Introduction	2
Review of financial performance of NHS providers.....	5
Statement of accounting officer's responsibilities and accountability framework	12
Annual governance statement	15
The Certificate and Report of the Comptroller and Auditor General to the Houses of Parliament.....	37
Consolidated accounts.....	43

Introduction

This document presents the results of all NHS trusts and NHS foundation trusts (termed 'providers') in England. The Department of Health and Social Care (DHSC) uses the provider sub-consolidation as part of the DHSC group accounts. We are very grateful to NHS providers for their co-operation in reporting their data to us.

These accounts are presented separately from those of NHS England as NHS England is not the parent body of NHS trusts and NHS foundation trusts.

The introduction describes the legal requirements for NHS trust and NHS foundation trust accounts and organisational changes in the provider sector in 2023/24 and 2024/25.

NHS trusts

Paragraph 11A(3) of Schedule 4 of the National Health Service Act 2006 (the 2006 Act) (as inserted by Section 87 of the Health and Care Act 2022) requires each NHS trust to prepare annual accounts for each financial year ending 31 March. These annual accounts must be audited by auditors appointed by the NHS trust.

NHS trusts that cease to exist as separate legal entities during the year (including on authorisation as an NHS foundation trust) prepare accounts for their final period as directed by the Secretary of State and have them audited.

NHS foundation trusts

Paragraph 25 of Schedule 7 to the 2006 Act (as amended by paragraph 31(3) of Schedule 5 to the Health and Care Act 2022) requires each NHS foundation trust to prepare annual accounts for the period beginning on the date it is authorised and ending the following 31 March and for each successive 12-month period. These annual accounts must be audited by auditors appointed by the NHS foundation trust's council of governors. The trust must lay a copy of the accounts, and any auditor's report on them, before Parliament and send them to NHS England.

NHS foundation trusts that cease to exist as separate legal entities before the end of the year continue to prepare accounts for their final period as directed by NHS England and have them audited, but do not present them to the council of governors.

Basis of preparation for consolidated NHS provider accounts

Section 65Z4 of the National Health Service Act 2006 (as inserted by Section 14 of the Health and Care Act 2022) requires NHS England to prepare, for each financial year, a set of accounts that consolidates the annual accounts of all NHS trusts and NHS foundation trusts. The Secretary of State has given directions on the content and form of these consolidated accounts and the principles to be applied in preparing them. The Comptroller and Auditor General is required to examine, certify and report on the consolidated NHS provider accounts and send a copy of any report to the Secretary of State and NHS England. NHS England is required to lay the consolidated provider accounts and the Comptroller and Auditor General's certificate and report before Parliament.

Organisation terminology

These consolidated accounts reference other documents issued by NHS England; in some cases these will have been issued by predecessor legal bodies. Documents issued by the NHS Trust Development Authority and Monitor before they were abolished are treated, from 1 July 2022, as having been issued by NHS England.

Changes in legal status of NHS providers

These consolidated NHS provider accounts incorporate the results of all NHS trusts and NHS foundation trusts. Entities for which legal status changed in 2023/24 or 2024/25 are as follows:

		NHS trusts	NHS FTs	All providers
1 April 2023	Number of providers at start of year	68	143	211
	Following dissolution of Yeovil District Hospital NHS Foundation Trust on acquisition by Somerset NHS Foundation Trust.			
1 July 2023	Dissolution of Southport and Ormskirk Hospital NHS Trust on acquisition by St Helens and Knowsley Hospital Services NHS Trust; entity renamed as Mersey and West Lancashire Teaching Hospitals NHS Trust.	-1		210
31 March 2024	Number of providers at end of year	67	143	210

		NHS trusts	NHS FTs	All providers
1 October 2024	Dissolution of Dudley Integrated Health and Care NHS Trust. This was following transfer of functions, net assets and staff to NHS Black Country Integrated Care Board, Black Country Healthcare NHS Foundation Trust and The Dudley Group NHS Foundation Trust	-1		-1
1 October 2024	Dissolution of Solent NHS Trust on acquisition by Southern Health NHS Foundation Trust; entity renamed as Hampshire and Isle of Wight Healthcare NHS Foundation Trust	-1		-1
1 November 2024	Dissolution of Barnet, Enfield and Haringey Mental Health NHS Trust on acquisition by Camden and Islington NHS Foundation Trust; entity renamed as North London NHS Foundation Trust	-1		-1
1 November 2024	Dissolution of Hounslow and Richmond Community Healthcare NHS Trust on acquisition by Kingston Hospital NHS Foundation Trust; entity renamed as Kingston and Richmond NHS Foundation Trust	-1		-1
1 January 2025	Dissolution of North Middlesex University Hospital NHS Trust on acquisition by Royal Free London NHS Foundation Trust.	-1		-1
31 March 2025	Number of providers at end of year	62	143	205

Review of financial performance of NHS providers

	2024/25	2023/24
Number of NHS providers in existence during the year	210	211
Deficit before impairments and transfers	£553 million	£2,312 million
Number of NHS providers recording a deficit before impairments, transfers and consolidation of charitable funds	112	136
Sector cash balance at year end	£9,977 million	£10,802 million

NHS providers have continued to focus on increasing productivity during 2024/25, delivering more care to patients with the resources available to them. In the face of unprecedented industrial action and a continued rise in demand for services, the provider sector improved operational performance in a number of key areas including elective waiting list reductions and cancer diagnosis, while still delivering an improved financial outturn.

NHS providers are not required to break even in every year. Providers are required to exercise their functions in line with the relevant plans of the integrated care board and system partners to achieve balance across the integrated care system as a whole, allowing for local allocation and prioritisation of available resources. The provider sector delivered a net deficit before impairments and gains and losses on transfers by absorption for the year ended 31 March 2025 of £553 million (2023/24: £2,312 million net deficit). 47% of this change in the outturn between the two years arises in operating surplus; 50% stems from a decrease in net finance costs as explained below. Providers held cash of £10.0 billion as at 31 March 2025 (31 March 2024: £10.8 billion).

The following table shows the profile of NHS providers that made up the sector during 2024/25. Providers are classified by their principal services but they may also provide other services. More analysis by trust type is set out in note 2 to the financial statements.

	Acute	Mental health	Ambulance	Specialist	Community	Charitable funds	Total
Number of providers	119	47	10	16	18	n/a	210
% of sector turnover	75%	15%	3%	4%	3%	<0.1%	100%
Surplus/(deficit) before impairments and transfers (£m)	(713)	53	17	92	13	(16)	(554)*
Number of providers reporting deficit before impairment and transfers	82	16	1	5	8	n/a	112

* The aggregate of the surplus/(deficit) from individual provider accounts does not equal the consolidated deficit in these accounts due to eliminating lease arrangements between NHS providers

The results for the year showed that, excluding the consolidation of charitable funds, 98 NHS providers (47%) (2023/24: 75 (36%)) delivered a surplus or broke even and 112 providers (53%) (2023/24: 136 (64%)) reported a deficit before impairments and transfers by absorption. The gross deficit of all providers in deficit decreased from £2,550 million in 2023/24 to £1,127 million in 2024/25. Of the 75 trusts that reported a surplus in 2023/24, 19 (25%) reported a deficit in 2024/25, while 42 (31%) of the 136 trusts reporting a deficit in 2023/24 improved to report a surplus in 2024/25.

Figure 1 shows the distribution of providers' surplus or deficit for 2024/25 and 2023/24. The two lines are plotted independently.

Figure 1: Surplus / (deficit) before impairments and absorption transfers

Where NHS charitable funds are locally deemed to be controlled by an NHS provider, the financial results of the charities are consolidated in these accounts. 40 NHS providers consolidated charitable funds, contributing an aggregate deficit of £16 million

(2023/24: 41 providers consolidated an £83 million deficit) and net assets of £247 million (31 March 2024: £264 million).

The NHS Oversight Framework sets out the principles for system accountability and improvement support where appropriate. Providers who were in segment 4 of the 2024/25 oversight framework were entered into the Recovery Support Programme (RSP). This programme provides focused and integrated support to systems as well as individual organisations. As at 31 March 2025, 17 providers reporting a deficit for the year were also receiving support in the RSP (31 March 2024: 17 providers). This support may not be finance related in all cases.

206 of 210 NHS provider audited accounts have been completed at the time of finalising these consolidated accounts on 3 November 2025 (2023/24: 206 of 211 at 1 November 2024). All 206 have unqualified true and fair audit opinions (2023/24: 206 unqualified). The results of four providers have been consolidated based on unaudited accounts information provided by the Trust; this is explained on page 23. Further information is provided in note 32 to these consolidated financial statements. The timeliness of local and national accounts is discussed further in the consolidated annual governance statement.

All providers have prepared financial statements on a going concern basis. HM Treasury's Financial Reporting Manual (FReM) defines that a public sector body will be a going concern where continuation of the provision of services is anticipated in the future. The same definition is applied by NHS providers in preparing their financial statements. The accounting policies contain our going concern assessment for these consolidated accounts.

Operating income

In the year to 31 March 2025, 210 NHS providers generated total operating revenues of £140.9 billion, an increase of £12.0 billion (9.3%); a real terms increase of 5.04% when adjusted for inflation¹. This increase of £12 billion includes a net 3.3% uplift to baseline contract prices with commissioners, including the impact of pay awards. Contract income was further increased by non-recurrent funding made available to systems to support financial recovery where their deficit plans for 2024/25 reflected an agreed level of financial improvement. The increase to employer contribution rates for the NHS pension scheme (a further 3.1% of pensionable pay compared to the prior year rate) was also funded by NHS England and is reflected in provider income.

¹ This is calculated with reference to the GDP deflator for 2024/25 published by HM Treasury on 30 June 2025

Operating expenditure

Total operating expenditure increased from £130.6 billion in 2023/24 to £142.2 billion in 2024/25, with key movements set out below. Excluding impairments, operating expenditure increased by £11.1 billion (8.7%) from £128.4 billion to £139.5 billion; a real terms increase of 4.40% when adjusted for inflation¹. The real terms increase in income being slightly higher than the real terms increase in expenditure in 2024/25 reverses the trend reported in the consolidated provider accounts in 2022/23 and 2023/24.

Figure 2: Expenditure bridge 2023/24 to 2024/25

Almost 74% (£8.3 billion) of the increase in operating expenditure related to employee costs, which is largely driven by the pay awards for 2024/25. Recruitment and retention challenges and industrial action have also driven up staff costs.

Half of the increase in supplies and services (£0.9 billion) relates to drug costs and is driven mainly by an increase in high cost drugs recharged to commissioners.

Impact of impairments

Impairments to the carrying value of assets are charged to operating surplus except where previous revaluation surpluses remain: in such cases a reduction is first recognised in the revaluation reserve to the extent of the remaining surplus for that asset. Where the impairments reflect a permanent loss, such as fire damage, they are always charged to expenditure. In 2024/25 net impairments charged to income and expenditure were £2,662 million (2023/24: £2,188 million). A further £1,065 million of net impairments was charged to reserves (2023/24: £1,451 million), reducing previously recognised revaluation surpluses. Providers also recognised revaluation surpluses directly in reserves totalling £1,007 million (2023/24: £1,197 million). This results in a net

downwards valuation movement on non-current assets of £2,720 million compared to a net downwards valuation movement of £2,442 million in 2023/24.

There were 182 NHS providers recording a net impairment within surplus/deficit in 2024/25 (2023/24: 170) while 14 providers recorded net reversals of impairments (2023/24: 24).

Of the £2,662 million of net impairments charged to income and expenditure, 86% arose from changes in market price (2023/24: 87%). These impairments reflect market conditions at the time of valuation and not a deterioration in the service potential of the asset. Further details of impairments are provided in note 10 to the accounts.

Net finance costs

Net finance costs in 2024/25 decreased by £879 million to £1,933 million. Average inflation during 2024/25 was lower than 2023/24, reducing the value of remeasurements on PFI and similar scheme liabilities recognised in finance costs by £1,008 million.

Working capital and borrowings

At 31 March 2025, NHS providers held cash and cash equivalents of £10.0 billion; equivalent to 4.0 weeks' operating costs in a sector with annual expenditure of £129.7 billion (31 March 2024: 4.7 weeks). This expenditure figure excludes the 9.4% (2023/24: 6.3%) additional NHS pension contribution made by NHS England. Revenue cash support may be provided by the Department of Health and Social Care to ensure essential day to day spend can be met thereby protecting the continuity of patient services. During 2024/25, 54 providers received public dividend capital to support short term revenue requirements, totalling a net £872 million (2023/24: 44 providers, £1,190 million). Providers in receipt of revenue support must work with NHS England to improve their financial position.

The number of receivables days has decreased to 14.3 days in 2024/25 (2023/24: 14.7 days). Payable days decreased to 35.2 days in 2024/25 from 37.8 days in 2023/24. Providers are monitored on their reported timeliness in paying suppliers.

Total long-term and working capital borrowing at 31 March 2025 was £21.7 billion (31 March 2024: £22.1 billion). This decrease in borrowings is a result of repayments on PFI obligations and loans exceeding remeasurements for inflation and interest arising in the year.

Capital expenditure

Providers' ability to invest in capital schemes is limited by constraints in DHSC's departmental capital expenditure limit. Integrated care systems are allocated capital budgets termed capital envelopes to cover day-to-day operational capital investment

which allows for local prioritisation of available resources within the system. These allocations are supplemented with centrally allocated funds to cover nationally strategic projects such as new hospitals and hospital upgrades. Further resource is made available to cover national programmes. In 2024/25 this included continued investment in access to diagnostics to support increased activity, improve productivity and reduce health inequalities.

Systems are required to ensure that capital plans take into account the impact on organisations' carbon emissions and deliver on objectives for a 'net-zero' National Health Service. The NHS is committed to achieving a net-zero NHS by 2040. This includes investing in schemes to reduce air pollution by decarbonising NHS estates and fleet and supporting delivery of high quality, digitally enabled, low carbon care.

Total purchases and new or modified leases of property, plant and equipment and intangible assets were £8.1 billion (2023/24: £8.2 billion). More than half (67%) of capital spend was on land and buildings, with a further 17% on plant, equipment and transport, 9% on information technology, and 7% on other capital (Figure 3).

Figure 3: Proportion of capital spend by type, 2024/25

The NHS continues to invest in the redevelopment of estates to modernise healthcare and shift care to more suitable settings. For example, in April 2024 South Tees Hospitals NHS Foundation Trust opened a new urgent treatment centre at the James Cook University Hospital, easing pressure on the emergency department and reducing delays in care for patients with minor injuries and illnesses. Following a re-profiling of the New Hospital Programme in January 2025, Royal Cornwall Hospitals NHS Trust received confirmation that a new Women and Children's Hospital, the largest ever single investment in the NHS in Cornwall, would proceed as part of the first wave of schemes. Digital innovation is core

to delivery of the new hospital and during 2024, the Trust successfully piloted the ‘Silent Hospital’ project, which replaced audible patient call bells on the postnatal ward with silent alerts delivered directly to staff-held mobile devices. Reductions in noise levels provided a calmer, more therapeutic environment for patients.

Understanding the NHS position

Central government and NHS bodies prepare their accounts under the principles of International Financial Reporting Standards (IFRS) as adopted by HM Treasury. However central government departments also report their financial outturn on an alternative basis where some items are treated differently, such as interests in private finance initiative (PFI) schemes. It is on this basis that DHSC holds NHS England to account. The government reporting basis is against the ‘non-ringfenced revenue departmental expenditure limit’ (NRF RDEL). The provider outturn on this basis can be combined with the position for the NHS England group to see the overall NHS outturn:

NHS outturn	2024/25 £m	2023/24 £m
NHS budget in directions (excluding funding for depreciation) ²	186,838	171,036
NHS England net expenditure on a government reporting basis ³	(190,193)	(173,762)
NHS provider outturn on a government reporting basis	3,299	2,492
NHS outturn	(56)	(234)
NHS outturn as percentage of budget	(0.03%)	(0.14%)

Wider context

More information on the performance of the NHS in 2024/25 and priorities going forward can be found in NHS England’s annual report and accounts.

Sir James Mackey
Chief Executive Officer
24 November 2025

² As contained in annex A1 of the government’s [financial directions to NHS England](#)

³ NHS England annual report and accounts: financial performance note

Statement of accounting officer's responsibilities and accountability framework

I am designated as the Accounting Officer for NHS England. In this capacity I am responsible for ensuring that NHS England prepares consolidated NHS provider accounts to send to the Secretary of State and the Comptroller and Auditor General. I am not the accountable/accounting officer for each individual NHS trust/NHS foundation trust; this is the role of each local chief executive. An NHS trust's chief executive is designated as the accountable officer when their appointment is confirmed by NHS England. NHS foundation trust chief executives are designated as the accounting officer by the NHS Act 2006.

Amanda Pritchard was the accounting officer for NHS England for the period covered by these consolidated accounts, up to 31 March 2025. I, Sir James Mackey as incoming Chief Executive of NHS England, received assurances from Amanda Pritchard at this date.

NHS trusts

The Secretary of State is responsible for determining, with HM Treasury's approval, the form of accounts each NHS trust must adopt. This is described in the [Department of Health and Social Care's Group Accounting Manual \(GAM\)](#), which is based on HM Treasury's Financial Reporting Manual (FRm). NHS England has set out the responsibilities of each NHS trust accountable officer to ensure:

- there are effective management systems in place to safeguard public funds and assets
- the trust achieves value for money from the resources available to it
- the trust's expenditure and income have been applied to the purposes intended by Parliament and conform to the authorities which govern them
- effective and sound financial management systems are in place
- the Trust's annual accounts give a true and fair view.

NHS England has set out the responsibilities of NHS trust directors to:

- apply suitable accounting policies consistently
- make reasonable judgements and estimates

- 
- make a statement within the accounts on whether applicable accounting standards have been followed, and to disclose and explain any material departures and
 - prepare the financial statements on a going concern basis and disclose any material uncertainties over going concern.

NHS foundation trusts

NHS England is responsible for determining, with the Secretary of State's approval, the form of accounts each NHS foundation trust must adopt. The [NHS foundation trust annual reporting manual](#) (FT ARM), which is based on the FReM, sets out the responsibilities of each NHS foundation trust accounting officer to:

- apply suitable accounting policies consistently
- make reasonable judgements and estimates
- make a statement within the accounts on whether applicable accounting standards have been followed, and to disclose and explain any material departures
- ensure the use of public funds complies with the relevant legislation, delegated authorities and guidance
- confirm that the annual report and accounts, taken as a whole, is fair, balanced and understandable and provides the information necessary for patients, regulators and stakeholders to assess the NHS foundation trust's performance, business model and strategy and
- prepare the financial statements on a going concern basis and disclose any material uncertainties over going concern.

