

Public sector finances, UK: June 2025

How the relationship between UK public sector monthly income and expenditure leads to changes in deficit and debt.

Coverage: United Kingdom
Date: 22 July 2025
Theme: Economy
Next release: 21 August 2025

Contact: Public sector finances team
Email: public.sector.inquiries@ons.gov.uk
Telephone: +441633 456402

1. Main points

- Borrowing – the difference between total public sector spending and income – was £20.7 billion in June 2025; this was £6.6 billion more than in June 2024 and the second-highest June borrowing since monthly records began in 1993, after that of June 2020.
- The interest payable on central government debt was £16.4 billion in June 2025, largely because the interest payable on index-linked gilts rises and falls with the Retail Prices Index; this was £8.4 billion more than in June 2024 and the second-highest June central government interest payable since monthly records began in 1997, after that of June 2022.
- Borrowing in the financial year to June 2025 was £57.8 billion; this was £7.5 billion more than in the same three-month period of 2024 and the third-highest April to June borrowing since monthly records began, after those of 2020 and 2021.
- The current budget deficit – borrowing to fund day-to-day public sector activities – was £16.3 billion in June 2025; this was £7.1 billion more than in June 2024 and the third-highest June current budget deficit since monthly records began in 1997, after those of 2020 and 2022.
- The current budget deficit in the financial year to June 2025 was £44.5 billion; this was £6.5 billion more than in the same three-month period of 2024 and the third-highest April to June current budget deficit since monthly records began, after those of 2020 and 2021.
- Public sector net debt excluding public sector banks was provisionally estimated at 96.3% of gross domestic product (GDP) at the end of June 2025; this was 0.5 percentage points more than at the end of June 2024 and remains at levels last seen in the early 1960s.
- Public sector net financial liabilities excluding public sector banks were provisionally estimated at 83.8% of GDP at the end of June 2025; this was 2.2 percentage points more than at the end of June 2024, but 12.5 percentage points less than for public sector net debt.
- Central government net cash requirement (excluding UK Asset Revolution Ltd and Network Rail) was £15.8 billion in June 2025; this was £1.3 billion more than in June 2024.

2. June 2025 indicators at a glance

Public sector net borrowing

Dataset identifier code: [J5I1](#)

Change since June 2024: ▲ £6.6 bn

Change since June 2023: ▲ £1.7 bn

In June 2025, the public sector spent more than it received in taxes and other income, leading to a net borrowing of £20.7 billion, the second-highest June net borrowing on record, after that of 2020.

Source: ONS

Total public sector spending

Dataset identifier code: [KX5Q](#)

Change since June 2024: ▲ £12.7 bn

Change since June 2023: ▲ £10.5 bn

In June 2025, the increase in public spending was largely because of a substantial increase in debt interest payable of £8.4 billion compared with June 2024.

Source: ONS

Total public sector receipts

Dataset identifier code: [JW2Q](#)

Change since June 2024: ▲ £6.1 bn

Change since June 2023: ▲ £8.8 bn

In June 2025, central government tax receipts were up £2.3 billion, and receipts from compulsory social contributions were up £3.1 billion, both compared with June 2024.

Source: ONS

Public sector net debt as a % of GDP

Dataset identifier code: [HF6X](#)

Change since June 2024: ▲ 0.5 pts

Change since June 2023: ▲ 0.0 pts

Debt at the end of June 2025 was equivalent to 96.3% of gross domestic product (GDP), the annual value of everything produced in the UK economy.

Source: ONS

3. Borrowing in June 2025

Initial estimates show that the public sector spent more than it received in taxes and other income in June 2025, requiring it to borrow £20.7 billion.

This was £6.6 billion more borrowing than in June 2024 and £3.5 billion more than the £17.1 billion forecast by the Office for Budget Responsibility in March 2025.

It was the second-highest borrowing in any June since monthly records began in 1993, behind that of June 2020, during the coronavirus (COVID-19) pandemic period.

Figure 1: Borrowing in June 2025 was higher than in any June in the last four years

Public sector net borrowing excluding public sector banks, £ billion, UK, June 2021 to June 2025

Source: Public sector finances from the Office for National Statistics

Notes:

1. Dataset identifier code: -J5II.
2. Positive numbers indicate a deficit; negative numbers a surplus.

Public sector net borrowing is the sum of the current budget deficit and the public sector's net (capital) investment.

The current budget, which is usually in deficit, can be considered as borrowing to fund day-to-day public sector activities. This is the difference between its current receipts and current expenditure, while taking account of capital consumption (depreciation).

The current budget was in deficit by £16.3 billion in June 2025, which was £7.1 billion more than in June 2024.

