

The Environment Agency (Environmental Permitting and Abstraction Licensing) (England) Charging Scheme 2022

Amendments up to 15 May 2026

Version: 1.9

We are the Environment Agency. We protect and improve the environment.

We help people and wildlife adapt to climate change and reduce its impacts, including flooding, drought, sea level rise and coastal erosion.

We improve the quality of our water, land and air by tackling pollution. We work with businesses to help them comply with environmental regulations. A healthy and diverse environment enhances people's lives and contributes to economic growth.

We can't do this alone. We work as part of the Defra group (Department for Environment, Food & Rural Affairs), with the rest of government, local councils, businesses, civil society groups and local communities to create a better place for people and wildlife.

The Environment Agency (Environmental Permitting and Abstraction Licensing) (England) Charging Scheme 2022

The Environment Agency in exercise of its powers under sections 41 to 41C of the Environment Act 1995, and with the approval of the Secretary of State and the consent of the Treasury, makes the following Charging Scheme.

Part 1: General

Commencement, extent and citation

1. (1) This charging scheme shall be referred to as the Environment Agency (Environmental Permitting and Abstraction Licensing) (England) Charging Scheme 2022 (“this Scheme”).

(2) It extends only to England, including the Isles of Scilly.

(3) It comes into force on 1 April 2022 and remains in force until revoked.

Interpretation: general

2. (1) In this Scheme –

“the Act” means the Water Resources Act 1991 and, unless otherwise specified, expressions used in this Scheme in relation to a water resources activity, have the same meaning as those used in the Act;

“the Regulations” means the Environmental Permitting (England and Wales) Regulations 2016 and, unless otherwise specified, expressions used in this Scheme in relation to a regulated facility have the same meaning as those used in the Regulations;

“activity” means a regulated facility or a water resources activity and for the purposes of this Scheme, and subject to its other provisions, an activity is deemed to fall within whichever description or descriptions in the Application Charge Tables and the Subsistence Charge Tables, fit it most aptly;

“application” means –

(a) an application –

(i) for a permit,

(ii) to vary, transfer, or surrender a permit,

(iii) to partially transfer or surrender a permit, or

(iv) to register an exempt waste operation,

(b) a regulator initiated variation, made under the Regulations, or

(c) an application for a permit, or to vary a permit or revoke an impounding permit, made under the Act;

“application charge” means a charge described in Part 2 of this Scheme;

“Application Charge Tables” means the “Environmental Permitting Application Charge Tables” and the “Water Resources Application Charge Tables”;

“charitable purposes” has the meaning given in section 2 of the Charities Act 2011;

“default standard facility” means a standard facility described in standard rules made after 1 April 2022;

“default standard facility charge” means the application or subsistence charges specified in the Agency’s response to the consultation on the standard rules relating to that facility, selected from –

- (a) the Default Standard Facility Charge Table in Chapter 4 of Part 1 of the Schedule, or

- (b) the Environmental Permitting Application Charge Tables or the Environmental Permitting Subsistence Charge Tables;

“Environmental Permitting Application Charge Tables” and “Environmental Permitting Subsistence Charge Tables” mean the Tables with those titles contained in Part 1 of the Schedule;

“financial year” means the 12 months ending on 31 March;

“nuclear site” has the meaning given in the Regulations but also includes a site which would require a nuclear site licence under the Nuclear Installations Act 1965, were it not exempt from this requirement by virtue of other legislation;

“permit” includes a licence within the meaning of the Act;

“reference” means the relevant number in the first column of the Application Charge Tables or the Subsistence Charge Tables, applicable to an application activity or a subsistence activity;

“relevant time and material costs” means –

- (a) in relation to a specified radioactive substances activity, those costs and expenses

- (i) incurred by the Agency in the determination of an application (including pre-application advice) or the annual subsistence of a permit, based on an hourly rate of £366.41 in relation to key technical work in relation to a specified radioactive substances activity, and £134.94 in any other case,

- (ii) in the case of a radioactive substances activity carried on at a nuclear site, incurred by the Food Standards Agency in carrying out its functions in relation to those matters, or

(b) in any other case, those costs and expenses incurred by the Agency in relation to the relevant matters described in this Scheme, based on an hourly rate of –

(i) £103.80, in the case of charges arising under paragraphs 14(1)(a) and (b) of this Scheme,

(ii) £129.75, in the case of charges arising under paragraph 14(1)(d) of this Scheme, or

(iii) £103.80 in any other case,

as notified from time to time by the Agency to the operator (including by way of estimates, subject to later reconciliation);

“sewerage undertaker” has the meaning given in the Water Industry Act 1991;

“specified radioactive substances activity” means a radioactive substances activity –

(a) carried on at a nuclear site,

(b) which involves the accumulation or disposal of radioactive waste at a regulated facility permitted for the accumulation and then disposal of radioactive waste to land,

(c) which involves the use of radioactive material for the purposes of generating electricity from fusion including any associated research and development, or

(d) which involves intrusive investigation work or other excavation, construction or building work carried on to determine the suitability of, or enable the use of, any premises as a place that may be used wholly or substantially for the underground disposal of solid radioactive waste;

“standard facility” means a regulated facility described in standard rules and which is the subject of a request from the operator made under, or a term referred to in, regulation 27(2) of the Regulations;

“subsistence charge” means a charge described in Part 3 of this Scheme;

“Subsistence Charge Tables” means the “Environmental Permitting Subsistence Charge Tables” and the “Water Resource Subsistence Charge Tables”;

“waste exemption charge” has the meaning given in Part 5 of this Scheme;

“water abstraction activity” means an abstraction of water which is required to be carried out under and in accordance with a licence granted under the Act and

“abstraction permit” shall be construed accordingly;

“water impounding activity” means an impounding of water which is required to be carried out under and in accordance with a licence granted under the Act and “impounding permit” shall be construed accordingly;

“water industry enforcement levy” has the meaning given in paragraph 14 (3);

“water resources activity” means a water abstraction activity or a water impounding activity and “water resources permit” shall be construed accordingly;

“Water Resources Application Charge Tables” and “Water Resources Subsistence Charge Tables” mean the Tables with those titles contained in Part 2 of the Schedule;

“water undertaker” has the meaning given in the Water Industry Act 1991;

(2) Nothing in this Scheme affects any powers of the Agency to enter into agreements under the provisions of sections 126, 127 and 130 of the Act.

(3) Subject to sub-paragraph (4), any references in this Scheme to a document published on GOV.UK mean the version of that document in force on that site on 1 April 2022.

(4) Any reference in this Scheme to guidance published on GOV.UK entitled “Choosing waste exemptions for waste management activity” means the version in force on 12 December 2024.

(5) The Schedule to this Scheme (Tables of Charges) has effect.

Liability to pay charges

3. The persons set out below are liable to pay the charges under this Scheme –

(a) in respect of an application charge, the person or persons –

(i) applying to hold a permit,

(ii) holding the permit to which the application relates,

(iii) applying for the transfer of a permit, or

(b) in respect of a subsistence charge, the holder of the permit in respect of which the subsistence charge is payable, or

(c) in respect of a waste exemption charge, the establishment or undertaking named in relevant particulars notified to the Agency pursuant to paragraph 10(1) of Schedule 2 of the Regulations, or

(d) in respect of a fee for intervention under Part 6 of this Scheme, the person the Agency reasonably suspects of carrying on an activity without a permit

contrary to regulation 12 of the Regulations or section 33 of the Environmental Protection Act 1990.

Time of payment

4. Charges payable under this Scheme are due and payable in full at the following times on or after the 1 April 2022 –

- (a) subject to sub-paragraph (b), an application charge is payable on the making of an application;
- (b) the following application charges are payable on demand –
 - (i) charges arising under paragraph 10;
 - (ii) charges where the application charge is the relevant time and material costs;
- (c) subject to sub-paragraph (d), a subsistence charge is payable annually on 1 April;
- (d) the following subsistence charges are payable on demand –
 - (i) a charge arising in the first year in which a permit is granted or in which the charge becomes payable;
 - (ii) any case where the subsistence charge is the relevant time and material costs;
 - (iii) any charges arising after 1 April in any year, under paragraphs 14 or 15 of this Scheme;
 - (iv) any charge arising under paragraph 13(11)(b) of this Scheme;
- (e) a waste exemption charge is payable on the date of registration and on each renewal date as defined in paragraph 6 of Schedule 2 of the Regulations;
- (f) all other charges are payable on demand.

Abatement of charges

5. The Agency may, by notice to the person liable for the charge, waive or reduce any charge specified in this Scheme if it considers it to be significantly disproportionate in a particular case, having regard to the actual costs and expenses

incurred or to be incurred by the Agency in relation to a particular application or subsistence period.

Inflation

5A. All charges in this Scheme shall increase on 1 April 2027 and annually thereafter on 1 April in each subsequent year, by a sum not exceeding the Consumer Prices Index measure of inflation in the 12 months to September of the immediately preceding year, as published by the Office for National Statistics.

Revocation

6. The following Environment Agency Charging Schemes are revoked for any period on or after 1 April 2022 –

- (a) The Environment Agency (Environmental Permitting) (England) Charging Scheme 2018 which came into effect on 1 April 2018, and all subsequent amendments made to that Scheme, and
- (b) The Environment Agency Scheme of Abstraction Charges 2020 to 2021 which came into effect on 1 April 2021.

