June 2024.

A breakdown of net borrowing by subsector and a summary of central government receipts and expenditure data are presented in Tables 1 to 3 in our [Public sector finances summary tables: Appendix M dataset](#).

Central government borrowed £132.5 billion of the £118.2 billion borrowed by the public sector (excluding public sector banks) in the FY to January 2025. This larger central government borrowing was partially offset by a £17.8 billion Bank of England (BoE) surplus and balanced by remaining subsectors.

Payments totalling £36.3 billion made by central government to the BoE in this period under its Asset Purchase Facility (APF) Fund indemnity agreement affected the borrowing of both subsectors. As with similar intra-public sector transactions, these payments are public sector borrowing neutral. They increased central government's borrowing by £36.3 billion in the FY to January 2025, but reduced the borrowing impact of the BoE by an equal and offsetting amount.

## **Central government current receipts**

Central government's current receipts were £854.1 billion in the FY to January 2025, £31.4 billion more than in the same period last year. Of this £31.4 billion increase in income:

- central government tax receipts increased by £36.1 billion to £654.8 billion, with increases in Income Tax, Corporation Tax and Value Added Tax (VAT) receipts of £24.0 billion, £5.0 billion and £2.7 billion, respectively
- compulsory social contributions decreased by £7.9 billion to £139.8 billion, largely because of the reductions in the main rates of National Insurance in early 2024

A detailed breakdown of central government income is presented in our [Public sector current receipts: Appendix D dataset](#).

## **Central government current expenditure**

Central government's total expenditure was provisionally estimated as £986.6 billion in the FY to January 2025, £37.1 billion more than in the same 10-month period a year ago. Of this overall £37.1 billion increase in spending:

- central government departmental spending on goods and services increased by £21.8 billion to £358.0 billion, as pay rises and inflation increased running costs
- net social benefits paid by central government increased by £13.2 billion to £256.1 billion, largely caused by inflation-linked increases in many benefits
- payments to support the day-to-day running of local government increased by £9.3 billion to £121.1 billion; these intra-government transfers have no impact on overall public sector borrowing (PSNB ex)
- interest payable on central government debt decreased by £1.3 billion to £73.8 billion, largely because the interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI)
- subsidies paid by central government decreased by £3.4 billion to £24.0 billion, largely because of the closure of the energy support schemes that were active until June 2023
- net current grants abroad decreased £4.8 billion to £6.0 billion, largely because of smaller net payments made to the EU

## **Central government net investment**

Central government net investment in the FY to January 2025 was £94.0 billion, £3.4 billion less than at the same point in the last financial year. This £94.0 billion includes £36.3 billion in regular payments from HM Treasury to the BoE APF Fund. These intra-public sector transfers have no impact on overall public sector borrowing (PSNB ex).

## **Local government**

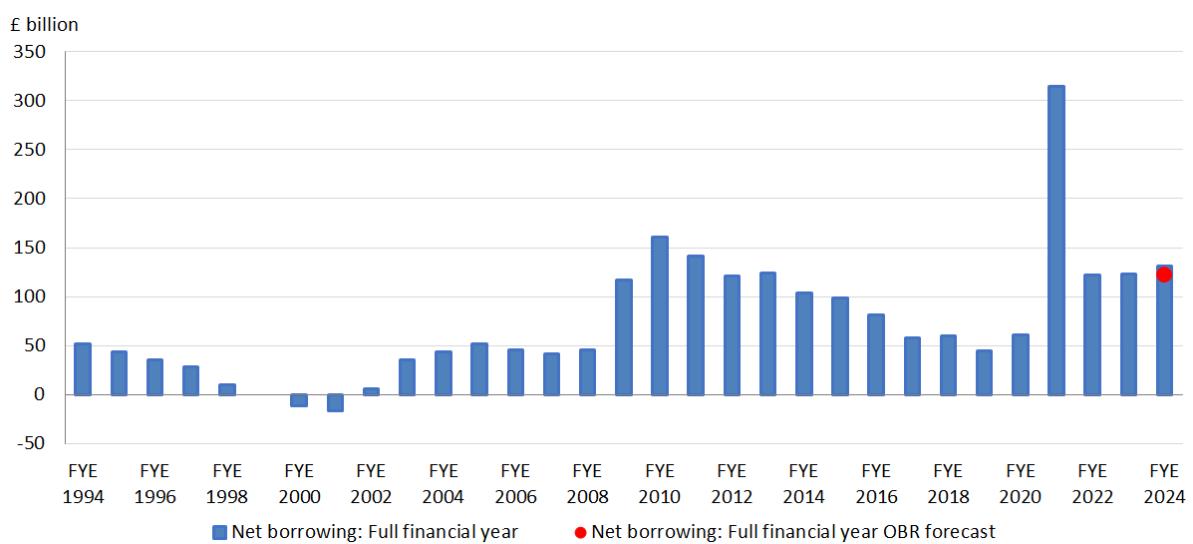

Initial estimates suggest that local government borrowing was £7.0 billion in the 10 months to January 2025. This was £1.1 billion lower than in the same period a year earlier. Our provisional monthly estimates for the UK are currently based on published budget data for England, Scotland and Wales, with estimates included for Northern Ireland.

