

**Department for Environment, Food and Rural Affairs**

# **Export of egg products not intended for human consumption that could be used as feed material, intended for dispatch to or for transit through the European Union or Northern Ireland**

**September 2025**

## **Contents**

1. Applicable Legislation
2. Scope of the Certificate
3. Certification by an Official Veterinarian (OV)
  - Part I:** Details of the Consignment
  - Part II:** Certification
4. Collection of evidence
5. Consignments or parts of the consignment originating from NI, EU Member States or from Third countries (Triangular Trade)
6. GB Approved Establishments to export to the EU
7. Certified Copies of Export Health Certificates (EHC)
8. Legal Statement
9. Disclaimer

**No: 8304 NFG**

**For export of egg products not intended for human consumption that could use used as feed, intended for dispatch to or for transit through the European Union or NI**

**NOTES FOR GUIDANCE (NFG) FOR THE CERTIFYING OV, CERTIFICATION SUPPORT OFFICER AND EXPORTER**

## **1. APPLICABLE LEGISLATION**

[Council Regulation \(EC\) No 1069/2009](#) and [Commission \(EU\) Regulation 142/2011](#) (as amended)

Any other EU legislation referenced in the certificate must be complied with and can be accessed on the following link:

<https://eur-lex.europa.eu/homepage.html>

### **IMPORTANT**

**These notes provide guidance to Certifying Officers (CO) and exporters. The NFG should have been issued to you together with the relevant export certificate applicable for exports of egg products not intended for human consumption that could use used as feed, intended for dispatch to or transit through the EU or NI. The NFG should not be read as a standalone document but in conjunction with the veterinary certificate.**

**We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in GB, in advance of each consignment.**

***[Please note, policies are being reviewed. NFG will be further amended to provide specific guidance. Traders should look at NFGs regularly for any updates]***

## **2. SCOPE OF THE CERTIFICATE**

This Model 8304 veterinary certificate maybe used for the export of egg products not intended for human consumption that could use used as feed, intended for dispatch to or transit through the EU or NI, in accordance with the relevant requirements described in Regulation (EU) No 142/2011.

Only Category 3 materials referred to in Article 10(e), (f) and (k)(ii) of Regulation (EC) No 1069/2009 may be used.

## **3. CERTIFICATION BY AN OV**

In **England, Scotland and Wales**, this certificate must be signed by a Government Veterinary Officer or by an OV appointed by APHA on behalf of Ministers in Defra, the Scottish Government or the Welsh Government and who hold the appropriate Official Controls Qualification (Veterinary) (OCQ (V)) authorisation.

OVs must sign and stamp, with the OV stamp, the health certificate in ink of a different colour to that of the printing of the EHC. There is no requirement to sign and stamp in a specific colour.

The OV should keep a copy of the signed certificate and any supporting documents for at least two years after signature or receipt/dispatch of the consignment, whichever is later. These can be electronic copies.

### **EHC in foreign languages of the EU Member States (MSs).**

EHC should be in English and the foreign languages of the Border Control Post (BCP) of entry in the EU, as well as in the language of the EU MS of destination if this is a different country from the point of entry to the EU. The required EHC must accompany the consignment.

Listing of the EU MS BCPs can be found here:

[https://ec.europa.eu/food/animals/vet-border-control/bip-contacts\\_en](https://ec.europa.eu/food/animals/vet-border-control/bip-contacts_en)

The foreign language certificate as received from the APHA Centre for International Trade at Carlisle or via the Export Health Certificates on-line system (EHCO) and bearing the same unique reference number as the English certificate, should be considered an official and accurate translation of the English, as published in EU legislation.

The (sub-) paragraphs / options and how they are numbered and formatted is identical in the English and foreign language editions and to the legislation published by the EU Commission. Therefore, when the same phrases/sentences in the foreign language versions as in the English version are struck through, both versions can and must be signed (as opposed to being initialled) by the OV as a genuine and properly authorised translation of the English.

This also applies to any instructions in the guidance notes to strike out certain paragraphs or to certify statements that the country is free of certain notifiable diseases etc.

Additional information can be found in the OV Instructions on page 23: [Official Veterinarian Training](#)

### **Signing, stamping and pagination**

The foreign language versions and any schedules (if any) may be stapled to the English version but doing so and then fan stamping the multiple sheets is not enough to create one indivisible single document according to the EU Commission.

Therefore, each page (including schedules) should be individually signed and stamped and bear the reference number of the certificate. The pages comprising the complete document should be sequentially numbered so they are part of a finite sequence which covers the English, foreign language version/s and any schedule pages.

For example, if the certificate consists of four A4 pages printed back-to-back on two sheets of A4 paper with a schedule that is three A4 pages long, all 11 pages must be stamped and **signed** (as above) and numbered 1/11 to 11/11.

COs will have to make handwritten corrections to page numbering as may be required. E.g. 1/4 to 4/4 (if present) on the foreign language parts in the example given above will need to be crossed out and the 1/11 to 11/11 entered.

The EHC accompanying the consignment will then comprise the original English EHC and any required additional foreign languages. These should be arranged in order with the English version on the top, followed by the foreign languages versions, and finally the pages of the schedule (if any) at the bottom.

As per general guidance for certifiers on APHA's Vet Gateway, any handwritten corrections or permitted deletions to a certificate should be stamped and **initialled**. This includes the deletion of optional statements in Part II of the certificate and alterations to content in Part I. The same applies if a pre-populated text in a box in Part I of the EHC needs to be amended. (E.g. if Box I.7 which is pre-populated as 'United Kingdom' 'GB', needs to be amended for triangular trade where third country origin 'Products Of Animal Origin' are being certified in the original third country packaging with the original third country Identification Marks, in which case the country of origin will be the third country in question and not the United Kingdom). Please follow the guidance on corrections in the link below:

[Instruction: Official Veterinarian Training](#)

We advise that individual stamping and initialling of diagonal lines drawn through blank boxes in Part I is not necessary. This is to reduce excessive stamping on the certificate. However, we are aware that some BCPs advise otherwise and request stamping and initialling of manually crossed out blank boxes in Part I of the certificate. In such cases OV should conform to the BCPs request to facilitate the clearance of the goods.

You can find further information on Export Health Certificates (EHC) Online Guidance for Certifiers in the link below:

[Using export health certificate \(EHC\) online: certifier guidance - GOV.UK](#)

You can also contact APHA's Centre for International Trade (CIT) on 03000 200 301.

UK approved establishments will be uploaded to [Europa](#) website in due course, until the establishments are in Europa website you can find the list of UK approved establishments in the link below:

<https://www.gov.uk/government/publications/businesses-approved-to-export-to-the-eu>

Please check the guidance on completion of Part I of the EHC at the bottom of the EHC and in the links provided in the NFG. For completion of Box I.8 - Region of Origin Code, if applicable; the territory code should be as listed in the relevant legislation that is provided under the notes at the bottom of the EHC. This is only for species or products affected by regionalisation measures or by the setting up of approved zones in accordance with a

European Community Decision. The approved regions or zones must be indicated as described in the Official Journal of the EU.

## **PART I: DETAILS OF THE CONSIGNMENT**

Please complete all the boxes in Part I of the certificate.

The Harmonised System (HS) Code is a commodity classification system used as a basis for customs tariffs and for international trade statistics.

**It is the exporter's responsibility to ensure that the HS code is entered correctly and accurately reflects the products being consigned.**

Further information on HS Codes can be found online at:

<https://www.gov.uk/trade-tariff/sections> and <http://madb.europa.eu/madb/euTariffs.htm>

## **PART II: CERTIFICATION**

### **Animal Health Attestation**

The OV signing the certificate must have read and understood Regulations (EC) No 1069/2009 (in particular, Article 10), and Commission Regulation (EU) No 142/2011, in particular Chapter I, of Annex XIV and must ensure that the products meet the requirements of the certificate. The starting material used must be Category 3 as specified in the Scope Section 2.

The following specific guidance in conjunction with the RCVS Principles of Certification may be followed: **The OV must have familiarity with sourcing, procurement, segregation, processing, and handling and storage arrangements in place at the establishment and ensure that the consignment meets the conditions required in the certificate. Where the OV is required to certify conditions outside of their personal knowledge, they must request and be provided with appropriate supporting documentation from another veterinarian (if appropriate) and/or the exporter.**

**II.2** This can be certified based on a written declaration from the exporter/plant operator confirming that the egg products are not intended for human consumption.

**II.3** The OV must establish that the egg product plant is approved, verified and supervised by the competent authority for the production of egg products for human consumption or as animal by-products. This can be established as detailed in Section 7 Approved establishments.

