

Enforcement easement on energy labelling requirements for household tumble dryers

The Department for Energy Security and Net Zero has issued a temporary enforcement easement in Great Britain (GB) in relation to the energy labelling requirements for household tumble dryers.

It is not in the public interest to take enforcement action against the supply of tumble dryers displaying a rescaled easement energy label, included in Table 1 (the “easement labels”), when combined with the new product information sheet for household tumble dryers, included in Table 2.

This covers the supply of the easement labels and new product information sheets in place of the current energy labels and product fiche (which are required under Regulation (EU) No 392/2012).

This easement will allow business to provide an energy label and product information sheet containing information, which are aligned with the EU equivalents. The ability to generate the easement label and the new product information sheet has been provided through the [create an energy label](#) service.

The easement ends 10 months from the date the new Tumble Dryer statutory instrument is made, which will be when the current GB statutory labelling requirements under Regulation (EU) No 392/2012 are replaced.

Energy label

The ‘Create an energy label’ service has been updated to enable industry stakeholders to generate easement labels and download the new product information sheet.

Table 1 – Easement rescaled energy labels

| Condenser easement label | Non-condenser easement label |
