Dear Nick,

**ENVIRONMENTAL PERMITTING ( England and Wales ) REGULATIONS 2007**  
**Transfer Station, Wardle Industrial Estate EAWML 50066/MO1**

I refer to Jan Edwards letter dated 8<sup>th</sup> October 2009.

The timescale indicated in the letter to erect signs and label the waste storage bays is acceptable.

In addition, the period allocated to undertake repairs to the concrete surfaces is also satisfactory. Please can you forward a programme of works by the end of October 2009 detailing the phased approach to restore the cracked surfaces.

With reference to the suppression of dust at the rear of the site ( the exempt activities ), can you please provide proposals on the measures to control dust emissions. This was requested in my letter ref.WD/RA/50066/36.09 following an inspection of your site on the 27<sup>th</sup> August 2009.

I am now able to confirm that your annual waste input of 70,915.38 tonnes complies with permit condition 1.2.2 and that you have not breached the 75,000 tonnes limit.

Can you please ensure that future waste returns record the waste accepted on site for the permitted operations. There was initial concern that you had exceeded the annual tonnage until it was identified that the spoil and hardcore material brought on site for feed stock for the washing plant had been included. If you feel that you need to take on more material then you will need to apply for a variation on the permit.

I trust that the updated working plan will be submitted within the next couple of days as the report was originally due on the 1<sup>st</sup> October 2009.

If you require any clarification of the above, please do not hesitate to contact me on the number below.

Yours faithfully,

**Rachel Argyros**
