Foreword by the Minister of State for Health

It gives me great pleasure to present the annual report for 2024 of the Human Medicines Regulations Advisory Bodies: The British Pharmacopoeia Commission. This report includes a record of members' interests in the relevant industry as per the Conflicts of Interest Code of Practice.

On behalf of all Health Ministers, I would like to thank the Chairs and Members of the Commission and all those who contribute to their many Expert Advisory Groups, Panels of Experts and Working Parties whose professional expertise, commitment and hard work plays a vital role in ensuring that the medicinal products we take continue to meet the highest standards of safety, quality and efficacy.

Karin Smyth MP

BRITISH PHARMACOPOEIA COMMISSION

BRITISH PHARMACOPOEIA COMMISSION

ANNUAL REPORT FOR 2024

Introduction

The British Pharmacopoeia Commission (BPC), appointed under Part 2 of the Human Medicines Regulations 2012 (the 2012 Regulations), is responsible under regulation 317 for preparing new editions of the British Pharmacopoeia (BP) and the British Pharmacopoeia (Veterinary) (BP Vet) and for keeping them up to date. It also provides advice to the United Kingdom (UK) delegation to the European Pharmacopoeia Commission (EPC), of which the UK is a member by virtue of its obligations under the Convention on the Elaboration of a European Pharmacopoeia (European Treaty Series No. 50). Under regulation 318 of the 2012 Regulations, the BPC also selects and devises names to be used at the head of monographs, which are subsequently published as British Approved Names (BAN).

It is of paramount importance that the medicines received by patients are safe, effective and of a suitable quality. The BP and BP(Vet) contribute significantly to the quality of medicines for human use and for animal use by providing publicly available, legally enforceable standards which are part of the overall system for safeguarding the health of patients in the UK and beyond. The BP is used across the globe and referenced in the legislation of several countries.

The membership

A list of members of the BPC during 2024 is shown in this report.

The terms of office for two lay members of the BPC ended on 31st December 2023. Following a comprehensive review conducted in collaboration with the Department of Health and Social Care Appointments and Honours Team, seven new members, five technical experts and two lay members were successfully appointed for a four-year term starting on 3rd June 2024.

Additionally, the second terms of office for three members were set to conclude on 21st June 2024. As part of the re-appointment process, one member's term was extended by one year, while two members received a four-year extension, all effective from 22nd June 2024.

A list of members of the supporting Expert Advisory Groups (EAGs), Panels of Experts and Working Parties (WPs) for 2024 is given in Appendix II.

Code of practice

1. Members of the BPC are required to comply with the Medicines and Healthcare products Regulatory Agency (MHRA) Code of Practice on Identifying, Declaring and Managing Interests. This new Code of Practice was launched on 8th September 2022 and replaced the former BPC Code of Practice. Members of the EAGs, Panels of Experts and WPs are also required to comply with the new Code of Practice. Members of the BPC and its supporting EAGs, Panels of Experts and WPs are permitted to hold personal interests in the pharmaceutical industry, with the exception of the Chair of the BPC. This allowance ensures that the BPC and its supporting groups benefit from the practical insights and up-to-date knowledge that these technical members bring from their active roles in the industry. The Code of Practice link can be found here [Code of Practice for the British Pharmacopoeia Commission and other expert advisory committees](#).

Meetings

2. The BPC met three times during 2024. Twelve meetings of the EAGs, Panels of Experts and WPs were also held during the year, together with several meetings of the four sub-groups of the Working Party on Advanced Therapy Medicinal Products (ATMP WP).
3. Summary Minutes of the meetings of the BPC and its EAGs, Panels of Experts and WPs can be found on the BP website ([Meetings and minutes - British Pharmacopoeia](#)).

Secretariat

4. The BP Secretariat is based at 10 South Colonnade, Canary Wharf, London E14 4PU.

Laboratory

5. The Laboratory is based at the Laboratory of the Government Chemist (LGC) (Teddington) and is managed under a collaboration agreement with LGC.

Costs

6. For each meeting that they attend, members of the BPC are entitled to claim a taxable attendance fee of £325 (Chair's fee, £500). Members of the EAGs, Panels of Experts and WPs are entitled to claim a taxable attendance fee of £200 per meeting attended (Chair's fee, £325). Travel and subsistence costs are also payable within MHRA guidelines.

