## About these statistics

This factsheet presents the latest statistics on trade and investment between the UK and Colombia. It summarises a wide range of publicly available data, from data providers such as the Office for National Statistics (ONS) and HM Revenue and Customs (HMRC), as well as international data providers.

This factsheet is part of a wider range produced by the Department for Business and Trade which draws together many data sources into one single compendium document for each individual trade and investment partner. The full set of factsheets for different individual partners can be found on the [Trade and Investment Factsheets website](#) on GOV.UK.

Where data are available, these factsheets contain metrics on:

- Headline trade statistics between the UK and each trading partner for the latest four quarters.
- Trade statistics by commodity and service type.
- Trade in goods between the UK and each trading partner, broken down by UK country and English region.
- Trade in services between the UK and each trading partner, broken down by mode of supply.
- UK's market share as a total of all imports for each trading partner.
- Number of VAT-registered businesses trading goods.
- UK's Foreign Direct Investment (FDI) with each investment partner.
- Summary trade and investment data as reported by each trade and investment partner, as well as economic data and projections.

International statistics for goods traded with the world are published in the [UN Comtrade database](#) and services by [ITC Trademap](#).

All statistics are correct at the time of publication, with upcoming release dates available on the [Government update schedule for Official Statistics](#). The Department for Business and Trade strongly recommends users download the latest factsheet to ensure the most up-to-date statistics are used. Please do not use previous factsheets to analyse earlier time periods than those shown in the most recent factsheets, as the data will have been revised and previous factsheets will no longer be correct. For analysis of earlier time periods, please use the published source data.

For the most up to date snapshot of the UK's trade and investment position with all partners, please see the [UK trade in numbers](#) publication or the [trade and investment core statistics book](#). These statistics are based on the same data sources as this factsheet and therefore are comparable. A list of all [Official Statistics](#) publications from the Department for Business and Trade can be found online.

# Trade with Colombia, in current prices (ONS)<sup>9 10 11</sup>

## Trade definitions

- **UK exports** - Goods and services that were produced or sourced in the UK, which were sold to Colombia.
- **UK imports** - Goods and services that were sold to the UK, which were produced or sourced by Colombia.
- **Total or 'bilateral' trade** - The value of total trade between the UK and Colombia (exports plus imports).
- **Trade balance** - The difference between exports and imports, calculated by UK exports minus UK imports.
- **Trade surplus** - This occurs when the value of UK exports to Colombia is greater than the value of UK imports from Colombia.
- **Trade deficit** - This occurs when the value of UK exports to Colombia is less than the value of UK imports from Colombia.

**Headline trade statistics include trade in non-monetary gold (reported within the unspecified goods category), which can significantly affect trends for some partners. Please see the factsheet quality and methodology report for more information.**

**These statistics are given on a balance of payments (change of ownership) basis.**

**Note:** UK trade statistics experienced higher levels of volatility between 2019 and 2022, due to the pandemic, global recession, supply chain disruption, EU Exit, Russia's invasion of Ukraine, price inflation, conflict in the Middle East, and data collection changes. All figures are reported in current prices (not adjusted for inflation), unless otherwise stated. We recognise that some changes in UK trade values will be partly due to price changes.

**Total trade** in goods and services (exports plus imports) between the UK and Colombia was £2.4 billion in the four quarters to the end of Q2 2025, an increase of 1.7% or £39 million in current prices from the four quarters to the end of Q2 2024.

In the four quarters to the end of Q2 2025, **total UK exports** to Colombia amounted to £1.5 billion (a decrease of 0.3% or £5 million in current prices, compared to the four quarters to the end of Q2 2024).

Of all UK exports to Colombia in the four quarters to the end of Q2 2025, £949 million (65.4%) were **goods** and £502 million (34.6%) were **services**. In the four quarters to the end of Q2 2025, UK **exports of goods** to Colombia increased by 1.8% or £17 million in current prices, compared to the four quarters to the end of Q2 2024 while UK **exports of services** to Colombia decreased by 4.2% or £22 million in current prices, compared to the four quarters to the end of Q2 2024.

In the four quarters to the end of Q2 2025, **total UK imports** from Colombia were £916 million (an increase of 5.0% or £44 million in current prices, compared to the four quarters to the end of Q2 2024).

Of all UK imports from Colombia in the four quarters to the end of Q2 2025, £575 million (62.8%) were **goods** and £341 million (37.2%) were **services**. In the same period, UK **imports of goods** from Colombia increased by 5.5% or £30 million in current prices, compared to the four quarters to the end of Q2 2024 while UK **imports of services** from Colombia increased by 4.3% or £14 million in current prices, compared to the four quarters to the end of Q2 2024.

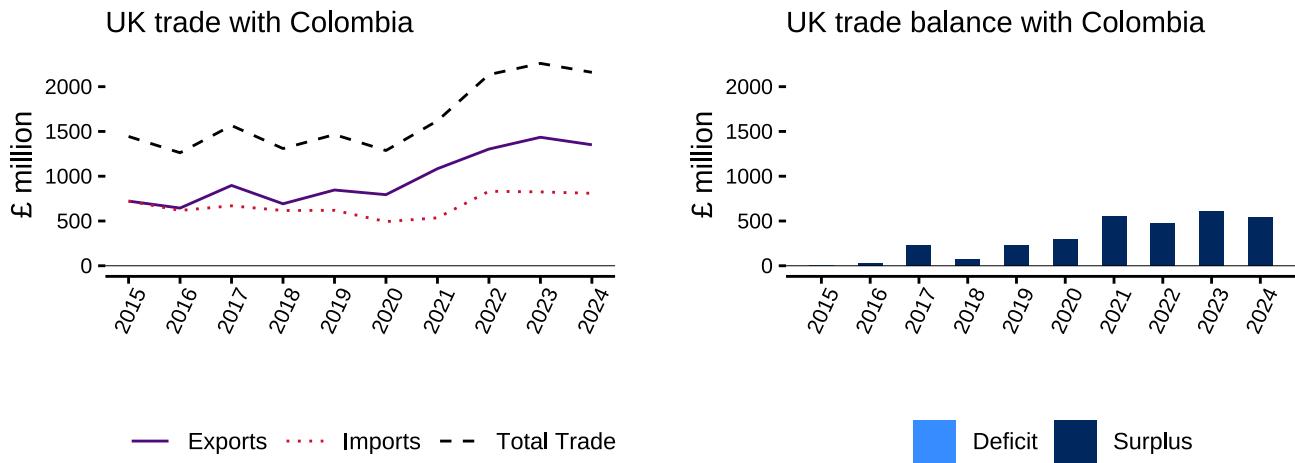

This means the UK reported a **total trade surplus** of £535 million with Colombia, compared to a trade surplus of £584 million in the four quarters to the end of Q2 2024. In the four quarters to the end of Q2 2025, the UK had a **trade in goods surplus** of £374 million with Colombia, compared to a trade in goods surplus of £387 million in the four quarters to the end of Q2 2024. Meanwhile, in the four quarters to the end of Q2 2025 the UK reported a **trade in services surplus** of £161 million with Colombia, compared to a trade in services surplus of £197 million in the four quarters to the end of Q2 2024.

<sup>10</sup>This factsheet contains data as reported by the UK, users are advised to use UK-reported data where possible for consistency between partners. These data are subject to **asymmetries** e.g. the value of UK exports to Colombia (reported by the UK) may not match the value of Colombia imports from the UK (reported by Colombia).

<sup>11</sup>Data are in current prices, meaning no adjustment has been made to account for changes in inflation or exchange rate. The totals may not exactly match the sum of their parts due to rounding.'

# Trade in goods by UK countries and English regions, in current prices (HMRC)<sup>21</sup>

22

## Regional trade definitions

- UK regions** - The UK is categorised into 12 regions based on the International Territorial level 1 (ITL1). This level includes 9 regions in England, as well as Wales, Scotland and Northern Ireland.
- Regional trade data** - The data are compiled by merging HM Revenues & Customs (HMRC) trade data with employment data from the Interdepartmental Business Register (IDBR) so a business' trade can be allocated to a UK region based on the proportion of its employees employed in that region. Where a trader is not matched with the IDBR, its trade is matched with ONS postcode data to obtain the UK region in which the Head Office of the VAT-registered business is based.

The maps below show the value of UK goods exports and imports between each UK region and Colombia in 2024. The maps are shaded with the 3 UK regions with the highest amount of trade as the darkest colour, and the 3 UK regions with the lowest amount of trade as the lightest colour.

The data that are presented in the maps above for 2024 in £ million are also given in the table below:

UK country or English region	North East	North West	Yorkshire and The Humber	East Midlands	West Midlands	East	London	South East	South West	Wales	Scotland	Northern Ireland
Value of goods exports to Colombia	21	24	64	31	32	60	39	54	15	25	60	13
Percentage of total goods exports to Colombia	4.5%	5.3%	14.1%	6.7%	7.1%	13.2%	8.5%	11.9%	3.4%	5.5%	13.2%	2.9%
Value of goods imports from Colombia	5	5	50	22	43	97	50	47	11	24	12	76
Percentage of total goods imports from Colombia	1.1%	1.1%	10.8%	4.7%	9.2%	20.9%	10.8%	10.2%	2.3%	5.2%	2.6%	16.5%

Note that these figures from HMRC are reported on a physical movement basis and are **not directly comparable** to trade data from ONS which are reported on a change of ownership basis. **Percentages will not total 100%** as data not allocated to a single UK country or English region are not presented.

<sup>21</sup>HMRC data source for regional UK trade data: [HMRC Regional Trade Statistics](#) (data extracted from the spreadsheet download using the HMRC interactive tables).

<sup>22</sup>Totals presented here will differ from overall HMRC trade figures due to the exclusion of trade in non-monetary gold and non-response estimates and the exclusion of data not allocated to a UK country or region. Figures for 2024 are provisional and subject to change.

# Trade in services by mode of supply, in current prices (ONS)<sup>23</sup>

## Trade in Services by Mode of Supply definitions

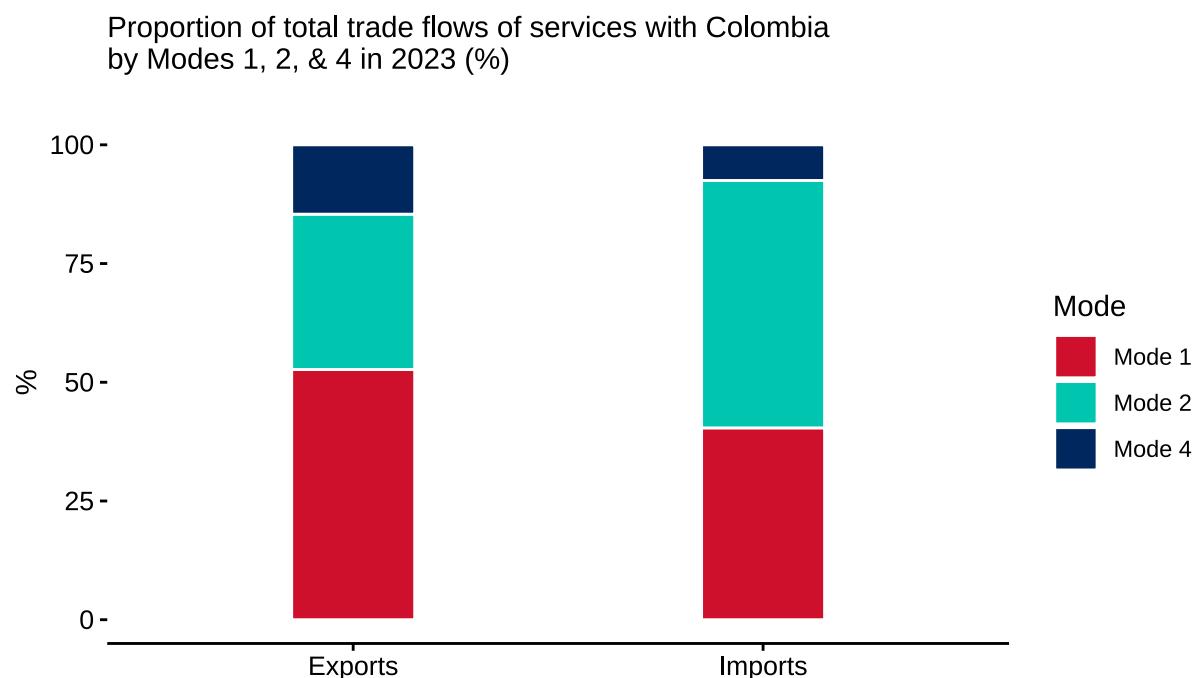

- **Modes of Supply** define the way services trade is conducted. The World Trade Organisation's [General Agreement on Services](#) categorises methods for trade in services into four different modes of supply, which depend upon the territorial presence of the supplier and the consumer at the time of transaction.
- **Mode 1** - Remote trade (a supplier in one country sells a service to a customer in another, without the movement of people).
- **Mode 2** - Consumption abroad (the person receiving the service travels to the supplier's country).
- **Mode 3** - Commercial presence (e.g. a company subsidiary) - this mode is not counted as part of UK services trade on a balance of payments basis and is not reported in this release. This means that total figures are only the total of Modes 1, 2 and 4.
- **Mode 4** - Presence of natural persons (a supplier sends its personnel to the customer's country to provide service).

## UK services exports to Colombia by mode of supply in 2023:

- £235 million of services exports to Colombia were delivered by Mode 1 (52.7%).
- £146 million of services exports were delivered by Mode 2 (32.7%).
- £65 million of services exports were delivered by Mode 4 (14.6%).

## UK services imports from Colombia by mode of supply in 2023:

- £124 million of services imports from Colombia were delivered by Mode 1 (40.4%).
- £160 million of services imports were delivered by Mode 2 (52.1%).
- £23 million of services imports were delivered by Mode 4 (7.5%).

<sup>23</sup>ONS data source for UK Trade in Services by Mode of Supply: [ONS Imports and exports of services by country, by modes of supply, UK](#)

## UK Market Share (ONS and UNCTAD)<sup>24 25</sup>

### Market Share definitions

- **UK market share** – Imports from the UK as a percentage of all the goods and services imported by Colombia. Market share is provided for total imports from the UK, as well as for goods and services separately.
- **Market share methodology** – These UK market share statistics are derived by the Department for Business and Trade, using publicly available data from the Office for National Statistics (ONS) and the United Nations Conference on Trade and Development (UNCTAD). These new statistics allows users to estimate the importance of UK trade on imports to each trading partner. Market share is calculated as the value of imports from the UK using data from [ONS](#), divided by the value of total imports using data from [UNCTAD](#). Data from UNCTAD are converted from US dollars into pounds sterling by using the annual average spot exchange rate <sup>26</sup>.

The UK's market share for Colombia in 2024 was as follows:

- **The total UK market share in Colombia was 2.2% in 2024 for goods and services.** This is a decrease of 0.1 percentage points from 2023.
- The UK market share in Colombia was 1.7% in 2024 for **goods only**. This is a decrease of 0.3 percentage points from 2023.
- The UK market share in Colombia was 3.7% in 2024 for **services only**. This is an increase of 0.4 percentage points from 2023.

The table below presents the UK's market share for Colombia between 2015 and 2024. Values presented in italics are based on UNCTAD estimates of imports.

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024
Total goods and services	1.7%	1.6%	2.0%	1.4%	1.6%	2.0%	2.1%	1.8%	2.3%	2.2%

# Number of VAT-registered businesses trading goods (HMRC)<sup>27 28 29</sup>

## Business counts definition (Regional Trade in Goods Statistics)

- Business counts report UK VAT-registered business exporting and importing goods. Data is collected primarily from customs declarations (using the Intrastat survey and VAT returns for Northern Ireland businesses trading with the EU).
- Counts exclude businesses trading below the statistical value thresholds for customs declarations and exclude trade in non-monetary gold.

## Businesses trading goods with Colombia in 2024:

- In 2024, around 1,500 UK VAT-registered businesses exported goods to Colombia.
- In 2024, around 500 UK VAT-registered businesses imported goods from Colombia.

<sup>27</sup>HMRC data source for Regional Trade Statistics business counts data: [UK trade in goods statistics](#).

<sup>28</sup>Data for UK businesses engaged in trade of services with Colombia are not available. A single business may trade with multiple trading partners abroad, so care should be taken when adding figures for multiple trading partners.

<sup>29</sup>HMRC does not receive partner country information for customs declarations with commodity line values that fall under the statistical value threshold of £873 (in value) and 1,000kg (in net mass). Therefore, these counts of exporting/importing businesses only capture those businesses with exports/imports (respectively) above the statistical value threshold. The number of businesses has been rounded to the nearest 100.

# Trade in Value Added (OECD)<sup>30</sup>

## Trade in Value Added definitions

- **Trade in Value Added (TiVA)** - TiVA is a statistical approach to examine supply chains, which is not possible with conventional ('gross') trade statistics. This is because TiVA treats international trade flows as flows of value added rather than gross flows of final goods and services.
- **Domestic and foreign value added** - In TiVA, gross exports are decomposed into domestic and foreign value added. Domestic value added measures the value added generated by the domestic economy in the production of its exports (e.g. the value added by UK car manufacturers and their UK supply chains in car exports). Foreign value added measures the value added contribution that foreign suppliers make to these exports (e.g. the import of foreign car parts).
- **TiVA statistics** - Although TiVA offers advantages over traditional ways of measuring trade, these statistics are not fully developed. These results are estimates which should be considered complementary to conventional trade statistics and not be over-interpreted. In addition, the geographical detail is limited for developing countries. More information on TiVA can be found in a recent [research report](#) by the Department for Business and Trade and Cambridge Econometrics.
- **UK forward linkages for exports** - Measures the reliance of foreign exporters on UK value added (inputs).
- **UK backward linkages for exports** - Measures the reliance of UK exporters on foreign value added (inputs).
- **Employment supported by exports** - This provides an estimate of the number of employees in exporting industries, and their domestic supply chains that are supported by exporting activity.

## UK forward linkages for exports:

- In 2022, 0.3% of the total value added in gross exports from Colombia originated in the UK.
- In 2022, 13.6% of the value added content in gross exports from Colombia reflected foreign imports from abroad. The largest sources of foreign value added for gross exports from Colombia were United States (4.2%), China (2.2%), and Brazil (0.7%).

## UK backward linkages for exports:

- In 2022, less than 0.1% of the total value added in gross exports from the UK originated in Colombia.
- In 2022, 18.9% of the value added content in gross exports from the UK reflected foreign imports from abroad. The largest sources of foreign value added for gross exports from the UK were United States (2.6%), China (1.9%), and Germany (1.7%).

## Employment supported by exports:<sup>31</sup>

- Exporting activity in Colombia supported 2.3 million jobs in 2020 (11.8% of total Colombia employment). Exports to the UK supported around 36,600 jobs in Colombia in 2020.
- Exporting activity in the UK supported 6.7 million jobs in 2020 (20.6% of total UK employment). Exports to Colombia supported around 8,300 jobs in the UK in 2020.

<sup>30</sup>The estimates in this factsheet are based on Trade in Value Added statistics published by the Organisation for Economic Co-operation and Development (OECD): a) [Trade in Value Added database \(origin of value added in gross exports\), October 2025](#); and b) [Trade in employment \(TiM\) database, January 2025](#), indicators EXGR\_DEM.

<sup>31</sup>These estimates measure employees directly and indirectly supported by exports i.e. workers employed in exporting businesses and in other domestic businesses supplying inputs to the exporting businesses. The estimates should be interpreted as employment *supported* by exports, rather than employment *created* by exports, as the jobs may have previously existed to serve the domestic market. Employees may also be supported by exports from a multiple number of trading partners. As with the core TiVA data, these estimates are based on a number of assumptions and modelling, so should be interpreted with caution.

# Foreign Direct Investment with Colombia (ONS)<sup>32 33 34</sup>

## Foreign direct investment definitions

- **Foreign direct investment (FDI)** - Investment made by a firm or individual in one economy ('direct investor') to acquire a 'lasting interest' in an enterprise operating in another economy. The lasting interest is deemed to exist if the direct investor acquires at least 10% of equity, or equivalently 10% of the voting rights, of the company.
- **FDI stock** - The accumulated value of all previous investments at the end of a reference period. Figures are net, that is the value of investment minus disinvestment. **UK outward FDI stock** provides the total value of FDI by UK investors in economies abroad (investment of a UK parent company in Colombia), while **UK inward FDI stock** provides the total value of FDI by non-UK investors in the UK (investment of a Colombia parent company in the UK).
- **Data disclosure** - It can happen that FDI is coming from only a few investors. In that case, figures are suppressed by the ONS to avoid disclosure of information relating to individual enterprises.

**Note:** The FDI data for 2020 have been affected by changes in sampling methodology. Improvements have been made to the population which has been sampled and the way that businesses are sampled from the population, capturing a wider range of businesses. This means data from 2020 and onward are more representative of UK FDI with overseas partners and are comparable.

More information about the methodology changes can be found on the [ONS website](#).

### UK outward FDI stock:

- At the end of 2023, the **stock of FDI from the UK in Colombia** was £643 million, 56.8% or £845 million lower than the end of 2022. At the end of 2023, Colombia accounted for less than 0.1% of the total UK outward FDI stock.

### UK inward FDI stock:

- At the end of 2023, the **stock of FDI from Colombia in the UK** was £1.6 billion, 4.0% or £62 million higher than the end of 2022. At the end of 2023, Colombia accounted for 0.1% of the total UK inward FDI stock.

<sup>32</sup>Data for both inward and outward FDI between the UK and Colombia are not available in the main ONS release ([Foreign Direct Investment involving UK companies](#)). Therefore, an [ONS FDI ad-hoc data release](#) is used to provide the latest FDI data for Colombia where it is unavailable in the main ONS release.

<sup>33</sup>Data are presented on a directional basis which means they are not directly comparable to the asset/liability report prepared by ONS as part of the Balance of Payments statistical release. Figures are on net basis (investments minus disinvestments) and are given in nominal terms. Negative FDI values occur when disinvestments are greater than investments. Data are on an immediate destination/source basis and not an ultimate destination/source, which is likely to overstate financial centres such as the Netherlands and Luxembourg.

<sup>34</sup>This factsheet contains data as reported by the UK and are subject to asymmetries e.g. UK outward FDI to Colombia (reported by the UK) may not match Colombia inward FDI from the UK (reported by Colombia). For consistency when comparing between partners, users are advised to use UK-reported data as far as possible.

## Background Notes

This document is one of a wider set of factsheets between the UK and its individual trade and investment partners which can be found on the [Trade and Investment Factsheets website](#). All of these factsheets are published as [Official Statistics](#) as defined by the [UK Statistics Authority](#).

Our statistical practice is regulated by the Office for Statistics Regulation (OSR). OSR sets the standards of trustworthiness, quality and value in the [Code of Practice for Statistics](#) that all producers of official statistics should adhere to. You are welcome to contact us directly with any comments about how we meet these standards. Alternatively, you can contact OSR by emailing [regulation@statistics.gov.uk](mailto:regulation@statistics.gov.uk) or via the OSR website.

The publication of these factsheets as Official Statistics was agreed by the Chief Statistician at the Department for Business and Trade, who monitors these factsheets to ensure they continue to adhere to the [Code of Practice for Statistics](#). These factsheets have not been formally assessed by the [Office for Statistics Regulation](#) and are therefore not designated as [Accredited Official Statistics](#).

As a requisite of publishing as Official Statistics, a [quality and methodology report](#) has been produced which outlines the quality of these factsheets, as well as providing more information on the methodology of the data sources presented here. This report contains hyperlinks to information on the strengths and weaknesses for each data source. Statistics contained in the factsheets from UK data providers all come from Official Statistics publications, with some sources also being from National Statistics publications.

Future updates of these factsheets can be found on the [Government update schedule for Official Statistics](#). These scheduled updates are in line with significant updates from UK data providers when they release new data. Unscheduled releases of the factsheets may also be necessary to accommodate data updates where little or no advanced notice are given, such as in the case of international data updates. Please see the data update schedule and revisions policy in the [quality and methodology report](#) for more information. Please note that there may be occasions where more recent data than is provided here can be found directly from the data providers.

The Department for Business and Trade welcome any feedback or comments on these factsheets, please send these to [statistics@businessandtrade.gov.uk](mailto:statistics@businessandtrade.gov.uk).