## 5. Borrowing in the financial year ending March 2024

The public sector borrowed £131.3 billion in the financial year ending (FYE) March 2024. This was £8.1 billion more than the £123.3 billion borrowed in FYE March 2023, and £9.4 billion more than the £121.9 billion forecast by the Office for Budget Responsibility.

**Figure 4: Borrowing in the FYE March 2024 was more than in the FYE March 2023 and more than was forecast by the Office for Budget Responsibility**

Public sector net borrowing excluding public sector banks, financial year ending (FYE), £ billion, UK

**Source:** Public sector finances from the Office for Budget Responsibility and Office for National Statistics

**Notes:**

1. Dataset identifier code: -J5II.
2. This chart uses forecast data published in the [Economic and fiscal outlook – October 2024 published October 2024](#).

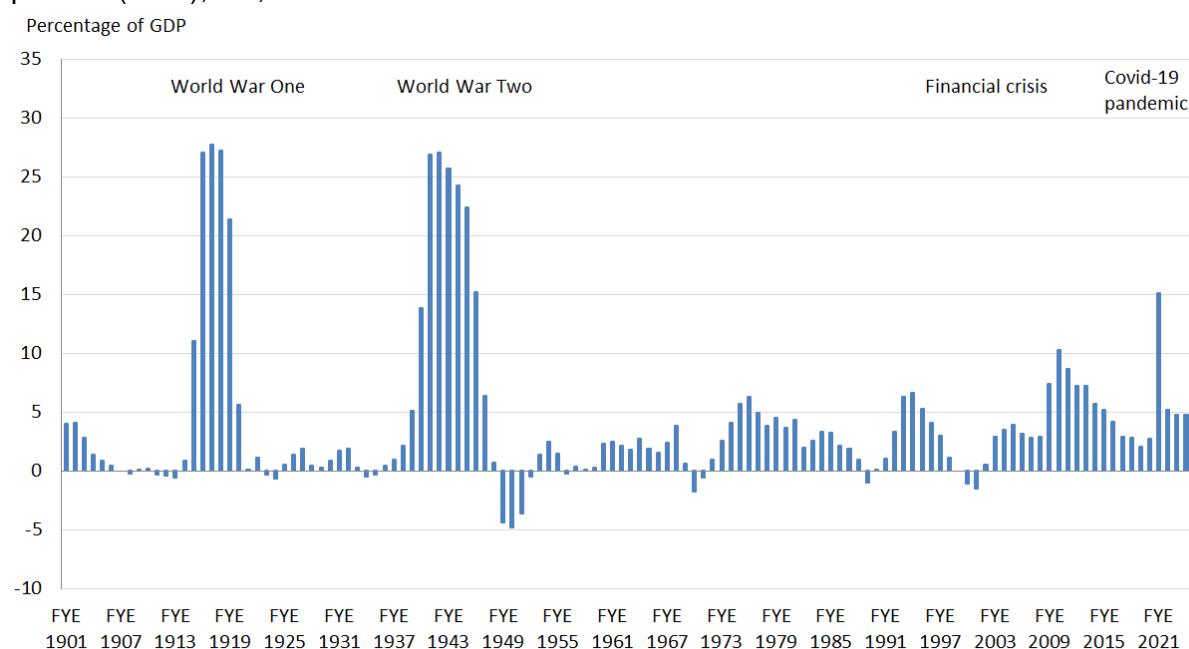

## 6. Borrowing in earlier financial years

Expressing borrowing as a ratio of gross domestic product (GDP) – the value of everything produced in the UK economy in a 12-month period – gives an estimate of its affordability and provides a more thorough and reliable measure for comparison of the UK's fiscal position over time.

Our current estimate for the total borrowed in the financial year ending (FYE) March 2024 as a ratio of GDP was 4.8%. This is 0.4 percentage points higher than our initial estimate of 4.4% published in our March 2024 release.

**Figure 5: Borrowing expressed as a ratio of GDP has reduced substantially, following its large increase during the coronavirus (COVID-19) pandemic period**

Public sector net borrowing excluding public sector banks, percentage of gross domestic product (GDP), UK, FYE 1901 to FYE 2024

Source: Public sector finances from the Office for National Statistics and Office for Budget Responsibility

Notes:

1. Dataset identifier code: -J5IJ.
2. This chart uses historical data published in the [Public finances databank 2024 to 2025](#).

We describe the methodology used for the presentation of our GDP ratios in our methodology article [The use of GDP in public sector fiscal ratio statistics](#).

## 7. The public sector balance sheet

The public sector balance sheet describes its financial position at a point in time. It shows its liabilities (amounts owed) and its assets (amounts owned).

