### INFORMATION ON ENGLAND AND WALES SEED CERTIFICATION FEE CHANGES

Dear Sir/Madam,

I am writing to notify you of a number of planned changes to seed certification fees in England and Wales. These changes will take effect from 1 February 2026 and the new fees are set out in tables below.

It is UK Government policy to charge for many publicly provided goods and services. The standard approach is to set fees to recover the full costs of service delivery and to review these fees annually. This relieves the general taxpayer of costs, so that they are properly borne by users who benefit from a service. This allows for a more equitable distribution of public resources and enables lower public expenditure and borrowing.

Plant Varieties and Seeds services, including seed certification, operate in line with this principle of full cost recovery. Plant Varieties and Seeds fees are reviewed regularly and adjusted to ensure no under, or over, recovery of costs (Managing Public Money, HM Treasury, June 2025).

The changes set out below ensure that the full costs of the services provided are reflected in the fees. Seed certification fees will continue to be reviewed annually, with any required fees changes planned to be implemented in July 2026 and then April from 2027 onwards, to ensure fees remain reflective of service delivery costs. A wider review of seed certification fees in England and Wales is also currently underway to take account of wider changes to this service and details of this will be circulated in due course.

Yours sincerely,

**Michael Brown**

**Joint Head of Plant Varieties and Seeds, APHA**