Progress and publications

British Pharmacopoeia 2024

7. Following publication of the BP 2024, three online updates were issued providing users with the texts of Supplements 11.3 to 11.5 of the 11th Edition of the European Pharmacopoeia.

British Pharmacopoeia 2025

8. The BP 2025 was published in August 2024. This new edition is available as a package containing the five volumes of the BP 2025, the one volume of the BP (Vet) 2025 and access to the electronic versions of both publications (online BP and offline download format).
9. This new edition contains over 4000 monographs for substances and articles used in the practice of medicine and almost 500 infrared reference spectra, together with the necessary appendices and supporting material. The effective date of the BP 2025 is 1st January 2025.
10. All monographs published within the 11th Edition of the European Pharmacopoeia, as amended by Supplements 11.1 to 11.7, are included either in this edition of the BP or, where appropriate, in the associated edition of the BP (Vet). Monographs of the European Pharmacopoeia are clearly distinguished from those of national origin by means of a chaplet of stars that appears alongside the monograph title. Where appropriate, statements of relevance to UK usage, such as Action and Use and the list of BP preparations, have been added to the European Pharmacopoeia monographs.
11. The BP 2025 contains 14 new monographs and texts of national origin which were not published in previous editions. A significant number of national monographs were amended in respect of technical or editorial content (105 in total) and the titles of 9 national monographs and one appendix name were amended in this edition.
12. Four new Appendices: Appendix XIV Q. Assay of Bet v 1 Allergen; Appendix XIV S. Monocyte-Activation Test for Vaccines Containing Inherently Pyrogenic Components; Appendix XVII D. Particle Size and Shape Determination by Image Analysis and Appendix XVII L. Particle Size Analysis by Dynamic Light Scattering have been incorporated by means of this edition.
13. One new Supplementary Chapter was added by means of this edition, SC IV W. Comparability of Alternative Analytical Procedures.

14. Five national monographs for products no longer marketed were omitted from the BP 2025 following consultation. In accordance with Regulation 252(2)(c) of the 2012 Regulations, omitted monographs continue to remain in force.

British Pharmacopoeia (Veterinary) 2025

15. The BP (Vet) 2025 was published as a companion volume to the BP 2025 in August 2024. This new edition contains monographs, infrared reference spectra and a number of appendices relating to materials used solely in veterinary medicine. The effective date of the BP (Vet) 2025 is 1st January 2025.
16. The BP (Vet) 2025 contains two new monographs of national origin which were not published in previous editions.

British Approved Names 2022

17. BAN 2022 (Supplement No.3) was published in August 2024. This Supplement defines 24 new chemical and biological entities that are used in medicines in the UK. The majority of the new names are for active substances used in medicinal products that have not previously been marketed in the UK.
18. Following the successful development and release of the new format for the online BAN publication and as part of the BP's ongoing sustainability initiatives, the BAN and its supplements will no longer be published in a hard copy format.

Digital Publications

19. The BP 2025 publications can be accessed through the online version (pharmacopoeia.com) and the offline download edition. Both formats have been updated to include the European Pharmacopoeia supplements 11.6 to 11.7 and will be updated in 2026 to include supplement 11.8.
20. The BP website has continued to be positively received by users. Several improvement features have been added to the BP 2025 online publication including a new accounts and dashboard for every user of the BP, the ability to provide feedback on every page, a live webchat feature and a new tool for users to sign up for updates as well as simpler

processes for purchasing. Further improvements are being developed based on user feedback through extensive customer research.

21. Following the regular public consultation scheduled for new and revised monographs, four three-month consultation periods were held during 2024. This continued to provide users with the opportunity to contribute to the monograph development and revision process, helping to ensure that published monographs are relevant and robust.

Prices and Availability

22. Details of the prices and availability of the above-mentioned publications are shown in **Appendix I**.
23. In addition, users can purchase access to a maximum of three individual BP monographs, together with the necessary supporting information including the Introduction, General Notices, Appendices and Supplementary Chapters.

