### Summary

- The Panel discussed skills and the need to raise awareness of the industry to develop the talent pipeline across both design, manufacturing and academia.
- The Panel discussed the reforms to the London Stock Exchange, and the private investment landscape in the UK.
- The Panel discussed how the defence industry relies on the semiconductor sector and opportunities to develop more resilient supply chains.
- The Panel heard about the British Industrial Competitiveness Scheme (BICS) consultation, and opportunities to feed into the development.
- The Panel discussed the opportunities represented by growth from the AI sector, but emphasised that to benefit from growth would require an appropriate skills base.
