Authorized Amendment

Summary / Overview of the amendment to explain/ensure that the reader understands: the rationale for the amendment; the major changes; and, importantly, the full context (including desired outcome) of the amendment.

The Regulated Community is reminded to check this amendment against any applicable AAMC, Waivers or Exemptions to ensure their ongoing validity.

- Formalisation of terminology regarding misfires and hang-ups; changed to 'failure to release or launch', in common with the Performance Failure definitions in DSA 03 OME Part 2, the safety manual for the use of ordnance, munitions and explosives.

- Addition of ACAWEWROs to BRd 1043 as a reference for guidance on off range weapons training and demos. The latter is pertinent to Naval surface target towing, while ACAWEWROs covers air to air, air to sea and aerial target towing.
- Clarification of the intent behind the referencing of STANAG 3564. The STANAG provides rules for live air weapons demonstrations, so the reference to training is removed and clarity provided that para 14 is about positive target ID.
- Public link to STANAG 3564 provided in the footnotes to remove the need for CFAOS Orgs to contact the MAA for access to the document.
