#### **THE TRADE IN ANIMALS AND RELATED PRODUCTS (SCOTLAND) REGULATIONS 2012**

The Scottish Ministers have reasonable grounds for suspecting the existence of foot-and-mouth disease in Hungary and Slovakia, such that products originating from territories subject to special transitional import arrangements are liable to pose risk to animal health.

is suspended, unless the products from susceptible animals are of a category and meet the conditions specified in paragraph 2.

(2) Accordingly, such products may only enter Scotland as products subject to official controls at border control posts in accordance with Part 3 of the Trade in Animals and Related Products (Scotland) Regulations 2012 (subject to the derogations and modifications set out in schedule 5 of those Regulations and as if paragraph 1 of schedule 3 of those Regulations did not apply)<sup>(2)</sup>, including being accompanied by the appropriate health certificate or relevant commercial documents required by those Regulations for the products concerned, and subject to any other requirements that apply in relation to the import of products from susceptible animals.

#### **Imports of products from susceptible animals remaining exempt from official controls**

2. Imports of products from susceptible animals remain exempt from official controls at border control posts as part of passengers' personal luggage where intended for personal consumption or use, or as part of a small consignment sent to natural persons which are not intended to be placed on the market, provided that they belong to at least one of the following categories:
