Dear Sir / Madam

I write in connection with the above application to install CCTV cameras to the field to the rear of my home [REDACTED].

My concern relates to that of privacy, having reviewed the CCTV system and design report it is apparent that Cameras 1, 2 and potentially 4 will overlook the rear of my property encroaching on my privacy and freedom.

Additionally I am surprised at the need for 8 poles consisting of 3 cameras each (24 in total) given they overlook a field in one of the lowest crime areas in Bristol. This seems excessive and intrusive given that there are public footpaths that run across this land. The GDPR implications seem to be significant given the level of surveillance.

Given the reasons above I wish to object to the proposal

Kind Regards

James