### **II.4 Starting/source material**

The starting material used must be Category 3. The correct category or categories of ABP must be selected, and the others deleted as instructed.

OVs should develop due familiarity with the sourcing, procurement, segregation, processing, handling and storage arrangements in place at the establishment.

This should be supported by physical inspection and by examination of relevant documentation or other records including commercial documentation, veterinary statements and valid written declarations-confirming source material content.

## **II.5 Processing method**

Egg products must have been subjected to processing in accordance with either:

(a) a processing method as laid out in Chapter III of Annex IV to Regulation (EU) No 142/2011, in order to kill pathogenic agents, The appropriate method ( 1-5, 7) as detailed in the establishment's approval document other document written procedure) should be inserted.

(b) to a method and parameters which ensure that the products comply with the microbiological standards set out in Chapter I of Annex X to Regulation (EU) No 142/2011, in order to kill pathogenic agents, as detailed in the establishments approval document. The microbiological standards referred to are those stated in II.6 and Footnote (5) of the certificate, or

(c) in accordance Section X, Chapters I and II of Annex III to Regulation (EC) No 853/2004. This relates to the egg products produced in a plant approved for and in compliance with the requirements for the production of materials for human consumption.

The correct processing method must be selected and the others deleted.

Establishments approved to manufacture and export egg products to the EU are required to apply at least one of the listed processing standards. The OV should develop due familiarity with approval and processing arrangements at the establishment and examine relevant records. They should obtain a written declaration from the exporter /plant operator confirming that the processing method has been applied.

## **II.6 Bacteriological testing**

The OV must establish that the consignment described in the certificate was analysed through a random sample, taken immediately prior to dispatch and found it to comply with the conditions detailed at II.6 and footnote (5).

This may be certified on the basis of the OV's knowledge of processing arrangements at the processing establishment and examination of relevant records and in particular laboratory results. The consignment should remain identified and accessible until these results are available, and the certificate signed and the consignment dispatched.

## **II.7 Residue check guarantees**

There is a UK national residue surveillance program, from the Animal and Animal Products (Examination for Residues and Maximum Residue Limits) Regulations 1997, that commits to the legislative requirements of Directive Nos 96/23 (EC), 96/22 (EC), and 470/2009 (EC) legislation concerning residue testing of products of animal origin. The residues tested in the program are listed in Annex I and II of Directive No 96/23 (EC), which includes veterinary medical products, unauthorised substances and environmental contaminants. The results of the statutory surveillance program can be accessed on the link below:

<https://www.gov.uk/government/collections/residues-statutory-and-non-statutory-surveillance-results>

The EHC residue testing requirements can be certified based on evidence that the egg products were produced in a system in compliance with the legislation on the use of veterinary medical products, unauthorised substances and environmental contaminants and in compliance with the national surveillance program, which complies with the relevant EU legislation.

## **II.8 Packaging**

The OV must establish that the conditions in relation to hygiene of the packaging or transport containers and labelling are met through knowledge of procedures in place at the establishment supported by visual inspection, inspection of records and valid declarations by the plant operator. The non-applicable option should be deleted.

Details of disinfectants approved for this purpose can be accessed via:

[http://disinfectants.defra.gov.uk/DisinfectantsExternal/Default.aspx?Module=ApprovalsList\\_Sl](http://disinfectants.defra.gov.uk/DisinfectantsExternal/Default.aspx?Module=ApprovalsList_Sl) (as amended)

The OV should ensure appropriate labelling indicating “NOT FOR HUMAN or ANIMAL CONSUMPTION” is in place.

## **II.9 Storage**

The OV must establish that the condition in relation to enclosed storage is met through knowledge of procedures in place at the establishment, visual inspection as supported by valid written declaration from the exporter/plant operator.

## **II.10 Precautions to avoid contamination with pathogens**

The OV must establish that processes are in place to prevent contamination by pathogenic agents after treatment through familiarity with processing, handling and storage

arrangements at the establishments, physical inspection and should obtain a relevant written declaration from the plant operator confirming these measures have been taken.

#### **4. COLLECTION OF EVIDENCE**

**Personnel may be authorised to collect evidence which may be used to support veterinary certification.** In GB, the Certification Support Officer (CSO) role has been developed by APHA.