Consolidated NHS provider accounts

In discharging its responsibilities in accordance with the directions to NHS England issued by the Secretary of State, NHS England has prepared consolidated NHS provider accounts on a basis consistent with the individual NHS providers' accounts and consolidated in accordance with International Financial Reporting Standards (IFRS), as amended for NHS providers by the FReM, the FT ARM and the GAM.

The Secretary of State's directions require NHS England to prepare these consolidated NHS provider accounts to:

- 
- give a true and fair view of the state of affairs of NHS trusts and foundation trusts collectively as at the end of the financial year and the comprehensive income and expenditure, changes in taxpayers' equity and cash flows for the financial year then ended
 - disclose any material expenditure or income that has not been applied for the purposes intended by Parliament or material transactions that have not conformed to the authorities that govern them.

As far as I am aware, there is no relevant audit information of which the auditors of the consolidated NHS provider accounts are unaware. As Accounting Officer I have taken all the steps I ought to have taken to make myself aware of any relevant audit information and to establish that the auditors are aware of this information.

Sir James Mackey
Chief Executive
24 November 2025

Annual governance statement

This annual governance statement (AGS) for the NHS provider sector has been prepared in the context of the accountability framework set out above. It has been prepared as a consolidation of the sector position based on reference to:

- (i) the segmentation of providers under the NHS Oversight Framework
- (ii) disclosures in local annual governance statements and
- (iii) the audit reports issued by local external auditors.

Scope of responsibility

NHS England's Board is not responsible for the internal control and systems of NHS providers; this is the responsibility of each NHS provider's board.

NHS trusts

As accountable officer, each NHS trust's chief executive is accountable to NHS England and is responsible for maintaining a sound system of internal control that supports the achievement of the trust's policies, aims and objectives. In addition, the chief executive, as accountable officer, has responsibility for safeguarding public funds and the organisation's assets as set out in the NHS trust accountable officer memorandum.

NHS foundation trusts

As accounting officer, each NHS foundation trust's chief executive has responsibility to Parliament for maintaining a sound system of internal control that supports the achievement of the trust's policies, aims and objectives. In addition, the chief executive, as accounting officer, has responsibility for safeguarding public funds and the organisation's assets as set out in the NHS foundation trust accounting officer memorandum.

Purpose of the system of internal control

NHS England's system of internal control is designed to support the achievement of its policies, aims and objectives and ensure compliance with legal and other obligations on NHS England and NHS trusts and foundation trusts. As part of this system, NHS England has the following processes to ensure these accounts provide a 'true and fair' view of the affairs of NHS providers:

- contributing to the development of guidance to NHS trusts and NHS foundation trusts through the Department of Health and Social Care's (DHSC's) Group Accounting Manual (GAM); this has been approved by HM Treasury

- providing guidance to foundation trusts through the NHS foundation trust annual reporting manual (FT ARM); this has been approved by the Secretary of State
- relying on the external auditors appointed by each NHS trust/NHS foundation trust's council of governors to provide assurance over the truth and fairness of each set of accounts consolidated into these accounts; these auditors have each undertaken an audit in accordance with the [Code of audit practice](#) (audit code), issued by the Comptroller and Auditor General, supported by the National Audit Office (NAO)
- appointing the Quality Assurance Directorate of the Institute of Chartered Accountants in England and Wales and Audit Quality Review department of the Financial Reporting Council to review the quality of the work of NHS foundation trust auditors and consider their findings. The audits of NHS trusts are reviewed under similar arrangements by Statute, not overseen by NHS England
- attending the NAO's Local Auditors' Advisory Group and associated technical networks, to which senior representatives from each of the audit suppliers appointed as auditors of NHS providers are invited; the forum members discuss technical audit and accounting issues in the public sector, including those concerning NHS bodies and
- consideration by NHS England's management and by its Audit and Risk Assurance Committee of the consolidated accounts and the processes established to derive them.

Each NHS provider's annual report and accounts includes an AGS for the year ended 31 March 2025. Each individual AGS explains how the accountable/accounting officer has reviewed the effectiveness of internal control during the period and highlights any significant control issues where the risk cannot be effectively controlled.

Timeliness of local and national accounts

In preparing the consolidated provider accounts based on consolidation schedules from NHS providers, we are reliant on each provider submitting their audited annual report and accounts to us. We and the Department of Health and Social Care issue directions to NHS bodies on the timing by which these should be submitted.

There are many reasons why a set of audited accounts for a local NHS body may go beyond the deadline: for example this may reflect illness in the preparer finance team or audit team, or a significant issue may be encountered that takes time to resolve, which may reflect weaknesses in an entity's preparation of its accounts. Auditors need to be able to complete their work independently of outside influence and take the necessary time to ensure their audit opinion is the right one and supported by appropriate audit evidence. It is also important that there is a properly functioning local audit market to

allow audited bodies to hold their auditors to account for delivery. We welcome the Financial Reporting Council's publication of its NHS Audit Market Study⁴.

The timeline on which these national accounts are finalised depends on both when the deadline for local audited accounts is set, and compliance with that deadline. For many years prior to 2019/20 the local audit deadline in the NHS was around the end of May. The deadline is set in consultation with the audit firms on what they are willing to sign up to. In recent years the local audit deadline has been around the end of June.

In recent years in the consolidated provider accounts we have described NHS England's limited direct role in NHS audits but detailed the steps we have been taking to improve compliance with the local deadline for audited accounts in the NHS.

More NHS bodies achieved the deadline for submission of audited accounts in 2024/25 than in recent years. 92% of local NHS bodies (being NHS providers and ICBs) met the deadline in 2024/25, the highest proportion since 2019/20. For NHS providers, 90% met the deadline in 2024/25, compared to only 82% in 2023/24 and 77% 2022/23.

The improvement in performance is welcomed but finalisation of these consolidated accounts requires a critical mass of completed local audits and the time taken to reach this threshold has resulted in these accounts being finalised in November for a second year. While this remains an improvement on the January completion for the years 2019/20 to 2022/23, we did not achieve our plan for earlier finalisation of the 2024/25 accounts in October.

The original plan was predicated on finalising these accounts with the consolidation of a small number of unaudited accounts where local audits were planned to be late due to either outstanding prior year accounts (see page 23), or local auditors awaiting local government pensions assurance. Additional national procedures are performed to obtain assurance over these unaudited values. This plan was initially affected by unplanned further delays at two trusts who were expected to complete to a September deadline following difficulties in appointing external auditors. Subsequent to this, delays to the audited accounts for University Hospitals Birmingham NHS Foundation Trust (see page 23) impacted on both finalisation of these accounts and assurance for the National Audit Office. As the consolidated provider accounts is a material component of the Department of Health and Social Care (DHSC) group, these delays have also led to DHSC not achieving its November target for its group annual report and accounts.

NHS England and the Department of Health and Social Care (DHSC) have worked closely with the Ministry of Housing, Communities and Local Government (MHCLG) on the relevant elements of its work to reform 'local' audit. In July 2025 MHCLG laid the

⁴ https://media.frc.org.uk/documents/NHS_Audit_Market_Study_Final_Report.pdf

English Devolution and Community Empowerment Bill⁵ before Parliament, part four of which makes changes to the local audit system in England and Wales. The reforms include establishing the Local Audit Office, a body to coordinate local audit with responsibilities including determining the framework for auditors to follow, rules for eligibility to be a local auditor, and inspection and enforcement. Bringing these functions together will help set the foundation to strengthen the audit market. These changes directly apply to audits of NHS trusts and ICBs; DHSC and NHS England are exploring ways to replicate them for NHS foundation trusts.

As well as reforms to the local audit system, we have continued our broader work to improve timeliness in NHS financial reporting including:

- encouraging auditors to give clear reporting to audit committees where the preparer's quality of draft accounts or working papers needs to improve
- working closely with NHS bodies to ensure they appoint external auditors in good time, which helps increase the likelihood of deadlines being achieved
- working with NHS bodies where financial reporting issues arise to ensure they are able to address findings effectively
- regular engagement with the audit firms and responding to their feedback to continue to strengthen the NHS financial reporting landscape, and working with partners to make sure training and guidance is available for preparers
- a rigorous system of monitoring NHS bodies before and after the audited accounts deadline to support them in managing their audited accounts to completion
- prompt escalation of NHS bodies requiring more support to ensure targeted support to bring resolution of issues and
- liaising with broader stakeholders on wider matters that can cause delays in NHS accounts, for example sign offs of local government pension scheme audits, which directly affects a handful of NHS providers with a corresponding impact on these consolidated accounts.

NHS England and DHSC have an ambition to return to laying the main national consolidated accounts (being the DHSC group, NHS England group and consolidated provider accounts) before Parliament in advance of the summer Parliamentary recess in July. Achieving this in the years ahead would require the audit community to accept a significantly earlier deadline for audited accounts than is currently the case, which partly flows from the preparation of accounts and the work required of the auditors. At the present time it is not clear that this is achievable in the short term. We will continue to focus on streamlining processes for preparation and audit of local and national accounts

⁵ <https://bills.parliament.uk/bills/4002/publications>

to the extent this falls within our role to seek to facilitate the earlier finalisation of accounts wherever possible.

Overview of internal control systems at NHS trusts and NHS foundation trusts

Regularity

Regularity means the use of public funds complies with the relevant legislation and delegated authorities. Local NHS provider auditors do not issue an opinion on local regularity, but do perform specific procedures as part of their reporting to the NAO. The application of materiality to regularity requires judgement: irregular spending might be material by nature (in a high profile area for example) without the quantum of spend being material. As set out in the statement of accounting officer's responsibilities, NHS England is required to disclose any material irregularity in the consolidated provider accounts. NHS providers generally have broad powers in spending money but we assess overall regularity by:

- reviewing the detail of our oversight and regulatory decisions (these concepts are explained below) to consider whether they highlight any regularity concerns
- confirmation from our regional teams whether they are aware of any irregular activity in providers
- collating any referrals of unlawful expenditure or activity submitted by local auditors (these are commonly termed 'section 30 referrals' and are explained further below)
- considering any fraud investigations known to NHS England
- reviewing the confirmation statements on regularity that each NHS provider chief executive is required to make in their statement of accounting/accountable officer responsibilities
- correlating sources of information on special severance payments and other forms of special payments, where specific controls apply and
- responding to any information provided to the NAO as part of their group audit.

We regularly remind NHS providers of their responsibilities over approval for special severance payments, including via letters, briefings, emails and webinars. If cases of non-compliance arise, we seek to identify issues and incorporate those into subsequent briefings and reminders to NHS bodies.

NHS Oversight Framework

The previous NHS Oversight Framework continued to apply to the 2023/24 and 2024/25 financial years, before being replaced by a new Oversight Framework for 2025/26. The purpose remains the same: it provides the framework for overseeing the delivery of high

quality, sustainable care with a focus at both local system and organisational level and identifying potential support needs.

The Framework describes a process to identify where NHS organisations may benefit from or require support to meet the standards required of them in a sustainable way and deliver the overall objectives for the sector in line with the priorities set out in the relevant planning guidance and other documents.

The remainder of this section specifically describes the Framework as in operation during 2023/24 and 2024/25. Details of the revised framework for 2025/26 can be found on our website⁶.

NHS Oversight Framework in 2023/24 and 2024/25

To provide an overview of the level and nature of support required across systems, inform oversight arrangements and target support capacity as effectively as possible, NHS England regional teams allocated NHS organisations to one of four 'segments'.

A segmentation decision indicates the scale and general nature of support needs, from no specific support needs (segment 1) to a requirement for mandated intensive support (segment 4). A segment does not determine specific support requirements. By default, all NHS organisations were allocated to segment 2 unless the criteria for moving into another segment were met. These criteria had two components:

- a) objective and measurable eligibility criteria based on performance against the six oversight themes using the relevant oversight metrics (the themes were: (i) quality of care, access and outcomes; (ii) people; (iii) preventing ill-health and reducing inequalities; (iv) leadership and capability; (v) finance and use of resources; (vi) local strategic priorities)
- b) additional considerations focused on the assessment of system leadership and behaviours, and improvement capability and capacity.

An NHS trust or foundation trust was placed in segment three or four where it was found to have significant support needs that may require formal intervention and mandated support. They are subject to enhanced direct oversight by NHS England (in partnership with their ICB) and, depending on the nature of the problem(s) identified, additional reporting requirements and financial controls.

NHS trusts were issued licences on 1 April 2023 and from 2023/24 have been subject to the same licence conditions as NHS foundation trusts.

Segmentation of NHS providers is updated regularly. The table below summarises NHS providers' segmentation as at 31 March 2025. A prior year comparative is not provided

⁶ <https://www.england.nhs.uk/long-read/nhs-oversight-framework-2025-26/>

as this table provides a snapshot at that point in time and the design and application of the Oversight Framework may evolve over time.

Segmentation at 31 March 2025				
	Number of NHS trusts	Number of NHS FTs	Total number of providers	% of sector
1	8	19	27	13%
2	24	51	75	37%
3	23	59	82	40%
4	7	14	21	10%
Total	62	143	205	

NHS providers in segment 3 or 4 in 2023/24 and 2024/25

Where an NHS provider triggered a specific concern, NHS England worked with the ICB to understand why this concern arose and if a support need existed. Based on this assessment, NHS England agreed the subsequent level of support required. Where there was a need for mandated support by NHS England the provider was placed into segment 3 or 4, depending on the complexity of the support need.

A segment 3 decision resulted in a bespoke support offer led by the NHS England regional team drawing on system and national expertise as required.

Segment 4 decisions were reserved for those trusts experiencing long standing complex issues or serious failures in areas such as quality, safety, leadership, governance or financial plans. A segment 4 decision always triggered a referral to NHS England's national Recovery Support Programme (RSP). Decisions on referrals into this programme were made by an executive committee of NHS England based on recommendations from Regional Directors or the Care Quality Commission. Where a referral into the RSP for a trust was agreed a dedicated Improvement Director was appointed to work alongside the Trust leadership as well as the ICB and regional team to oversee the development and delivery of an improvement plan. A diagnostic review would be undertaken to identify underlying drivers that needed to be addressed and embed improvement upstream to prevent further deterioration and enable stabilisation.

Enforcement action in 2023/24 and 2024/25

Where an NHS provider was in breach of its licence conditions (or where NHS England had reasonable grounds for suspecting a breach), NHS England also considered the use of its enforcement powers. These powers include, among others, agreeing enforcement undertakings or issuing directions to the provider to secure compliance and ensure the breach does not recur. Details of any enforcement action is publicly available via the Provider Directory on our [website](#).

In exceptional circumstances an NHS trust or NHS foundation trust may be placed in trust special administration. Administration is a regime for ensuring the continuity of essential services in the event of provider financial distress. No trusts or foundation trusts were subject to trust special administration in 2023/24 or 2024/25.

NHS trusts' and NHS foundation trusts' significant internal control weaknesses

Sources of information

In the information that follows, NHS England has collated a number of sources of information to disclose the position for NHS providers.

NHS Oversight Framework segment 3 or 4

Where an NHS provider was in Oversight Framework segment 3 or 4 and receiving mandated support, the support offered to the provider will be defined in terms of the Oversight Framework themes.

NHS England placing an NHS provider into segment 3 or 4 and mandating support would normally indicate the existence of control weaknesses or failings in the trust's control environment.

Other significant control issues

NHS providers may also declare other matters as significant control issues. NHS England's FT ARM for NHS foundation trusts and AGS guidance for NHS trusts gives guidance on how to determine whether an internal control matter is 'significant' but does not prescribe an approach; this is a matter for each trust's board. The table that follows includes all cases where trusts have disclosed one or more significant control weaknesses in their annual governance statement.

External auditor's conclusion on use of resources

In addition to the 'true and fair' audit opinion on the accounts, external auditors of NHS trusts and NHS foundation trusts are required to conclude whether the trust has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources. Where the auditor identifies significant issues, the auditor reports that they are unable to satisfy themselves that the trust has made these proper arrangements. Such reporting does not imply that the 'true and fair' audit opinion on the provider's accounts is qualified. These conclusions are listed in the table that follows. In each case we summarise if this modification relates to the same matters as the reason for Oversight Framework segmentation as 3 or 4 by NHS England.

Defining a significant internal control issue for this document

Our starting point for this consolidated annual governance statement is where a trust has locally assessed and disclosed a significant internal control issue in its own annual governance statement.

In addition, regardless of whether these have been reported locally, we also deem the following to be evidence of significant internal control weaknesses:

- NHS Oversight Framework segmentation of 3 or 4 by NHS England during the year (with respect to the Framework as applicable to 2024/25)
- the external auditor modifying their use of resources conclusion.

In the table that follows we also disclose notes on other non-standard forms of the auditor's reporting. We do not consider that entries here necessarily represent a significant internal control weakness.

Summary of results

The table below provides a summary of the detail that follows:

	2024/25	2023/24
Number of providers receiving mandated support from NHS England during the year	109	101
Total number of modified conclusions relating to arrangements for securing economy, efficiency and effectiveness in the provider's use of resources	77	67 ⁷
Number of providers where 'true and fair' audit opinion has been modified (qualified)	0	0
Providers consolidated without an audit report	4	5

Providers consolidated without an audit report

The consolidated provider accounts for 2023/24 describes how that document was finalised with five providers not having received their audit report. Three of these five were subsequently received:

- Barking, Havering and Redbridge University Hospitals NHS Trust in March 2025
- East London NHS Foundation Trust in March 2025
- Humber Teaching NHS Foundation Trust in February 2025

⁷ This was 66 at the time of finalising the consolidated provider accounts for 2023/24. The auditor subsequently issued their audit report for Barking, Havering and Redbridge University Hospital NHS Trust which included a modified 'use of resources' conclusion.

The audited 2023/24 accounts for Birmingham Women's and Children's NHS Foundation Trust and Croydon Health Services NHS Trust remain outstanding at the time of finalising these 2024/25 consolidated accounts.

The consolidated provider accounts for 2024/25 have been prepared using unaudited information for four providers as the audit reports remained outstanding at the time of finalising these disclosures on 3 November 2025:

Provider	Reason for 2024/25 delay
Birmingham Women's and Children's NHS Foundation Trust	The auditor identified concerns around weaknesses in the system of internal control in 2023/24 which required further investigation by the Trust. Following ongoing delays the audit of the 2024/25 accounts has not yet commenced.
Croydon Health Services NHS Trust	The audit of the 2023/24 accounts was delayed while the Trust commissioned an external review into issues raised by a third party. The audit of the 2024/25 accounts has not yet commenced.
Humber Teaching NHS Foundation Trust	The accounts are delayed pending the auditor obtaining assurance over local government pensions information. The accounts being delayed is not within the trust's control.
University Hospitals Birmingham NHS Foundation Trust	Following late completion to audited accounts in 2023/24, the Trust experienced difficulties preparing its 2024/25 draft accounts which has delayed completion of the associated audit, alongside a revised audit risk profile.

More information on the approach taken for finalising these accounts with respect to national materiality is provided in note 32 to the consolidated financial statements.

List of providers with matters to report

The table below lists the NHS trusts and NHS foundation trusts for which there are matters to report in the relevant columns. It therefore does not list all NHS providers. Column (3) lists significant internal control issues disclosed in local annual governance statements, excluding matters relating to the same issues as covered by NHS England's mandated support. Therefore, the absence of a tick in this column does not necessarily mean the provider disclosed no significant internal control issues in its local AGS.

	Provider subject to mandated support from NHS England		Other significant internal control issue disclosed by provider	Audit report: Significant issues in arrangements for use of resources		
Provider name	(1) Provider in Oversight Framework segment 3 or 4 during the year *	(2) Provider in recovery support programme during the year	(3) Significant internal control issue not relating to matters in (1)	(4) UoR significant issues: linked to matters in (1)	(5) UoR significant issues: Other matter (or segment 3/4 post year-end)	(6) Other notes
Airedale NHS Foundation Trust	Yes (Finance)			Yes (also governance over electronic patient records implementation)		
Ashford and St Peter's Hospitals NHS Foundation Trust			Yes: operational performance, CQC rating		Yes: financial sustainability	
Avon and Wiltshire Mental Health Partnership NHS Trust	Yes (Quality, access & outcomes; finance; people)					
Barking, Havering and Redbridge University Hospitals NHS Trust	Yes (Quality, access & outcomes; finance; leadership & capability)	✓ Exited May 2024		Yes (also governance around risk management and timely preparation of accounts)		
Barnet, Enfield And Haringey Mental Health NHS Trust (<i>organisation demised 1 November 2024</i>)						α γ
Barnsley Hospital NHS Foundation Trust	Yes (Finance)					γ
Barts Health NHS Trust	Yes (Quality, access & outcomes)		Yes: financial sustainability, hospital redevelopment	Yes		
Bedfordshire Hospitals NHS Foundation Trust					Yes: financial sustainability	
Birmingham and Solihull Mental Health NHS Foundation Trust	Yes (Quality, access & outcomes; people)					
Birmingham Women's and Children's NHS Foundation Trust	Yes (Quality, access & outcomes)		These consolidated accounts have been prepared using unaudited financial information for this Trust: see page 23			
Black Country Healthcare NHS Foundation Trust	Yes (Quality, access & outcomes; finance; leadership & capability)			Yes

Totals	109	25	16	52 ^	25 ^	-

*** Approach for column (1):**

- The explanation for each provider shows the support offerings for each provider in segment 3 or 4 at any point during the year. In some cases a trust may receive a combination of mandated and targeted support with all such support needs included here.
- In many cases our support also relates to the leadership and capability theme in the Oversight Framework. Where this is the case the underlying issues will usually relate to other themes so this is not always additionally listed here, unless it is a primary matter.

Notes for column (6) – note we do not consider these items as significant internal control issues:

- α 3 providers where the auditor included an 'emphasis of matter' relating to the organisation demising during the reporting year
- β 1 provider where the auditor included an 'emphasis of matter' for other reasons. Further information is available in the audit report included within the individual trust accounts.
- γ 2 providers with modification to audit report relating to remuneration report. Further information is available in the audit report included within the individual trust accounts.

Note on totals:

^ No audit report has been issued for Birmingham Women's and Children's NHS Foundation Trust, Croydon Health Services NHS Trust, Humber Teaching NHS Foundation Trust, and University Hospitals Birmingham NHS Foundation Trust at the time of finalising the disclosures in these consolidated accounts on 3 November 2025: see page 23 above and note 32 to the financial statements.

Special severance payments

NHS providers are required to obtain approval in advance of making non-contractual departure payments (termed ‘special severance payments’) to employees. At the time of finalising the disclosures in these consolidated provider accounts on 3 November 2025, there are 4 outstanding cases for 2024/25 where payments were made without prior authorisation. These have been submitted for retrospective approval. These cases, while currently irregular, have been judged as individually and collectively not material by nature to these consolidated accounts. The consolidated provider accounts for 2023/24 were finalised with 5 cases of special severance payments having been made without prior authorisation. These were submitted retrospectively and the Chief Secretary to the Treasury subsequently declined to approve them so the cases referenced in the 2023/24 consolidated accounts remain irregular. We will continue to reinforce the requirement that NHS providers obtain the necessary approvals for such payments in advance of offers being made.

Auditor referrals of matters arising

Under Section 30 of the Local Audit and Accountability Act 2014 for NHS trusts, and under Schedule 10 to the NHS Act 2006 for NHS foundation trusts, where an auditor believes that the body or an officer of the body:

- is about to make, or has made, a decision which involves or would involve the incurring of expenditure which is unlawful, or
- is about to take, or has taken, a course of action which, if pursued to its conclusion, would be unlawful and likely to cause a loss or deficiency

the auditor should make a referral to the Secretary of State (for NHS trusts)/NHS England (for NHS foundation trusts).

37 NHS trusts (2023/24: 39) and no NHS foundation trusts (2023/24: none) were subject to such referrals in 2024/25. All of these referrals for 2024/25 relate to a failure by the trust to meet the statutory breakeven duty target (2023/24: 38 of 39). This requires an NHS trust to achieve a cumulative breakeven over a three or five-year period. The underlying issues in trust finances are disclosed as part of the detail on significant internal control issues presented above. The statutory breakeven duty does not apply to NHS foundation trusts.

Sir James Mackey
Chief Executive
24 November 2025

The Certificate and Report of the Comptroller and Auditor General to the Houses of Parliament

Opinion on consolidated financial statements

I certify that I have audited the Consolidated NHS Provider Accounts for the year ended 31 March 2025 under the National Health Service Act 2006.

The Consolidated NHS Provider Accounts comprise the:

- Consolidated Statement of Financial Position as at 31 March 2025;
- Consolidated Statement of Comprehensive Income, Consolidated Statement of Cash Flows and Consolidated Statement of Changes in Equity for the year then ended; and
- the related notes including the significant accounting policies.

The financial reporting framework that has been applied in the preparation of the consolidated financial statements is applicable law and UK adopted International Accounting Standards.

In my opinion, the consolidated financial statements:

- give a true and fair view of the state of affairs of NHS trusts and NHS foundation trusts, taken collectively, as at 31 March 2025 and of their deficit for the year then ended; and
- have been properly prepared in accordance with the National Health Service Act 2006 and Secretary of State directions issued thereunder.

Opinion on regularity

In my opinion, in all material respects, the income and expenditure recorded in the consolidated financial statements have been applied to the purposes intended by Parliament and the financial transactions recorded in the consolidated financial statements conform to the authorities which govern them.

Basis for opinions

I conducted my audit in accordance with International Standards on Auditing (UK) (ISAs UK), applicable law and Practice Note 10 *Audit of Financial Statements and Regularity of Public Sector Bodies in the United Kingdom (2024)*. My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of my certificate.

Those standards require me and my staff to comply with the Financial Reporting Council's *Revised Ethical Standard 2019*. I am independent of NHS England and of NHS trusts and NHS foundation trusts, taken collectively, in accordance with the ethical requirements that are relevant to my audit of the consolidated financial statements in the UK. My staff and I have fulfilled our other ethical responsibilities in accordance with these requirements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Conclusions relating to going concern

In auditing the consolidated financial statements, I have concluded that NHS England's use of the going concern basis of accounting in the preparation of the consolidated financial statements of the NHS trusts and NHS foundation trusts is appropriate.

Based on the work I have performed, I have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the NHS trusts' and NHS foundation trusts' collective ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

My responsibilities and the responsibilities of the Accounting Officer with respect to going concern are described in the relevant sections of this certificate.

The going concern basis of accounting for the Consolidated NHS Provider Accounts is adopted in consideration of the requirements set out in HM Treasury's Government Financial Reporting Manual, which requires entities to adopt the going concern basis of accounting in the preparation of the financial statements where it is anticipated that the services which they provide will continue into the future.

Other Information

The other information comprises information included in the Consolidated NHS Provider Accounts but does not include the consolidated financial statements and my auditor's certificate and report thereon. The Accounting Officer is responsible for the other information.

My opinion on the consolidated financial statements does not cover the other information and, except to the extent otherwise explicitly stated in my certificate and report, I do not express any form of assurance conclusion thereon.

My responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

If I identify such material inconsistencies or apparent material misstatements, I am required to determine whether this gives rise to a material misstatement in the consolidated financial statements themselves. If, based on the work I have performed, I conclude that there is a material misstatement of this other information, I am required to report that fact.

I have nothing to report in this regard.

Opinion on other matters

In my opinion, based on the work undertaken in the course of the audit, the information given in the Introduction, Review of financial performance of NHS providers, Statement of accounting officer's responsibilities and accountability framework, and the Annual governance statement for the financial year for which the consolidated financial statements are prepared is consistent with the consolidated financial statements and is in accordance with the applicable legal requirements.

Matters on which I report by exception

In the light of the knowledge and understanding of NHS trusts and NHS foundation trusts, taken collectively, and their environment obtained in the course of the audit, I have not identified material misstatements in the Introduction, Review of financial performance of NHS providers, Statement of accounting officer's responsibilities and accountability framework, and the Annual governance statement.

I have nothing to report in respect of the following matters which I report to you if, in my opinion:

- adequate accounting records have not been kept by NHS England or returns adequate for my audit have not been received from branches not visited by my staff; or
- I have not received all of the information and explanations I require for my audit; or
- the annual governance statement does not reflect compliance with HM Treasury's guidance.

Responsibilities of the Accounting Officer for the financial statements

As explained more fully in the Statement of accounting officer's responsibilities and accountability framework, the accounting officer is responsible for:

- maintaining proper accounting records;
- providing the C&AG with access to all information of which management is aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;
- providing the C&AG with additional information and explanations needed for his audit;
- providing the C&AG with unrestricted access to persons within NHS England (and NHS trusts and NHS foundation trusts) from whom the auditor determines it necessary to obtain audit evidence;
- ensuring such internal controls are in place as deemed necessary to enable the preparation of financial statements to be free from material misstatement, whether due to fraud or error;
- preparing financial statements which give a true and fair view in accordance with Secretary of State directions issued under the National Health Service Act 2006;
- preparing the information which comprises the Introduction, Review of financial performance of NHS providers, the Statement of accounting officer's responsibilities and accountability framework and the Annual governance statement in accordance with the National Health Service Act 2006, and with the directions made thereunder by the Secretary of State; and
- assessing NHS trusts' and NHS foundation trusts' collective ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Accounting Officer anticipates that the services provided by NHS trusts and NHS foundation trusts will not continue to be provided in the future.

Auditor's responsibilities for the audit of the financial statements

My responsibility is to audit, certify and report on the financial statements in accordance with the National Health Service Act 2006.

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a certificate that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Extent to which the audit was considered capable of detecting non-compliance with laws and regulations including fraud

I design procedures in line with my responsibilities, outlined above, to detect material misstatements in respect of non-compliance with laws and regulations, including fraud. The extent to which my procedures are capable of detecting non-compliance with laws and regulations, including fraud is detailed below.

Identifying and assessing potential risks related to non-compliance with laws and regulations, including fraud

In identifying and assessing risks of material misstatement in respect of non-compliance with laws and regulations, including fraud, I:

- considered the nature of the sector, control environment and operational performance including the design of the NHS trusts' and NHS foundation trusts' accounting policies and performance incentives
- inquired of management, NHS England's head of internal audit and those charged with governance, including obtaining and reviewing supporting documentation relating to NHS England's policies and procedures on:
 - identifying, evaluating and complying with laws and regulations;
 - detecting and responding to the risks of fraud; and
 - the internal controls established to mitigate risks related to fraud or non-compliance with laws and regulations including NHS England's controls relating to NHS trusts' and NHS foundation trusts' compliance with the National Health Service Act 2006 and Managing Public Money;
- inquired of management, NHS England's head of internal audit and those charged with governance whether:
 - they were aware of any instances of non-compliance with laws and regulations;
 - they had knowledge of any actual, suspected, or alleged fraud;
- discussed with the engagement team regarding how and where fraud might occur in the consolidated financial statements and any potential indicators of fraud.

As a result of these procedures, I considered the opportunities and incentives that may exist within the NHS trusts and NHS foundation trusts for fraud and identified the greatest potential for fraud in the following areas: revenue recognition, posting of unusual journals, complex

transactions and bias in management estimates. In common with all audits under ISAs (UK), I am required to perform specific procedures to respond to the risk of management override.

I obtained an understanding of the NHS trusts' and NHS foundation trusts' framework of authority and other legal and regulatory frameworks in which NHS trusts and NHS foundation trusts operate. I focused on those laws and regulations that had a direct effect on material amounts and disclosures in the financial statements or that had a fundamental effect on the operations of NHS trust and NHS foundation trusts. The key laws and regulations I considered in this context included National Health Service Act 2006, the Health and Social Care Act 2012, the Health and Care Act 2022, Managing Public Money, employment law and tax legislation.

I considered regulations and regularity relating to special payments including special severance payments, as I identified the completeness and regularity of special payments and special severance payments as a significant risk.

Audit response to identified risk

To respond to the identified risks resulting from the above procedures:

- I reviewed the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described above as having direct effect on the financial statements;
- I enquired of management and the Audit and Risk Assurance Committee concerning actual and potential litigation and claims;
- I reviewed minutes of meetings of those charged with governance and the NHS England Board and internal audit reports;
- I addressed the risk of fraud through management override of controls by testing the appropriateness of journal entries and other adjustments including consolidation adjustments; assessing whether the judgements on estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business; enquiring with the auditors of NHS trusts and NHS foundation trusts about the findings of their audits; and using the work of component auditors with respect to management override of controls; and
- in addressing the risk of fraud in revenue recognition, I directed the auditors of NHS trusts and NHS foundation trusts of the need to consider the presumed risk of fraud in revenue recognition and enquired with them around the findings of their audits and used the work of component auditors with respect to fraud in revenue recognition.

I communicated relevant identified laws and regulations and potential risks of fraud to all engagement team members and relevant component audit teams and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

A further description of my responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of my certificate.

Other auditor's responsibilities

I am required to obtain sufficient appropriate audit evidence to give reasonable assurance that the expenditure and income recorded in the financial statements have been applied to the purposes intended by Parliament and the financial transactions recorded in the financial statements conform to the authorities which govern them.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control I identify during my audit.

Report

I have no observations to make on these financial statements.

Gareth Davies

Taxpayers' and others' equity at 31 March 2024		56,040	11,722	170	(21,776)	264	46,420

* These adjustments reflect local NHS providers' adjustments to prior year reserves. The aggregated adjustments were not considered material to the consolidated provider accounts in 2023/24 and so prior year balances were not restated.

** Other reserve movements includes a transfers between charitable funds and NHS provider income and expenditure reserves representing a transfer of resources eliminated from income and expenditure on consolidation.

Information on reserves

Public dividend capital

Public dividend capital (PDC) is a type of public sector equity finance based on the excess of assets over liabilities at the time of establishment of an NHS trust, or predecessor NHS trust where PDC is recognised by a foundation trust. Additional PDC may also be issued to NHS providers by the Department of Health and Social Care to fund capital investment or support operating cash flows. A charge, reflecting the cost of capital utilised by an NHS provider, is payable to the Department of Health and Social Care as the PDC dividend.

Revaluation reserve

Increases in asset values arising from revaluations are recognised in the revaluation reserve, except where, and to the extent that, they reverse impairments previously recognised in operating expenses, in which case they are reversed in operating expenses. Subsequent downward movements in asset valuations are charged to the revaluation reserve to the extent that a previous gain was recognised unless the downward movement represents a clear consumption of economic benefit or a reduction in service potential.

Other reserves

This reserve reflects balances formed on the creation of predecessor NHS bodies, and in some historic mergers before the use of transfer by absorption. Other reserves also include non-controlling interests. Non-controlling interests represent the equity in a subsidiary of an NHS provider which is not attributable, directly or indirectly, to the NHS provider.

Income and expenditure reserve

The balance of this reserve represents the accumulated surpluses and deficits of NHS providers.

NHS charitable funds reserves

This balance represents the ring-fenced funds held by the NHS charitable funds consolidated within these financial statements. These reserves are classified as restricted or unrestricted and a breakdown is provided in note 28.

Consolidated statement of cash flows for the year ended 31 March 2025

	Note	2024/25 £m	2023/24 £m
Cash flows from operating activities			
Operating (deficit)		(1,298)	(1,652)

Capital element of PFI and other service concession payments	21.1	(668)	(621)
Interest element of lease liability repayments	21.1	(110)	(93)
Interest paid on PFI and other service concession obligations	21.1	(735)	(756)
Other interest paid		(63)	(67)
PDC dividend (paid)		(1,020)	(1,132)
Other movements in financing cash flow		1	6
Net cash generated from financing activities		776	1,156
(Decrease) in cash and cash equivalents		(724)	(1,947)
Cash and cash equivalents at 1 April		10,802	12,846
Cash and cash equivalents transferred under absorption accounting		(1)	(3)
Adjustments to prior period accounted for in year	18.1	(100)	(94)
Cash and cash equivalents at 31 March	18.1	9,977	10,802

Total cash and cash equivalents is reconciled to the consolidated statement of financial position in note 18.1

Cash flows from discontinued operations are not material so are not shown separately on the face of the consolidated statement of cash flows.

Notes to the financial statements

Note 1 Accounting policies and other information

Basis of preparation

Paragraph 1 of Section 65Z4 of the National Health Service Act 2006 (as inserted by Section 14 of the Health and Care Act 2022) requires NHS England to prepare a set of accounts that consolidates the annual accounts of all NHS trusts and NHS foundation trusts for each financial year. This set of accounts is termed the 'consolidated provider accounts' and is prepared in accordance with directions issued by the Secretary of State. In line with those directions, these accounts have been prepared in accordance with the Department of Health and Social Care (DHSC) Group Accounting Manual (GAM) 2024/25 and the HM Treasury Financial Reporting Manual (FReM) in relevant respects. 'NHS providers' is used as a collective term for NHS trusts and NHS foundation trusts. 'Trusts' when not prefixed with 'NHS' is also used to mean providers in general.

NHS England is responsible for issuing an accounts direction to NHS foundation trusts under the NHS Act 2006. NHS England directs that the financial statements of NHS foundation trusts shall meet the accounting requirements of the GAM. The GAM is directly applicable to NHS trusts as a result of directions issued by the Secretary of State.

The accounting policies contained within the GAM are broadly consistent with those specified in the FReM, which itself follows UK-adopted International Financial Reporting Standards (IFRS), to the extent that it is meaningful and appropriate in the public sector context. The GAM's divergences from the FReM are designed to ensure an appropriate financial reporting framework and have been approved by HM Treasury's Financial Reporting Advisory Board. NHS providers have confirmed their accounting policies are consistent with the GAM in all material respects.

Accounting convention

These financial statements have been prepared under the historical cost convention modified to account for the revaluation of property, plant and equipment, intangible assets, right of use assets and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies.

Consolidated Statement of Comprehensive Income (SOCI) policy

The SOCI in these consolidated accounts is presented to separately identify the surplus or deficit before impairments of non-financial assets and absorption transfers as this is how NHS England has reported on the performance of NHS providers during the year. We consider that the notional gain/loss associated with a transfer by absorption is outside of the operational performance management of an NHS provider. Impairments and revaluations of property, plant and equipment and other non-financial assets are usually considered outside of a provider's control. Fair value movements are not included within the 'impairments and transfers' column as providers are held to account for the effects of funds being invested in this way.

Note 1.1 Consolidation and other entities

Basis of consolidation

These accounts consolidate the accounts of all NHS providers that have been in existence during 2024/25 using the principles of IFRS as adopted by the FReM. They present the consolidated results of the NHS provider sector after the elimination of inter-NHS provider balances and transactions. NHS England is not the parent undertaking for NHS providers and its results are not incorporated within these accounts. As there is no parent entity within this consolidation, only consolidated group statements are presented.

The consolidated provider accounts are prepared based on accounts for each NHS provider which have been audited by the provider's locally appointed auditor. For 2024/25, four providers' audits remain incomplete at the time of finalising these disclosures on 3 November 2025. More information is provided in note 32. We are satisfied that the residual uncertainty is not material to these consolidated accounts.

Business combinations and machinery of government changes

Where an NHS provider combines with, transfers a function to, or receives a function from another entity within the Whole of Government Accounts boundary (including other NHS providers) this represents a 'machinery of government change' regardless of the mechanism used to effect the combination.

Where functions are transferred to NHS providers from other NHS or local government bodies (or vice versa), the transaction is accounted for as a transfer by absorption. The assets and liabilities transferred are recognised in the accounts as at the date of transfer and prior year comparatives are not restated. The assets and liabilities are not adjusted to fair value prior to recognition. The net gain/loss corresponding to the net assets/liabilities transferred is recognised within non-operating income/expenditure.

In absorption transfers for property, plant and equipment assets and intangible assets, the cost and accumulated depreciation and amortisation balances from the transferring entity's accounts are preserved on recognition in the NHS provider accounts. Where the transferring body recognised revaluation reserve balances attributable to the assets, the NHS provider makes a transfer from its income and expenditure reserve to its revaluation reserve. Where DHSC transfers Public Dividend Capital (PDC) from the divesting body to the receiving body as part of an absorption transaction, this is treated as a transfer from the income and expenditure reserve to the PDC reserve by the NHS provider. This ensures that the absorption gain/loss is calculated in line with the requirements of the FReM and also that the balance of PDC is preserved where this is transferred by DHSC.

Where functions are transferred to another NHS or local government body, the assets and liabilities transferred are derecognised from the accounts as at the date of transfer and prior year comparatives are not restated. The net loss / gain corresponding to the net assets / liabilities transferred is recognised within non-operating income/expenditure. Any revaluation reserve balances attributable to assets de-recognised are transferred to the income and expenditure reserve.

Where NHS providers acquire businesses from outside of the Whole of Government Accounts boundary, these are accounted for in accordance with *IFRS 3 Business combinations*.

Subsidiaries

Under *IFRS 10 Consolidated financial statements*, an NHS provider controls an investee when it is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Power over the investee occurs where the provider has existing rights that give it the current ability to direct the relevant activities. The income, expenses, assets, liabilities, equity and reserves of subsidiaries are consolidated, in full, into the appropriate financial statement lines. The capital and reserves attributable to non-controlling interests are included within Other Reserves in the Consolidated Statement of Financial Position.

The amounts consolidated are drawn from the financial results of the subsidiaries for the year. Where there is more than a three month gap between a subsidiary's financial year end and the NHS provider's financial year end (31 March), the actual amounts for each month of the year to 31 March are obtained from the subsidiary and consolidated.

Where a subsidiary's accounting policies are not aligned with those of the NHS provider (including where they report under UK GAAP) amounts are adjusted during local consolidation where the differences are material. Inter-entity balances, transactions and gains/losses are eliminated in full on consolidation. Subsidiaries classified as 'held for sale' are measured at the lower of their carrying value and 'fair value less costs to sell'.

NHS charitable funds

NHS providers are the corporate trustees to various NHS charitable funds. NHS providers have individually assessed their relationships to the respective charitable funds to determine whether they meet the definition of subsidiaries under IFRS 10. Some NHS providers consolidate their linked NHS charity as a result. Other providers may also have charities meeting the definition of local control that are not locally consolidated on the grounds of materiality. These consolidated accounts only include charities locally consolidated by providers.

The charitable fund's statutory accounts are prepared to 31 March in accordance with the UK Charities Statement of Recommended Practice (SORP) which is based on UK Generally Accepted Accounting Principles (UK GAAP). On consolidation, necessary adjustments are made to the charity's assets, liabilities and transactions to:

- recognise and measure them in accordance with the NHS provider's accounting policies; and
- eliminate intra-group transactions, balances, gains and losses.

Associates

Associate entities are those over which an NHS provider has the power to exercise a significant influence. Associate entities are recognised in these financial statements using the equity method. The investment is initially recognised at cost. It is increased or decreased subsequently to reflect the NHS provider's share of the entity's profit or loss or other comprehensive gains and losses (eg revaluation gains on the entity's property, plant and equipment) following acquisition. It is also reduced when any distribution (e.g. share dividends) are received by the NHS provider from the associate.

Associates which are classified as 'held for sale' are measured at the lower of their carrying value and 'fair value less costs to sell'.

Joint ventures

Joint ventures are arrangements in which the NHS provider has joint control with one or more other parties, and where it has the rights to the net assets of the arrangement.

Joint ventures are accounted for using the equity method.

Joint operations

Joint operations are arrangements in which the NHS provider has joint control with one or more other parties and has the rights to the assets, and obligations for the liabilities, relating to the arrangement. The NHS provider includes within its financial statements its share of the assets, liabilities, income and expenditure.

Note 1.2 Contract income

Where income is derived from contracts with customers, it is accounted for under *IFRS 15 Revenue from contracts with customers*. The GAM expands the definition of a contract to include legislation and regulations which enables an entity to receive cash or another financial asset that is not classified as a tax by the Office of National Statistics (ONS).

Revenue in respect of goods/services provided is recognised when (or as) performance obligations are satisfied by transferring promised goods/services to the customer and is measured at the amount of the transaction price allocated to those performance obligations. At the year end, each NHS provider accrues income relating to performance obligations satisfied in that year. Where the provider's entitlement to consideration for those goods or services is unconditional a contract receivable will be recognised. Where entitlement to consideration is conditional on a further factor other than the passage of time, a contract asset will be recognised. Where consideration received or receivable relates to a performance obligation that is to be satisfied in a future period, the income is deferred and recognised as a contract liability.

Revenue from NHS contracts

The main source of income for NHS providers is contracts with commissioners for healthcare services. Funding envelopes are set at an Integrated Care System (ICS) level. The majority of providers' NHS income is earned from NHS commissioners under the NHS Payment Scheme (NHSPS). The NHSPS sets out rules to establish the amount payable to trusts for NHS-funded secondary healthcare.

Aligned payment and incentive (API) contracts form the main payment mechanism under the NHSPS. API contracts contain both a fixed and variable element. Under the variable element, providers earn income for elective activity (both ordinary and day case), out-patient procedures, out-patient first attendances, diagnostic imaging and nuclear medicine, and chemotherapy delivery activity. The precise definition of these activities is given in the NHSPS. Income is earned at NHSPS prices based on actual activity. The fixed element includes income for all other services covered by the NHSPS assuming an agreed level of activity with 'fixed' in this context meaning not varying based on units of activity. Elements within this are accounted for as variable consideration under IFRS 15 as explained below.

High costs drugs and devices excluded from the calculation of national prices are reimbursed by NHS England based on actual usage or at a fixed baseline in addition to the price of the related service.

Providers also receive income from commissioners under the Best Practice Tariff (BPT) scheme and in 2023/24, Commissioning for Quality Innovation (CQUIN). Delivery under these schemes is part of how care is provided to patients. As such CQUIN and BPT payments are not considered distinct performance obligations in their own right; instead they form part of the transaction price for performance obligations under the overall contract with the commissioner and are accounted for as variable consideration under IFRS 15. Payment for CQUIN and BPT on non-elective services is included in the fixed element of API contracts with adjustments for actual achievement being made at the end of the year. BPT earned on elective activity is included in the variable element of API contracts and paid in line with actual activity performed.

Where the relationship with a particular integrated care board is expected to be a low volume of activity (annual value below £0.5m), an annual fixed payment is received by the provider as determined in the NHSPS documentation. Such income is classified as 'other clinical income' in these accounts.

Elective recovery funding provides additional funding to integrated care boards to fund the commissioning of elective services within their systems. Trusts do not directly earn elective recovery funding, instead earning income for actual activity performed under API contract arrangements as explained above. The level of activity delivered by the trust contributes to system performance and therefore the availability of funding to the trust's commissioners.

Mental health provider collaboratives

NHS led provider collaboratives for specialised mental health, learning disability and autism services involve a lead NHS provider taking responsibility for managing services, care pathways and specialised commissioning budgets for a population. Lead providers are accountable to NHS England and as such recognise the income and expenditure associated with the commissioning of services from other NHS and non NHS providers. Transactions for commissioning of services between NHS providers are eliminated within these accounts.

Revenue from research contracts

Where research contracts fall under IFRS 15, revenue is recognised as and when performance obligations are satisfied. For some contracts, NHS providers assess that the research project constitutes one performance obligation over the course of the multi-year contract. In many cases it is assessed that the provider's interim performance does not create an asset with alternative use for the provider, and the provider has an enforceable right to payment for the performance completed to date. It is therefore considered that the performance obligation is satisfied over time, and the provider recognises revenue each year over the course of the contract. Some research income alternatively falls within the provisions of *IAS 20 Accounting for Government grants*.

NHS injury cost recovery scheme

NHS providers receive income under the NHS injury cost recovery scheme, designed to reclaim the cost of treating injured individuals to whom personal injury compensation has subsequently been paid, for instance by an insurer. Providers recognise the income when performance obligations are satisfied. In practical terms this means that treatment has been given, they receive notification from the Department of Work and Pensions' Compensation Recovery Unit, have completed the NHS2 form and have confirmed there are no discrepancies with the treatment. The income is measured at the agreed tariff for the treatments provided to the injured individual, less an allowance for unsuccessful compensation claims and doubtful debts in line with *IFRS 9 Financial instruments* requirements of measuring expected credit losses over the lifetime of the asset.

Note 1.3 Other forms of income

Grants and donations

Government grants are grants from Government bodies other than income from commissioners for the provision of services. Where a grant is used to fund revenue expenditure it is credited to operating income to match that expenditure. Where the grant is used to fund capital expenditure, it is credited to the Consolidated Statement of Comprehensive Income once conditions attached to the grant have been met. Donations are treated in the same way as government grants.

Apprenticeship service income

The value of the benefit received when accessing funds from the Government's apprenticeship service is recognised as income at the point of receipt of the training service. Where these funds are paid directly to an accredited training provider from the NHS provider's apprenticeship service account held by the Department for Education, the corresponding notional expense is also recognised at the point of recognition for the benefit.

Note 1.4 Expenditure on employee benefits

Short-term employee benefits

Salaries, wages and employment-related payments, such as social security costs and the apprenticeship levy, are recognised in the period in which the service is received from employees. The cost of annual leave entitlement earned but not taken by employees at the end of the period is recognised in the financial statements to the extent that employees are permitted to carry-forward leave into the following period.

NHS pension scheme

Past and present employees are covered by the provisions of two NHS Pension Schemes. Details of the benefits payable and rules of the schemes can be found on the NHS Pensions website at www.nhsbsa.nhs.uk/pensions. Both the 1995/2008 and 2015 schemes are accounted for, and the scheme liability valued, as a single combined scheme. Both are unfunded, defined benefit schemes that cover NHS employers, general practices and other bodies, allowed under the direction of the Secretary of State for Health and Social Care in England and Wales. The scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, the scheme is accounted for as a defined contribution scheme: the cost to the NHS body of participating in the scheme is taken as equal to the employers' pension contributions payable to the scheme for the accounting period and charged to operating expenditure.

Additional pension liabilities arising from early retirements are not funded by the scheme except where the retirement is due to ill-health. The full amount of the liability for the additional costs is charged to operating expenses at the time of committing to the retirement, regardless of the method of payment.

In order that the defined benefit obligations recognised in the financial statements of the NHS Pension Schemes do not differ materially from those that would be determined at the reporting date by a formal actuarial valuation, the FReM requires that "the period between formal valuations shall be four years, with approximate assessments in intervening years". An outline of these follows:

a) Accounting valuation

A valuation of scheme liability is carried out annually by the scheme actuary (currently the Government Actuary's Department) as at the end of the reporting period. This utilises an actuarial assessment for the previous accounting period in conjunction with updated membership and financial data for the current reporting period, and is accepted as providing suitably robust figures for financial reporting purposes. The valuation of scheme liability as at 31 March 2025 is based on valuation data as 31 March 2023, updated to 31 March 2025 with summary global member and accounting data. In undertaking this actuarial assessment, the methodology prescribed in IAS 19, relevant FReM interpretations, and the discount rate prescribed by HM Treasury have also been used.

The latest assessment of the liabilities of the scheme is contained in the Statement by the actuary, which forms part of the NHS Pension Scheme (England and Wales) Annual Report and Accounts. These accounts can be viewed on the NHS Pensions website and are published annually. Copies can also be obtained from The Stationery Office.

b) Full actuarial (funding) valuation

The purpose of this valuation is to assess the level of liability for the benefits due under the schemes (taking into account their recent demographic experience), and to recommend contribution rates payable by employees and employers.

The latest actuarial valuation undertaken for the NHS Pension Scheme was completed as at 31 March 2020. The results of this valuation set the employer contribution rate payable from April 2024 to 23.7% of pensionable pay (previously 20.6%). The core cost cap of the scheme was calculated to be outside of the 3% cost cap corridor as at 31 March 2020. However, when the wider economic situation was taken into account through the economic cost cap cost of the scheme, the cost cap corridor was not similarly breached. As a result, there was no impact on the member benefit structure or contribution rates.

The 2024 actuarial valuation is currently being prepared and will be published before new contribution rates are implemented from April 2027.

Other pension schemes

Local Government Pension Scheme

Some NHS providers employ staff who are members of the Local Government Pension Scheme ('LGPS') which is a defined benefit pension scheme, administered locally through local pension funds. Where an NHS provider is able to identify its share of the underlying scheme assets and liabilities these are recognised as a defined benefit pension scheme ('on Statement of Financial Position') by the provider and are consolidated here. As provider interests in such pension funds are not material to this consolidation, detailed disclosures on movements in scheme assets and liabilities are not disclosed in these accounts but can be found in the accounts of individual NHS providers.

The assets are measured at fair value and the liabilities at the present value of future obligations. The increase in the liability arising from pensionable service earned during the year is recognised within operating expenses. The expected gain during the year from scheme assets is recognised within finance income. The net interest cost during the year arising from the unwinding of the discount on the net scheme liabilities is recognised within finance costs.

Remeasurements of the defined benefit plan are recognised as 'other comprehensive income' in the Consolidated Statement of Comprehensive Income.

Where an NHS provider is unable to identify its share of the underlying scheme liabilities these are accounted for as defined contribution pension schemes ('off Statement of Financial Position') and employer contributions are charged to expenditure as they fall due. Seven NHS providers recognise LGPS schemes in this way.

Other pension schemes

Some NHS providers have employees who are members of defined benefit pension schemes other than the NHS Pension Scheme and the Local Government Pension Scheme. Where an NHS provider is able to identify its share of the underlying scheme liabilities these are recognised as a defined benefit pension scheme ('on Statement of Financial Position'). Otherwise, these are recognised as defined contribution pension schemes ('off Statement of Financial Position').

There are currently no defined benefit pension arrangements accounted for 'on Statement of Financial Position' by NHS providers apart from LGPS schemes.

Defined contribution pension schemes

Some NHS providers have employees who are members of defined contribution pension schemes. In accounting for these schemes trusts recognise expenditure for employer contributions as they fall due. The National Employment Savings Trust (NEST) is a common example of such a scheme.

Note 1.5 Expenditure on other goods and services

Expenditure on goods and services is recognised when, and to the extent that they have been received and is measured at the fair value of those goods and services. Expenditure is recognised in operating expenses except where it results in the creation of a non-current asset such as property, plant and equipment.

Note 1.6 Discontinued operations

Discontinued operations occur where activities either cease without transfer to another entity, or transfer to an entity outside of the boundary of the Whole of Government Accounts, such as private or voluntary sectors. Such activities are accounted for in accordance with *IFRS 5 Non-current assets held for sale and discontinued operations*. Activities that are transferred to other bodies within the boundary of the Whole of Government Accounts are 'machinery of government changes' and treated as continuing operations.

Note 1.7 Property, plant and equipment

Recognition

Property, plant and equipment is capitalised where:

- it is held for use in delivering services or for administrative purposes;
- it is probable that future economic benefits will flow to, or service potential be provided to, a trust;
- it is expected to be used for more than one financial year;
- the cost of the item can be measured reliably; and
- the item has cost of at least £5,000; or
- collectively, a number of items have a cost of at least £5,000 and individually have cost of more than £250, where the assets are functionally interdependent, had broadly simultaneous purchase dates, are anticipated to have similar disposal dates and are under single managerial control.

Where a large asset, for example a building, includes a number of components with significantly different asset lives, eg plant and equipment, then these components are treated as separate assets and depreciated over their own useful economic lives.

Subsequent expenditure

Subsequent expenditure relating to an item of property, plant and equipment is recognised as an increase in the carrying amount of the asset when it is probable that additional future economic benefits or service potential deriving from the cost incurred to replace a component of such item will flow to a trust and the cost of the item can be determined reliably. Where a component of an asset is replaced, the cost of the replacement is capitalised if it meets the criteria for recognition above. The carrying amount of the part replaced is de-recognised. Other expenditure that does not generate additional future economic benefits or service potential, such as repairs and maintenance, is charged to the Consolidated Statement of Comprehensive Income in the period in which it is incurred.

Measurement

Valuation

All property, plant and equipment assets are measured initially at cost, representing the costs directly attributable to acquiring or constructing the asset and bringing it to the location and condition necessary for it to be capable of operating in the manner intended by management.

Assets are measured subsequently at valuation. Assets which are held for their service potential and are in use (ie operational assets used to deliver either front line services or back office functions) are measured at their current value in existing use. Assets that were most recently held for their service potential but are surplus with no plan to bring them back into use are measured at fair value where there are no restrictions on sale at the reporting date and where they do not meet the definitions of investment properties or assets held for sale.

Current values in existing use are determined as follows:

- Land and non-specialised buildings – market value in existing use
- Specialised buildings – depreciated replacement cost on a modern equivalent asset basis.

For specialised assets, current value in existing use is interpreted as the present value of the asset's remaining service potential, which is assumed to be at least equal to the cost of replacing that service potential. In line with the GAM, specialised assets are therefore valued as their depreciated replacement cost (DRC) on a modern equivalent asset (MEA) basis. This valuation method therefore applies to the majority of NHS providers' property asset base. The MEA method assumes that the existing asset would be replaced with a modern asset of equivalent capacity and function. This asset need not be restricted to the current location and thus, where it would meet the contractual location requirements of the service being provided, an alternative site may instead be used as the basis of valuation. It is for individual NHS providers to determine whether the alternative site approach is appropriate when undertaking an MEA based valuation.

Revaluations of property, plant and equipment are performed with sufficient regularity to ensure that carrying values are not materially different from those that would be determined at the end of the reporting period.

Note 1.24 explains some estimation uncertainties relating to property valuations and explores the impact of these on these consolidated accounts.

Valuation guidance issued by the Royal Institution of Chartered Surveyors (RICS) states that valuations are performed net of VAT where the VAT is recoverable by the entity. This commonly applies to schemes procured under a Private Finance Initiative (PFI), where the construction is completed by a special purpose vehicle and the costs have recoverable VAT for a trust.

Properties in the course of construction for service or administration purposes are carried at cost, less any impairment loss. Cost includes professional fees and, where capitalised in accordance with IAS 23, borrowing costs. Assets are revalued and depreciation commences when the assets are brought into use.

IT equipment, transport equipment, furniture and fittings, and plant and machinery that are held for operational use are valued at depreciated historic cost where these assets have short useful lives or low values or both, as this is not considered to be materially different from current value in existing use.

Depreciation

Items of property, plant and equipment are depreciated over their remaining useful economic lives in a manner consistent with the consumption of economic or service delivery benefits. Land is considered to have an infinite life and is not depreciated.

Property, plant and equipment which has been reclassified as 'held for sale' ceases to be depreciated upon the reclassification. Assets in the course of construction and residual interests in off-Statement of Financial Position Private Finance Initiative (PFI) contract assets are not depreciated until the asset is brought into use or reverts to the trust, respectively.

Revaluation gains and losses

Revaluation gains are recognised in the revaluation reserve, except where, and to the extent that, they directly relate to a revaluation decrease that has previously been recognised in operating expenses, in which case they are reversed in operating expenditure. Revaluation losses are charged to the revaluation reserve to the extent that there is an available balance for the asset concerned, and thereafter are charged to operating expenses.

Gains and losses recognised in the revaluation reserve are reported in the Consolidated Statement of Comprehensive Income as an item of 'other comprehensive income'.

Impairments

In accordance with the GAM, impairments that arise from a clear consumption of economic benefits or of service potential in the asset are charged to operating expenses. A compensating transfer is made from the revaluation reserve to the income and expenditure reserve of an amount equal to the lower of (i) the impairment charged to operating expenses; and (ii) the balance in the revaluation reserve attributable to that asset before the impairment.

An impairment that arises from a clear consumption of economic benefit or of service potential is reversed when, and to the extent that, the circumstances that gave rise to the loss is reversed. Reversals are recognised in operating expenditure to the extent that the asset is restored to the carrying amount it would have had if the impairment had never been recognised. Any remaining reversal is recognised in the revaluation reserve. Where, at the time of the original impairment, a transfer was made from the revaluation reserve to the income and expenditure reserve, an amount is transferred back to the revaluation reserve when the impairment reversal is recognised.

Other impairments are treated as revaluation losses. Reversals of 'other impairments' are treated as revaluation gains.

De-recognition

Assets intended for disposal are reclassified as 'held for sale' once the criteria in *IFRS 5 Non-current assets held for sale and discontinued operations* are met. The sale must be highly probable and the asset available for immediate sale in its present condition.

Following reclassification, the assets are measured at the lower of their existing carrying amount and their 'fair value less costs to sell'. Depreciation ceases to be charged and the assets are not revalued, except where the 'fair value less costs to sell' falls below the carrying amount. Assets are de-recognised when all material sale contract conditions have been met.

Property, plant and equipment which is to be scrapped or demolished does not qualify for recognition as 'held for sale' and instead is retained as an operational asset and the asset's economic life is adjusted. The asset is de-recognised when scrapping or demolition occurs.

Donated, government grant and other grant funded assets

Donated and grant funded property, plant and equipment assets are capitalised at their current valuation on receipt. The donation/grant is credited to income at the same time, unless the donor has imposed a condition that the future economic benefits embodied in the grant are to be consumed in a manner specified by the donor, in which case, the donation/grant is deferred within liabilities and is carried forward to future financial years to the extent that the condition has not yet been met.

The donated and grant funded assets are subsequently accounted for in the same manner as other items of property, plant and equipment.

Private finance initiative (PFI) and Local Improvement Finance Trust (LIFT) transactions

PFI and LIFT transactions which meet the IFRIC 12 definition of a service concession, as interpreted in HM Treasury's *FReM*, are accounted for as 'on-Statement of Financial Position' by NHS providers. Annual contract payments to the operator (the unitary charge) are apportioned between the repayment of the liability including the finance cost, charges for services and lifecycle replacement of components of the asset.

Initial recognition

In accordance with the *FReM*, the underlying assets are initially recognised as property, plant and equipment, together with an equivalent liability. Initial measurement of the asset and liability are in accordance with the initial measurement principles of IFRS 16 (see leases accounting policy).

Subsequent measurement

Assets are subsequently accounted for as property, plant and equipment and/or intangible assets as appropriate.

The liability is subsequently reduced by the portion of the unitary charge allocated as payment for the asset and increased by the annual finance cost. The finance cost is calculated by applying the implicit interest rate to the opening liability and is charged to finance costs in the Statement of Comprehensive Income. The element of the unitary charge allocated as payment for the asset is split between payment of the finance cost and repayment of the net liability.

Where there are changes in future payments for the asset resulting from indexation of the unitary charge, the Trust remeasures the PFI liability by determining the revised payments for the remainder of the contract once the change in cash flows takes effect. The remeasurement adjustment is charged to finance costs in the Statement of Comprehensive Income.

The service charge is recognised in operating expenses and the finance cost is charged to finance costs in the Consolidated Statement of Comprehensive Income. Lifecycle maintenance spend is charged to operating expenses or capitalised as property, plant and equipment depending upon the nature of the expenditure.

Initial application of IFRS 16 liability measurement principles to PFI and LIFT liabilities in 2023/24

IFRS 16 liability measurement principles were applied to PFI, LIFT and other service concession arrangement liabilities in these financial statements from 1 April 2023. The change in measurement basis was applied using a modified retrospective approach with the cumulative impact of remeasuring the liability on 1 April 2023 recognised in the income and expenditure reserve.

Useful lives of property, plant and equipment

Useful lives assigned to categories of property, plant and equipment vary between NHS providers according to specific local circumstances. The ranges of useful lives across the sector are:

	Min life Years	Max life Years
Buildings, excluding dwellings	1	169
Dwellings	1	122
Plant & machinery	1	35
Transport equipment	1	20
Information technology	1	22
Furniture & fittings	1	45

Land is not depreciated by NHS providers and so is not included in the above table.

Useful lives reflect the total life of an asset and not the remaining life of an asset. The figures disclosed here are the minimum and maximum used across the provider sector for each category of asset.

Note 1.24 provides further information on the sensitivity of these estimated useful lives.

Note 1.8 Intangible assets

Recognition

Intangible assets are non-monetary assets without physical substance controlled by the Trust. They are capable of being sold separately from the rest of a trust's business or arise from contractual or other legal rights. Intangible assets are recognised only where it is probable that future economic benefits will flow to, or service potential be provided to, the trust and where the cost of the asset can be measured reliably.

Internally generated intangible assets

Internally generated goodwill, brands, mastheads, publishing titles, customer lists and similar items are not capitalised as intangible assets.

Expenditure on research is not capitalised. Expenditure on development is capitalised when it meets the requirements set out in *IAS 38 Intangible assets*.

Software

Software which is integral to the operation of hardware, eg an operating system, is capitalised as part of the relevant item of property, plant and equipment. Software which is not integral to the operation of hardware, eg application software, is capitalised as an intangible asset where it meets recognition criteria.

Measurement

Intangible assets are recognised initially at cost, comprising all directly attributable costs needed to create, produce and prepare the asset to the point that it is capable of operating in the manner intended by management.

Subsequently intangible assets are measured at current value in existing use. Where no active market exists, intangible assets are valued at the lower of depreciated replacement cost and the value in use where the asset is income generating. Revaluation gains and losses and impairments are treated in the same manner as for property, plant and equipment. Assets that were most recently held for their service potential but are surplus with no plan to bring them back into use are measured at fair value where there are no restrictions on sale at the reporting date and where they do not meet the definition of an asset held for sale.

Intangible assets 'held for sale' are measured at the lower of their carrying amount or 'fair value less costs to sell'.

Amortisation

Intangible assets are amortised over their expected useful lives in a manner consistent with the consumption of expected economic or service delivery benefits.

Useful lives of intangible assets

Useful lives assigned to categories of intangible asset vary between NHS providers according to specific local circumstances. The range of useful lives across the sector is:

	Min life Years	Max life Years
Intangible assets - internally generated		
Information technology	1	21
Development expenditure	1	20
Websites	1	10
Intangible assets - purchased		
Software	1	20
Licences & trademarks	1	20
Other	1	21

Useful lives reflect the total life of an asset and not the remaining life of an asset. The figures disclosed here are the minimum and maximums used across the provider sector for each category of asset.

Note 1.9 Investment properties

Investment properties are measured at fair value. Changes in fair value are recognised as gains or losses in income/expenditure.

Only those assets which are held solely to generate a commercial return are considered to be investment properties. Where an asset is held, in part, for support service delivery objectives, then it is considered to be an item of property, plant and equipment. Properties occupied by employees, whether or not they pay rent at market rates, are not classified as investment properties.

Note 1.10 Leases

A lease is a contract or part of a contract that conveys the right to use an asset for a period of time in exchange for consideration. An adaptation of the relevant accounting standard by HM Treasury for the public sector means that for NHS bodies, this includes lease-like arrangements with other public sector entities that do not take the legal form of a contract. It also includes peppercorn leases where consideration paid is nil or nominal (significantly below market value) but in all other respects meet the definition of a lease. NHS providers do not apply lease accounting to new contracts for the use of intangible assets.

A trust determines the lease term with reference to the non-cancellable period and any options to extend or terminate the lease which the trust is reasonably certain to exercise.

NHS providers as lessees

Initial recognition and measurement

At the commencement date of the lease, being when the asset is made available for use, providers recognise a right of use asset and a lease liability.

The right of use asset is recognised at cost comprising the lease liability, any lease payments made before or at commencement, any direct costs incurred by the lessee, less any cash lease incentives received. It also includes any estimate of costs to be incurred restoring the site or underlying asset on completion of the lease term.

The lease liability is initially measured at the present value of future lease payments discounted at the interest rate implicit in the lease. Lease payments includes fixed lease payments, variable lease payments dependent on an index or rate and amounts payable under residual value guarantees. It also includes amounts payable for purchase options and termination penalties where these options are reasonably certain to be exercised.

Where an implicit rate cannot be readily determined, a provider's incremental borrowing rate is applied. This rate is determined by HM Treasury annually for each calendar year. A nominal rate of 4.72% applied to new leases commencing in 2024 and 4.81% to new leases commencing in 2025.

Providers do not apply the above recognition requirements to leases with a term of 12 months or less or to leases where the value of the underlying asset is below £5,000, excluding any irrecoverable VAT. Lease payments associated with these leases are expensed on a straight line or other systematic basis over the lease term. Irrecoverable VAT on lease payments is expensed as it falls due.

Subsequent measurement

As required by a HM Treasury interpretation of the accounting standard for the public sector, the providers employ a revaluation model for subsequent measurement of right of use assets, unless the cost model is considered to be an appropriate proxy for current value in existing use or fair value, in line with the accounting policy for owned assets. Where consideration exchanged is identified as significantly below market value, the cost model is not considered to be an appropriate proxy for the value of the right of use asset.

Providers subsequently measure the lease liability by increasing the carrying amount for interest arising which is also charged to expenditure as a finance cost and reducing the carrying amount for lease payments made. The liability is also remeasured for changes in assessments impacting the lease term, lease modifications or to reflect actual changes in lease payments. Such remeasurements are also reflected in the cost of the right of use asset. Where there is a change in the lease term or option to purchase the underlying asset, an updated discount rate is applied to the remaining lease payments.

NHS providers as lessors

Providers assess each of their leases and classify them as either finance leases or operating leases. Leases are classified as finance leases when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases.

Where a provider is an intermediate lessor, classification of the sublease is determined with reference to the right of use asset arising from the headlease.

Finance leases

Amounts due from lessees under finance leases are recorded as receivables at the amount of the provider's net investment in the leases. Finance lease interest income is allocated to accounting periods to reflect a constant periodic rate of return on the provider's net investment.

Operating leases

Income from operating leases is recognised on a straight-line basis or another systematic basis over the term of the lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense on a straight-line basis over the lease term.

Note 1.11 Inventories

Inventories are valued at the lower of cost and net realisable value. NHS providers measure the cost of inventories using either a first in first out (FIFO) method or the weighted average cost method.

Note 1.12 Financial assets and financial liabilities

Recognition

Financial assets and financial liabilities arise where providers are party to the contractual provisions of a financial instrument, and as a result have a legal right to receive or a legal obligation to pay cash or another financial instrument. The GAM expands the definition of a contract to include legislation and regulations which give rise to arrangements that in all other respects would be a financial instrument and do not give rise to transactions classified as a tax by ONS.

This includes the purchase or sale of non-financial items (such as goods or services), which are entered into in accordance with the provider's normal purchase, sale or usage requirements and are recognised when, and to the extent which, performance occurs, ie, when receipt or delivery of the goods or services is made.

Classification and measurement

Financial assets and financial liabilities are initially measured at fair value plus or minus directly attributable transaction costs except where the asset or liability is measured at fair value through income and expenditure. Fair value is taken as the transaction price, or otherwise determined by reference to quoted market prices or valuation techniques.

Financial assets or financial liabilities in respect of assets acquired or disposed of through leasing arrangements are recognised and measured in accordance with the accounting policy for leases described in note 1.10.

Financial assets are subsequently measured at amortised cost, fair value through income and expenditure or fair value through other comprehensive income.

Financial liabilities are subsequently measured at amortised cost or fair value through income and expenditure.

Financial assets and financial liabilities at amortised cost

Financial assets at amortised cost are those where cash flows are solely payments of principal and interest. Financial assets and liabilities subsequently measured at amortised cost include cash equivalents, contract and other receivables, trade and other payables, rights and obligations under lease arrangements and loans receivable and payable.

After initial recognition, these financial assets and financial liabilities are measured at amortised cost using the effective interest method less any impairment (for financial assets). The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortised cost of a financial liability.

Interest revenue or expense is calculated by applying the effective interest rate to the gross carrying amount of a financial asset or amortised cost of a financial liability and recognised in the Consolidated Statement of Comprehensive Income as a financing income or expense. In the case of loans held from the Department of Health and Social Care, the effective interest rate is the nominal rate of interest charged on the loan.

Financial assets measured at fair value through other comprehensive income

Financial assets that are debt instruments are measured at fair value through other comprehensive income where business model objectives are met by both collecting contractual cash flows and selling financial assets and where the cash flows are solely payments of principal and interest. Movements in the fair value of financial assets in this category are recognised as gains or losses in other comprehensive income except for impairment losses. On derecognition, cumulative gains and losses previously recognised in other comprehensive income are reclassified from equity to income and expenditure.

In some cases providers have irrevocably elected to measure some equity instruments at fair value through other comprehensive income. This is not material to these consolidated accounts.

Financial assets and financial liabilities at fair value through income and expenditure

Financial assets measured at fair value through income and expenditure are those that are not otherwise measured at amortised cost or at fair value through other comprehensive income. This category also includes financial assets and liabilities acquired principally for the purpose of selling in the short term (held for trading) and derivatives. Derivatives which are embedded in other contracts, but which are separable from the host contract are measured within this category. Movements in the fair value of financial assets and liabilities in this category are recognised as gains or losses within surplus / (deficit) for the year.

In some cases providers have irrevocably elected to measure some financial assets at fair value through income and expenditure. This is not material to these consolidated accounts.

Impairment of financial assets

For all financial assets measured at amortised cost including lease receivables, contract receivables and contract assets or assets measured at fair value through other comprehensive income, providers recognise an allowance for expected credit losses.

Providers adopt the simplified approach to impairment for contract and other receivables, contract assets and lease receivables, measuring expected losses as at an amount equal to lifetime expected losses. For other financial assets, the loss allowance is initially measured at an amount equal to 12-month expected credit losses (stage 1) and subsequently at an amount equal to lifetime expected credit losses if the credit risk assessed for the financial asset significantly increases (stage 2).

For financial assets that have become credit impaired since initial recognition (stage 3), expected credit losses at the reporting date are measured as the difference between the asset's gross carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate.

Expected losses are charged to operating expenditure within the Consolidated Statement of Comprehensive Income and reduce the net carrying value of the financial asset in the Consolidated Statement of Financial Position.

De-recognition

Financial assets are de-recognised when contractual cash flows have been received or the provider has transferred substantially all the risks and rewards of ownership. A financial asset may also be written off when there is deemed no realistic prospect of recovery, at which point any loss in excess of credit loss allowances already recognised will be charged to operating expenditure.

Financial liabilities are de-recognised when the obligation is discharged, cancelled or expires.

Note 1.13 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank, in hand and cash equivalents. Cash equivalents are readily convertible investments of known value which are subject to an insignificant risk of change in value and usually mature within 3 months or less from the date of acquisition.

In the Statement of Cash Flows, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and that form an integral part of a trust's cash management. Cash, bank and overdraft balances are recorded at current values.

Note 1.14 Third party assets

Assets belonging to third parties in which a NHS provider has no beneficial interest (such as money held on behalf of patients) are not recognised in the accounts since an NHS provider has no beneficial interest in them. They are disclosed in a separate note to the accounts in accordance with the requirements of the FReM (see note 18.2 to the accounts).

Note 1.15 Provisions

An NHS provider recognises a provision where it has a present legal or constructive obligation of uncertain timing or amount; for which it is probable that there will be a future outflow of cash or other resources; and a reliable estimate can be made of the amount. The amount recognised in the Consolidated Statement of Financial Position is the best estimate of the resources required to settle the obligation.

Where the effect of the time value of money is significant, the estimated risk-adjusted cash flows are discounted using the HM Treasury's discount rates effective for 31 March 2025.

		<u>Nominal rate</u>	<u>Prior year rate</u>
Short-term	Up to 5 years	4.03%	4.26%
Medium-term	After 5 years up to 10 years	4.07%	4.03%
Long-term	After 10 years up to 40 years	4.81%	4.72%
Very long-term	Exceeding 40 years	4.55%	4.40%

HM Treasury provides discount rates for general provision on a nominal rate basis. Expected future cash flows are therefore adjusted for the impact of inflation before discounting using nominal rates. The following inflation rates are set by HM Treasury, effective 31 March 2025.

	<u>Inflation rate</u>	<u>Prior year rate</u>
Year 1	2.60%	3.60%
Year 2	2.30%	1.80%
Into perpetuity	2.00%	2.00%

Early retirement provisions and injury benefit provisions both use the HM Treasury’s post employment benefits discount rate of 2.40% in real terms (2.45% at 31 March 2024).

Clinical negligence costs

NHS Resolution operates a risk pooling scheme under which an NHS provider pays an annual contribution to NHS Resolution, which, in return, settles all clinical negligence claims. Although NHS Resolution is administratively responsible for all clinical negligence cases, the legal liability remains with an NHS provider. The total value of clinical negligence provisions carried by NHS Resolution on behalf of NHS providers is disclosed at note 22.3.

Non-clinical risk pooling

NHS providers can participate in the Property Expenses Scheme and the Liabilities to Third Parties Scheme. Both are risk pooling schemes under which an NHS provider pays an annual contribution to NHS Resolution and, in return, receives assistance with the costs of claims arising. The annual membership contributions, and any ‘excesses’ payable in respect of particular claims are charged to operating expenses when the liability arises.

Note 1.16 Contingencies

Contingent assets (that is, assets arising from past events whose existence will only be confirmed by one or more future events not wholly within the entity’s control) are not recognised as assets, but are disclosed in note 23 where an inflow of economic benefits is probable.

Contingent liabilities are not recognised in the statement of financial position, but are disclosed in note 23. Contingent liabilities are defined as:

- possible obligations arising from past events whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the entity’s control; or
- present obligations arising from past events but for which it is not probable that a transfer of economic benefits will arise or for which the amount of the obligation cannot be measured with sufficient reliability.

Note 1.17 Public dividend capital

Public dividend capital (PDC) is a type of public sector equity finance based on the excess of assets over liabilities at the time of establishment of the NHS trust or predecessor NHS trust in the case for NHS foundation trusts. The Secretary of State can issue new PDC to, and require repayments of PDC from NHS providers. HM Treasury has determined that PDC is not a financial instrument within the meaning of *IAS 32 Financial instruments: presentation*. PDC is recorded at the value received.

A charge, reflecting the cost of capital utilised by the trust, is payable as public dividend capital dividend. The charge is calculated at the rate set by HM Treasury (currently 3.5%) on the average relevant net assets of the trust during the financial year. Relevant net assets are calculated as the value of all assets less the value of all liabilities, with certain additions and deductions as defined in the PDC dividend policy issued by the Department of Health and Social Care. This policy is available at <https://www.gov.uk/government/publications/guidance-on-financing-available-to-nhs-trusts-and-foundation-trusts>.

In accordance with the requirements laid down by the Department of Health and Social Care (as the issuer of PDC), the dividend for the year is calculated on the actual average relevant net assets as set out in the “pre-audit” version of the annual accounts. The dividend thus calculated is not revised should any adjustment to net assets occur as a result of the audit of the annual accounts.

Note 1.18 Value added tax

Most of the activities of NHS providers are outside the scope of VAT and, in general, output tax does not apply and input tax on purchases is not recoverable. Irrecoverable VAT is charged to the relevant expenditure category or included in the capitalised purchase cost of fixed assets. Where output tax is charged or input VAT is recoverable, the amounts are stated net of VAT. Where an NHS provider consolidates the activities of a subsidiary, these activities may be within the scope of VAT rules.

Note 1.19 Corporation tax

Under the Corporation Tax Act 2010 NHS trusts are exempt from corporation tax. NHS foundation trusts are also generally exempt except HM Treasury may make an order to make specified foundation trust commercial activity liable to corporation tax. We are not aware of any such order. NHS providers may also incur corporation tax charges through subsidiaries which are consolidated into their financial statements.

Corporation tax expense recognised in these financial statements represents the sum of the tax currently payable and deferred tax.

Current tax is the expected tax payable on the taxable surpluses generated during the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustments to tax payable in respect of previous years.

Note 1.20 Climate change levy

Expenditure on the climate change levy is recognised in the Consolidated Statement of Comprehensive Income as incurred, based on the prevailing chargeable rates for energy consumption.

Note 1.21 Foreign exchange

The functional and presentation currency of NHS providers is sterling. A transaction which is denominated in a foreign currency is translated into the functional currency at the spot exchange rate on the date of the transaction.

Where an NHS provider has assets or liabilities denominated in a foreign currency at the reporting date:

- monetary items (other than financial instruments measured at 'fair value through income and expenditure') are translated at the spot exchange rate on 31 March;
- non-monetary assets and liabilities measured at historical cost are translated using the spot exchange rate at the date of the transaction; and
- non-monetary assets and liabilities measured at fair value are translated using the spot exchange rate at the date the fair value was determined.

Exchange gains or losses on monetary items (arising on settlement of the transaction or on re-translation at the reporting date) are recognised as income or expense in the period in which they arise. Exchange gains or losses on non-monetary assets and liabilities are recognised in the same manner as other gains and losses on these items.

Note 1.22 Losses and special payments

Losses and special payments are items that Parliament would not have contemplated when it agreed funds for the health service or passed legislation. By their nature they are items that ideally would not arise. They are therefore subject to special control procedures compared with the generality of payments. They are divided into different categories, which govern the way that individual cases are handled. Losses and special payments are charged to the relevant functional headings in expenditure on an accruals basis.

Losses and special payments notes within individual NHS provider financial statements are compiled directly from each trust's losses and compensations register which reports on an accruals basis without provisions for future losses.

Note 1.23 Going concern

HM Treasury's Financial Reporting Manual (FReM) defines that a public sector body that is not classified as a trading entity will be a going concern where there is the anticipated continuation of the provision of services in the future. The same definition is applied by NHS providers in preparing their financial statements. All NHS provider financial statements have been prepared on a going concern basis in 2024/25. NHS England has prepared these consolidated financial statements on a going concern basis which reflects the basis on which the underlying accounts have been prepared with the sector having no material uncertainty to disclose. This is consistent with the current and future funding confirmed for the NHS by Parliament and the Government.

Note 1.24 Critical accounting judgements and key sources of estimation uncertainty

These consolidated NHS provider accounts reflect the following accounting judgements made either by NHS England or individual NHS providers:

- Intra-group transactions and balances between NHS providers are eliminated upon consolidation. Where differences are identified in the amounts recorded, adjustments are made to these amounts to ensure all intra-group balances eliminate. Any difference between these amounts and the amounts recognised as expenditure and payables are not further adjusted as these net amounts are not material. We are satisfied that the gross mismatches which net together to this immaterial position do not constitute a material error.
- These consolidated accounts are prepared on a going concern basis as detailed within accounting policy 1.23.
- Individual NHS providers apply judgement in their application of the nationally prescribed accounting policies set out in the DHSC GAM.

The following are the key sources of estimation uncertainty:

- Measurement of specialised non-current assets: Property plant and equipment is measured using the revaluation model in IAS 16 Property, plant and equipment as set out in accounting policy 1.7. This measurement basis also applies to right of use assets unless cost is deemed to be an appropriate proxy for valuation as detailed in accounting policy 1.10. In applying RICS guidance to valuing an asset, the valuation used by the NHS provider will depend on the local assumptions and data used, including the floor area for assets. For a specialised asset valued on a depreciated replacement cost (DRC) basis as a modern equivalent asset (MEA), this includes the assumption of whether 'alternative site' or 'no alternative site' is used for the valuation. Further, RICS guidance says that valuations should be stated net of VAT where VAT would be recoverable on the cost of replacing the service potential. Whether this is applicable in each local valuation is a matter of local judgement, with guidance on the parameters for this judgement provided in the DHSC GAM. The accounting policy of DRC:MEA is applied consistently for specialised assets across NHS providers, but local valuation assumptions may have material effects on each local valuation.
- Useful lives of PPE: as shown in note 14.1, property plant and equipment (PPE) is material to these consolidated accounts. In note 1.7 we disclose, for each category of PPE, the lowest minimum and the highest maximum in the ranges of useful lives used by providers. Useful lives are the period over which assets are depreciated. We do not collect information from providers on average useful lives, but in taking the median average lowest and median average highest, and the mean average of those, an approximate average can be computed to assess the impact of the accounting estimates.

As shown in note 14.1, buildings and plant & equipment depreciation comprise 46% and 29% of total PPE depreciation charged in-year respectively. Utilising the methodology outlined above, a very approximate average useful life in these categories is 39 years and 10 years respectively. In average terms, making all asset lives one year shorter would increase the annual depreciation charge by approximately £40 million for buildings and £108 million for plant & machinery. This is not material. Based on a materiality of £1.3 billion, nine times this 'one year effect' would be required to lead to a material error based on these approximate averages.

The depreciation charge in these accounts comprises the depreciation charges in each provider's accounts, which in themselves relate to many assets. It is therefore not possible to thoroughly interrogate this accounting estimate upon consolidation, but given the impact locally each provider's accounting estimates in this area are subject to review by each local external auditor.

- Measurement of lease liabilities and right of use assets for lease-like arrangements with public sector entities that do not take the legal form of a contract: In accordance with accounting policy 1.10, where formal documentation does not exist for a lease-like arrangement with a public sector body, providers must calculate lease liabilities and initial right of use asset values with reference to an expected lease term. Providers will estimate expected lease term based on the commercial reality of the arrangement and current plans for estates and service provision. This increases the estimation uncertainty in the measurement of these balances. For example, if a lease term was assessed at 25 years instead of 20 years for a lease commencing in 2025, this would result in a 13% increase in the liability and asset on initial recognition. The bases for such judgements are subject to review by each local external auditor.

Critical accounting estimates and judgements made in the preparation of individual NHS provider accounts are disclosed locally by each NHS provider.

Note 1.25 Early adoption of standards, amendments and interpretations

The consolidated NHS provider accounts have not adopted any IFRSs, amendments or interpretations early.

Note 1.26 Standards, amendments and interpretations in issue but not yet effective or adopted

IAS 8 Accounting policies, changes in accounting estimates and errors, requires disclosure in respect of new IFRSs, amendments and interpretations that are, or will be, applicable after the accounting period. There are a number of IFRSs, amendments and interpretations issued by the International Accounting Standards Board that are effective for financial statements after this accounting period. The UK Endorsement Board is responsible for deciding which international accounting standards are adopted for use in the UK. The Financial Reporting Advisory Board considers the extent to which UK-adopted standards are meaningful and appropriate in the public sector context prior to adoption into the HM Treasury FReM.

Standard	Description of amendment	Effective date
<i>Standards, amendments or interpretations issued and effective from 2025/26:</i>		
IFRS 17 Insurance contracts	Establishes a consistent set of principles for the recognition, measurement, presentation and disclosure of insurance contracts. Replaces <i>IFRS 4 Insurance contracts</i> .	Adopted in the UK public sector from 1 April 2025.
<i>Standards, amendments or interpretations issued and effective for later periods:</i>		
Amendments to IFRS 7 and IFRS 9 - classification and measurement	Includes clarifications over the timing of derecognition where settled by electronic transfer and classification of financial assets with environmental, social or corporate governance features.	UK-adopted and effective for periods starting on or after 1 January 2026. Not yet adopted for the public sector.
Annual improvements (volume 11)	Minor clarifications to IFRS 1, 7, 9, 10 and IAS 7.	UK-adopted and effective for periods starting on or after 1 January 2026. Not yet adopted for the public sector.
Amendments to IFRS 7 and IFRS 9 - nature dependent electricity contracts	Targeted amendments in relation to reporting the financial effects of nature-dependent electricity contracts.	UK-adopted and effective for periods starting on or after 1 January 2026. Not yet adopted for the public sector.
IFRS 18 Presentation and Disclosures in Financial Statements	New requirements for presentation and disclosure in the financial statements, with a focus on the income statement.	Standard effective for periods on or after 1 January 2027. Not yet endorsed for use in the UK
IFRS 19 Subsidiaries without Public Accountability: Disclosures	Voluntary reduced disclosure framework for use by eligible subsidiaries that prepare financial statements applying IFRS.	Standard effective for periods on or after 1 January 2027. Not yet endorsed for use in the UK

None of these new or amended standards are expected to have a material impact on the consolidated NHS provider accounts in future accounting periods.

Changes to non-investment asset valuation for public sector entities

In addition to new standards and revisions issued by the IASB, following a thematic review of non-current asset valuations for financial reporting in the public sector, HM Treasury has made a number of changes to valuation frequency, valuation methodology and classification which are effective in the public sector from 1 April 2025 with a 5 year transition period. NHS bodies are adopting these changes to an alternative timeline.

Changes to subsequent measurement of intangible assets and PPE classification / terminology to be implemented for NHS bodies from 1 April 2025:

- Withdrawal of the revaluation model for intangible assets. Carrying values of existing intangible assets measured under a previous revaluation will be taken forward as deemed historic cost.
- Removal of the distinction between specialised and non-specialised assets held for their service potential. Assets will be classified according to whether they are held for their operational capacity.

These changes are not expected to have a material impact on these financial statements.

Changes to valuation cycles and methodology to be implemented for NHS bodies in later periods:

- A mandated quinquennial revaluation frequency (or rolling programme) supplemented by annual indexation in the intervening years.
- Removal of the alternative site assumption for buildings valued at depreciated replacement cost on a modern equivalent asset basis. The approach for land has not yet been finalised by HM Treasury.

The impact of applying these changes in future periods has not yet been assessed. Property assets (both owned and right of use) routinely subject to revaluation have a total book value of £52,215 million as at 31 March 2025. Assets valued on an alternative site basis have a total book value of £26,220 million at 31 March 2025.

Note 2 Operating segments

The NHS provider sector is formed of five types of NHS provider, supplying different services: acute, ambulance, community, mental health and specialist. This classification is based on the majority of the provider's income: ie each provider is allocated to a single segment. Each NHS provider also belongs to one of seven regions.

These are two alternative segmental analyses. NHS England is not the parent of NHS providers and as such does not have a function that meets the definition of the chief operating decision maker in *IFRS 8 Operating segments*.

Net assets are not split between segments in our internal reporting and so are not split by segment here.

The figures reported below include inter-NHS provider trust income and expenditure and these are removed in reconciling to the Consolidated Statement of Comprehensive Income overleaf. The figures below exclude amounts relating to NHS charitable funds which are excluded for our regulatory analysis. The impact of consolidating charitable funds is added in to the reconciliation to the Consolidated Statement of Comprehensive Income overleaf.

Analysis by type of trust

Surplus / (deficit) for the year	(2,232)	6	(86)	(2,312)	(2,165)	(4,477)

² These numbers represent the elimination of transactions between NHS providers. The adjustments include the alignment of accounting treatment for lease arrangements between providers which, under the application of *IFRS 16 Leases*, is not consistent between the lessee and lessor.

³ These numbers reflect the impact of consolidating NHS charitable funds including local intra-group eliminations. These numbers do not represent total income and expenditure in NHS charitable funds.

⁴ The net impairments figure in this reconciliation excludes impairments to right of use assets held under inter-provider leases eliminated on consolidation therefore does not match the impairments figure seen in the segmental reporting analysis.

Note 3 Operating income from patient care activities

All income from patient care activities relates to contract income recognised in line with accounting policy 1.2.

Note 3.1 Income from patient care activities (by nature)

	2024/25 £m	2023/24 £m
Acute services		
Income from commissioners under API contracts (NHSPS variable element)*	19,780	16,348
Income from commissioners under API contracts (fixed element)*	63,015	60,285
Other NHS clinical income (including high cost drugs income)	11,000	9,564
Mental health services		
Income from commissioners under API contracts*	12,024	11,145
Income for the secondary commissioning of services	1,569	1,529
Other clinical income	1,729	1,549
Ambulance services		
A & E income	3,633	3,331
Patient transport service income	283	260
Other income	166	177
Community services		
Income from commissioners under API contracts*	8,984	8,298
Community services income from other sources	1,671	1,624
All services		
Private patient income	783	759
National pay award central funding**	-	302
Additional pension contribution central funding***	5,215	3,183
Other clinical income	1,265	1,303
Total income from patient care activities	131,117	119,657

*Aligned payment and incentive contracts are the main form of contracting between NHS providers and their commissioners. More information can be found in accounting policy 1.2 and the 2023/25 NHS Payment Scheme documentation.

<https://www.england.nhs.uk/publication/2023-25-nhs-payment-scheme/>

**Additional funding was made available directly to providers by NHS England for implementing the backdated element of pay awards where government offers were finalised after the end of the financial year. NHS Payment Scheme prices and API contracts are updated for the weighted uplift in in-year pay costs when awards are finalised.

*** Increases to the employer contribution rate for NHS pensions since 1 April 2019 have been funded by NHS England. NHS providers continue to pay at the former rate of 14.3% with the additional amount being paid over by NHS England on providers' behalf. The full cost of employer contributions (23.7%, 2023/24: 20.6%) and related NHS England funding (9.4%, 2023/24: 6.3%) have been recognised in these accounts.

Note 3.2 Income from patient care activities (by source)

	2024/25 £m	2023/24 £m
Income from patient care activities received from:		
NHS England	28,253	30,103
Integrated care boards	98,481	85,369
Department of Health and Social Care	2	2
NHS other	169	142
Local authorities	2,301	2,214

Expenditure on short term leases	106	98
Expenditure on low value leases	23	25
Variable lease payments not included in the liability	28	28
Early retirements	2	1
Redundancy	53	31
Charges to operating expenditure for on-SoFP IFRIC 12 schemes (eg PFI / LIFT)***	1,221	1,199
Charges to operating expenditure for off-SoFP PFI / LIFT schemes	1	1
Car parking & security	85	78
Hospitality	7	8
Losses, ex gratia & special payments	23	21
Grossing up consortium arrangements	20	17
Other services, eg external payroll	100	90
Other	605	596
NHS charitable funds: Other resources expended	45	55
Total	142,179	130,563

* Staff costs here and in note 8.1 differ as note 8.1 also includes redundancy and early retirements costs and the costs of staff involved in research & development, education & training and internal audit services.

** These are the audit fees disclosed by NHS providers and do not include the audit fee payable to the National Audit Office in respect of these consolidated accounts. A fee of £470,000 (2023/24: £280,000) is accrued in the NHS England accounts.

*** This line does not contain all the charges relating to PFI and similar schemes in these accounts. An analysis of payments made to PFI operators can be found in note 25.3.

Note 7.2 Other auditors' remuneration

	2024/25 £m	2023/24 £m
Other remuneration paid to the external auditor is made up as follows:		
1. Audit of accounts of any associate of the provider	0.5	0.4
2. Audit-related assurance services	0.2	0.1
3. Taxation compliance services	-	-
4. All taxation advisory services not falling within item 3 above	-	-
5. Internal audit services	-	-
6. All assurance services not falling within items 1 to 5	0.2	-
7. Corporate finance transaction services not falling within items 1 to 6 above	-	-
8. Other non-audit services not falling within items 2 to 7 above	0.2	0.1
Total	1.1	0.6

Note 8.1 Employee benefits

	Permanent £m	Other £m	2024/25 Total £m	2023/24 Total £m
Salaries and wages	66,491	2,554	69,045	62,804
Social security costs	7,082	162	7,244	6,843
Apprenticeship levy	337	4	341	321
Employers' contributions to NHS pensions	12,887	208	13,095	10,371
Pension cost - other	22	2	24	27
Other employment benefits	-	-	-	6
Termination benefits	27	2	29	27
Temporary staff (including agency)	-	3,848	3,848	4,789
NHS charitable funds staff	5	-	5	4
Total gross staff costs	86,851	6,780	93,631	85,192
Recoveries in respect of seconded staff	(136)	(14)	(150)	(137)
Total staff costs	86,715	6,766	93,481	85,055
Included within:				
Costs capitalised as part of assets	340	37	377	323

Staff costs here and in note 7.1 differ as note 8.1 also includes redundancy and early retirements costs and the costs of staff involved in research & development, education & training and internal audit services.

Individual NHS providers' accounts and annual reports contain disclosure of senior manager remuneration, fair pay ratio information and off-payroll engagements as required by the HM Treasury FReM.

Note 8.2 Average number of employees (WTE basis)

	Permanent Number	Other Number	2024/25 Total Number	2023/24 Total Number
Medical and dental	137,638	26,595	164,233	158,694
Ambulance staff	33,049	264	33,313	33,144
Administration and estates	306,071	17,170	323,241	313,457
Healthcare assistants and other support staff	264,803	38,815	303,618	300,868
Nursing, midwifery and health visitors	410,971	42,086	453,057	444,490
Scientific, therapeutic and technical staff	163,892	7,700	171,592	167,951
Healthcare science staff	31,760	1,181	32,941	31,424
Social care staff	3,402	84	3,486	3,037
Other	3,948	139	4,087	3,764
Total average numbers	1,355,534	134,034	1,489,568	1,456,829
Of which:				
Number of employees (WTE) engaged on capital projects	3,912	456	4,368	4,210

Note 8.3 Early retirements due to ill-health

During 2024/25 there were 1,157 early retirements on the grounds of ill-health (2023/24: 1,306). The estimated additional pension liability borne by the NHS Pension Scheme is £100 million (2023/24: £116 million).

Note 8.4 Reporting of compensation schemes - exit packages

Redundancy and other departure costs have been paid in accordance with the provisions of the NHS terms and conditions of service. Exit costs are accounted for in full in the year of departure. Ill-health retirement costs are met by the pension scheme and are not included in the table.

Further disclosure of exit packages paid to senior managers can be found in the remuneration reports of individual NHS providers. Note 8.5 provides further analysis of the 'other departures' disclosed below.

	Number of compulsory redundancies Number	Number of other departures agreed Number	Total number of exit packages Number
2024/25			
Exit package cost band (including any special payment element)			
<£10,000	225	2,272	2,497
£10,000 - £25,000	258	541	799
£25,001 - £50,000	264	253	517
£50,001 - £100,000	211	141	352
£100,001 - £150,000	59	26	85
£150,001 - £200,000	31	4	35
>£200,000	2	1	3
Total number of exit packages by type	1,050	3,238	4,288
Total resource cost (£m)	43	41	84

	Number of compulsory redundancies Number	Number of other departures agreed Number	Total number of exit packages Number
2023/24			
<£10,000	113	1,863	1,976
£10,000 - £25,000	131	357	488
£25,001 - £50,000	97	169	266
£50,001 - £100,000	86	132	218
£100,001 - £150,000	42	23	65
£150,001 - £200,000	23	4	27
>£200,000	1	2	3
Total number of exit packages by type	493	2,550	3,043
Total resource cost (£m)	22	31	53

Note 8.5 Exit packages: other (non-compulsory) departure payments

	2024/25		2023/24	
	Payments agreed Number	Total value of agreements £m	Payments agreed Number	Total value of agreements £m
Voluntary redundancies including early retirement contractual costs	98	4.8	128	6.2
Mutually agreed resignations (MARS) contractual costs	533	14.2	257	8.1
Early retirements in the efficiency of the service contractual costs	-	-	2	0.3
Contractual payments in lieu of notice	2,586	17.4	2,116	14.4
Exit payments following employment tribunals or court orders	85	1.7	95	1.3
Non-contractual payments requiring HM Treasury approval*	67	2.5	51	0.9
Total	3,369	40.6	2,649	31.2

* Includes any non-contractual severance payment made following judicial mediation, and amounts relating to non-contractual payments in lieu of notice.

In 2024/25 there were 2 non-contractual payments requiring HM Treasury approval (totalling £1.1 million) that were in excess of the individuals' salaries (2023/24: one payment totalling £0.1 million).

As a single exit package can be made up of several components, each of which will be counted separately in this note, the total number in note 8.5 does not match the total numbers in note 8.4 which is the number of individuals.

Exit packages disclosed in this note differ from the redundancy figure included within note 7.1. The redundancy figure in note 7.1 relates to additional costs which are not exit packages payable directly to the employee.

Note 9 Pension costs

All NHS providers participate in the NHS Pension Scheme. This is a statutory, defined benefit scheme, the regulations of which are laid down in the NHS Pension Scheme Regulations 1995 (SI 1995 No. 300). NHS providers pay contributions at rates specified by the Secretary of State, as advised by the Government Actuary and with the consent of HM Treasury.

For 2024/25, the employer contribution rate was 23.7% (2023/24: 20.6%). It is not possible for the NHS provider sector to identify its share of the underlying scheme assets and liabilities. Therefore, the scheme is accounted for as a defined contribution scheme in these accounts.

Employer pension contributions are charged to operating expenses as and when they become due.

As set out in accounting policy 1.4, some NHS providers also have employees who are members of other pension schemes. Membership of these individual schemes is not material to the consolidated NHS provider accounts.

Note 10 Impairment of non-current assets

Impairments are either charged to operating expenditure or the revaluation reserve. More detail is provided in accounting policy 1.7 and 1.8. Impairments reduce the value of assets. The note below provides detail about the reasons for impairments.

			2024/25	2023/24
	Impairments	Reversals	Net	Net
	£m	£m	impairments	impairments
			£m	£m
Net impairments charged to operating surplus / deficit resulting from:				
Loss or damage from normal operations	19	-	19	5
Over specification of assets	4	-	4	1
Abandonment of assets in course of construction	207	-	207	9
Unforeseen obsolescence	10	(2)	8	132
Changes in market price	2,733	(437)	2,296	1,911
Other causes	134	(6)	128	130
Total net impairments charged to operating surplus / deficit	3,107	(445)	2,662	2,188
Impairments charged to the revaluation reserve	1,220	(155)	1,065	1,451
Total net impairments	4,327	(600)	3,727	3,639

Net impairments taken to operating surplus / deficit relate to property, plant and equipment (£2,444 million, 2023/24: £1,894 million), intangible assets (£69 million, 2023/24: £76 million), right of use assets (£147 million, 2023/24: £199 million), and investments in joint ventures and associates (£1 million, 2023/24: £1m reversal) and assets held for sale (£1 million, 2023/24: £20 million). Impairments charged to the revaluation reserve relate to property, plant and equipment (£1,053 million, 2023/24: £1,443 million), right of use assets (£11 million, 2023/24: £7 million) and intangible assets (£1 million, 2023/24: £1 million).

In addition there are revaluation surpluses taken to the revaluation reserve of £1,007 million (2023/24: £1,197 million), as can be seen in the Statement of Changes in Equity.

Note 11 Finance expenditure

Finance expenditure represents interest and other charges involved in the borrowing of money.

	2024/25	2023/24
	£m	£m
Interest on loans from the Department of Health and Social Care	51	55
Interest on other loans	7	9
Interest on lease liabilities	112	94
Interest on late payment of commercial debt	1	1
Finance costs on PFI, LIFT and other service concession arrangements:		
Main finance costs	734	713
Contingent finance costs	1	2
Remeasurement of the liability resulting from change in index or rate	555	1,563
Other finance costs	7	11
Total finance expenditure - financial liabilities	1,468	2,448
Finance expense - unwinding of discount on provisions	14	11
Total finance expenditure	1,482	2,459

Note 12 Other gains and losses

Note 14.5 Property plant and equipment assets subject to an operating lease (Trust as a lessor)

Property, plant and equipment disclosed in this note includes assets which are subject to operating leases where providers grant use of assets to third parties. It is not possible to accurately quantify the total value of such assets due to the impracticability in apportioning whole site valuations to partial assets subject to such leases. In the public sector, specialised assets are valued at the depreciated replacement cost of a modern equivalent asset required to replace the existing service potential of the trusts assets as set out in accounting policy 1.7.

Note 15 Leases - NHS providers as lessees

The majority of NHS provider lease arrangements are for the use of land and buildings ranging from integrated care units to office accommodation, and used by providers to deliver clinical and non-clinical services. Approximately 42% (2023/24: 43%) of lease arrangements based on the value of lease obligations at the reporting date are with NHS Property Services, a Government-owned property management company maintaining approximately 10% of the total NHS estate. The remaining leases are mainly with private landlords under commercial terms. Across providers there is a wide variety of lease terms on individual leases. More detail on the nature of lease arrangements including any restrictions or covenants imposed can be found in the accounts of individual NHS providers.

Note 15.1 Right of use assets - 2024/25

Net book value at 1 April 2023	5,131	586	112	56	8	3	5,896	2,515

Of the total net impairments of £206 million shown in this note, £199 million was charged to operating expenses and £7 million to the revaluation reserve.

Note 15.3 Reconciliation of the carrying value of lease liabilities

Lease liabilities are included within borrowings in the statement of financial position. A breakdown of borrowings is disclosed in note 21.

	2024/25 £m	2023/24 £m
Carrying value at 1 April	5,690	5,760
Lease additions	618	574
Lease liability remeasurements	263	230
Interest charge arising in year	112	94
Early terminations	(92)	(62)
Lease payments (cash outflows)	(955)	(906)
Carrying value at 31 March	5,636	5,690

Lease payments for short term leases, leases of low value underlying assets and variable lease payments not dependent on an index or rate are recognised in operating expenditure and disclosed in Note 7.1.

Cash outflows in respect of leases recognised on-SoFP are disclosed in the reconciliation above.

Income generated from subleasing right of use assets in 2024/25 was £7 million (2023/24: £1 million) and is included within revenue from operating leases in note 4.

Note 15.4 Maturity analysis of future lease payments at 31 March 2025

	31 March 2025		31 March 2024	
	Total £m	Of which leased from DHSC group bodies: £m	Total	Of which leased from DHSC group bodies:
Undiscounted future lease payments payable in:				
- not later than one year;	898	348	839	311
- later than one year and not later than five years;	2,610	1,171	2,452	1,106
- later than five years.	2,895	1,007	3,014	1,193
Total gross future lease payments	6,403	2,526	6,305	2,610
Finance charges allocated to future periods	(767)	(174)	(615)	(138)
Net lease liabilities at 31 March	5,636	2,352	5,690	2,472

A description of how liquidity risk is managed in the provider sector to ensure these liabilities can be met as they fall due is disclosed in Note 27.1.

Note 16 Inventories

	31 March 2025	31 March 2024
	£m	£m
Drugs	575	538
Work in progress	2	2
Consumables	893	854
Energy	17	18
Other	48	47
Total inventories	1,535	1,459

Inventories recognised in expenditure for the year were £15,787 million (2023/24: £14,460 million). Write-downs of inventories recognised in expenditure for the year were £23 million (2023/24: £19 million).

Note 17.1 Receivables

	31 March 2025	31 March 2024
	£m	£m
Current		
Contract receivables	3,880	4,091
Contract assets	2	3
Capital receivables	62	39
Allowance for impaired contract receivables / assets	(660)	(631)
Allowance for other impaired receivables	(36)	(31)
Deposits and advances	6	4
Prepayments	1,366	1,221
Interest receivable	15	18
Finance lease receivables	-	3

Deposits with the National Loans Fund (excluding charitable funds)	159	371
NHS charitable funds cash and cash equivalents	75	89
Total cash and cash equivalents as in Statement of Financial Position	9,977	10,802
Bank overdrafts	-	-
Total cash and cash equivalents as in Statement of Cash Flows	9,977	10,802

* These adjustments reflect NHS providers' reclassification of prior year NLF deposits as a short term investments rather than cash equivalents. Prior period adjustments are not material to the consolidated provider accounts and so prior year balances are not restated.

Note 18.2 Third party assets

The balance of third party assets, including patients' money held within the NHS providers' bank accounts at 31 March 2025 was £35 million (31 March 2024: £37 million). These have been excluded from the Consolidated Statement of Financial Position as they are not assets of the NHS provider sector. Neither NHS providers nor Government more widely has a beneficial interest in these assets.

Note 19 Trade and other payables

- later than five years.	158	5	-	-	1	201	365
Total	336	76	19	32	68	833	1,364

- Pension provisions relate to staff who have retired early from the NHS Pensions Scheme and are calculated in accordance with DHSC guidance.
- Other legal claims include personal legal claims that have been lodged against NHS providers with NHS Resolution but not yet agreed and therefore not included in provisions held by NHS Resolution.
- Equal pay provisions include provisions for unresolved claims relating to employment contracts.
- Redundancy and restructuring provisions are included by trusts who are undergoing change in their organisational structures.
- Other provisions includes £133 million (31 March 2024: £128 million) in respect of the 2019/20 Pensions Annual Allowance Charge Compensation Scheme for clinicians. Other examples include dilapidations associated with leases, VAT and employment tax claims and other contractual disputes.

Note 22.3 Clinical negligence liabilities

NHS Resolution manages clinical and some non-clinical claims on behalf of NHS providers. For this to occur, providers pay an annual premium to NHS Resolution, who then assumes responsibility for settling claims on providers' behalf. This is called the Clinical Negligence Scheme for Trusts (CNST) which covers clinical negligence claims for incidents occurring on or after 1 April 1995. The Existing Liabilities Scheme (ELS) is centrally funded by DHSC and covers clinical negligence claims against NHS organisations for incidents occurring before 1 April 1995.

Under these schemes, most liabilities for clinical negligence are not included in providers' statements of financial position. Instead they separately disclose the amounts relating to clinical negligence cases for their trust which are included in the provisions of NHS Resolution.

As at 31 March 2025, NHS Resolution held provisions for clinical negligence liabilities totalling £32,760 million for CNST (2023/24: £31,343 million) and £633 million for ELS (2023/24: £635 million) on behalf of NHS providers. NHS Resolution's annual report and accounts provides more information on overall liabilities and explanations for movements between years:

<https://resolution.nhs.uk/corporate-reports/>

Note 23 Contingent assets and liabilities

Contingent assets and liabilities are potential assets and liabilities arising from past events, whose existence will only be confirmed by the occurrence of future events that are not entirely within the entity's control.

