

EIH Tier 1 Assessment Record

EIH Tier 1 Site Assessment	Comments
Unique Reference No ()	
Operation/activity:	
Location: Grid/GPS/Map ref. incl. UTM/MGRS	
Population at Risk	
Date of assessment:	
Assessor: (No./Rank/Name)	
Units on Site: Indicate where appropriate the host unit.	
CEG/Trade of Assessor: Medical, Infantry, RAF Regt	
Site: Industrial, Agricultural, Residential, Green Field, Brown Field etc. Historic use of site.	
Site: Is the site in co-use by civilians/coalition forces?	
Civil Activities: If in co-use what activities are being undertaken by the owners/ tenants/coalition partners for example, production, storage, accommodation etc? Any indication of previous use and whether any hazardous material was used (talk to LECs)?	
Hazardous Material: Are any hazardous materials on site from civilian activity (past or present), if so what and in what quantities (estimate if necessary) and what condition is the storage facility and in what condition are the containers?	
Military Activities: What activities are the military units (inc. HN and Allies) undertaking, for example, patrol base, RLC stores, POL storage and distribution, accommodation. If there has been a change in military occupation are there any risks remaining from previous use.	
Pollution: Any evidence of ground or water pollution, if so any indication of pollutant, estimate of surface area of contamination and location on site.	
Surrounding Area: In the area surrounding the camp (out to 500m radius) is there evidence of any industrial or agricultural activity that may affect the health of the troops in the location? Include known breeding or suspected disease vector breeding sites. If so, what?	
Water Supply: Mains, service bulk supply, unit production, packaged.	
Waste Disposal: bury, burn, incinerate or remove by contract.	
Known Disease Vectors on or around the site: Biting insects, rodents, feral cats/dogs etc.	
Assessment of Risk without remedial measures	
Assessment of Risk with remedial measures	
Tier 2 Assessment Requested on date:	
Low = Low risk of impact on the mission	
Medium = May be some limited impact on the mission	
High = The mission may be at risk; all high risks (acute or chronic health effects) either before or after remedial measures must result in request for a Tier 2 assessment.