There are several measures of the public sector balance sheet that we discuss in our [What the UK government owns and what it owes blog](#).

Table 3 presents the narrowest balance sheet measure, which is the redemption value of central government gilts. It then builds on this measure, widening coverage by both the subsector and the range of asset and liability types included, to reach the far wider measure of public sector net worth. We explain this measure in our [Wider measures of the public sector balance sheet: public sector net worth methodology](#).

**Table 3: The public sector balance sheet**

Balance sheet measures as at the end of January 2025, £ billion, UK

Classification of assets and liabilities [note 1] [note 2] [note 10]	Central government gilts	General government gross debt	PSND excluding both BoE and public sector banks (PSND ex BoE)	PSND excluding public sector banks	PSNFL excluding public sector banks	Public sector net worth excluding public sector banks
<b>Total [note 3]</b>	<b>2,449.9</b>	<b>2,880.9</b>	<b>2,604.1</b>	<b>2,777.8</b>	<b>2,411.9</b>	<b>-828.9</b>
Assets: Non-financial [note 4]						1,583.0
Assets: Illiquid financial [note 5]					1,069.4	1,069.4
Assets: Liquid financial [note 5]			248.8	352.2	352.2	352.2
Liabilities: Currency and deposits		260.0	265.2	1,096.9	1,096.9	1,096.9
Liabilities: Gilts [note 6]	2,449.9	2,449.3	2,412.4	1,843.7	1,843.7	1,843.7
Liabilities: Other debt securities and loans		171.6	175.2	189.3	189.3	189.3
Liabilities: Other financial liabilities [note 7]				703.5	703.5	

**Source:** Public sector finances from the Office for National Statistics and Debt Management Office

**Notes:**

1. All aggregates are presented on a [2010 European system of national and regional accounts \(ESA 2010\) \(PDF, 6.4MB\)](#) basis unless indicated.
2. Consolidation between subsectors mean that the size of assets and liabilities (such as gilts) impacting on the measure can change as the coverage increases.
3. Total equals liabilities less assets except public sector net worth, where total equals assets less liabilities.
4. Non-financial account data based on the [UK national balance sheet](#).
5. "Liquid financial assets" mainly consists of foreign exchange reserves and cash deposits. "Illiquid financial assets" includes assets such as loans, financial derivatives, and other accounts receivable.
6. Gilt liabilities have been adjusted to remove those held by Pool Re which is classified as a central government body.
7. "Other financial liabilities" includes monetary gold and special drawing rights, standardised guarantees, financial derivatives, funded pension liabilities and other accounts payable.
8. Figures may not sum because of rounding.
9. We publish an additional presentation of the UK public sector balance sheet following [International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E](#).
10. PSND - Public sector net debt and PSNFL - public sector net financial liabilities

Our [Public sector balance sheet tables: Appendix N dataset](#) presents a detailed reconciliation between the balance sheet measures summarised in Table 3.

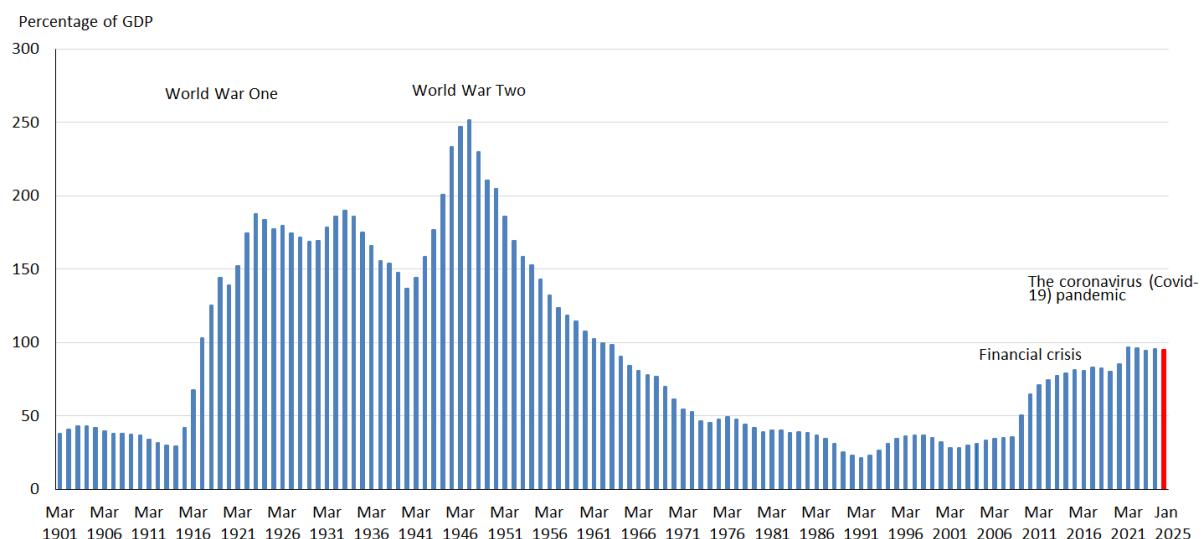

## Public sector net debt

Public sector net debt excluding public sector banks (PSND ex) is the most widely used balance sheet measure used to describe the UK public sector's financial position at a point in time. Expressing net debt as a ratio of gross domestic product (GDP) gives an estimate of its affordability, and provides a more thorough and reliable measure for comparison of the UK's fiscal position over time.