Future Publications

24. By the end of 2024 work was progressing on the preparation of the next editions of the BP and BP (Vet). These will be published during 2025 and will have an effective date of 1st January 2026.
25. A digital update to the BP 2025 was issued in October 2024, providing users with the text of the Supplement 11.6 of the 11th Edition of the European Pharmacopoeia which came into effect on 1st January 2025. A further update was issued in December providing users with the text of Supplement 11.7, which will come into effect on 1st April 2025. Supplement 11.8 will be available in advance of its implementation on 1st July 2025. These updates will only be available via the online BP and the offline download. The texts will subsequently be included in the BP 2026 publications as appropriate.

Other pharmacopoeial matters

Biological Medicines

26. While continuing to maintain quality standard monographs for biological products, the main focus during the year has been the continued development of non-mandatory guidance for the analysis of cell and gene therapy products.
27. The ATMP WP continued to develop non-mandatory guidance documents that support quality and innovation in these medicines. Guidance documents for “Characterisation of the capsid particle population in rAAV products” and “T cell and NK cell characterisation assays” were made freely available on the British Pharmacopoeia website www.pharmacopoeia.com/guidance/atmp in January and March 2024 respectively. The published guidance was developed and approved by the BP, as part of the MHRA, in partnership with experts from the cell and gene therapy community including representatives from industry, the NHS and academia.
28. In December, a draft guidance document was published for consultation on “Replication-competent virus assays” with a further guidance document expected to be published for consultation in early 2025 on “Validation protocols and reports for digital and quantitative polymerase chain reaction for vector copy number and genomic titre”. Two new groups have also been established to work to produce guidance for topic areas related to encapsidated DNA characterisation and capsid protein characterisation.
29. The importance of stakeholder contributions and systems-wide approaches is recognised, and the ATMP WP includes representatives from the NHS, academia, industry, and the UK Catapult network. In addition, a close working relationship between the MHRA and the Cell and Gene Therapy Catapult has been extended and continues to support the work and continued staff development in both organisations. The Working Party continues to focus on horizon scanning and identifying new topics and is working to produce further non-mandatory guidance documents for the ATMP community.
30. The BIO-DPS Working Party (Alternative Approaches for Documentary and Physical Standards for Biotechnological Products) has continued to explore the potential of performance and class-based standards for biotechnological products. The results from the international multi-laboratory monoclonal antibody analysis were used to assess the value of alternative standards with discussions held to re-establish concepts and outline future next step approaches for the study.

Unlicensed Medicines

31. Monographs that have been developed to cover unlicensed formulations are identified as such in the BP. These monographs provide legally enforceable standards for unlicensed formulations which may be widely used or are required for certain patient populations. The BP is also continuing to develop further guidance for prescribers, manufacturers and suppliers of unlicensed medicines which will be included in future publications.
32. A number of monographs for unlicensed formulations are being developed as part of a series of family monographs alongside those for licensed products containing the same active ingredient. This initiative will make the most efficient use of Laboratory resources and will provide assurance that the methods for the unlicensed formulations are suitable.

Herbal and Complementary Medicines

33. Following public consultation on new extract monographs, monographs for Green Tea Extract and Decaffeinated Green Tea Extract were published in the BP 2025 edition and work is progressing on further extract monographs.
34. In parallel, work to maintain and update the existing monographs for herbal medicines which are still used and would benefit from modernisation continued, and revised monographs for Capsicum Tincture, Ispaghula Husk Granules, Podophyllum Resin and Compound Podophyllum Paint were published in the BP 2025.

Nomenclature

35. The BP continued to provide advice and comments to the World Health Organization (WHO) Committee on International Non-proprietary Names (INN). Recommended INN (rINN) for products licensed in the UK are formally adopted as BANs when they are first included in licensed medicines. UK Experts provided input into two INN Consultations during the year and contributed to the evaluation of INN requests and the development of WHO policies on drug nomenclature. Two rINN Lists (91 and 92) were published by WHO during the year.

36. The BP Secretariat is also responsible for advising the MHRA on the acceptability of proposed invented names for medicines in the UK. BP staff also continue to provide advice to manufacturers on the acceptability of invented names and remain the experts on the acceptability of invented names within the MHRA.

Sustainability

37. Since the publication of the first BP Sustainability Information Pack in March 2024, this has been downloaded by over 100 BP users. This pack aims to address environmental impacts associated with quality control testing, primarily in laboratory settings, and includes several case studies from stakeholders to support the adoption of greener practices. Work is ongoing to update the Sustainability Information Pack in 2025.
38. Trials in the BP laboratory to reduce solvent usage during quality control testing through method adjustments were successful. These trials included solvent recirculation and avoiding solvent pre-mixing, demonstrating significant reductions in solvent usage without compromising test results.
39. Proposals to integrate sustainability into the monograph elaboration and revision process have been introduced, including scaling down column sizes and utilising method greenness calculators. A scaled method for Solifenacin Oral Suspension was published as an additional resource in the 2025 edition of the BP and further scaled methods will be introduced in future publications.

Liaison with Other UK Organisations

40. The BP and Veterinary Medicines Directorate (VMD), an executive agency of the Department for Environment, Food and Rural Affairs, continue to collaborate closely on the development of monographs for veterinary medicines through representation from the VMD on Expert Advisory Groups.
41. The MHRA is a member of a Pharmaceuticals in the Environment (PiE) collaboration of UK regulators including the VMD, Environment Agency, Health and Safety Executive, and devolved nations equivalents. This group aims to address the prevalence of certain animal and human medicines in the water tables of the UK through monitoring and regulatory action. This is also pertinent to addressing anti-microbial resistance (AMR). The BP is supporting the MHRA Partnerships group in this task.

Laboratory

42. The Laboratory has continued to support the work of the BPC and the wider MHRA remit relating to public health throughout 2024.
43. During the year laboratory work on 37 new and revised BP monographs was undertaken for inclusion in future publications. The Laboratory also provided data to support several regulatory investigations during the year.

BP Reference Materials

44. Eleven new BPCRS were established to support the BP and BP (Vet) publications, sixty-five were replaced and two hundred were re-tested to ascertain their continued stability.
45. All new BPCRS that were introduced into the BP 2025 and BP (Vet) 2025 were made available by July 2024 in advance of the publication in August 2024. Making the materials available as early as possible ensures that users are ready to comply with the new and revised monographs before they come into force.
46. The demand for these reference materials remained high throughout the year. A total of 38,786 vials were sold within the UK and to countries worldwide, representing an increase of approximately 7 % compared to the previous year.

European Pharmacopoeia

47. The fifth and sixth Supplements to the 11th Edition of the European Pharmacopoeia (Supplements 11.5 and 11.6) were published in January 2024 and July 2024 respectively. Supplement 11.5 came into effect on 1 July 2024 and Supplement 11.6 has come into effect on 1 January 2025. The seventh Supplement (11.7) was published in January 2025 and will come into effect on 1 April 2025. The text of these publications was included in the online BP in advance of their effective date and will be published in the next editions of the BP and BP (Vet) as appropriate.
48. The UK continued to play a highly active role in supporting the work of the EPC and its Groups of Experts and Working Parties, providing experts to groups that are most relevant to the UK market. Members of the UK delegation represented the BPC at meetings of the EPC, providing valuable input to the work of that Commission.

49. The Laboratory provides technical support for the work of the EPC, providing technical data to support the elaboration of new monographs and the revision of existing monographs.
50. A list of the current membership of the United Kingdom delegation, and the names of the UK members of Groups of Experts and Working Parties during 2024, is included in Appendix II.

International Liaison and Collaboration

51. Liaison was maintained on a wide range of topics relating to pharmacopoeial matters and nomenclature with various international organisations and bodies including the World Health Organization (WHO) and the United States Pharmacopoeia (USP).
52. In preparation for the fifteenth International Meeting of World Pharmacopoeias, to be hosted in New Delhi by the Indian Pharmacopoeia Commission (IPC), BP Secretariat staff have led a project to create a Terms of Reference document with the goal to improve governance and focus, and to support the India/US-led project on climate-friendly principles. Both projects have progressed to target, with the goal of all parties agreeing to text in the meeting scheduled for February 2025.
53. Throughout the year BP Secretariat staff provided feedback to WHO on draft monographs for the International Pharmacopoeia, which was greatly appreciated. Many of the standards included in the International Pharmacopoeia, and the policies employed, are consistent with those in the BP.
54. The BP attended the 58th WHO Expert Committee meeting on Specifications for Pharmaceutical Preparations in October during which monographs and reference materials for the International Pharmacopoeia were discussed.
55. The BP hosted the Chief Scientific Officer and delegation from the United States Pharmacopoeia in London in October. Topics discussed included continuation of harmonisation of drug product monographs, ICH topics, biologics and the environmental footprint of pharmaceuticals as well as the International Meeting of World Pharmacopoeias projects (see 52 above)
56. BP staff attended the 78th and 79th WHO Consultations on INN in April and October. This regular INN committee discussed and agreed a significant number of names for new chemical and biological substances at both meetings.

