Subject: Objection chiswell green green belt

To whom it concerns,

I would like to strongly object to the proposed planning for 7 houses being built opposite cuckmans farm.

Again this is highly disruptive for local residents and shouldn't even be considered for a moment given the road network and the more damaging effect on the green belt land.

If this is given the go ahead it will have a knock on effect and open the flood gates for more planning to be considered when we are already under strain with our local infrastructure and amenities.

I have been a resident on the [REDACTED] for almost 20 years and the effect extra traffic has on this area is considerable. Getting in and out of at Albans is a joke at the best of times and the side roads aren't being repaired any where near as regularly as is needed. Roads are sinking in places!

We enjoy walking in the area with our dog also and so are aware of these building sites and the consequence for the locals and wildlife alike. Small areas of beauty are important for our mental health and shouldn't be ignored as such.

Kind regards

Amanda Sheppard
