Your ref:

Dear Rachel,

ENVIRONMENTAL PERMIT EAWML/50066
NICK BROOKES T/A NICK BROOKES DEMOLITION AND WASTE DISPOSAL
WARDLE INDUSTRIAL ESTATE, GREEN LANE, WARDLE, CHESHIRE CW5 6DB

I am writing in response to your e-mail correspondence of 8th October 2009.

- I can confirm that our client proposes to erect the signs as requested on the waste storage bays within three months from the date of this letter.
- Within twelve months, repairs to the concrete surfaces within the permitted area will be completed. The work will take place in three phases. A programme of works will be forwarded to you by end of October 2009.
- The aggregate washing plant will continue to operate under Paragraph 13 waste exemption. This will be reviewed next Spring following any relevant changes brought in under the proposed EA/DEFRA Waste Exemption Review.
- Nick Brookes is currently looking into the DOC transfer note documentation in view of the Aggregates Quality Protocol.
- Proposals on measures to control dust emissions from the rear of the site (the exempt activities) will be forwarded to you in a separate response, either direct from Nick Brookes or myself if instructed, within the next four weeks.
- A Quality Management System for the washing plant will be developed and again forwarded to you under separate correspondence.

Do not hesitate to contact me if you require any further clarification or information in the meantime.

Yours sincerely,

Jan Edwards
Senior Consultant
