

## UNLOCKING SPACE FOR INVESTMENT

# GROWTH HUB

**The UK Space Agency is launching a freely available resource centre that provides practical toolkits, insights and videos to strengthen investor readiness and help growth-stage businesses to scale.**

The UK space sector is growing in scale and ambition, generating £16.4 billion annually and supporting 45,000 jobs. While seed funding and grants have built a strong pipeline of ventures, many companies struggle to convert technical excellence into commercial traction at the scale investors require. The Growth Hub brings together the practical tools and insights businesses need to prepare for investment and position themselves for growth.

### What will it involve?

The Growth Hub brings together short, accessible learning modules and practical resources available on demand. Hosted on GOV.UK and the UK Space Agency YouTube channel, it features videos, presentations, FAQs, case studies, and checklists designed to help businesses overcome common investor challenges. Companies will also benefit from insights shared directly by investors and entrepreneurs through industry soundbites, making the Growth Hub a central resource for strengthening investor readiness.

### Who should use it?

The Growth Hub is designed for founders and leadership teams preparing for Series A and beyond, including CEOs building their investment story, CFOs strengthening financial models and governance, and CTOs demonstrating the defensibility of their technology. It is open to all UK space businesses looking to improve investor readiness and scale with confidence.

### When does it launch?

**Available from October 2025.**

Hosted on GOV.UK and UK Space Agency YouTube channel.

Free to access anytime, with no application required.