Public sector net investment comprises of its acquisitions less disposals of capital assets (gross fixed capital formation), less the depreciation of capital assets, plus capital grants to the private sector, less capital grants from the private sector.

Net investment was estimated at £4.4 billion in June 2025, which was £0.5 billion less than in June 2024.

Table 1: Public sector net borrowing by subsector: June

2. Public sector excluding the public sector-controlled banks.
3. Excludes Network Rail Limited and UK Asset Resolution Limited.
4. The data in this table correspond to those published in Table PSA2 of our [Public sector finances tables 1 to 10: Appendix A dataset](#).
5. Extremely large percentage changes are not included in this table.
6. With effect from June 2024 there are no institutions classified as public sector banks.

A breakdown of net borrowing by subsector and a summary of central government receipts and expenditure data are presented in Tables 1 to 3 in our [Public sector finances summary tables: Appendix M dataset](#).

- The initial outturn estimates for the early months of the current financial year contain more forecast data than other months, as profiles of tax receipts and departmental and local government spending are still provisional. The data for these months are typically prone to sizeable revisions in later months.

Central government borrowing

Central government forms the largest part of the public sector and includes government departments such as HM Revenue and Customs (HMRC), Department of Health and Social Care, Department for Work and Pensions, Department for Education, Ministry of Defence and other government agencies.

The relationship between central government's receipts and expenditure is an important determinant of public sector net borrowing. Of the £20.7 billion borrowed by the public sector in June 2025, central government borrowed £20.2 billion.

Central government current receipts

Central government's current receipts were £86.8 billion in June 2025, £5.7 billion more than in June 2024. Of this £5.7 billion increase in income:

- central government tax receipts increased by £2.3 billion to £63.6 billion; this included increases of £1.0 billion in Income Tax, £0.7 billion in Value Added Tax (VAT), and £0.5 billion in Corporation Tax receipts
- compulsory social contributions increased by £3.1 billion to £17.4 billion; on 6 April 2025 changes to the rate of National Insurance contributions paid by employers came into effect

A detailed breakdown of central government income is presented in our [Public sector current receipts: Appendix D dataset](#).

Central government current expenditure

Central government spending data for June 2025 are provisional. There is uncertainty around these estimates until more detailed departmental information becomes available over time.

Central government's current expenditure was provisionally estimated as £97.1 billion in June 2025, £12.4 billion more than in June 2024. Of this overall £12.4 billion increase in spending:

- central government debt interest payable increased by £8.4 billion to £16.4 billion, largely because the interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI)
- central government departmental spending on goods and services increased by £2.0 billion to £37.2 billion, as pay rises and inflation increased running costs
- net social benefits paid by central government increased by £1.5 billion to £26.5 billion, largely caused by inflation-linked increases in many benefits and earnings-linked increases to state pension payments
- payments to support the day-to-day running of local government decreased by £0.4 billion to £12.3 billion; these intra-government transfers are both central government spending and a local government receipt, so they have no effect on overall public sector borrowing

Interest payable on central government debt

The interest payable on central government debt was £16.4 billion in June 2025, £8.4 billion more than in June 2024, and £2.4 billion more than the £14.0 billion forecast by the Office for Budget Responsibility (OBR). This was the second-highest June interest payable since monthly records began in 1997, after that of June 2022.

Figure 2: The interest payable on index-linked gilts rises and falls with the Retail Prices Index, adding volatility to central government debt interest costs

Central government debt interest payable, £ billion, UK, June 2023 to June 2025

Source: Public sector finances from the Office for National Statistics

Notes

1. Net of redemption proceeds.
2. Dataset identifier codes: NMFX, JNYY and JNYX.

The interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI), adding volatility to central government debt interest costs. This additional RPI inflation-linked interest is described as “capital uplift” and affects the value of the gilt principal.

Capital uplift was £10.9 billion in June 2025, largely reflecting the 1.7% increase in the RPI between March and April 2025.

Figure 2 shows this series as the light blue portion of each stacked bar. It excludes the uplift payable at the time of an index-linked gilt redemption. These redemption payments are already recorded as accrued interest payable across the life of each index gilt. For further details of our approach, see our [Calculation of interest payable on government gilts methodology](#).

Borrowing in other subsectors

Our [Public sector finances borrowing by subsector: Appendix R dataset](#) provides further detail on data presented in Table 1, including transactions related to borrowing by each subsector and their contribution to total public sector borrowing in a matrix table format. The time period presented in the matrix table can be changed using the drop-down box feature.

4. Borrowing in the financial year to June 2025

The public sector spent more than it received in taxes and other income in the financial year (FY) to June 2025. Provisional estimates show it borrowed £57.8 billion over the three-month period, in line with the latest (March 2025) Office for Budget Responsibility (OBR) forecast.

Borrowing in financial year ending (FYE) June 2025 was £7.5 billion more than in the FY to June 2024 and the third highest in any June since monthly records began in 1993, after those of June 2020 and 2021, during the coronavirus (COVID-19) pandemic period.

Figure 3: Borrowing in the financial year to June 2025 was in line with forecast

Cumulative public sector net borrowing excluding public sector banks, £ billion, UK, financial year (FY) to March 2025 and FY to March 2026

Notes:

1. Dataset identifier code: -J5II.
2. This chart uses forecast data published in the [Economic and fiscal outlook – March 2025 and monthly profiles published in May 2025](#).

Within public sector borrowing in the FY to June 2025, the current budget deficit was £44.5 billion, £6.5 billion more than in FY to June 2024. Public sector net investment increased by £1.0 billion to £13.3 billion over the same three-month period.

Table 2: Public sector net borrowing by subsector: financial year to June 2025

2. Public sector excluding the public sector-controlled banks.
3. Excludes Network Rail Limited and UK Asset Resolution Limited.
4. The data in this table correspond to those published in Table PSA2 of our [Public sector finances tables 1 to 10: Appendix A dataset](#).
5. Extremely large percentage changes are not included in this table.
6. With effect from June 2024 there are no institutions classified as public sector banks.

Central government net borrowing

Central government net borrowing is the sum of its current budget deficit and its net (capital) investment spending.

The current budget, which is usually in deficit, can be considered as borrowing to fund day-to-day central government activities. This is the difference between its current receipts and current expenditure, while taking account of capital consumption (depreciation).

Tables 1 to 3 in our [Public sector finances summary tables: Appendix M dataset](#) provide an extended presentation of Table 2 and a summary of central government receipts and expenditure data.

Central government current receipts

Central government's current receipts were £252.0 billion in the FY to June 2025, £15.9 billion more than in the same three-month period a year ago. Of this £15.9 billion increase in income:

- central government tax receipts increased by £8.4 billion to £186.4 billion; this included increases of £3.7 billion in Income Tax, £1.9 billion in Value Added Tax (VAT) and £1.8 billion in Corporation Tax receipts
- compulsory social contributions increased by £7.5 billion to £48.0 billion; on 6 April 2025 changes to the rate of National Insurance contributions paid by employers came into effect

A detailed breakdown of central government income is presented in our Public sector current receipts: Appendix D dataset.

Central government current expenditure

Central government's current expenditure was provisionally estimated as £281.3 billion in the FY to June 2025, £21.9 billion more than in the same three-month period a year ago. Of this overall £21.9 billion increase in spending:

- central government departmental spending on goods and services increased by £8.6 billion to £112.5 billion, as pay rises and inflation increased running costs
- interest payable on central government debt increased by £7.4 billion to £33.2 billion, largely because the interest payable on index-linked gilts rises and falls with the Retail Prices Index (RPI)
- net social benefits paid by central government increased by £5.1 billion to £80.7 billion, largely caused by inflation-linked increases in many benefits and earnings-linked increases to state pension payments
- payments to support the day-to-day running of local government decreased by £0.3 billion to £40.2 billion; these intra-government transfers have no impact on overall public sector borrowing (PSNB ex)

Central government net investment

Central government net investment in the FY to June 2025 was £22.3 billion, £5.3 billion less than in the same three-month period a year ago.

In the FY to June 2025, central government made payments totalling £4.1 billion to the Bank of England (BoE) Asset Purchase Facility (APF) Fund. These payments are recorded as central government net investment. Intra-public sector transfers such as these have no impact on overall public sector borrowing (PSNB ex). They increased central government's borrowing by £4.1 billion in the FY to June 2025 but reduced the borrowing impact of the BoE by an equal and offsetting amount.

Local government

Initial estimates suggest that local government was in surplus by £4.1 billion in the FY to June 2025. This was a £1.0 billion smaller surplus than in the same period a year earlier. These estimates are largely based on the OBR's Economic and fiscal outlook – March 2025 and monthly profiles published in May 2025.

5. Borrowing in earlier financial years

Provisional estimates show the public sector borrowed £148.8 billion in the financial year ending (FYE) March 2025. This was the third-highest borrowing in any financial year since records began in FYE March 1947, after the equivalent 12-month period of the FYE March 2021 during the coronavirus (COVID-19) pandemic, and the FYE March 2010 following the global financial downturn. However, these estimates have not been adjusted for inflation.

Expressing borrowing as a ratio of gross domestic product (GDP) – the value of everything produced in the UK economy in a 12-month period – gives an estimate of its affordability and provides a more thorough and reliable measure for comparison of the UK's fiscal position over time.

We currently estimate the total borrowed in the FYE March 2025 was equivalent to 5.1% of GDP, 0.3 percentage points higher than in the FYE March 2024.

Figure 4: Financial year borrowing as a percentage of GDP has been stable at around 5% since the coronavirus (COVID-19) pandemic period

Public sector net borrowing excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year ending (FYE) March 1901 to FYE March 2025

Source: Public sector finances from the Office for National Statistics and Office for Budget Responsibility

Notes:

1. Dataset identifier code: -J5IJ.
2. This chart uses historical data published in the [Public finances databank 2025 to 2026](#).

We describe the methodology used for the presentation of our GDP ratios in our [The use of GDP in public sector fiscal ratio statistics methodology](#).

- This release presents the fourth estimate of UK public sector finances for the financial year ending (FYE) March 2025; these are not final figures, and they will be revised over the coming months as we replace our initial estimates with provisional and then final outturn data.

6. The public sector balance sheet

The public sector balance sheet describes its financial position at a point in time. It shows its liabilities (amounts owed) and its assets (amounts owned).

There are several measures of the public sector balance sheet that we discuss in our [What the UK government owns and what it owes blog](#).

Table 3 presents the narrowest balance sheet measure, which is the redemption value of central government gilts. It then builds on this measure, widening coverage by both the subsector and the range of asset and liability types included, to reach the far wider measure of public sector net worth. We explain this measure in our [Wider measures of the public sector balance sheet: public sector net worth methodology](#).

Table 3: The public sector balance sheet

Balance sheet measures as at the end of June 2025, £ billion, UK

Classification of assets and liabilities [note 1] [note 2] [note 10]	Central government gilts	General government gross debt	PSND excluding both BoE and public sector banks (PSND ex BoE)	PSND excluding public sector banks (PSND ex)	PSNFL excluding public sector banks	Public sector net worth excluding public sector banks
Total [note 3]	2,541.2	2,999.9	2,713.1	2,874.5	2,504.0	-878.1
Assets: Non-financial [note 4]						1,625.8
Assets: Illiquid financial [note 5]					1,076.6	1,076.6
Assets: Liquid financial [note 5]			255.3	412.1	412.1	412.1

Liabilities: Other debt securities and loans		188.9	192.0	205.8	205.8	205.8
Liabilities: Other financial liabilities [note 7]					706.0	706.0

Source: Public sector finances from the Office for National Statistics and Debt Management Office

Notes:

1. All aggregates are presented on a [2010 European system of national and regional accounts \(ESA 2010\)](#) (PDF, 6.4MB) basis unless indicated.
2. Consolidation between subsectors mean that the size of assets and liabilities (such as gilts) impacting on the measure can change as the coverage increases.
3. Total equals liabilities less assets except public sector net worth, where total equals assets less liabilities.
4. Non-financial account data based on the [UK national balance sheet](#).
5. "Liquid financial assets" mainly consists of foreign exchange reserves and cash deposits. "Illiquid financial assets" includes assets such as loans, financial derivatives, and other accounts receivable.
6. Gilt liabilities have been adjusted to remove those held by Pool Re which is classified as a central government body.
7. "Other financial liabilities" includes monetary gold and special drawing rights, standardised guarantees, financial derivatives, funded pension liabilities and other accounts payable.
8. Figures may not sum because of rounding.
9. We publish an additional presentation of the UK public sector balance sheet following [International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E](#).
10. PSND - Public sector net debt and PSNFL - public sector net financial liabilities.

Our [Public sector balance sheet tables: Appendix N dataset](#) presents a detailed reconciliation between the balance sheet measures summarised in Table 3.

Public sector net debt

Public sector net debt excluding public sector banks (PSND ex) is the most widely used balance sheet measure used to describe the UK public sector's financial position at a point in time. Expressing net debt as a ratio of gross domestic product (GDP) gives an estimate of its affordability and provides a more thorough and reliable measure for comparison of the UK's fiscal position over time.

The net debt-to-GDP ratio at the end of June 2025 was provisionally estimated at 96.3%, 0.5 percentage points more than a year ago. However, this is a highly provisional estimate. It is likely to be revised in future publications because it partly relies on GDP estimates based on the Office for Budget Responsibility's [Economic and fiscal outlook – March 2025 report](#).

