# About this document

**This document, produced by MHCLG in collaboration with ONS, presents high-level data to support the Plan for Neighbourhoods programme. It is intended to support Neighbourhood Boards in both identifying and evidencing local needs or trends. It does not make policy recommendations.**

---

## Background

- On 4 March 2025, the UK Government announced the launch of the Plan for Neighbourhoods. This will provide up to £20 million in support and funding for 75 places across the UK over the next decade.
- Data is presented across broad themes that Neighbourhood Boards may consider addressing through the programme.
- This pack does not take account of the implementation of current national or local policy interventions.

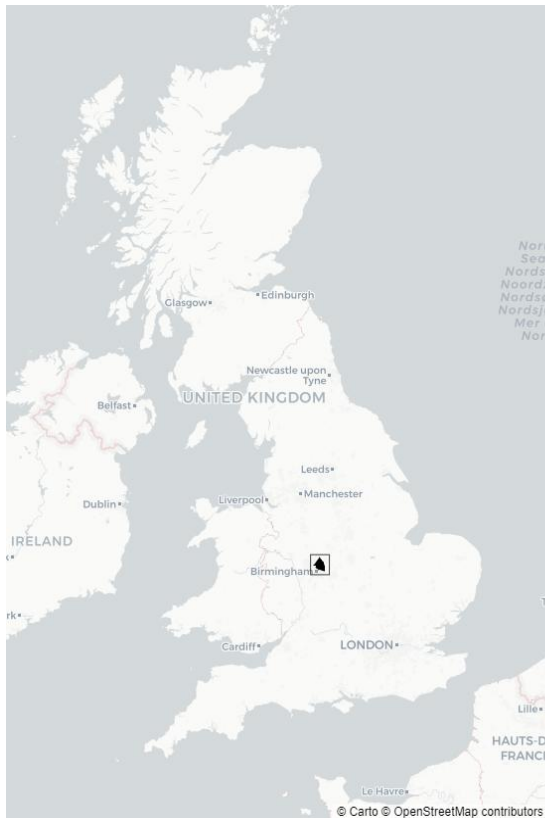

## Data caveats

- The data sources in this pack are the latest available as of 1st April 2025. In collaboration with the Office for National Statistics (ONS), we have derived metrics at the Built Up Areas (BUA) (2024) geographical level, where this data was not previously available. Estimates are at BUA (2024) level unless stated otherwise. **These are experimental estimates for small levels of geography that may be more volatile or have higher levels of uncertainty, which should be taken into consideration when interpreting the data.** The metrics in this pack do not account for any boundary request changes submitted by places.
- Lockdown restrictions and the furlough scheme were in place at the time Census 2021 was conducted, which significantly impacted 'travel to work methods' data. As such, the data are not reflective of current commuting patterns. We have therefore used Census 2011 data in the commuter flows table shown in this pack. [Census 2021 employment data](#) may also be impacted by furlough and the timing of Census day (March 2021).
- Due to data availability, estimates at local authority level are based on geographic boundaries as of 2024. Royal Sutton Coldfield is within the local authority of Birmingham.

