

Statistical Release: UK official holdings of international reserves – July 2025

Date: 5 August 2025

Theme: The Economy

Coverage: United Kingdom

This monthly press notice shows details of movements in July 2025 in the UK's official holdings of international reserves, which consist of gold, foreign currency assets and International Monetary Fund assets. Further background detail on the reserves can be found in the accompanying Background Note. We welcome any feedback on this release at:

statistics-enquiries@hmtreasury.gov.uk.

I. Executive Summary

- No intervention operations were undertaken in this month.
- The UK government's gross reserves decreased by \$1,733 million to \$206,064 million at the end of July 2025.
- The Bank of England's gross reserves increased by \$1,498 million to \$43,261 million at the end of July 2025.

Table A.1: Movements and end-month holdings of UK official international reserves (\$ million)

	Movement in July 2025	Level at end-July 2025
UK government's net official reserves	-906	103,298
UK government's gross official reserves	-1,733	206,064
Bank of England net foreign currency holdings	5	16
Bank of England gross foreign currency holdings	1,498	43,261

'Gross' foreign currency reserves represent the government's total holdings of foreign currency reserves. 'Net' foreign currency reserves deduct foreign currency liabilities from gross foreign currency reserves. This is explained in further detail in the Background Note.

II. UK Foreign Currency Reserves: Overview

The UK government's holdings of gross reserves increased between 2008-09 and 2020-21. A time series of this data is available at:

<https://www.bankofengland.co.uk/statistics/uk-international-reserves/2025/july-2025>

One driver of this increase was government provision of a total of £72 billion of additional financing which came to an end in April 2020. Other drivers included an increase in the UK's allocation of Special Drawing Rights (SDR) from the IMF in 2009 and 2021, and a rise in the value of gold. In aggregate that equates to a 5% increase in the size of the UK's reserves as a percentage of UK GDP during that period bringing them in line with other comparable economies. The proportion of the reserves that is unhedged for currency risk has been increased since 2017, in part due to the outcome of an investment strategy review of the UK's foreign currency assets.¹ The growth in the reserves can be seen in the diagrams below.²

Chart 1.1: UK Government's Official Reserves

Chart 1.2: Bank of England's Official Holdings

Table A.2: UK foreign currency assets and liabilities at end-July 2025 (market value, \$million)

	UK Government			Bank of England		
	Assets	Liabilities	Net assets	Assets	Liabilities	Net assets
	(\$mn)	(\$mn)	(\$mn)	(\$mn)	(\$mn)	(\$mn)
Jul-25	206,064	-102,766	103,298	43,261	-43,245	16

A historical version of this table can be found in the accompanying Background Note.

¹ Further details regarding the EEA's investment strategy review can be found in the *Management of the Official Reserves, 2020*. This report is available at: <https://www.gov.uk/government/publications/management-of-the-official-reserves>.

² More information on the growth of the reserves can be found in the accompanying Background Note. Figures may not sum due to rounding.

III. UK Government Foreign Currency Assets and Liabilities³

The UK government's net reserves decreased by \$906 million in July 2025. The end-July 2025 total was \$103,298 million (£78,070 million⁴) compared with \$104,204 million (£76,044 million⁵) at end-June 2025.

Table A.3: UK government's official reserve assets and liabilities (market value, \$ million)

	End-Jun 2025	End-Jul 2025	Movement in July 2025
Gross Reserves⁶	207,796	206,064	-1,733
Liabilities	-103,593	-102,766	827
<i>of which:</i>			
<i>foreign currency forwards and swaps (net)⁷</i>	-51,291	-50,724	567
<i>repo transactions⁸</i>	-11,834	-11,947	-112
Net Reserves⁹	104,204	103,298	-906
Change in net reserves			-906
<i>of which:</i>			
<i>valuation effects</i>			-554
<i>transactions against sterling¹⁰</i>			-351
<i>of which:</i>			
<i>UK public sector customers¹¹</i>			-347
<i>Other¹²</i>			-4

- **No intervention operations were undertaken in July.** If the government so instructs, the Bank, acting as its agent, could intervene in the foreign exchange market by buying or selling government foreign exchange reserves. If intervention is undertaken, the monthly press release will provide details of the amount and date of the intervention and an explanation of why it was undertaken.

³ Past data can be revised; the most up to date historical data for end-July 1999 onwards are available on the Bank of England website at: <https://www.bankofengland.co.uk/statistics/uk-international-reserves/2025/july-2025>

⁴ When converted at a closing market rate of £1 = \$1.32315 on 31 July 2025

⁵ When converted at a closing market rate of £1 = \$1.3703 on 30 June 2025

⁶ In this presentation, gross reserves in part 1 and assets in part 2 exclude market valuation of foreign currency forwards and swaps. These derivatives are shown (excluding sterling leg) within liabilities.

⁷ Net present value of foreign currency forwards, interest rate and cross currency swaps (excluding sterling leg).

⁸ Market value of liabilities to repay foreign currency received in repo transactions.

⁹ Figures may not sum due to rounding.

¹⁰ These are foreign currency transactions that are exchanged into sterling.

¹¹ These are transactions undertaken on behalf of government departments.

¹² This is a balancing figure between 'transactions against sterling' and 'UK public customers'.

IV. Bank of England Foreign Currency Assets and Liabilities¹³

- The Bank of England's net holdings of foreign currency increased by \$5 million in July 2025. The end-July 2025 total was \$16 million (£12 million¹⁴) compared with \$11 million (£8 million¹⁵) at end-June 2025.

Table A.4: Bank of England's foreign currency assets and liabilities (market value, \$ million)

	End-Jun 2025	End-Jul 2025	Movement in July 2025
Assets¹⁶	41,763	43,261	1,498
Liabilities	-41,752	-43,245	-1,493
<i>of which:</i>			
foreign currency forwards and swaps (net) ¹⁷	-1,823	-1,200	623
repo transactions ¹⁸	-1,354	-1,501	-147
Net assets¹⁹	11	16	5
Change in net holdings			5
<i>of which:</i>			
valuation effects			5
transactions against sterling ²⁰			0
<i>of which:</i>			
UK public sector customers ²¹			0
Other ²²			0

- No intervention operations were undertaken in July.** The Bank could also undertake foreign exchange operations to intervene in support of its monetary policy objective. If intervention is undertaken, the monthly press release will provide details of the amount and date of intervention and an explanation of why it was undertaken.
- The Bank of England's foreign currency assets and liabilities mainly arise from the Bank's foreign exchange reserves, deposits placed with the Bank by overseas central banks and other customers, and other capital items.

¹³ Past data can be revised; the most up to date historical data for end-July 1999 onwards are available on the Bank of England website at: <https://www.bankofengland.co.uk/statistics/uk-international-reserves/2025/july-2025>

¹⁴ When converted at a closing market rate of £1 = \$1.32315 on 31 July 2025

¹⁵ When converted at a closing market rate of £1 = \$1.3703 on 30 June 2025

¹⁶ In this presentation, gross reserves in part 1 and assets in part 2 exclude market valuation of foreign currency forwards and swaps. These derivatives are shown (excluding sterling leg) within liabilities.

¹⁷ Net present value of foreign currency forwards, interest rate and cross currency swaps (excluding sterling leg).

²⁰ These are foreign currency transactions that are exchanged into sterling.

²¹ These are transactions undertaken on behalf of government departments.

²² This is a balancing figure between 'transactions against sterling' and 'UK public customers'.

Background Note

Introduction

The Reserves are a pool of liquid financial assets. The government's official holdings of international reserves comprise gold, foreign currency assets and International Monetary Fund (IMF) Special Drawing Rights (SDRs).²³ With the exception of the SDR assets that constitute the UK's Reserve Tranche Position (RTP) at the IMF and other loans to the IMF, these assets are held in the Exchange Equalisation Account (EEA).

Origin and purpose

The EEA was established in 1932 to provide a fund that could be used, when necessary, to regulate the exchange value of sterling and, therefore, is the mechanism through which any government exchange rate intervention would be conducted.

There has been no intervention for the purposes of influencing the sterling exchange rate since 1992. Against this background, foreign exchange reserves are held on a precautionary basis – to meet any change in exchange rate policy in the future, if required, or in the event of any unexpected shocks. The reserves are also used to: provide foreign currency services for government departments and agencies to provide foreign exchange for making payments abroad; and to buy, sell and hold Special Drawing Rights (SDRs) as required by the UK's membership of the IMF. The way the reserve assets are invested, financed and managed is primarily designed to meet these policy objectives.

Bank of England's role

The Bank acts as HMT's Agent in the day-to-day management of the EEA, dealing in foreign exchange and investing the reserves within the framework of a Service Level Agreement (SLA) set annually by HMT.²⁴ The Bank also acts as HMT's Agent for foreign currency liability management, including any issuance of foreign currency debt. This allows the foreign currency part of the government's balance sheet to be managed in an integrated way by the Bank as Agent. In addition to the United Kingdom's Official Reserves, the Bank of England manages its own holdings of foreign currency assets and gold. The Bank can intervene in the foreign exchange market in support of its monetary policy objectives.

²³ The SDR is an international reserve asset created by the IMF. Its value is defined in terms of a basket of the US dollar, euro, yen, sterling and renminbi. More information on the SDR can be found at: <http://www.imf.org/external/np/exr/facts/sdr.htm>.

²⁴ A summary of the SLA has been published in the *Management of the Official Reserves, 2020*. This report is available at: <https://www.gov.uk/government/publications/management-of-the-official-reserves>.

Gross and net reserves

The gross reserves represent the government's holdings of foreign currency assets, the IMF position (consisting of the Reserve Tranche Position at the IMF, other loans to the IMF and the net SDR position) and gold holdings. The government also holds foreign currency liabilities; these largely represent transactions undertaken to hedge interest and exchange rate movements in the government's foreign currency assets. The difference between these two is called the "net" or "unhedged" reserves. This represents the portion of the government's foreign currency assets that is not hedged in any way.

The gross reserves assets are volatile over the course of the year. The general volatility in reserves can be caused by a number of factors including:

- Volatility in foreign currency markets
- Volatility in the US\$ value of gold

The changes in the UK foreign currency assets and liabilities over the last twelve months can be seen in the table below.

Table B.1: End-month holdings of UK official reserve assets and liabilities (market value, \$ million)

	UK Government			Bank of England		
	Assets	Liabilities	Net assets	Assets	Liabilities	Net assets
Aug-24	193,045	-99,901	93,144	35,545	-35,523	22.751
Sep-24	194,098	-98,820	95,278	32,756	-32,733	22.440
Oct-24	189,228	-94,896	94,332	32,431	-32,409	22.618
Nov-24	188,258	-94,905	93,353	34,544	-34,517	26.757
Dec-24	185,835	-93,744	92,091	33,285	-33,252	32.866

Feb-25	188,056	-93,206	94,849	35,820	-35,805	15.013
Mar-25	193,890	-94,650	99,240	32,659	-32,647	12.191
Apr-25	200,944	-97,590	103,355	35,057	-35,050	6.790
May-25	203,483	-100,501	102,982	38,049	-38,037	12.062
Jun-25	207,796	-103,593	104,204	41,763	-41,752	10.684
Jul-25	206,064	-102,766	103,298	43,261	-43,245	16.017

Purpose of the Statistical Release

The purpose of the Official Reserves Statistical Release is to inform the public, Parliament, international institutions and markets as to the position of the UK's foreign currency reserves and operations on a month-by-month basis.

It is published on the third working day following the end of each month in order to provide users with timely information on relevant data. Given this timescale, detailed commentary on monthly movements in the reserves (mainly resulting from volatility in foreign exchange markets and the value of gold) is not included; however the Release does include a more meaningful assessment of longer term trends and reports intervention operations. It also serves as a precursor to the more substantial reporting provided in the Exchange Equalisation Account annual accounts, which can be found on the Treasury website at: <https://www.gov.uk/government/organisations/hm-treasury/series/hmt-eea>.

Users of the Release can compare the latest information on the UK's Official Reserves across time, with other countries and with the underlying data published by the Bank of England.²⁵ It is also where users can see the size of any intervention operations undertaken. In addition the information presented assists users in understanding global capital flows and the UK's public sector finances. It provides data on one element of the financial account and International Investment Position of the UK's balance of payments, and on a financing item of the Central Government Net Cash Requirement, and on liquid assets that are netted off in the UK's Public Sector Net Debt.²⁶

Users may also wish to use these statistics to conduct research into the efficiency and effectiveness of reserves management. Additionally, as these statistics are, in the UK, one relatively small financing item of the Central Government Net Cash Requirement, they could be used in conjunction with other information on financing items published in the Public Sector Finances Release to assess the capacity of the government to service and repay its debt, a key element in determining sovereign risk and risk premia.²⁷ The government's Statistical Releases, including this one, and financial reports, contain relevant information for this analysis. Finally, as the statistics provide data on one element of the financial account and the International Investment Position of the UK's balance of payments, these statistics could be used in conjunction with other statistics published by the ONS to inform users' understanding of these accounts of the Balance of Payments.

Users are likely to include UK and foreign research bodies and financial institutions, academics, foreign governments, credit rating agencies, news media organisations, and the general public.

²⁵ Underlying data released by the Bank of England is available at: <https://www.bankofengland.co.uk/statistics/uk-international-reserves/2025/july-2025>

²⁶ Data on the UK's balance of payments is published by the ONS at: <https://www.ons.gov.uk/economy/nationalaccounts/balanceofpayments>.

²⁷ Data on the UK's public sector finance is released by the ONS at: <https://www.ons.gov.uk/economy/governmentpublicsectorandtaxes/publicsectorfinance>.

Monthly data are published in accordance with the IMF International Reserves Template, based on more detailed information published by the Bank

Since July 2000, the UK government has published reserves data in this monthly press notice in accordance with the IMF/G10's International Reserves Template, which is based on the Special Data Dissemination Standard (SDDS).²⁸ This measures the value of the UK's foreign currency and gold assets, liabilities and derivatives on a marked-to-market basis (that is, using current and market valuations).²⁹

The format of this information is aligned with the information published by the Bank of England in their reserves data statistical release, which uses the same IMF template. The IMF has published the *International Reserves and Foreign Currency Liquidity, Guidelines for a Data Template*, which can be found at: <https://data.imf.org/?sk=2DFB3380-3603-4D2C-90BE-A04D8BBCE237>

Data on many other countries' international reserves and foreign currency liquidity are also available on the IMF's website:

<http://www.imf.org/external/np/sta/ir/IRProcessWeb/colist.aspx>

This press notice uses data compiled by the Bank, which the Bank also uses for their own statistical release. The Bank's statistical release includes further detailed information, including the composition of both the UK government's and the Bank of England's foreign currency assets and liabilities.

Data quality, reconciliation with published annual accounts, and revision policy

This release uses the latest financial management data compiled by the Bank of England, as explained above. The data are validated by the Bank under a well-established system of reporting and associated controls, including management review, reconciliation to source data and balance sheet attestation, all of which are subject to independent audit. The annual data are also reconciled with the audited account of the EEA's balance sheet assets and liabilities, in an annual reconciliation statement, which is published in the EEA annual accounts.³⁰

The Bank does very occasionally revise the data, and if they do this, then they provide explanations on their statistical release website. Revised data are clearly indicated in their time series. In line with HM Treasury's statistical revisions policy (see:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/191042/statistics_revisions_policy.pdf) they would also be highlighted in this release.

²⁸ The IMF SDDS was established in 1996 to guide countries that have, or that might seek, access to international capital markets in the dissemination of economic and financial data to the public.

²⁹ Past data can be revised; the most up to date historical data for end-July 1999 onwards are available on the Bank of England website at: <https://www.bankofengland.co.uk/statistics/uk-international-reserves/2025/july-2025>

³⁰ Under the Finance Act 2000 (section 4 of the EEA Act 1979) the Treasury has a statutory obligation to publish a full set of annual financial accounts for the EEA. The accounts are audited by the National Audit Office and laid before both Houses of Parliament. The EEA annual accounts are available at: <https://www.gov.uk/government/organisations/hm-treasury/series/hmt-eea>.

A National Statistics publication

National Statistics are quantitative information produced by the government and its nominated agents, which are produced and published in accordance with the provisions set out in the Statistics and Registration Service Act 2007 and in supplementary statistical legislation. National Statistics are assessed by the UK Statistics Authority to ensure that they are compliant with the high professional standards set out in the UK Statistics Authority's Code for Practice for Official Statistics. National Statistics undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

For more information about HM Treasury statistics visit:

<https://www.gov.uk/government/statistics?departments%5B%5D=hm-treasury>

Next publication date

The figures for August 2025 are due for publication on 3rd September 2025.

Feedback and enquiries

We would welcome enquiries, comments and feedback from users of these statistics on any changes that users would like to see. Please send all comments or enquiries on our statistics to:
