

## Appendix A: Proposal for information to be provided in standardised price list

- A.1 Below we set out our initial proposal for information that FOPs and referral providers could be required to publish, and to actively share with a comparison website portal. For each item, we set out:
- (a) Required information including prices, the duration of consultations, details about the service or treatment being provided, and whether multiple prices need to be provided for different categories of animal characteristics or medicine formulations.
    - (i) Eg “prices per species and weight category” could mean separate prices should be provided for dogs under 20kg, dogs between 20kg and 40kg, dogs over 40kg, cats and other small animals. (Note we would welcome views on how these categories might best be split.)
  - (b) Optional information that FOPs and referral providers could include about the service or treatment provided.
  - (c) An indicative example of the information that would appear to pet owners.

Service	Information to be provided
<b>1. Consultation and preventative care</b>	
First, repeat and OOH vet consultation (including duration)	Required: <ul style="list-style-type: none"> <li>• Prices for first, repeat and OOH consultations</li> <li>• Duration in minutes</li> </ul> “£X for a 15 min initial consultation. £Y for a 15 min repeat consultation. £Z for a 15 min OOH consultation.”
