

### Sigma Group Modulbox MB SV – all models

Aspect	Details
Images	
PSD Number	2507-0148
Product Type	Machinery – Local Exhaust Ventilation
Product Identifiers	Brand: Tekno Filtering / Sigma Group Models: Modulbox MB 20, 30, 40, 50 & 60 SV
Product Description	A water backed booth LEV system designed to capture and filter dust produced during stone processing.
Country of Origin	Italy
Counterfeit	No
Risk Level	Health risk
Risk Type	High
Risk Description	Product instructions do not include adequate instructions for installation, specifically, the requirement for ducting extracted air to outside. When used in accordance with the instructions without being ducted to outside, the machine does not effectively control exposure to hazardous substances generated during the intended use of the machine, including respirable dust. This is of particular concern when used to control dust generated by processing materials containing respirable crystalline silica (RCS). Exposure to RCS poses a serious health risk. This product does not meet the requirements of the Supply of Machinery (Safety) Regulations 2008.
Corrective Measures	<p>The manufacturer Tekno Filtering s.r.l.s. have stopped supply in GB until the machine instructions are updated and brought into compliance. The GB supplier Stone and Glass Group Limited has also stopped supply. The GB supplier will contact existing customers to provide additional information regarding the installation of ducting with this machine. Customer contact: <a href="mailto:service@stoneandglassgroup.co.uk">service@stoneandglassgroup.co.uk</a></p> <p>Users of these machines should ensure that they are ducted to outside when used to control exposure to substances hazardous to health or use other equally effective measures.</p>