The net debt-to-GDP ratio at the end of January 2025 was provisionally estimated at 95.3%, 0.1 percentage points higher than a year ago. However, this is a highly provisional estimate and is likely to be revised in future publications because it partly relies on GDP estimates based on the October 2024 Office for Budget Responsibility forecast. Our blog explains [why our estimates of the debt to GDP ratio are susceptible to revision](#).

**Figure 6: Net debt as a percentage of GDP remains at levels last seen in the early 1960s**

Public sector net debt excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year end (FYE) 1901 to January 2025

**Source:** Public sector finances from the Office for National Statistics and Office for Budget Responsibility

**Notes:**

1. Dataset identifier code: HF6X.
2. This chart uses historical data published in the [Public finances databank 2024 to 2025](#).

Public sector net debt excluding the Bank of England (BoE) was £2,604.1 billion at the end of January 2025, or around 89.3% of GDP. This was £173.7 billion, or 6.0 percentage points of GDP, less than the wider measure of net debt (including the BoE). This difference was largely a result of the BoE's quantitative easing activities, including the gilt-purchasing activities of the Asset Purchase Facility (APF) Fund.

The APF Fund's gilt holding is not recorded directly as a component of public sector net debt. Instead, in January 2025, we recorded the £100.7 billion difference between the £651.7 billion of reserves created to purchase its gilts (at market value at the time of purchase) and their £551.0 billion redemption value.

For details of the BoE's contribution to public sector net debt, see Table PSA9A of our [Public sector finances tables 1 to 10: Appendix A dataset](#).

## Public sector net financial liabilities

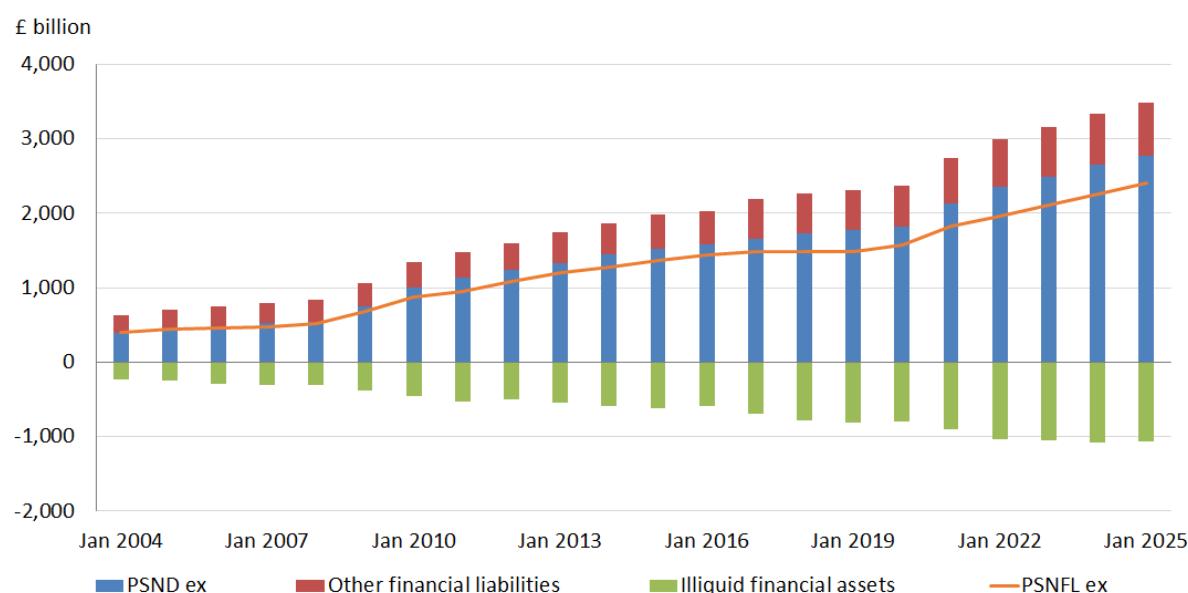

Public sector net financial liabilities excluding public sector banks (PSNFL ex) were £2,411.9 billion at the end of January 2025, which was equivalent to an estimated 82.7% of GDP. This was £159.6 billion, or 2.0 percentage points, more than at the end of January 2024.

PSNFL ex adds further assets and liabilities to those recorded in debt (PSND ex). These extra assets are currently valued at more than the extra liabilities. This means that PSNFL ex was 12.6 percentage points of GDP less than PSND ex, which stood at 95.3% of GDP at the end of January 2025.