Our [How the ONS estimates UK debt to GDP figures blog](#) explains why our estimates of the debt to GDP ratio are susceptible to revision.

Figure 5: Net debt as a percentage of GDP remains at levels last seen in the early 1960s

Public sector net debt excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year ending (FYE) March 1901 to June 2025

Source: Public sector finances from the Office for National Statistics and Office for Budget Responsibility

Notes:

1. Dataset identifier code: HF6X.
2. This chart uses historical data published in the [Public finances databank 2025 to 2026](#).

Public sector net debt excluding the Bank of England (BoE) was £2,713.1 billion at the end of June 2025, or around 90.9% of GDP. This was £161.3 billion, or 5.4 percentage points of GDP, less than the wider measure of net debt (including the BoE). This difference was largely a result of the BoE's quantitative easing activities, including the gilt-purchasing activities of the Asset Purchase Facility (APF) Fund.

The APF Fund's gilt holding is not recorded directly as a component of public sector net debt. Instead, in June 2025, we recorded the £89.4 billion difference between the £590.0 billion of reserves created to purchase its gilts (at market value at the time of purchase) and their £500.6 billion redemption value. For details of the BoE's contribution to public sector net debt, see Table PSA9A of our [Public sector finances tables 1 to 10: Appendix A dataset](#).

Public sector net financial liabilities

Public sector net financial liabilities excluding public sector banks (PSNFL ex) were £2,504.0 billion at the end of June 2025. This was equivalent to an estimated 83.8% of GDP. This was £178.9 billion, or 2.2 percentage points, more than at the end of June 2024.

PSNFL ex adds further assets and liabilities to those recorded in debt (PSND ex). These extra assets are currently valued at more than the extra liabilities. This means that PSNFL ex was 12.5 percentage points of GDP less than PSND ex, which stood at 96.3% of GDP at the end of June 2025.

We explain the financial assets and liabilities captured in PSNFL ex in our [Public sector net financial liabilities \(PSNFL\) methodology](#).

Additionally, we published [a blog explaining the PSNFL measure](#), because it has been selected by the UK government as the reference for a balance sheet fiscal rule.

Figure 6: The upward trend in public sector net financial liabilities is largely because of increases in net debt

Public sector net financial liabilities, £ billion, UK, month end June 2004 to June 2025

Source: Public sector finances from Office for National Statistics

Notes:

1. Dataset identifier codes: KSE6, JMET, JMEU and CPNF.
2. PSND ex abbreviates public sector net debt excluding public sector banks.
3. PSNFL ex abbreviates public sector net financial liabilities excluding public sector banks.

The additional financial assets and liabilities included in PSNFL ex that fall outside of the PSND ex boundary are not updated monthly. Instead, they are updated quarterly, or when data become available. These data were updated on 20 June 2025.

A more detailed presentation of the public sector balance sheet is available in our [Public sector net worth: Appendix O dataset](#), released on 20 June 2025.

7. Revisions

The data for the latest months of every release contain a degree of forecasts. These are then replaced by improved estimates, as further data are made available, and finally by outturn data.

- Our initial estimates of borrowing for the most recent months are prone to revisions in later months. This is because some tax receipts contain a degree of Office for Budget Responsibility (OBR)-based forecast data. Both departmental and local government spending profiles are provisional.

Table 4: Revisions to public sector net borrowing by subsector

Public sector net borrowing by subsector compared with the previous publication, UK, £ billion

4. With effect from June 2024 there are no institutions classified as public sector banks.

Tables 4 to 6 of our [Public sector finances summary tables: Appendix M dataset](#) compare our latest public sector finances data with those in our [Public sector finances, UK: May 2025 bulletin](#), published on 20 June 2025. They highlight the revisions to borrowing by subsector, with additional detail for central government receipts and expenditure.

Our [Public sector finance revisions analysis: Appendix P dataset](#) records monthly borrowing data as at first and at subsequent publications, graphically illustrating any potential bias to our early estimates.

Revisions to public sector net borrowing in the financial year to May 2025

We have reduced our provisional estimate of public sector net borrowing (PSNB ex) in the financial year (FY) to May 2025 by £0.6 billion to £37.1 billion since publishing our [Public sector finances, UK: May 2025 bulletin](#). This change was largely because of regular updates to our central government data.

While the central government current budget deficit remained largely unchanged there were several offsetting changes to tax receipts, National Insurance contributions receipts and within current expenditure. These updates included a reduction of current grants to local government of £0.6 billion, which reduced central government borrowing but increased local government borrowing by an equal and offsetting amount.

Tables 5 to 6 of our [Public sector finances summary tables: Appendix M dataset](#) present the revisions to our previously published estimates of central government receipts and spending by component.

