Joint listed building data specification

This specification aligns the listed building data requirements of Local Land Charges Programme and the Ministry of Housing, Communities & Local Government's Digital Planning Programme, enabling local authorities to use a single dataset that serves both programmes and reduces administrative burden.

Name	Attribute/Value Type/Multiplicity	Comment
Registration date	registration-date: Date 1	
Originating Authority	originating-authority: String 1	
Point for further information	further-information-location: String 1..3	
Geometry Identifier	ID: Identifier 1	
Land Interest Geometry	land-interest-geometry: GeoJSON feature collection 1	
Land Description	land-description: Feature 1	All charges must have a Land Description, which can be either Charge Address or Charge Geographic Description
Charge Address	land-description: charge-address: Feature attribute 0..1	
Secondary Address Information	land-description: charge-address Line 1: String 1	Where Charge Address is used this attribute must be entered
Primary Address Information	land-description: charge-address Line 2: String 0..1	
Supplementary Address Information	land-description: charge-address Line 3: String 0..1	
Supplementary Address Information	land-description: charge-address Line 4: String 0..1	
Supplementary Address Information	land-description: charge-address Line 5: String 0..1	
Supplementary Address Information	land-description: charge-address Line 6: String 0..1	
Postcode	land-description:postcode: String [1	Where Charge Address is used this attribute must be entered
Unique Property Reference Number	uprn: Integer 1	Where Charge Address is used this attribute must be entered
Charge Geographic Description	land-description: charge-geographic-description: String 0..1	
Local Land Charge Register Part	old-register-part: Integer 0..1	
Originating authority charge identifier	originating-authority-charge-identifier: String 0..1	
Statutory Provision	statutory-provision: String 0..1	
LA File Reference	further-information-reference: String 0..1	
Date charge created	charge-creation-date: Date 0..1	
Supplementary Charge Information	supplementary-information: String 0..1	

Joint listed building data specification

This specification aligns the listed building data requirements of Local Land Charges Programme and the Ministry of Housing, Communities & Local Government's Digital Planning Programme, enabling local authorities to use a single dataset that serves both programmes and reduces administrative burden.

Suggested mapping			
MHCLG Requirements	**Name**	**Attribute/Value Type/Multiplicity**	**Comment**
Listed-building	Originating authority charge identifier	originating-authority-charge-identifier: String 0..1	This field should be populated by the HE reference (where available)
name	Land Description	land-description: Feature 1	Name of the property or land
entry-date	Registration date	registration-date: Date 1	Registration date is Date of entry on the Local Land Charges Register, for existing charges it is the date entered on the current register.
start-date	Date charge created.	charge-creation-date: Date 0..1	Date charge created is Date on which the registered charge first came into existence.
end-date	Expiry Date	expiry-date: Date 0..1	Only used 'where the charge is enforceable for a fixed term' so would be reasonably certain this is not applicable to LB

HM Land Registry

Ministry of Housing, Communities & Local Government
