Authorized Amendment
Summary / Overview of the amendment to explain/ensure that the reader understands: the rationale for the amendment; the major changes; and, importantly, the full context (including desired outcome) of the amendment.
The Regulated Community is reminded to check this amendment against any applicable AAMC, Waivers or Exemptions to ensure their ongoing validity.
It was mandated (due to JSP 815, Weston-On-The-Green Service Inquiry recommendations, 3* direction, and a coroner recommendation) that the MOD regulate the Risks to Life associated with operating Airborne Equipment and that Safety Responsibilities associated with the activity are properly defined (including by publishing orders and instructions).
Changes made: - This new series of regulations provides direction and guidance for an expanded set of activities to provide clarity on the requirements dependent on the activity. - This provides an update to the requirements of RA 1150, RA 1345, and RA 2355 and in doing so introduces new regulations that will now be applicable to Airborne Equipment activities. - The introduction of Duty Holding construct in the Airborne Equipment community. - The Airborne Equipment community should be aware that the option of using civil equipment from Aircraft that are on the Military Aircraft Register has been removed.

ISSUE STATE CHANGES (if more lines required, contact the MRP Team)			
<i>Document Title</i>	<i>Previous Issue</i>	<i>New Issue</i>