Over the same period, we have reduced our initial estimates of central government net investment by £1.5 billion. Initial outturn estimates for the early months of the financial year contain more forecast data than in other months and are typically prone to sizeable revisions in later months.

Revisions to public sector net debt at the end of May 2025

We have increased our estimate of public sector net debt (PSND ex) at the end of May 2025 by £7.1 billion to £2,874.5 billion, since publishing our [Public sector finances, UK: May 2025 bulletin](#). This change was mainly because of regular updates to Bank of England data published a month in arrears.

Revisions to gross domestic product

Since publishing our May 2025 bulletin, we have increased our estimate of net debt expressed as a percentage of gross domestic product (GDP) by 0.2 percentage points to 96.6% of GDP at the end of May 2025.

This change was a combination of an upward revision to our previous estimate of net debt and a small increase to our previous estimate of GDP, which has been updated to include the [GDP quarterly national accounts, UK: January to March 2025](#), published on 30 June 2025.

Our blog, [How the ONS estimates UK debt to GDP figures](#), explains why our estimates of GDP ratios are susceptible to revision.

8. Data on public sector finances

Public sector finances tables 1 to 10: Appendix A

Dataset | Released 22 July 2025

The data underlying the public sector finances statistical release are presented in the tables PSA 1 to 10.

Public sector current receipts: Appendix D

Dataset | Released 22 July 2025

A breakdown of UK public sector income by latest month, financial year-to-date and full financial year, with comparisons with the same period in the previous financial year.

Public sector finances summary tables: Appendix M

Dataset | Released 22 July 2025

The latest public sector net borrowing by subsector and a summary of central government receipts and expenditure data.

Public sector balances sheet tables: Appendix N

Dataset | Released 22 July 2025

A reconciliation of the latest public sector balance sheet measures.

Public sector finances borrowing by subsector: Appendix R

Dataset | Released 22 July 2025

Public sector finances analytical tables (PSAT) showing transactions related to borrowing by subsector. Total Managed Expenditure (TME) is also provided.

International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E

Dataset | Released 20 June 2025

Presents the balance sheet, statement of operations and statement of other economic flows for the public sector, compliant with the Government Finance Statistics Manual 2014: GFSM 2014 presentation. Updated quarterly, depending on the availability of data.

Public sector net worth: Appendix O

Dataset | Released 20 June 2025

Presents the balance sheet for the public sector, consistent with the [2010 European system of national accounts \(ESA 2010\) \(PDF, 6.4MB\)](#) and Eurostat's [Manual on Government Deficit and Debt \(MGDD\)](#). Updated quarterly, depending on the availability of data.

9. Glossary

Public sector

In the UK, the public sector consists of six subsectors: central government, local government, public non-financial corporations, public sector funded pensions, the Bank of England (BoE) and public financial corporations (including public sector banks). The figures presented in this release exclude public sector banks unless otherwise noted.

The NatWest Group, the last remaining public sector bank, was reclassified to the private sector as of June 2024.

Public sector current budget deficit

Public sector current budget deficit (PSCBD) is the gap between current expenditure and current receipts on an accruals basis, having taken account of depreciation. PSCBD is effectively an estimate of borrowing to fund day-to-day public sector activities and is the reference statistic used for a UK government fiscal rule.

The current budget is in surplus when receipts are greater than expenditure and is indicated with a negative sign.

Public sector net borrowing

Public sector net borrowing (PSNB) is the gap between total expenditure and current receipts on an accruals basis. If receipts exceed expenditure, this is referred to as a surplus and is indicated with a negative sign. Borrowing is often referred to by commentators as “the deficit”.

Public sector current budget deficit and net borrowing are measured on an accruals basis, where transactions for income are recorded when earned and expenses are recorded when incurred, rather than when the bills are paid (on a cash basis).

Central government net cash requirement

The central government net cash requirement (CGNCR) represents the cash needed to be raised from the financial markets over a period to finance its activities. The amount of cash required will be affected by changes in the timing of payments to and from the public sector, rather than when these liabilities were incurred.

Public sector net debt

Public sector net debt (PSND), often referred to by commentators as “the national debt”, represents the amount of money the public sector owes to the private sector and overseas (in the form of loans, debt securities, deposit holdings and currency), net of liquid financial assets held.

Public sector net financial liabilities

Public sector net financial liabilities (PSNFL) is a wider measure of the balance sheet than public sector net debt and includes all financial assets and liabilities recognised in the national accounts. PSNFL is the reference statistic used for a UK government fiscal rule and is sometimes referred to as “net financial debt”.

Broadening the PSNFL measure to include the public sector’s non-financial assets provides public sector net worth (PSNW), our widest balance sheet measure.

10. Data sources and quality

Methodology guides

To supplement this release, we publish an accompanying [Monthly statistics on the public sector finances: a methodological guide](#) and [Public sector finances QMI](#) outlining the strengths, limitations, and appropriate uses of government finance statistics.

We also explain the recording of interest payable to holders of UK government gilts in the UK public sector finances in our [Calculation of interest payable on government gilts methodology](#) and our [Use of gross domestic product \(GDP\) in public sector fiscal ratio statistics methodology](#).

Accredited official statistics

Public sector net borrowing, cash requirement and debt are [accredited official statistics](#). These accredited official statistics were independently reviewed by the Office for Statistics Regulation in June 2017. They comply with the standards of trustworthiness, quality, and value in [the Code of Practice for Statistics](#) and should be labelled “accredited official statistics”.

Official statistics

Public sector net financial liabilities and public sector net financial worth are both official statistics. These measures were introduced after June 2017, and so have not yet been reviewed by the Office for Statistics Regulation.

Official statistics in development

Public sector net worth is labelled as “official statistics in development”. Until October 2023, these were called “experimental statistics”. Read more about the change in our [Guide to official statistics in development](#).

Central government tax receipts and social contributions

In the most recent months, tax receipts recorded on an accrued basis are subject to some uncertainty. This is because many taxes such as Value Added Tax (VAT), Corporation Tax, and Pay As You Earn (PAYE) Income Tax contain some forecast cash receipts data and are liable to revision when actual cash receipts data are received.

The forecasts underlying our current tax estimates largely reflect the expectations published in the Office for Budget Responsibility’s (OBR’s) [Economic and fiscal outlook – March 2025 report](#).

Public corporations

Data for public corporations in the financial year ending (FYE) March 2026 are highly provisional initial estimates for the UK. They are largely based on the OBR's Economic and fiscal outlook – March 2025 report.

Data for public corporations in FYE March 2024 and FYE March 2025 remain largely based on the OBR's Economic and fiscal outlook – October 2024 report, and are supplemented by in-year estimates for train operating companies, the Housing Revenue Account, and surveyed public corporations.

Local government

Local government data for the FYE March 2026 are highly provisional initial estimates for the UK. They are largely based on the OBR's Economic and fiscal outlook – March 2025 and monthly profiles published in May 2025.

Local government data for the FYE March 2025 remain provisional estimates for the UK. They are largely based on published budget data for England, Scotland and Wales, with estimates included for Northern Ireland.

In recent years, planned local government expenditure initially reported in local authority budgets has been systematically lower than final outturn current expenditure reported in the audited accounts, and generally higher than that reported in final outturn capital expenditure. Therefore, we may include adjustments to increase or decrease the amounts reported at the budget stage.

For FYE March 2024, we include a £0.5 billion downward adjustment to Scotland's capital expenditure.

For FYE March 2025, we include a £3.0 billion upward adjustment to England's current expenditure.

To reflect the most recently available data for housing benefits, we have applied further downward adjustments to budget data for current expenditure on benefits of £0.2 billion in FYE March 2024 and £1.4 billion in FYE March 2025.

Comparing our data with official forecasts

The independent OBR is responsible for the production of official forecasts for the UK government. These forecasts are usually produced twice a year, in spring and autumn. The latest forecast was published in the OBR's [Economic and fiscal outlook – March 2025 report](#).

Table 5: Latest public sector finances estimates compared with the corresponding Office for Budget Responsibility forecast, UK

£ billion unless otherwise stated

	June 2025: Provisional estimate	June 2025: Forecast [note 1]	Difference	FYE March 2026: Forecast [note 1]
Current budget deficit	16.3	13.0	3.3	36.1
Net Borrowing	20.7	17.1	3.6	117.7
Net Debt	2,874.5	2,834.8	39.7	2,897.2
Net Debt % of GDP	96.3	95.9	0.4	95.1
Net Financial Liabilities	2,504.0	-	-	2,525.5
Net Financial Liabilities % of GDP	83.8	-	-	82.9

1 GDP denominator 12 month moving total to period

2 GDP denominator 12 month centred moving total around period

3 BoE abbreviates Bank of England

4 Time series only available back to 2000 Q1 with "-" denoting no data

5 "-" denotes zero value for that period

Worksheet PS6A: Net borrowing summary, UK, not seasonally adjusted

This worksheet contains one table. Some cells refer to notes which can be found on the notes worksheet tal

This table contains monthly and financial year to date data:

Relationships between columns 1+3+4=5 ; 2+3+4=6 ; 6+7+8=5

1 NRAM = Northern Rock Asset Management, B&B = Bradford and Bingley.

2 NCR = Net Cash Requirement

3 Does not include Net Cash Requirement to Central Government

4 Negative NCR reflects change in financing as from 2014/15 new financing requirements of Network Rail were met through core central government borrowing and are therefore included in main CGNCR.

