

EXPORT OF PRIMATES TO DENMARK

NOTES FOR GUIDANCE (NFG) FOR OFFICIAL VETERINARIANS AND EXPORTERS

IMPORTANT: The certificate is provided based on information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, in Carlisle, see the link below.

[Contact APHA - GOV.UK \(www.gov.uk\)](http://www.gov.uk)

This document should not be read as a standalone document but in conjunction with 9125EHC.

Scope of the certificate

This certificate may be issued for the export of **Primates** where the certification takes place in Wales, Scotland or England, i.e. Great Britain only.

A note on the English text and translation:

Please note that this certificate is taken from an English translation provided by **Danish** Authorities and the English text is therefore constrained by their model certificate.

Country of origin

Although the certificate has been prepopulated with UNITED KINGDOM, this certificate should and can only be issued for animals that are certified in England, Scotland and Wales (i.e. Great Britain).

Certification

The basic principles of certification apply and although this is not a harmonised EU level EU entry certificate, the general requirements that the EU specifies for its harmonised certificates for Part I of the certificates should be followed i.e. Commission Implementing Regulation (EU) 2020/2235 Chapter 4 Annex I.

Entry BCP

Official designation number of the BCP should be used, list for reference provided here: [Designated Border Control Posts \(BCPs\) \(europa.eu\)](http://europa.eu).

9125NFG (Cleared 09/02/2026)

Place of loading

In the case of traveling by plane, write "name of the airport". In case of traveling by sea, write "name of the port". In case of traveling by land, write "name of the establishment where the animals are loaded onto means of transport".

Means of transport

Select one or more of the following means of transport for animals or goods leaving the country of dispatch, and indicate its identification:

- aircraft (indicate the flight number);
- ship (indicate the ship name and number);
- railway (indicate the train identity and wagon number);
- road vehicle (indicate the registration number with trailer number, if applicable).

In the case of a ferry, tick 'ship' and identify the road vehicle(s) with registration number (with trailer number, if applicable), in addition to the name and number of the scheduled ferry.

Notifiable Disease Clearance

Point II.1 and II.2 - The Danish authority will accept either Balai approval or Confined Establishment approval status to certify these two health attestations.

Diseases specified in the certificate that require establishment freedom only

(In this scenario, OV's do not have to approach CITC and must establish the disease freedom themselves.)

For diseases that require disease freedom attestations at the level of the establishment of origin/departure (within the boundaries), OV's should check establishment records, [check with the (approved) premises' veterinarian] [check with the veterinarian responsible for the registered establishment] (if a different person) and collect evidence as necessary for themselves. For diseases that are on National lists, see below.

Check official UK listing for freedom

For national and regional freedom of diseases first check the official sources of disease information for the United Kingdom.

- the Notifiable Disease Occurrence List for Great Britain (ET171) available on the 'Exports > Certification Procedures' page of the APHA Vet Gateway (link below),
- the UK Status for Non-Notifiable Diseases Relevant to Export Certification (ET152) available on the 'Exports > Certification Procedures' page of the APHA Vet Gateway, (link below).

[http://apha.defra.gov.uk//External OV Instructions/Export Instructions/Certification Procedures/index.htm](http://apha.defra.gov.uk//External%20OV%20Instructions/Export%20Instructions/Certification%20Procedures/index.htm)

These listings are the basis on which the diseases listed there, can be certified. However, the recent occurrence of a disease in the territory of Great Britain does not necessarily preclude certification and may need to be subject to an NDC issued by Carlisle Centre for International Trade (see below).

A final check of disease freedom status (for diseases not issued on an NDC) on the day of certification is required.

In the event of a disease outbreak that OV's become aware of, after the EHC has been issued that affects the disease clearance, OV's must not certify the EHC and must contact CITC immediately for advice on whether certification can still take place.