CSOs can be utilised by OV's for gathering evidence relating to this certificate. The CSOs must be authorised by APHA and they must hold the appropriate Official Controls Qualification (Animal Health Professional) (OCQ(AHP)-CSO) qualification.

The OV must direct the CSO as to how and where any necessary evidence relevant to the requirements of the EHC should be obtained. CSOs may not carry out any functions that require the exercise of veterinary judgement and are restricted to the execution of administrative checks.

They may only carry out such inspections, factual verification and evidence collection as specified by the directing OV, who remains responsible for the certification of the product. CSOs are not authorised to sign an EHC in their own right or on behalf of an OV.

Any documentary evidence collected by the CSO must be stamped, signed and dated by the CSO, before being submitted by them as supporting evidence to the OV. It is required that the OV is familiar with the product process and evidence required to start with, before directing the CSO to provide future evidence on an ongoing basis.

Additional guidance and principles of implementation are provided in the OV Instructions [Export document](#) section of the APHA [Official Veterinarian Training](#).

#### **5. CONSIGNMENTS OR PARTS OF THE CONSIGNMENT ORIGINATING FROM, NI, EU MEMBER STATES OR FROM THIRD COUNTRIES (TRIANGULAR TRADE)**

This section of the guidance applies to exports to the EU and movements from GB to NI but does not apply to movements of retail products to Northern Ireland under the Northern Ireland Retail Movement Scheme (NIRMS).

An ABP consignment for export from GB can contain animal products that originate from NI, EU and third countries, only if those products have undergone further processing in GB. Processing should be understood in the context of Commission Regulation (EU) No 142/2011 and is different than the definition that applies in the context of products of animal origin for human consumption.

ABP imported into GB, which is only unloaded, stored, and reloaded, or which is only rewrapped in GB, cannot be re-exported to the EU or moved to NI except under the NIRMS or under the customs transit procedure (see below). Guidance on triangular trade can be found here: [Triangular Trade Briefing Note](#)

To avoid the restriction applicable to triangular trade, businesses can make use of the customs transit procedure for goods from third countries landed in GB, to move through GB, directly to NI. Consignments being moved under the customs transit procedure are not subject to triangular trade rules. Guidance on the transit procedure can be found in the triangular trade briefing note above.

## **6. GB APPROVED ESTABLISHMENTS TO EXPORT TO THE EU**

The exporting establishment must be authorised and listed by the GB as a 'GB approved establishment' for ABP not for human consumption. A list of approved establishments can be found on the European Commission's list of approved establishments' link below:

[https://ec.europa.eu/food/safety/international\\_affairs/trade/non-eu-countries\\_en](https://ec.europa.eu/food/safety/international_affairs/trade/non-eu-countries_en)

Please note that the list is updated regularly and ONLY establishments on the list are approved to export to the EU and does not include establishments with pending applications for approval/registration.

If the final product contains animal products from other establishments, or products were previously processed in different establishments in the production chain, then these establishments should also be listed on the EU website as GB approved establishments.

For approved establishments in NI the "EC" suffix which is present in the health/ID mark of approved food establishments, should not be included when referring to establishment approval numbers in the certificate. This may also be relevant to certain ABP consignments – e.g. where the ABP is generated at an approved slaughterhouse without separate ABP approval.

## **7. CERTIFIED COPIES OF EHCs**

When completing export certification, the CO and, if applicable, FCCO must make photocopies of, or scan and save all documents they certify. OVs must retain copies of certification documents in accordance with RCVS Certification principles:

<https://www.rcvs.org.uk/setting-standards/advice-and-guidance/code-of-professional-conduct-for-veterinary-surgeons/supporting-guidance/certification/>

COs must retain copies of all export documentation for a period of two years. A certified copy of this EHC does not need to be returned to the APHA CITC. For the purposes of completing routine Quality Assurance checks on export certification, CITC may request certified copies of certification from COs.

Further details on Post Certifying Procedures, 'certified copies' of certification and the types of documents that should be retained by COs can be found on the OV Instruction Exports [document](#) of the APHA Official Veterinarian Training.

## **8. LEGAL STATEMENT**

References in this guidance to “assimilated EU Regulation” should be interpreted as references to assimilated law, as defined under the European Union (Withdrawal) Act 2018.

## **9. DISCLAIMER**

This certificate is provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter’s responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact APHA in Carlisle, via the link below:
