About this document

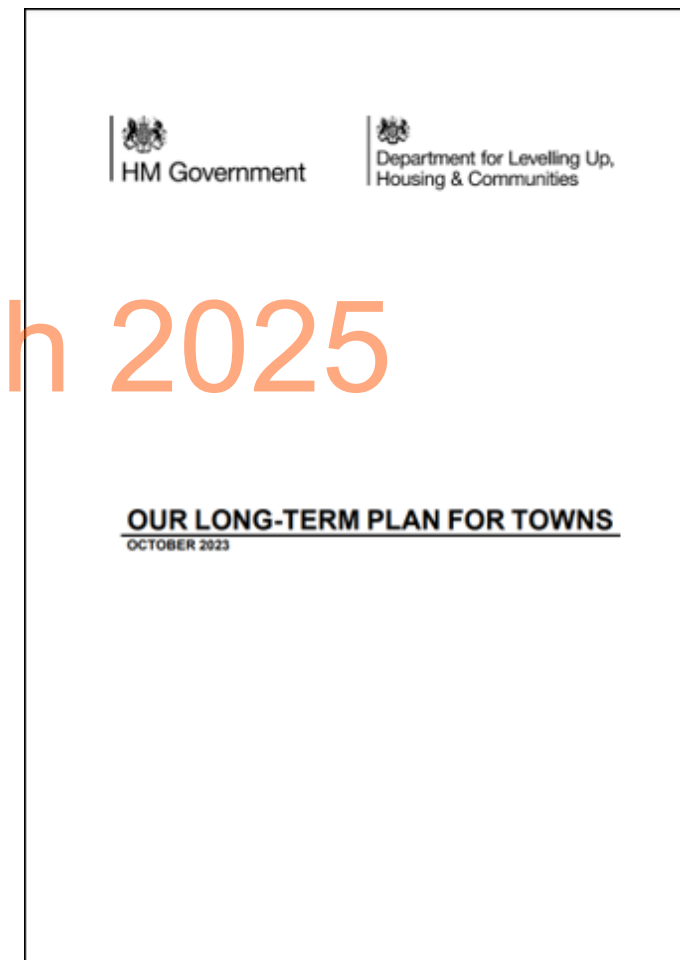

This document, produced by DLUHC in collaboration with ONS, presents high-level data to support the Long-Term Plan for Towns programme. This collaboration is supported through the Levelling Up Subnational Data project. It does not make policy recommendations.

Background

- On 1 October 2023, the UK government announced its long-term plan for towns. This will provide long-term investment in 75 towns to be spent on local people's priorities such as regenerating local high streets and town centres or securing public safety.
- This data pack primarily uses metrics and indicators across the three policy investment themes [as detailed further in the guidance for local authorities and Town Boards](#). Data presented in this pack are at town level, where possible, but other geographies are used where sufficiently granular data is not yet available.
- This is a local data profile. It does not take account of the implementation of current national or local policy interventions.

Data caveats

- The data sources in this pack are the latest available as of 30th November 2023. In collaboration with the Office for National Statistics (ONS), we have derived metrics at town level based on Localities for 2020 where this data was not previously available. Estimates are at town level unless stated otherwise. These are experimental estimates for small levels of geography that may be more volatile or have higher levels of uncertainty, which should be taken into consideration when interpreting the data.
- Due to data availability, estimates at local authority level are based on geographic boundaries as of 2022.

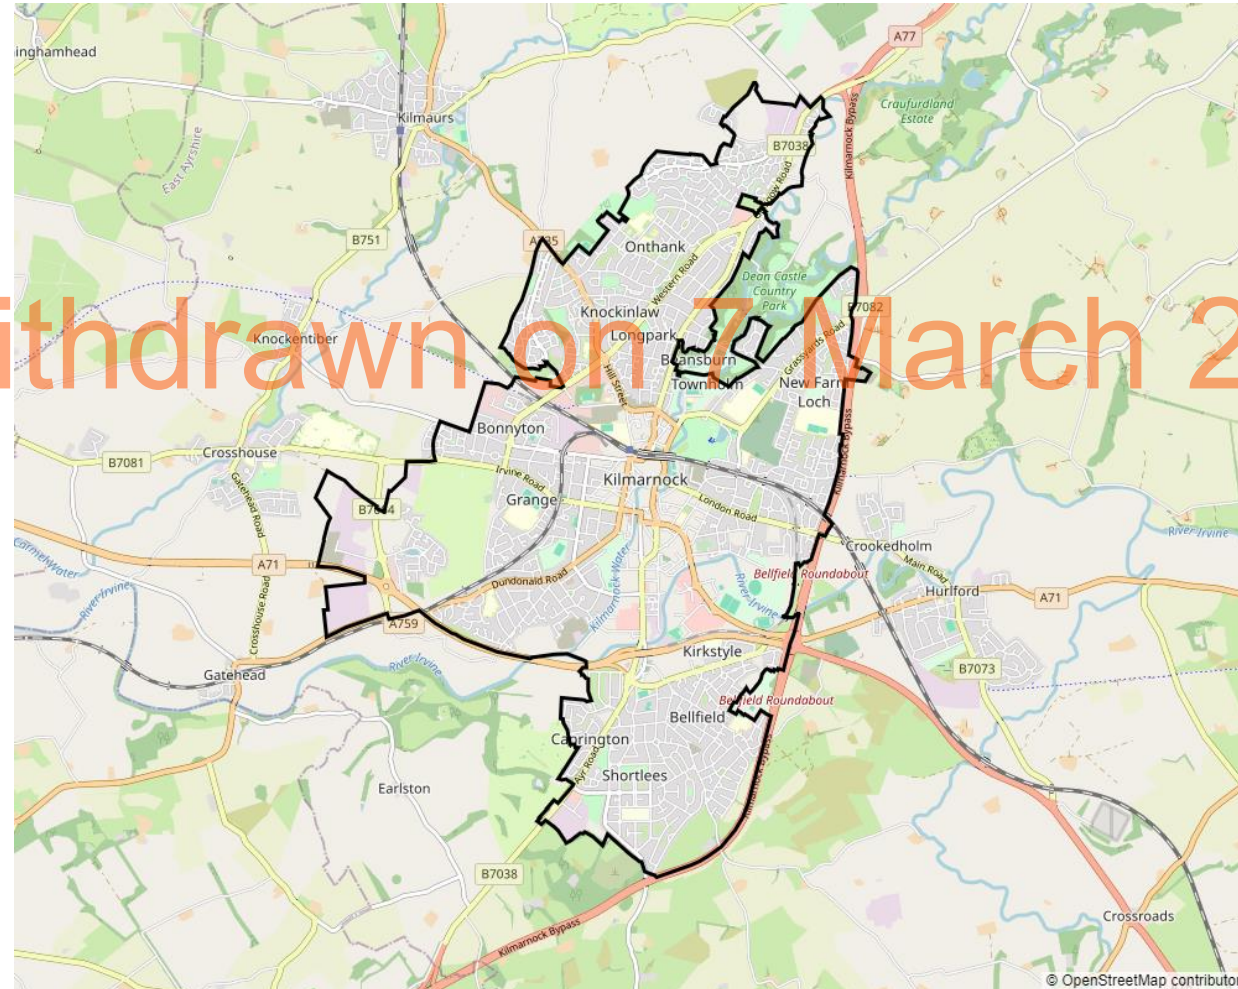

Map of Kilmarnock

This data pack defines a towns boundary based on the definition of Localities (2020), unless stated otherwise. This reflects the approach set out in the Long-Term Plan for Towns guidance for defining the geographical area covered by the Town Board.

Overview of town indicators

This page provides an overview of how the town's indicators (listed in Annex B) for policy investment themes fare against national averages.

The chart on the left shows how Kilmarnock town's indicators (orange) fare against national averages (dark blue). Town values have been scaled relative to the national averages which were set to 100.

The policy investment themes are listed below:

- [T1] Safety and Security
- [T2] High Streets, Heritage and Regeneration
- [T3] Transport and Connectivity

How to read the chart:

1. Compare the overall shape of the town data points to the national average shape.
2. The closer a town marker is to value 100 on the chart, the closer it is to the national average. For example, a town value of 150 means that it is 50% higher than the national average.

Indicators for policy investment themes

Safety and Security

“Towns will now be able to use this funding to reduce crime and improve safety in their local area.” (Our Long-Term Plan for Towns, 2023)

Indicator	Kilmarnock	East Ayrshire	Scotland
Recorded crime rate per 1,000 population (2017-18)	35.1	28.1	28.8

Withdrawn on 7 March 2025

Source: [Scottish Government, 2020](#)

High Streets, Heritage and Regeneration (1/2)

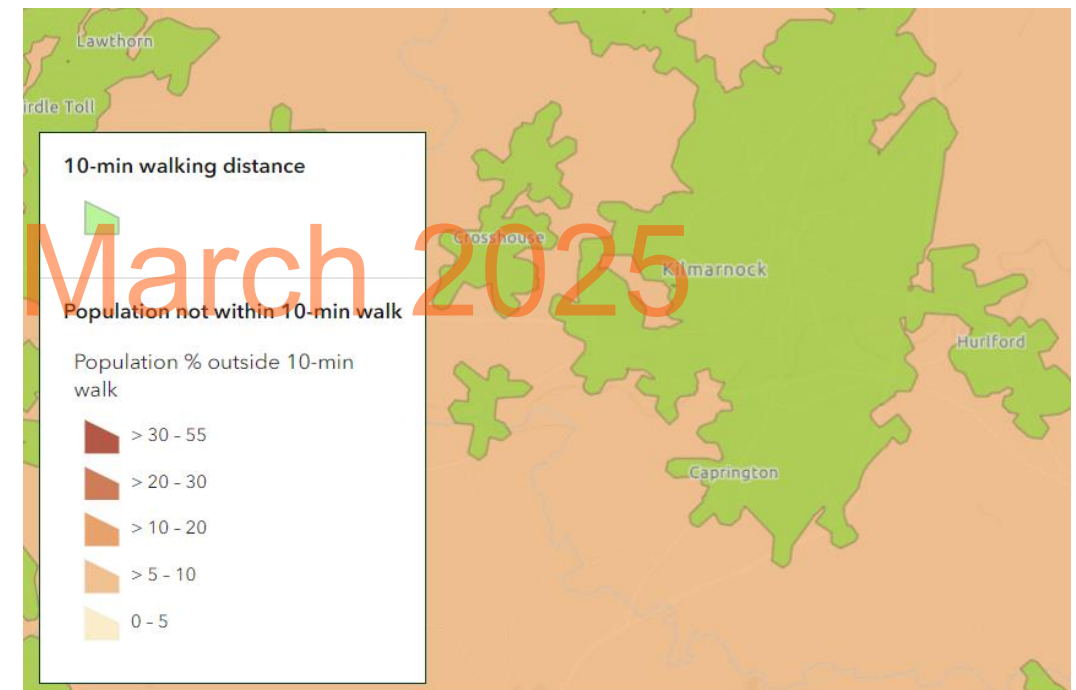

“Towns would be able to use this funding to enhance their town centres, making them and their buildings more attractive and accessible to residents, businesses, and visitors in a post Covid environment.” (Our Long-Term Plan for Towns, 2023)

Indicator	Kilmarnock	Scotland
Number of outlets (takeaways, restaurants, clubs, bars, pubs, fitness facilities and sport clubs) per 1,000 population (Sept 2023)	2.4	2.1*
Commercial vacancy rates (%) (Nov 2023)	13.2	11.9*
Footfall index** based on Virgin Media O2 mobile phone data (March 2022 to March 2023)	84.5	100

* Scotland average is derived from Localities with a population between 20,000 and 100,000 only.

** Anonymised and aggregated mobile network data by Virgin Media O2. Footfall is defined as the average daily number of outbound journeys (not including journeys to home) within the town/Localities over the period March 2022 - March 2023. The mean average footfall of all Scottish towns with a population between 20,000 and 100,000 people, has been standardised to an index of 100, with the figure for this town scaled relative to this average.

10-minute walking distance to green spaces in Kilmarnock, 2023
