Dear sirs

I wish to object to the above planning application relating to the installation of a multitude of cctv cameras and their supporting structures. I cannot understand why this draconian measure is required to protect what is an essentially "a playing field" which was for the enjoyment the general public a joint usage with a school. The scheme appears to be in excess of that employed at/in the Louvre (Paris). I am under the impression that the site will not house any valuable equipment or buildings.

My concerns are as follows

1. Will the field of view of the cameras be restricted to the school playing areas or cover the whole site (thus infringing on the public's right of privacy).
2. Any information obtained through the security installation must be subject to the data protection act.
3. Who will be responsible for monitoring / controlling the surveillance devices and will the public have unrestricted access to the recorded data.
4. Will all public areas including public right of ways be protected (for the public good).
5. Will the restricted public areas be protected against vehicles used in the maintenance of the security system.
6. Trees etc, to be protected against any alteration or change to enhance the cctv cameras field of view.