On 30 October 2024, we published an explanation of the financial assets and liabilities captured in PSNFL ex in our [PSNFL methodology](#). Additionally, we published [a blog explaining the PSNFL measure](#), because it has been selected by the UK government as the reference for a balance sheet fiscal rule.

**Figure 7: The upward trend in public sector net financial liabilities is largely because of increases in net debt**

Public sector net financial liabilities, £ billion, UK, month end January 2004 to January 2025

Source: Public sector finances from Office for National Statistics

Notes:

1. Dataset identifier codes: KSE6, JM6T, JMEU and CPNF.
2. PSND ex abbreviates public sector net debt excluding public sector banks.
3. PSNFL ex abbreviates public sector net financial liabilities excluding public sector banks.

Our [Public sector balance sheet tables: Appendix N](#) presents a reconciliation between PSND ex and PSNFL ex, in the context of the balance sheet measures summarised in Table 3.

The additional assets and liabilities included in PSNFL ex that fall outside of the PSND ex boundary are not updated monthly. Instead, they are updated quarterly, or when data become available. These data were last updated on 20 December 2024.

A more detailed presentation of the public sector balance sheet is available in our [Public sector net worth: Appendix O dataset](#), released on 20 December 2024.

## 8. Revisions

The data for the latest months of every release contain a degree of forecasts. These are then replaced by improved estimates, as further data are made available, and finally by outturn data.

- !** Our initial estimates of borrowing for the most recent months are prone to revisions in later months. This is because some tax receipts contain a degree of Office for Budget Responsibility (OBR)-based forecast data. Both departmental and local government spending profiles are provisional.

**Table 4: Revisions to public sector net borrowing by subsector**

Public sector net borrowing by subsector compared with the previous publication, UK, £ billion

**Notes**

1. Public Sector excluding Bank of England and the public sector-controlled banks.
2. Public Sector excluding the public sector-controlled banks.
3. The data in this table correspond to that published in Table PSA2 of [Public sector finances tables 1 to 10: Appendix A dataset](#).
4. There are no institutions classified as public sector banks as of June 2024.

Tables 4 to 6 of our [Public sector finances summary tables: Appendix M dataset](#) compare our latest public sector finances data with those in our [Public sector finances, UK: December 2024 bulletin](#), published on 22 January 2025. They highlight the revisions to borrowing by subsector, with additional detail for central government receipts and expenditure.

Our [Public sector finance revisions analysis: Appendix P dataset](#) records monthly borrowing data as at first and at subsequent publications, graphically illustrating any potential bias to our early estimates.

## **Revisions to public sector net borrowing in the financial year to December 2024**

We have increased our estimate of public sector net borrowing (PSNB ex) in the first nine months of the financial year by £3.7 billion to £133.6 billion since publishing our December 2024 release. This is because of regular updates to our central government data.

Also, this month we have reduced our previous estimate of central government tax receipts by £2.5 billion, largely because of decreases in Corporation Tax receipts of £2.3 billion and Value Added Tax (VAT) receipts of £0.5 billion. These decreases were slightly offset by an increase to our previous estimate of Income Tax receipts of £0.2 billion.

For the same nine-month period, we have increased our previous estimate of total central government spending by £2.6 billion. Most notably, we have increased our previous estimate of spending on debt interest payable by £2.3 billion to reflect the latest source data.

We have made several other smaller changes to our provisional spending estimates, again to reflect the latest source data. Of these, we have increased our previous estimate of central government net investment by £0.4 billion. This now includes a £0.7 billion capital transfer paid to the private sector in December 2024 to account for repayments following a ruling from the Court of Justice of the European Union on UK taxation of controlled foreign companies.

## **Revisions to public sector net borrowing in earlier financial years**

We have increased our estimate of borrowing in the financial year ending March 2024 by £0.3 billion to £131.3 billion, since publishing our December 2024 release. This change was because of updates to previous Corporation Tax estimates.

## **Revisions to public sector net debt (PSND ex) at the end of December 2024**

We have reduced our estimate of debt at the end of December 2024 by £2.9 billion to £2,822.2 billion since publishing our December 2024 release. This change was largely because of updated Bank of England data, some of which are published one month in arrears.

## **Revisions to gross domestic product**

This month we have updated our previous estimates of nominal gross domestic product (GDP) with those published in our [GDP first quarterly estimate, UK: October to December 2024 bulletin](#), published on 13 February 2025.

GDP in the most recent periods was lower than previously estimated, meaning that this update has increased our published estimates of debt expressed as a ratio of GDP by between 0.1 and 0.2 percentage points from November 2023 to date.

## **9. Data on public sector finances**

### Public sector finances tables 1 to 10: Appendix A

Dataset | Released 21 February 2025

The data underlying the public sector finances statistical release are presented in the tables PSA 1 to 10.

### Public sector current receipts: Appendix D

Dataset | Released 21 February 2025

A breakdown of UK public sector income by latest month, financial year-to-date and full financial year, with comparisons with the same period in the previous financial year.

