

While I understand the importance of addressing housing demands, I believe that this specific proposal does not adequately meet the needs of the local community

The proposed houses fail to provide suitable accommodation that aligns with the demographics and needs of the area.

The site's development could have a detrimental effect on the local environment and would place undue strain on existing local infrastructure, including schools, healthcare services, roads, and public transportation. These services are already under pressure,

The addition of seven houses in this area will contribute to increased traffic congestion, which is already a major problem

In light of these concerns, I urge that you again reject this proposal
