**Subject:** No building !

I do not live within this area now, but i grew up very near here and it upsets me greatly to see yet MORE applications for building !.

I still love this area very much but unfortunately it is now being slowly but surely ruined by various building work.

If this carries on , there really will be no green spaces left even though they are actually designated GREEN SPACE.

It doesn't seem to mean much anymore. Then of course there is the enviromental issue to think of, which generally lets be honest, developers do not care, not really ! All they are bothered with is the money they are going to make.

Green spaces are important now more than ever for people especially after Covid.

Please can these people consider the long term effect and aspect of this, that's all i can say really.

Praying it does not go ahead.

Thankyou.

Mrs C. Vincent....a previous very near to this area resident.