### Public sector finances summary tables: Appendix M

Dataset | Released 21 February 2025

The latest public sector net borrowing by subsector and a summary of central government receipts and expenditure data.

### Public sector balances sheet tables: Appendix N

Dataset | Released 21 February 2025

A reconciliation of the latest public sector balance sheet measures.

### Public sector finances borrowing by subsector: Appendix R

Dataset | Released 21 February 2025

Public sector finances analytical tables (PSAT) showing transactions related to borrowing by subsector. Total Managed Expenditure (TME) is also provided.

### International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E

Dataset | Released 20 December 2024

Presents the balance sheet, statement of operations and statement of other economic flows for the public sector, compliant with the Government Finance Statistics Manual 2014: GFSM 2014 presentation. Updated quarterly, depending on the availability of data.

### Public sector net worth: Appendix O

Dataset | Released 20 December 2024

Presents the balance sheet for the public sector, consistent with the 2010 European system of national accounts (ESA 2010) (PDF, 6.4MB) and Eurostat's Manual on Government Deficit and Debt (MGDD). Updated quarterly, depending on the availability of data.

## **10. Glossary**

### **Public sector**

In the UK, the public sector consists of six subsectors: central government, local government, public non-financial corporations, public sector funded pensions, the Bank of England (BoE) and public financial corporations (including public sector banks). The figures presented in this release exclude public sector banks unless otherwise noted.

The NatWest Group, the only remaining public sector bank, was reclassified to the private sector as of June 2024.

### **Public sector current budget deficit**

Public sector current budget deficit (PSCBD) is the gap between current expenditure and current receipts on an accruals basis, having taken account of depreciation. PSCBD is effectively an estimate of borrowing to fund day-to-day public sector activities and is the reference statistic used for a UK government fiscal rule.

The current budget is in surplus when receipts are greater than expenditure and is indicated with a negative sign.

### **Public sector net borrowing**

Public sector net borrowing (PSNB) is the gap between total expenditure and current receipts on an accruals basis. If receipts exceed expenditure, this is referred to as a surplus and is indicated with a negative sign. Borrowing is often referred to by commentators as “the deficit”.

Public sector current budget deficit and net borrowing are measured on an accruals basis, where transactions for income are recorded when earned and expenses are recorded when incurred, rather than when the bills are paid (on a cash basis).

### **Central government net cash requirement**

The central government net cash requirement (CGNCR) represents the cash needed to be raised from the financial markets over a period to finance its activities. The amount of cash required will be affected by changes in the timing of payments to and from the public sector, rather than when these liabilities were incurred.

### **Public sector net debt**

Public sector net debt (PSND), often referred to by commentators as “the national debt”, represents the amount of money the public sector owes to the private sector and overseas (in the form of loans, debt securities, deposit holdings and currency), net of liquid financial assets held.

### **Public sector net financial liabilities**

Public sector net financial liabilities (PSNFL) is a wider measure of the balance sheet than public sector net debt and includes all financial assets and liabilities recognised in the national accounts. PSNFL is the reference statistic used for a UK government fiscal rule and is sometimes referred to as “net financial debt”.

Broadening the PSNFL measure to include the public sector's non-financial assets provides public sector net worth (PSNW), our widest balance sheet measure.

## **11. Data sources and quality**

### **Methodology guides**

To supplement this release, we publish an accompanying [methodological guide and quality and methodology information \(QMI\)](#) outlining the strengths, limitations, and appropriate uses of government finance statistics.

We also explain the recording of interest payable to holders of UK government gilts in the UK public sector finances in our [Calculation of interest payable on government gilts methodology](#) and our [Use of gross domestic product \(GDP\) in public sector fiscal ratio statistics methodology](#).

### **Accredited official statistics**

Public sector net borrowing, cash requirement and debt are [accredited official statistics](#). These accredited official statistics were independently reviewed by the Office for Statistics Regulation in June 2017. They comply with the standards of trustworthiness, quality, and value in [the Code of Practice for Statistics](#) and should be labelled “accredited official statistics”.

### **Official statistics**

Public sector net financial liabilities and public sector net financial worth are both official statistics. These measures were introduced after June 2017, and so have not yet been reviewed by the Office for Statistics Regulation.

### **Official statistics in development**

Public sector net worth is labelled as “official statistics in development”. Until October 2023, these were called “experimental statistics”. Read more about the change in our [Guide to official statistics in development](#).

### **Tax receipts and social contributions**

In the most recent months, tax receipts recorded on an accrued basis are subject to some uncertainty. This is because many taxes such as Value Added Tax (VAT), Corporation Tax, and Pay As You Earn (PAYE) Income Tax contain some forecast cash receipts data and are liable to revision when actual cash receipts data are received.

The forecasts underlying our current tax estimates reflect the expectations published in the Office for Budget Responsibility's (OBR's) [Economic and fiscal outlook – October 2024 report](#).

