I object to this this application in its entirety. One of the most dangerous aspects of this application is the fact that it is showing a road exiting from the new build properties directly opposite the primary school in stebbing high street. This is a very dangerous place to have an exit directly opposite a primary school full of 250 children.

I am absolutely opposed to the building of this quantity of new houses in the village. The position of these houses and the most importantly the entrances of roads attached to these houses has not been carefully thought through . It is a small village and it will be swamped by new build properties in the most inappropriate sites.

Yours sincerely

Stephen Walker
