

Before launch – urgent updates

- **Publishing** – Restore patent publishing to full capacity.
- **Improvements to internal system** – Speed up processing of requests including filing receipts for NP1 applications and invoicing.
- **Derivation of right** – When applying for a patent, we will be adding more options so filers can accurately state how the rights were derived from the inventor.
- **Changes to drafts** – The user who submits a draft application will now get notifications, not the user who created it.
- **Update fees** – Update service so new fees are displayed and customer is charged the correct amount.

Launch window – 0-6 months after launch

- **Correspondence** – Improvements to correspondence, including who receives it, downloading multiple documents at once and a document previewer.
- **Patent application improvements**
 - The representative defaults to the organisation your account is linked to.
 - Improvements to ‘Review and submit’ page to include fee details and to prompt further checks.
- **Respond to an examination improvement** – Add an ‘Additional Docs’ option to allow tracked changes to be uploaded more easily.
- **Search improvements** - Add the ability to search for patents by publication number. Improve party search by only returning addresses that are in use.
- **Change of name and address** – The change name and change address features will be added to the service.
- **Withdrawal** – Add option to upload supporting information, add a further prompt before withdrawals are completed and display supporting details of the application being withdrawn.

Beyond launch – 6-12 months beyond launch

- **Correspondence** – Implement further changes and improvements to make it easier for users to review and download correspondence.
- **Patent application improvements** – Implement further changes and improvements, including ways to play back application details and documents immediately after submission.
- **Payment and invoicing** – Improvements to the payment experience in OneIPO, including views of Deposit Account balances and improvements to when invoices are issued for new applications.
- **National Phase Applications** – Make Improvements to the claim a priority date journey.
- **Renewal reminder and ceasing notifications** – Sending the overdue renewal reminder and ceasing notifications generated from OneIPO out digitally.