	31 March 2025 £m	31 March 2024 £m
Value of contingent liabilities		
NHS Resolution legal claims	(17)	(5)
Employment tribunal and other employee related litigation	(10)	(8)
Redundancy	(2)	(2)
Other	(97)	(98)
Gross value of contingent liabilities	(126)	(113)
Amounts recoverable against liabilities	16	-
Net value of contingent liabilities	(110)	(113)
Net value of contingent assets	5	1

Note 24.1 Contractual capital commitments

At 31 March, contractual capital commitments not otherwise included in these financial statements were:

	31 March 2025 £m	31 March 2024 £m
Property, plant and equipment	2,450	2,409
Intangible assets	105	120
Total	2,555	2,529

Note 24.2 Other financial commitments

NHS providers are committed to making the following payments under non-cancellable contracts (which are not leases, PFI contracts or other service concession arrangements):

	31 March 2025 £m	31 March 2024 £m
Payments falling due:		
- not later than 1 year;	485	408
- after 1 year and not later than 5 years;	461	514
- thereafter.	164	126
Total	1,110	1,048

Note 25 On-SoFP PFI, LIFT and other service concession arrangements

Note 25.1 On-SoFP PFI, LIFT and other service concession obligations

NHS providers recognise the following obligations in respect of assets included in the on-SoFP schemes:

	31 March 2025 £m	31 March 2024 £m
Gross PFI, LIFT or other service concession liabilities	20,469	21,289
Of which liabilities are due		
- not later than one year;	1,324	1,335
- later than one year and not later than five years;	5,240	5,180
- later than five years.	13,905	14,774
Finance charges allocated to future periods	(6,761)	(7,366)
Net PFI, LIFT or other service concession arrangement obligation	13,708	13,923
- not later than one year;	607	606
- later than one year and not later than five years;	2,777	2,625
- later than five years.	10,324	10,692

Note 25.2 Total service concession arrangement commitments

NHS providers are committed to making the following total payments in respect of on-Statement of Financial Position PFI, LIFT and other service concession arrangements:

	31 March 2025 £m	31 March 2024 restated* £m
Total future payments due in:		
- not later than one year;	2,842	2,738
- later than one year and not later than five years;	11,369	10,910
- later than five years.	29,825	30,772
Total	44,036	44,420

	Number	Number
Total number of PFI, LIFT and other service concession schemes recognised on-SoFP at 31 March	140	145
Of which schemes with total future commitment in excess of £500 million	25	26

* One NHS provider restated prior year total commitments under service concession arrangements to remove assumptions about future inflation. This restatement reduced the prior year total commitment by £1,465 million.

Note 25.3 Analysis of amounts paid to service concession operators

This note shows the total amount paid to the service concession operator in the year, on an accruals basis. The constituent parts of the unitary payment are taken to the Consolidated Statement of Comprehensive Income or Consolidated Statement of Financial Position as appropriate.

	2024/25 £m	2023/24 £m
Unitary payment paid to service concession operator	2,834	2,740
Consisting of:		
- Interest charge	734	713
- Repayment of balance sheet obligation	665	620
- Service element	1,189	1,156
- Capital lifecycle maintenance	179	183
- Revenue lifecycle maintenance	8	8
- Contingent rent	1	2
- Addition to lifecycle prepayment	58	58

Note 26 Off-SoFP PFI, LIFT and other service concession arrangements

As at 31 March 2025 one NHS provider accounts for two PFI schemes as off-SoFP arrangements (31 March 2024: 2 providers, 3 schemes). The charge recognised in year and future commitments on these schemes are not material to these consolidated accounts.

Note 27 Financial instruments

Note 27.1 Financial risk management

The risks arising from financial instruments and the NHS providers' policies and processes in response to these risks are described below. Individual NHS providers may have their own bespoke policies and processes in place to deal with the risks they face as an entity.

Liquidity risk

The level of income generated by NHS providers is dependent on the contractual arrangements they have with their commissioners, whose resources are voted on annually by Parliament. Contract prices are determined by the NHS Payment System which is based on nationally collected cost data and updated annually for inflation to reflect the efficient cost of providing healthcare.

NHS providers are required by legislation to carry out their functions effectively, efficiently and economically and under their licence conditions they are required to maintain working capital balances sufficient to enable the continued provision of services ensuring they are able to continue as a going concern. NHS England oversees the risk of individual NHS providers breaching these and other licence conditions relating to finance by reviewing a range of financial information and categorising each trust according to our NHS Oversight Framework. It may provide mandated support to providers where required. Where providers have difficulty maintaining necessary cash balances, cash support may be provided by DHSC to cover necessary and essential expenditure. Where support is received, providers must work with NHS England to improve their financial position.

Details of the oversight framework to be used by NHS England for 2025/26 to monitor these risks can be accessed on the NHS England website (<https://www.england.nhs.uk/nhs-oversight-framework/>)

As disclosed within the accounting policies at Note 1.23, these consolidated accounts are prepared on a going concern basis and we do not consider there to be a material uncertainty over going concern. It is deemed that there is not a risk that the consolidated provider sector would fail to meet its liabilities as they fall due.

Credit risk

The vast majority of the NHS provider sector's income is generated from public sector bodies and as such is exposed to low credit risk as these bodies are financed through taxation.

NHS providers are permitted to generate income derived from private patients and overseas visitors without reciprocal arrangements, however this income contributes only 0.71% of total income from patient care activities generated in 2024/25 (2023/24: 0.73%). Other sources of income from non-public sector bodies amount to a small proportion of total provider income. Accordingly, the effective credit risk posed by income derived from private and overseas patients or non-public sector entities to the sector is low. Within cash and cash equivalents, £9.7 billion is held with the Government Banking Service and National Loans Fund. Individual providers have confirmed that they do not consider these deposits to be exposed to significant credit risk. The maximum exposures as at 31 March 2025 are in receivables, as disclosed in the receivables note.

Currency risk

The NHS provider sector operates principally within England and as such has only negligible amounts of transactions, assets and liabilities which are not in Sterling. Therefore the NHS provider sector has low exposure to currency risk.

Interest rate risk

NHS providers have the power to enter into loans and working capital facilities with commercial lenders. NHS providers are also able to borrow from DHSC. The term of DHSC loans can range up to 25 years but individual DHSC loan products may be shorter, with the potential for replacement DHSC loans to be at a different interest rate. However given the total interest paid to DHSC by NHS providers (see note 11) this is not a material risk to the consolidated NHS provider accounts.

Note 27.2 Financial assets as at 31 March 2025

Carrying values of financial assets as at 31 March 2025	Financial assets at amortised cost £m	Financial assets at fair value through I&E £m	Financial assets at fair value through OCI £m	Total £m
Receivables excluding non-financial assets	3,907	-	-	3,907
Financial assets / investments	207	5	5	217
Cash and cash equivalents at bank and in hand*	9,902	-	-	9,902
NHS charitable funds financial assets	103	123	36	262
Total at 31 March 2025	14,119	128	41	14,288

Note 27.3 Financial assets as at 31 March 2024

Carrying values of financial assets as at 31 March 2024	Financial assets at amortised cost £m	Financial assets at fair value through I&E £m	Financial assets at fair value through OCI £m	Total £m
Receivables excluding non-financial assets	4,049	-	-	4,049
Financial assets / investments	181	2	5	188
Cash and cash equivalents at bank and in hand*	10,713	-	-	10,713
NHS charitable funds financial assets	115	126	40	281
Total at 31 March 2024	15,058	128	45	15,231

* Cash and cash equivalents excludes cash held by NHS charitable funds, which is shown within the final row of the above two tables.

Note 27.4 Financial liabilities

Carrying values of financial liabilities	31 March 2025 £m	31 March 2024 £m
Loans from the Department of Health and Social Care	2,060	2,217
Obligations under PFI, LIFT and other service concession contracts	13,708	13,923
Obligations under leases	5,636	5,690
Other borrowings	261	306
Trade and other payables excluding non-financial liabilities	11,639	12,356
Other financial liabilities	6	2
Provisions under contract	400	427
NHS charitable funds financial liabilities	6	11
Total financial liabilities	33,716	34,932

All financial liabilities are held at amortised cost.

Note 27.5 Maturity of financial liabilities

The following maturity profile of financial liabilities is based on the contractual undiscounted future cash flows. This differs to the amounts recognised in the statement of financial position which are discounted to present value.

Financial liabilities fall due in:	31 March 2025 £m	31 March 2024 £m
one year or less;	14,323	15,166
more than one year but not more than five years;	8,999	8,699
more than five years.	18,223	19,358
Total financial liabilities	41,545	43,223

Note 27.6 Fair values of financial instruments

At a consolidated level, the fair values of financial instruments do not differ materially from the book values disclosed.

Note 28 Analysis of NHS charitable funds reserves

	31 March 2025 £m	31 March 2024 £m
Restricted funds:		
Endowment funds	14	12
Other restricted income funds	79	79
Unrestricted funds:		
Unrestricted income funds	153	172
Revaluation reserve	1	1
Total	247	264

NHS charitable funds are consolidated by 40 NHS providers where the trust determines they have control (2023/24: 41) as outlined in accounting policy 1.1. Other providers may also have charities meeting the definition of local control that are not locally consolidated on the grounds of materiality.

Restricted funds are funds that are to be used in accordance with specific restrictions imposed by the donor, for example where the donor has specified that their donation should be spent on a specified ward, patients, nurses or project fund. Endowment funds are funds which the trustees are required to invest or to keep and use for the charity's purposes.

Unrestricted income funds comprise those funds that the trustees are free to use for any purpose in furtherance of the charitable objects. Unrestricted funds include general funds, where the donor has not specified or restricted the use the charity may make of their donation. General funds additionally generate income from Gift Aid, investment income, interest and donations given specifically to cover running costs.

Note 29.1 Losses and special payments

	2024/25		2023/24	
	Number of cases	Total value of cases £m	Number of cases	Total value of cases £m
Losses				
Cash losses	8,146	5.5	2,992	2.8
Fruitless payments	644	4.0	544	2.1
Bad debts and claims abandoned	30,616	77.1	28,765	61.3
Stores losses and damage to property	7,465	28.8	7,334	30.9
Total losses	46,871	115.4	39,635	97.1
Special payments				
Extra-contractual payments	29	0.2	12	0.1
Extra-statutory and extra-regulatory payments	3	-	2	1.3
Compensation payments under court order or legally binding arbitration award	415	3.6	401	2.6
Special severance payments	67	2.5	51	0.9
Ex-gratia payments	7,428	12.5	6,578	12.1
Total special payments	7,942	18.8	7,044	17.0
Total losses and special payments	54,813	134.2	46,679	114.1

The total losses disclosed here are higher than the amounts included in the line 'Losses, ex gratia & special payments' in note 7.1 as NHS providers include some losses in other lines within that note.

HM Treasury requires disclosure of individual losses or special payments in excess of £300,000.

Note 29.2 Losses in excess of £300,000

In 2024/25 12 trusts reported 15 individual losses in excess of £0.3 million, totalling £9.7million:

- The following 2 trusts have recorded £2.1 million of overseas visitor debt write-offs:

- Barts Health NHS Trust (two cases totalling £1.3 million)
- Great Ormond Street Hospital for Children NHS Foundation Trust (£0.8 million)

The following 6 trusts have recorded £4 million of pharmacy losses and obsolete stock write-offs:

- North West Anglia NHS Foundation Trust (two cases totalling £0.7 million)
- Northern Care Alliance NHS Foundation Trust (£0.3 million)
- Royal Surrey NHS Foundation Trust (£1.4 million)
- Salisbury NHS Foundation Trust (£0.4 million)
- University Hospitals Sussex NHS Foundation Trust (£0.9 million)
- Walsall Healthcare NHS Trust (£0.3 million)
- East Suffolk and North Essex NHS Foundation Trust recorded a £0.4 million loss on a superseded IT system.
- Nottingham University Hospitals NHS Trust recorded a £1.7 million loss due to a maternity fine.
- Sheffield Teaching Hospitals NHS Foundation Trust recorded a £0.8 million loss on outstanding construction works following a coffee shop operator being placed into administration.
- United Lincolnshire Teaching Hospitals NHS Trust recorded two fruitless payments totalling £0.7 million following a construction partner entering administration (£0.4 million) and under a minimum occupancy guarantee (£0.3 million).

In 2023/24 13 trusts reported 14 individual losses in excess of £0.3 million, totalling £10.9 million:

- The following 8 trusts recorded a total of £4.3 million of pharmacy losses and obsolete stock write-offs:

- Barking, Havering and Redbridge University Hospitals NHS Trust (£0.4 million)
- Guy's and St Thomas' NHS Foundation Trust (£0.6 million)
- North Middlesex University Hospital NHS Trust (£0.5 million)
- North West Anglia NHS Foundation Trust (2 cases totalling £0.8 million)
- Northern Care Alliance NHS Foundation Trust (£0.7 million)
- Portsmouth Hospitals University NHS Trust (£0.4 million)
- Royal Surrey NHS Foundation Trust (£0.6 million)
- Worcestershire Acute Hospitals NHS Trust (£0.3 million)

- University Hospitals Sussex NHS Foundation Trust recorded £1.5 million of losses due to fire damage.
- Nottingham University Hospitals NHS Trust wrote off £0.3 million of outstanding invoices for an overseas visitor.
- Sandwell And West Birmingham Hospitals NHS Trust wrote off £1.5 million of outstanding invoices due from Birmingham City Council for delayed transfers of care.
- South Western Ambulance Service NHS Foundation Trust recorded a loss of £2.2 million due to a supplier entering administration.
- Whittington Health NHS Trust recorded a loss of £1.1 million following the abandonment of a capital project.

Note 29.3 Special payments in excess of £300,000

In 2024/25 four individual special payments in excess of £0.3 million were reported, totalling £3.9 million:

- East of England Ambulance Service NHS Trust made a special severance payment of £1 million.
- Northern Care Alliance NHS Foundation Trust made ex gratia payments to staff members relating to VAT refunds in lease car schemes totalling £0.8 million. The decision to make these payments is considered a single case.
- South Western Ambulance Service NHS Foundation Trust reported £0.6 million compensation paid for damage to a vehicle. Total costs incurred for this incident across all financial years was £0.7m.
- West Midlands Ambulance Service University NHS Foundation Trust recorded a £1.5 million legal claim settlement.

In 2023/24 two individual special payments in excess of £0.3 million were reported, totalling £2.4 million:

- Leeds Teaching Hospitals NHS Trust made ex gratia payments to staff members relating to VAT refunds on lease car payments totalling £1.1 million. The decision to make these payments is considered a single case.
- East Midlands Ambulance Service NHS Trust paid £1.3 million of incentive payments to staff outside of the national employment contract. The decision to make these payments was considered a single case. Due process was not followed for the approval of these payments resulting in a section 30 referral from the auditor. This referral was detailed in the 2023/24 Consolidated Annual Governance Statement. In July 2025, HM Treasury declined to approve the case for retrospective approval.

Note 30 Related parties

DHSC is regarded as a related party of NHS trusts and NHS foundation trusts. Per paragraph 25 of *IAS 24 Related party disclosures*, government-related entities are not required to disclose balances and transactions with entities that have the same government control. The information below was collected from NHS trusts and NHS foundation trusts, who were advised to exclude from the data collection balances and transactions with entities within the whole of government accounts boundary.

Information on related party balances and transactions with charitable funds and group entities below only relates to where the entity has not been consolidated within the local accounts, and thus not consolidated within these consolidated provider accounts.

Details of NHS providers' material related party transactions are shown in the accounts of the individual NHS providers.

	Receivables		Payables

	Income		Expenditure	
	2024/25 £m	2023/24 £m	2024/25 £m	2023/24 £m
Value of transactions with board members and key staff (excluding salaries)	-	-	-	-
Value of transactions with other related parties:				
Non-consolidated NHS charitable funds	138	99	4	7
Subsidiaries / Associates / Joint Ventures	55	41	274	138
Other	118	129	212	247
Total	311	269	490	392

Note 31 Transfers by absorption

During 2024/25, five NHS providers were dissolved and services formerly provided by those organisations transferred to other NHS bodies (2023/24: two). Details of these transactions are included in the introduction to these consolidated accounts on page 3. Transfers between NHS providers eliminate on consolidation and have no net impact on these consolidated accounts.

Transfers to/from other bodies are not material.

Note 32 Consolidation of unaudited local provider accounts

As explained in accounting policy note 1.1, these accounts are prepared based on locally audited provider accounts. To expedite national financial reporting, the disclosures in these consolidated accounts were finalised on 3 November 2025 using unaudited financial information for four providers.

Further information on each provider is set out in the consolidated annual governance statement. A summary of the financial information used for each of these four providers is presented below:

	Operating income	Employee benefits	Other operating expenses	Property, plant and equipment	All other assets	Liabilities	Reserves
	£m	£m	£m	£m	£m	£m	£m
NHS provider							
Birmingham Women's and Children's NHS Foundation Trust	836	(431)	(365)	281	236	(207)	310
Croydon Health Services NHS Trust	516	(343)	(176)	232	78	(81)	229
Humber Teaching NHS Foundation Trust	278	(181)	(101)	91	58	(71)	78
University Hospitals Birmingham NHS Foundation Trust	2,639	(1,594)	(1,072)	1,091	427	(1,170)	348
Total in providers (before considering additional national procedures)	4,269	(2,549)	(1,714)	1,695	799	(1,529)	965

Some of these total balances are material to the consolidated accounts so we have performed additional procedures with respect to independent information on elements listed below, together with procedures on other balances to reduce overall uncertainties, and further consideration of the risk associated with residual amounts:

- Operating income: amounts from NHS England group entities have been validated to NHS England's financial ledger
- Employee benefits: within these figures, permanent employee costs have been validated to source evidence for payroll expenditure
- Other operating expenditure: clinical negligence premiums paid to NHS Resolution have been agreed to third party confirmations and analytical procedures have been performed over depreciation charges
- Other assets: cash balances held with the Government Banking Service and the National Loans Fund have been validated against third party confirmations
- Public dividend capital reserve: balances validated against central records from the Department of Health and Social Care

Following these procedures, together with detailed consideration of risks around balances without additional NHS England procedures, we are satisfied that the residual balances over which uncertainty remains does not present a material risk to these consolidated accounts.

The consolidated provider accounts for 2023/24 were finalised using unaudited information for five NHS providers. Three of those five providers have now published audited accounts for 2023/24. Any change in their financial information was not material and such amendments have been presented as 2024/25 items in these consolidated accounts. The 2023/24 annual accounts of Birmingham Women's and Children's NHS Foundation Trust and Croydon Health Services NHS Trust remain unaudited at the date of finalising disclosures in these consolidated accounts.

Note 33 Prior period adjustments

Note 25.2 which discloses the total commitments to service concession operators has been restated to correct a material prior period error by one provider. More information in relation to these restatements can be found beneath this note.

Other local prior period adjustments in individual NHS providers are not material to the consolidated accounts, and so their effects are instead disclosed in the current year.

Note 34 Events after the reporting date

There are no material non-adjusting events after the reporting period.

In accordance with the requirements of *IAS 10 Events after the reporting period*, events are considered up to the date on which the accounts are authorised for issue. This is interpreted as the date of the Certificate and Report of the Comptroller and Auditor General.