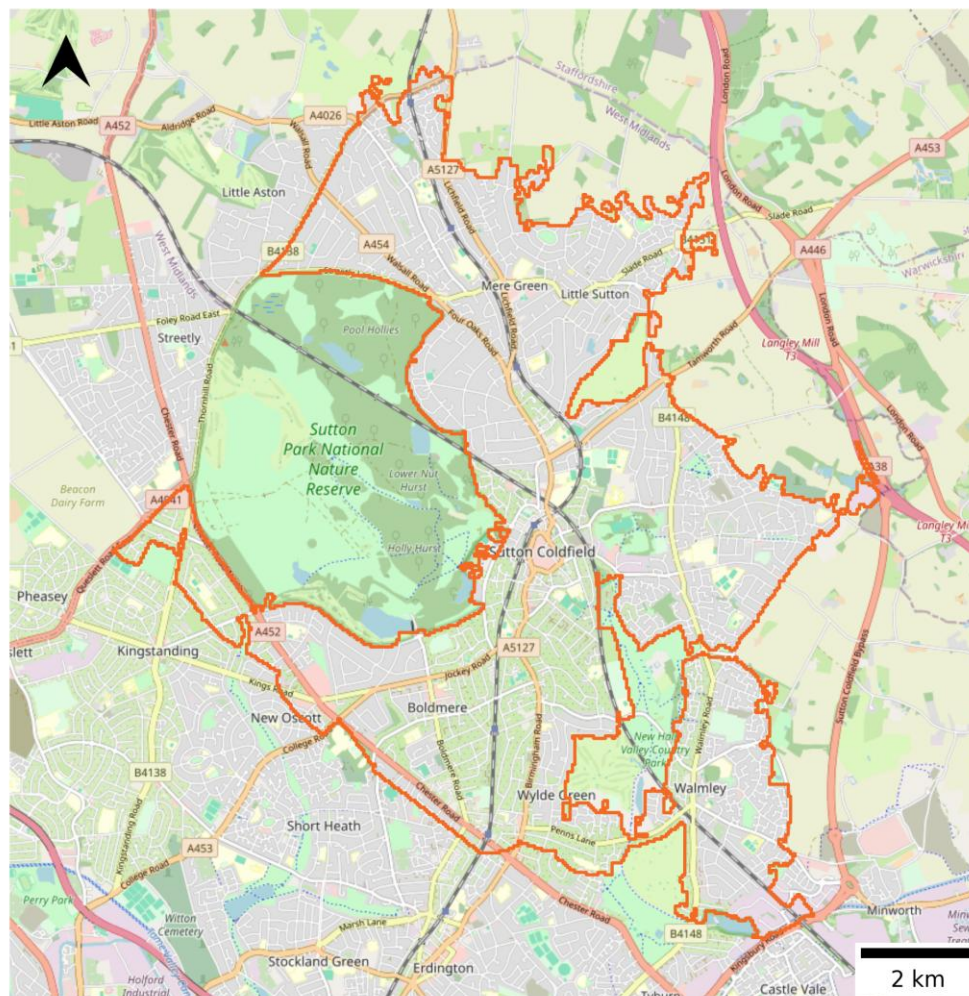

# Map of Royal Sutton Coldfield

This data pack defines a neighbourhood's boundary based on the definition of Built Up Areas (BUA, 2024), unless stated otherwise. This reflects the default approach for the Plan for Neighbourhoods. The metrics in this pack do not account for any boundary changes submitted by the Neighbourhood Boards.

# Overview of indicators

This page provides an overview of how the BUA's indicators (listed in the Annex) for policy investment themes fare against national averages.

The chart on the left shows how Royal Sutton Coldfield's indicators (orange) fare against national averages (dark blue). BUA values have been scaled relative to the national averages which were set to 100.

## How to read the chart:

1. Compare the overall shape of the BUA data points to the national average shape.
2. The closer a BUA marker is to value 100 on the chart, the closer it is to the national average. For example, a BUA value of 150 means that it is 50% higher than the national average.

\* The [Barriers to Housing and Services Domain](#) measures the physical and financial accessibility of housing and local services. The indicators fall into two sub-domains: 'geographical barriers', which relate to the physical proximity of local services, and 'wider barriers' which includes issues relating to access to housing such as affordability and homelessness. A value of 0 indicates none of the [Lower Layer Super Output Areas \(LSOAs\)](#) that intersect the BUA (wholly or partly) are in the top 20% most deprived for the domain within England.

Vehicle crime (2024)	9.2	11.5	5.7
Violence and sexual offences (2024)	23.0	52.6	32.3

**Note:** Rates were calculated using 2022 mid-year population estimates due to data availability.

**Social Trust (%) (2023) and Index of Multiple Deprivation (IMD) deciles (2019)**  
(IMD Decile 1 = Most Deprived)

**Source:** [MHCLG IMD, 2019](#); [Onward, 2023](#)

**Note:** Data is at MSA level, resulting in multiple MSAs per BUA. There was an average of 7 respondents per MSA.

[Net social trust](#) is defined as the estimated proportion of people who say they generally trust others minus the proportion of people who say that you cannot be too careful when dealing with people. According to [Onward \(2023\)](#), **Royal Sutton Coldfield has a social trust score of 9%**, which is higher than the England average of -3%, showing that there is a higher level of social trust within Royal Sutton Coldfield than national levels. More deprived [Middle Layer Super Output Areas \(MSOAs\)](#) are likely to have lower levels of social trust than less deprived MSOAs in Royal Sutton Coldfield.

## High Streets, Heritage and Regeneration (1/2)

Indicator	Royal Sutton Coldfield	England
Number of outlets (takeaways, restaurants, clubs, bars, pubs, fitness facilities and sport clubs) per 1,000 population (June 2025)	1.9	2.5
Commercial vacancy rate* (%) (June 2025)	9.3	10.4
Footfall index** based on Virgin Media O2 mobile phone data (April 2022 to March 2023)	127.1	100.0

\* The commercial vacancy rate represents the total number of retail and leisure units that are vacant but in an occupiable state, as a percentage of the total number of business units in a destination. Where units are under renovation or demolished, they are not classed as vacant. Commercial vacancy rate is based on data from Green Street. They produce a separate measure of vacancy rate following a different methodology which may differ to that included here.

\*\* Anonymised and aggregated mobile network data by Virgin Media O2. Footfall is defined as the average daily number of outbound journeys (not including journeys to home) within the Built Up Area over the period April 2022-March 2023. The mean average footfall of Built Up Areas in England with populations similar to Royal Sutton Coldfield (+/- 30%) has been standardised to an index of 100. The number for Royal Sutton Coldfield is scaled relative to this average.