Acknowledgements

57. The BPC wishes to express its gratitude to all EAG, Panel and WP members for the invaluable contribution they have made towards the continuing improvement of standards in the BP and to members of the United Kingdom delegation to the EPC and to UK members of its Groups of Experts and Working Parties who have unstintingly provided time, attention, and expertise to the work of that BPC. In particular, the BPC wishes to acknowledge the contribution of those members who have now retired from the EAGs, Panels of Experts and WPs of the BPC.
58. The BPC also wishes to record its immense gratitude to the staff of the BP and Laboratory Services Group of the MHRA. Significant input to the work of the BPC continued to be received from members of staff from the following Groups of the MHRA: Healthcare, Quality & Access; Scientific Research & Innovation; Communications and Engagement. Significant input has also been received from the BP and MHRA Laboratories, from the Department of Health and Social Care, from the Cell and Gene Therapy Catapult and from the Veterinary Medicines Directorate.
59. The BPC wishes to acknowledge the advice of the publishing team at The Stationery Office (TSO) in the production of the BP 2025, the BP (Vet) 2025 and Supplement No.3 to BAN 2022.

APPENDIX I

BRITISH PHARMACOPOEIA COMMISSION PUBLICATIONS DURING 2024

Publications may be purchased from TSO Customer Service Centre, or from the British Pharmacopoeia's pharmacopoeia.com website.

British Pharmacopoeia 2025 package

Consisting of: -

British Pharmacopoeia 2025

British Pharmacopoeia (Veterinary) 2025

Online Access (single-user licence, allowing access to three in-year electronic updates)

BP Download Edition (single-user licence)

(£1000 for a package consisting of print, online and download of the edition or £875 for each individually)

Individual BP Monograph (only supplied electronically)

(Price £200 for the first text, £150 each for the second and third texts)

British Approved Names

British Approved Names 2022: Supplement No.3 (including Supplements 1 to 3)

(Price £150, available online only)

APPENDIX II

Membership of the British Pharmacopoeia Commission

Post	Name and title	Affiliations
Chair	Dr Anna-Maria Brady BSc PhD	Former Head of Biologicals and Administration, Veterinary Medicines Directorate
Vice Chair	Mr Robert Lowe BPharm FRPharmS	Director of Pharmacy Quality Assurance Specialist Services, NHS East of England & Northamptonshire

I write a regular foreward for European Pharmaceutical Review (EPR) on various topics of interest to readers, e.g., the role of AI in pharmaceutical industry. these articles are wholly crafted by me and EPR does not influence my output nor pay me.

I regularly review articles in various journals, e.g., journal of pharmaceutical sciences, organic process research and development, journal of chromatography.

These are blind reviews and my participation isn't recorded in the published article.

I'm not paid for these reviews.

I am an academic at King's College London and I conduct research. One of my research activities involves collaborating with a pharmaceutical company (AstraZeneca) on a drug development project in which I am the second supervisor of a PhD student (co-funded by the UKRI and AstraZeneca). The start date and duration of the project will be on the 01 Oct 2024 for 4 years.

At King's College London, I give

lectures on the British Pharmacopoeia (a total of 4 hours per year) at the master and undergraduate levels. I also provide training to master students on how to use and critique the BP monographs.

Ka Lung Andrew Chan	BPC	Additional				I am a committee member of a Royal Society of Chemistry interest group (the Joint Pharmaceutical and Analysis Group). I helped organising meetings (7 per year) and occasionally join as an invited speaker.