PSA7D Central Government Net Cash Requirement on own account (receipts and outlays on a cash basis)

Relationships between columns 1+6+7=8; 9+10+11=12; 12-8=13

1 Comprises payments into the Consolidated Fund and all payovers of NICs excluding those for Northern Ireland.

2 Income tax includes capital gains tax and is gross of any tax credits treated by HM Revenue and Customs (HMRC) as tax deductions.

3 UK receipts net of personal pension rebates; gross of Statutory Maternity Pay and Statutory Sick Pay.

4 Payments into Consolidated Fund.

5 Including some elements of expenditure not separately identified.

6 Mainly comprises privatisation proceeds.

7 Net of certain receipts, and excluding on-lending to local authorities and public corporations.

8 A much more detailed breakdown of tax receipts is available from HMRC at www.gov.uk/government/organisations/hm-revenue-customs

9 NCR = Net Cash Requirement. Without Northern Rock Asset Management & Bradford and Bingley.

10 Gross of tax credits. Includes diverted profit tax.

REC3 Reconciliation of Central Government Net Cash Requirement and Changes in Net Debt

£ million

Relationship between columns 14=1+2+3+4+5+6+7+8+9+10+11+12+13

1 Excluding Northern Rock Asset Management (NRAM), Bradford & Bingley (B&B) and Network Rail (NR) - although cash flows relating to NRAM and B&B are included from October 2014 and for NR from April 2015

2 All adjustments reflect differences between when, and at what value, liabilities and assets are scored in net debt and their related cash flows

3 Includes gilts that are transferred to central government (such as those previously held by the Royal Mail Pension Plan) as well as timing differences where cash flows and debt movements were recorded in adjacent months

4 Includes the impact of imputed finance leases as well as the reclassifications of London Continental Railway and the reorganisation of the Housing Revenue Account

5 When an index-linked gilt is redeemed, the impact will always be negative which can cause MW7L to be negative.

Column relationships 1+2+3+4+5+6+7-8-9=10

1 Bank of England comprises Banking Department and Issue Department. Banking Department plus Issue Department assets and liabilities measured after consolidation of Issue Department deposit held at Banking Department.

2 From September 2021 this is calculated using APF purchase of gilts (YWWB9T9) plus APF purchase of corporate bonds (YWWZJ5J).

3 From September 2021 APF gilt purchases are sourced directly from BoE website (YWWB9T9).

4 Includes BoE's temporary purchases of long-dated UK government conducted between 28 September and 14 October 2022.

5 Up to the 19th January 2019, Term Funding Scheme was within the APF. From 19th January 2019, TFS was transferred to the BoE balance sheet.

6 These series can be derived from the BoE Annual Report and Accounts covering both the Banking and Issue Department liabilities and assets.

7 Includes: insurance, pension, standardised guarantee schemes and other accounts receivable/payable.

8 Gilts are recorded at face (or redemption) value in this presentation.

9 Consolidation of gilts issued by central government but held by Banking & Issue Department of BoE.

10 Consolidation of the loan to the BoE Asset Purchase Facility Fund (BEAPFF).

11 Comprised of Ways and Means advance to the National Loans Fund and the loan to the CCFE granted in April 2020 and fully repaid in March 2022.

12 HM Treasury estimates based on management information. Estimates for February 2015 to February 2016 based on annual report data only.

13 Term Funding Scheme (SME) is the TFS with additional incentives for small and medium-sized enterprises which started 15th April 2020.

1 ONS estimates of the interest received by APF from central government, largely on its gilt holdings.

2 ONS estimates of the interest paid by APF to Bank of England on the loan. Calculated using the Bank of England base rate. From February 2025 the base rate has been set at 4.5 percent.

3 Dividends paid to HM Treasury consolidate between the central government and Bank of England and so are public sector borrowing neutral.

4 The full cash transfers (series MT6A and MF7A) will impact the net cash requirement measure by the total amounts.

Worksheet PSA10: Public sector transactions by sub-sector and economic category, UK, not seasonally adjusted

This worksheet contains one table.

Some cells in this table are black indicating that some transactions do not exist in all subsectors

Time period covered by this presentation April 2024 to March 2025
