

Healthcare Professionals (92207278-WK27)

Q.001 As part of their jobs, regulated healthcare professionals such as doctors, nurses, social workers, physiotherapists, and paramedics must regularly engage in 'reflective practice'. Reflective practice involves carefully thinking about the treatment they have provided to ensure it's as safe, effective, and high-quality as possible. This helps them learn from mistakes and make improvements. How much do you agree with the following statement: During reflective practice, healthcare professionals should be given access to information about how their care impacted patients so they can assess what worked well and what they may need to improve in the future