## **Value Added Tax**

In August 2024, HM Revenue and Customs (HMRC) advised that annual Value Added Tax (VAT) receipts for the financial year ending (FYE) March 2023 and the FYE March 2024 had not been aligned to their annual accounts while ongoing assurance was carried out.

In our [Public sector finances, UK: July 2024 bulletin](#) we advised that VAT receipts over this period should be treated as provisional and that we would inform users when HMRC's assurance process was complete.

This month, HMRC has advised us that this assurance work was complete and that they expect to reduce previously reported VAT cash receipts for the FYE March 2023 and the FYE March 2024. This change will be reported in our Public sector finances, UK: February 2025 bulletin to be published on 21 March 2025.

Further briefing and the expected impact of this change is available in [HMRC tax receipts and National Insurance contributions for the UK](#) on the GOV.UK website.

Total cash tax receipts paid by HMRC to HM Treasury are unaffected by this update and therefore central government net cash requirement will not change. However, we expect public sector net borrowing to increase in the FYE March 2023 and the FYE March 2024. Additionally, there will be a revision in borrowing in the FYE March 2022 because of the timing adjustments applied to our cash receipts data.

## **Changes to National Insurance contributions**

The UK government announced [changes to the National Insurance contributions](#) paid by employers in the Autumn Budget 2024. This change comes into effect from 6 April 2025.

## **Annington Homes**

In December 2024, we recorded the [UK government repurchase of 36,347 military homes from Annington Homes](#) at a cost of £6.0 billion. Reflecting international statistical guidance, this purchase was recorded in December 2024, according to the date of the agreement. This month we have recorded the accompanying cash transaction, which has increased central government net cash requirement by £6.0 billion in January 2025.

## **Local government**

Local government data for the financial year ending (FYE) March 2025 are provisional estimates for the UK. They are largely based on published budget data for England, Scotland and Wales, with estimates included for Northern Ireland.

In recent years, planned local government expenditure initially reported in local authority budgets has been systematically lower than final outturn current expenditure reported in the audited accounts, and generally higher than that reported in final outturn capital expenditure. Therefore, we may include adjustments to increase or decrease the amounts reported at the budget stage.

For FYE March 2024, we include a £0.5 billion downward adjustment to Scotland's capital expenditure.

For FYE March 2025, we include a £3.0 billion upward adjustment to England's current expenditure.

To reflect the most recently available data for housing benefits, we have applied further downward adjustments to budget data for current expenditure on benefits of £0.2 billion in FYE 2024 and £1.6 billion in FYE 2025.

## **Public corporations**

Data for public corporations in FYE 2024 are largely based on the OBR's [Economic and fiscal outlook – October 2024 report](#), and are supplemented by in-year estimates for train operating companies, the Housing Revenue Account and surveyed public corporations.

## **Comparing our data with official forecasts**

The independent OBR is responsible for the production of official forecasts for the UK government. These forecasts are usually produced twice a year, in spring and autumn. The latest forecast was published in the OBR's [Economic and fiscal outlook – October 2024 report](#). The [next OBR forecast](#) will be published on 26 March 2025.

**Table 5: Latest public sector finances estimates compared with the corresponding Office for Budget Responsibility forecast, UK**

£ billion unless otherwise stated

	January 2025: Provisional estimate	January 2025: Forecast [note 1]	Difference	FYE March 2025: Forecast [note 1]
Net Borrowing	-15.4	-20.5	5.1	127.5
Net Debt	2,777.8	2,809.0	-31.2	2,835.6
Net Debt % of GDP	95.3	98.2	-2.9	98.4

1 GDP denominator 12 month moving total to period

2 GDP denominator 12 month centred moving total around period

3 BoE abbreviates Bank of England

4 Time series only available back to 2000 Q1 with "—" denoting no data

5 "—" denotes zero value for that period

### Worksheet PS6A: Net borrowing summary, UK, not seasonally adjusted

This worksheet contains one table. Some cells refer to notes which can be found on the notes worksheet tab.

This table contains monthly and financial year to date data:

Relationship between columns 11=1+3+6+7+8+10 ; 15=12+13+14

1 Includes capital gains tax paid by households. Includes income tax and capital gains tax paid by corporations.

2 Mainly comprises corporation tax and petroleum revenue tax.

Relationship between columns 18=(15-11)+17 ; 20=18+19 ; 21=15+17+19

3 Mainly national insurance contributions (NICs).

4 Consists largely of gross operating surplus, equates to depreciation for government. Also includes rent receipts.

5 Includes investment income attributable to insurance policy holders

Relationship between columns: 1=2+4+7 ; 11=2+3+6+9+10 ; 13=11+12

1 Previously known as the borrowing requirement of the sector concerned

2 BoE includes Bank of England Asset Purchase Facility Fund and Special Liquidity Scheme

Figures derived from Bank of England accounts and ONS estimates

Figures for most recent months are ONS estimates

3 Excluding public sector banks

4 NCR = Net Cash Requirement

5 Funded public sector pensions only

6 Public Sector

7 Central Government

General Government NCR (series RUUI) =1+5

# PSA7C Central Government Net Cash Requirement

Relationships between columns 1+3+4=5 ; 2+3+4=6 ; 6+7+8=5

1 NRAM = Northern Rock Asset Management, B&B = Bradford and Bingley.

2 NCR = Net Cash Requirement

3 Does not include Net Cash Requirement to Central Government

4 Negative NCR reflects change in financing as from 2014/15 new financing requirements of Network Rail were met through core central government borrowing and are therefore included in main CGNCR.

