Authorized Amendment
Summary / Overview of the amendment to explain/ensure that the reader understands: the rationale for the amendment; the major changes; and, importantly, the full context (including desired outcome) of the amendment.
The Regulated Community is reminded to check this amendment against any applicable AAMC, Waivers or Exemptions to ensure their ongoing validity.
<p>On completion of the Flying Display Season (DS), the MAA Display Team (DT) review RA 2335 to ensure it remains fit for purpose. Although no Request for Change were submitted by the Regulated Community, the DT look at lessons identified during the DS in order to adapt the RA to meet future requirements. Additionally, RA 2335 takes account of changes that will be made to RA 2330: Low Flying and CAA CAP 403 - Flying Displays and Special Events as it is essential these documents remain closely aligned.</p> <p>The key changes to Issue 13 of RA 2335 are the introduction of regulation associated with the conduct of Display Parachuting in RA2335(5) – RA2335(7), required as a result of a Service Inquiry and to complement the introduction of the RA1700 Series. These new regulations address Parachute Display Team Organizations and Management, Display Parachute Training and Practices, and lastly, Display Parachute Separation Distances, Minima and Restrictions. The data used in the Parachute regulations is largely drawn from CAA CAP 660 – Parachuting. Specific Display Parachute Forms have also been developed for the Notification of Parachute Displays, Foreign Military Parachute Display Team Approvals, PDA Forms and Post-Display Reports.</p> <p>The changes made to RA2330: Low Flying with regard to Public Assemblies have been taken into account within RA2335, and the 2 documents are aligned. Furthermore the Flying Display Director Accreditation regulation has been moved to new section (RA2335(4)) and the GM associated with RPAS display activity has been moved into AMC.</p> <p>Other changes include defining Validation, moving the GM related to Validation into AMC and aligning RA2335 with NATO Stanag 3533 by changing the Mach limit for display flying from M0.90 to M0.95.</p>

ISSUE STATE CHANGES (if more lines required, contact the MRP Team)			
Document Title	Previous Issue	New Issue
