

1. No:.....

EXPORT OF OVINE AND CAPRINE SEMEN TO KENYA

NOTES FOR GUIDANCE FOR OFFICIAL VETERINARIANS AND EXPORTERS

IMPORTANT

These notes provide guidance to Official Veterinarians (OV's) and exporters and should have been issued to you together with export certificate 6528EHC. These Notes for Guidance (NFG) are not intended to operate as a standalone document but in conjunction with certificate 6528EHC.

Exporters are strongly advised to verify the requirements of the importing country by contacting the veterinary authorities, or their representatives in the UK, in advance of each consignment.

1. Scope of the Certificate

Export health certificate 6528EHC may be used for the export of ovine and caprine semen from the United Kingdom to Kenya.

2. Certification by an Official Veterinarian (OV)

This certificate may be signed by an Official Veterinarian (OV) appointed by the Department for Environment, Food and Rural Affairs, the Scottish Government, Welsh Government or the Department of Agriculture, Environment and Rural Affairs (DAERA) Northern Ireland, who is on the appropriate panel for export purposes or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

Certified Copy Requirements - England, Wales and Scotland

Guidance concerning return of certified copies of EHCs has changed and only specific certified copies are required to be returned to the APHA. Certifying OVs must return a certified copy of EHCs only for the following EHC types:

- if the exported commodity is cattle, pigs, sheep, goats or camelids;
- if the certificate was applied for manually and the application documents have been emailed to APHA and not applied for via the Exports Health Certificates Online (EHCO) system.

Certified copies should be emailed on the day of signature to the Centre for International Trade Carlisle (CITC) at the following address: certifiedcopies@apha.gov.uk.

For certificates that have been issued to the Certifying OV via the EHCO system, the Certifying OV must complete the certifier portal with the status of the certificate and the date of signature.

A copy of all EHCs and supporting documentation certified must be retained for two years.

Certifying OVs are not required to return certified copies of other EHCs issued, however CITC may request certified copies of EHCs and supporting documentation in order to complete Quality Assurance checks or if an issue arises with the consignment after certification.

DAERA Export Health Certificates: Provision of certified copies

Authorised Private Veterinary Practitioners (aPVPs) certifying DECOL (the online application system for Third Country Export Health Certificates 6528NFG (Revised 29/08/2025))

in Northern Ireland) produced Export Health Certificates must return a legible, scanned copy of the final EHC to the relevant DAERA Processing Office within 1 working day of signing.

Good quality photographic copies will be accepted by the department, where obtaining a scanned copy is not feasible - for example, where 'on site' certification is undertaken and scanning facilities are not available.

For record purposes, a copy of the final Export Health Certificate and associated Support documents should be retained by the aPVP for a period of 2 years from the date of certification.

The Department will carry out periodic audits of all aspects of export certification to ensure that a high standard of certification is being maintained.

3. Schedules

Paragraph I refers: A separate schedule may be used to identify the animals certified. This schedule must contain the same information as that required in paragraph I and paragraph I must be annotated "See attached schedule". Each page of the schedule must bear a page number and the health certificate reference number and must be signed, dated and stamped by the Official Veterinarian (OV).

The schedule must be stapled inside the health certificate and the OV should "fan" and stamp over the pages of the schedule and certificate. The top stapled corner of the schedule and certificate should be folded over and stamped also. Any blank spaces in the schedule or in paragraph I must be deleted with diagonal lines.

4. Approval of the Semen Production Centre

Paragraphs II b) and IV 1.1 refer: The centre must be approved under Directive 92/65 and listed on gov.uk (in GB) or approved under Regulation (EU) 2020/686 and listed on TRACES/DAERA website (in NI).

5. Import permit

Paragraph III.(d) refers: The import permit number should be given in the health certificate at paragraph III.(d).

6. Admission of animals to Centre

Paragraph IV 2.1 refers: Bespoke admission of animals is required for Kenya, as the assurances relating to the health status of the flocks/herds of origin are over and above those required in Directive 92/65/EC (e.g. for paratuberculosis, freedom is required for 2 years, as opposed to 1 year). OVs may certify this paragraph based on personal knowledge of the flock(s)/herd(s) of origin of the animals or supporting certification from a private veterinarian with knowledge of the flocks(s)/herd(s) of origin. For assurances on scrapie, 6528SPT must be completed by the centre veterinarian and APHA/DAERA veterinarian.

Paragraph IV 2.3 refers: Negative comparative intradermal tuberculin test for tuberculosis in caprine animals means a reaction to bovine PPD tuberculin which is less than the reaction to avian PPD tuberculin when the test is read at 72 hours, the test being performed by injecting bovine and avian PPD tuberculins into the skin at the posterior aspect of the base of the right and left ear.

Paratuberculosis - Negative CFT means a titre less than 1/8.

7. Laboratory tests

The OV must ensure that any laboratory carrying out pre-export testing is officially approved for this purpose by Defra or DARD.

In Great Britain (England, Wales and Scotland), the majority of pre-export testing is carried out at the Veterinary Laboratories Agency (VLA) Laboratory, New Haw, Weybridge, Addlestone, Surrey, KT15 3NB, (Tel: 01932 341111). Some tests are carried out at VLA Lasswade, Pentlands Science Park, Bush Loan, Penicuik, Midlothian, EH26 0PZ, (Tel: 0131 445 6169). Certain specialist tests are carried out at regional VLA laboratories.

In Northern Ireland, the majority of pre-export testing is carried out at the Veterinary Sciences Division (VSD) Laboratory, Stormont, Belfast, BT4 3SD (tel: 028 9052 0011).

For operational reasons however, the laboratories involved may change periodically. Accordingly, the OV is advised to check with the VLA or VSD to determine to which laboratories samples should be sent for testing. Samples should always be sent to the laboratory concerned sufficiently in advance of the export date to enable the tests to be carried out and reported. If in doubt as to the procedures for collection, the requirement for transport medium if any, dispatch of samples and the length of time a test is likely to take, the OV should seek the advice of the relevant laboratory.

8. Sealing of the transport container

Paragraphs I.(c) and IV.5 refer: The semen must be secured within a cryogenic container by a tamperproof seal applied in such a way that the container cannot be opened without breaking the seal. The number on the seal must be entered at paragraph I.(c) on the health certificate.

If it is necessary to top up the container, the additional liquid nitrogen used must meet the requirements of the certificate (see paragraph IV.5.4). Topping up should be done in the presence of an Official Veterinarian (OV) who must apply a new tamperproof seal. The OV must endorse paragraph I.(c) on the health certificate with the new seal number, giving name and signature and dating and stamping the endorsement in the margin of the certificate in any ink colour **other than black**.

9. Notifiable disease clearance (form 618NDC)

Paragraphs IV.6.1 and IV.7 refer: OVs may certify paragraph IV.7 on behalf of the Department provided written authority to do so has been obtained on form 618NDC from the local Animal Health Divisional Office (or equivalent in Northern Ireland).

10. Disclaimer

This certificate is provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country.

If these do not match, the exporter should contact the APHA Centre for International Trade at Carlisle, via the link below:
<https://www.gov.uk/government/organisations/animal-and-plant-health-agency/about/access-and-opening#centre-for-international-trade-carlisle>
or, in the case of Northern Ireland, DAERA at Dundonald House, Belfast.
