

Chapter 27    Appendix P: Calibration weighting control totals: CASI sample

This table contains the weights pre- and post-calibration by the variables used to calibrate, for the CASI sample. More details can be found in [Chapter 5 - Weighting](#)

Some shorthand is used in this table: [x] denotes no data present.

ies	CASI respondents weighted by wt_int (n)	CASI respondents weighted by wt_int	Non-presence (NP) weights (n)	Non-presence (NP) weights	Selection and Non-presence (NP) weights (n)	Selection and Non-presence (NP) weights	Final calibrated and scaled weights (n)	Final calibrated and scaled weights	Population estimates (n)	Population estimates