# PSA7D Central Government Net Cash Requirement on own account (receipts and outlays on a cash basis)

Relationships between columns 1+6+7=8; 9+10+11=12; 12-8=13

1 Comprises payments into the Consolidated Fund and all payovers of NICs excluding those for Northern Ireland.

2 Income tax includes capital gains tax and is gross of any tax credits treated by HM Revenue and Customs (HMRC) as tax deductions.

3 UK receipts net of personal pension rebates; gross of Statutory Maternity Pay and Statutory Sick Pay.

4 Payments into Consolidated Fund.

5 Including some elements of expenditure not separately identified.

6 Mainly comprises privatisation proceeds.

7 Net of certain receipts, and excluding on-lending to local authorities and public corporations.

8 A much more detailed breakdown of tax receipts is available from HMRC at [www.gov.uk/government/organisations/hm-revenue-customs](http://www.gov.uk/government/organisations/hm-revenue-customs)

9 NCR = Net Cash Requirement. Without Northern Rock Asset Management & Bradford and Bingley.

10 Gross of tax credits. Includes diverted profit tax.

Relationship between columns 14=1+2+3+4+5+6+7+8+9+10+11+12+13

1 Excluding Northern Rock Asset Management (NRAM), Bradford & Bingley (B&B) and Network Rail (NR) - although cash flows relating to NRAM and B&B are included from October 2014 and for NR from April 2015

2 All adjustments reflect differences between when, and at what value, liabilities and assets are scored in net debt and their related cash flows

3 Includes gilts that are transferred to central government (such as those previously held by the Royal Mail Pension Plan) as well as timing differences where cash flows and debt movements were recorded in adjacent months

4 Includes the impact of imputed finance leases as well as the reclassifications of London Continental Railway and the reorganisation of the Housing Revenue Account

5 When an index-linked gilt is redeemed, the impact will always be negative which can cause MW7L to be negative.

Column relationships 1+2+3+4+5+6+7-8-9=10							

1 Bank of England comprises Banking Department and Issue Department. Banking Department plus Issue Department assets and liabilities measured after consolidation of Issue Department deposit held at Banking Department.

2 From September 2021 this is calculated using APF purchase of gilts (YWWB9T9) plus APF purchase of corporate bonds (YWWZJ5J).

3 From September 2021 APF gilt purchases are sourced directly from BoE website (YWWB9T9).

4 Includes BoE's temporary purchases of long-dated UK government conducted between 28 September and 14 October 2022.

5 Up to the 19th January 2019, Term Funding Scheme was within the APF. From 19th January 2019, TFS was transferred to the BoE balance sheet.

6 These series can be derived from the BoE Annual Report and Accounts covering both the Banking and Issue Department liabilities and assets.

7 Includes: insurance, pension, standardised guarantee schemes and other accounts receivable/payable.

8 Gilts are recorded at face (or redemption) value in this presentation.

9 Consolidation of gilts issued by central government but held by Banking & Issue Department of BoE.

10 Consolidation of the loan to the BoE Asset Purchase Facility Fund (BEAPFF).

11 Comprised of Ways and Means advance to the National Loans Fund and the loan to the CCFP granted in April 2020 and fully repaid in March 2022.

12 HM Treasury estimates based on management information. Estimates for February 2015 to February 2016 based on annual report data only.

13 Term Funding Scheme (SME) is the TFS with additional incentives for small and medium-sized enterprises which started 15th April 2020.

1 ONS estimates of the interest received by APF from central government, largely on its gilt holdings.

2 ONS estimates of the interest paid by APF to Bank of England on the loan. Calculated using the Bank of England base rate. From November 2024 the base rate has been set at 4.75 percent.

3 Dividends paid to HM Treasury consolidate between the central government and Bank of England and so are public sector borrowing neutral.

4 The full cash transfers (series MT6A and MF7A) will impact the net cash requirement measure by the total amounts.

**Worksheet PSA10: Public sector transactions by sub-sector and economic category, UK, not seasonally adjusted**

This worksheet contains one table.

Some cells in this table are black indicating that some transactions do not exist in all subsectors

Time period covered by this presentation April 2023 to March 2024

Transactions	Central government (£ million)	Local government (£ million)	General government (£ million)	Public corporations (£ million)	Public sector funded pension schemes (£ million)	Bank of England (£ million) [note 6]	Public sector excluding public sector banks (£ million)	Public sector banks (£ million) [note 129]	Public sector including public sector banks (£ million)
