Object to Proposal

Dear Sir/Madam,

I wish to object to the proposed development on this Green Belt land. The owner has twice now removed all natural growth from the plot devastating the natural environment of the wildlife that lived there. This is Green Belt land and must be protected. The building of 7 detached houses on a plot of land without appropriate highway access is likely to have serious negative consequences on the local community and the scale of the development is inappropriate with housing which is unlikely to make a difference to the Districts overall housing target. The approval of this application will set a further dangerous precedent for the local green space with developers looking to profit on the demise of the local community.

The development should again, be rejected.

Kind regards,

Sami Goldbrom