Part 2: Application charges

Interpretation of this Part

7. In this Part –

“administrative application” means an application which the Agency considers to be of a purely administrative nature;

“application activity” means a single activity described in a single sentence in column 2 of the Application Charge Tables;

“application activity charge” means the charge for the relevant type of application described in columns 3 to 8 of the Application Charge Tables, which corresponds to the relevant application activity;

“application amendment” means a request to make an amendment to an application which the Agency considers requires further public consultation;

“asset management plan” means a plan under which the water companies operate for a five year period;

“combined sewer overflow” and “emergency overflow” have the meanings given in Part 1 of the Schedule;

“different terms renewal application” means an application which would be a renewal application but does not meet the conditions in paragraphs (b) and/or (c) of the definition of renewal application;

“enhanced pre-application advice” means advice given by the Agency in relation to a proposed application for a permit, which goes beyond basic assistance and signposting to guidance;

“environmentally beneficial activity” means a water resources activity which the Agency is satisfied is to be carried out on a non-commercial basis, solely for the benefit of the environment and not as a result of any statutory or regulator imposed requirement;

“farming installation” means an installation falling within Section 6.9 of Part 2 of Schedule 1 to the Regulations;

“farming review variation” means a variation relating to the review of a permit authorising a farming installation;

“further information notice” means a notice served under paragraph 4 of Part 1 of Schedule 5 to the Regulations;

“habitats assessment” means an assessment of the risks to one or more of the following sites –

- (a) a European site within the meaning of the Conservation of Habitats and Species Regulations 2017;
- (b) a site referred to in the National Planning Policy Framework 2023 as requiring the same assessment as a European site;
- (c) a site of special scientific interest within the meaning of the Wildlife and Countryside Act 1981;
- (d) a marine conservation zone within the meaning of the Marine and Coastal Access Act 2009;

“high public interest application” means an application which the Agency considers requires enhanced public participation, taking into account in relation to a regulated facility its public participation statement published on GOV.UK under regulation 60 of the Regulations.

“low risk surrender activity” means –

- (a) an activity comprising the permanent deposit of waste, in relation to which the operator has received confirmation from the Agency that a low risk or basic surrender application can be made, in accordance with the guidance titled “Landfill and deposit for recovery activities: aftercare and surrender” published on GOV.UK, or
- (b) any other activity, in relation to which the operator has received confirmation from the Agency that intrusive investigation is not required in accordance with the criteria in box 1 of “Site condition report – guidance and templates”, (H5), version 3, published by the Agency in May 2013;
- (c) a stand-alone groundwater activity consisting of a discharge to a well or borehole where that activity has not been put into operation;

“minor variation” means an application to vary a permit which the Agency considers is of a minor technical nature;

“normal variation” means an application to vary a permit which is not a minor variation or a substantial variation;

“open-loop heat pump” means a device that transfers heat or water to, or from, the ground (“ground source heat pump”) or a water body (“water source heat pump”) to provide heating, cooling or hot water for residential, commercial or industrial buildings;

“renewal application” means an application for an abstraction permit or variation which –

- (a) is made by the holder of a permit or variation within one year prior to its expiry,
- (b) does not request authorisation of an abstraction of a greater volume or from a different point to that authorised by the expiring permit or variation, and
- (c) is otherwise subject to materially the same conditions as the expiring permit or variation;

“substantial variation” means an application to vary a permit which the Agency considers is likely to involve significant assessment.

Application charges – general

8. (1) An application charge is payable for an application unless it is –

- (a) an administrative application;
- (b) an application solely to reduce the volume of water authorised under an abstraction permit.

(2) Subject to the other provisions of this Part, the application charge is the total of the application activity charges applicable to all the application activities which are the subject of the application.

(3) Where more than one application activity (other than a flood risk activity) is the subject of an application for a permit, the application activity charge for each activity, except the one for which the largest charge is payable, is reduced by –

- (a) 90% for all those activities which –
 - (i) fall in the same application activity description;
 - (ii) comprise the storage of hazardous waste, incidental to an installation carrying on activities falling within either reference 1.16.1 or 1.16.4 of the Environmental Permitting Application Charge Tables;
 - (iii) comprise the treatment of non-hazardous effluent and its subsequent discharge to sewer where associated with each other;
 - (iv) as part of the same operation, abstract water from the same source of supply, excepting any activity which is the subject of a renewal application or which is an environmentally beneficial activity;
 - (v) comprise the abstraction of water for an open-loop heat pump with any discharge associated with the open-loop heat pump;
- (b) 50% for any other activities which –

- (i) are reasonably associated with each other,

as part of the same operation, abstract water from different sources of supply, excepting any activity which is the subject of a renewal application, or which is an environmentally beneficial activity;

(4) Where more than one application activity which is a flood risk activity is the subject of an application for a permit, the application activity charge for each activity, except the one for which the largest charge is payable, is reduced by 75%.

(5) Where an application is returned because it is not duly made (unless this is due to obvious errors or omissions), the Agency will retain a sum equal to 20% of the application charge, subject to a maximum of £1,673.78.

Application charges – special cases

9. (1) In the case of the following applications, the application charge is the relevant time and materials costs –

- (a) an application which relates to a specified radioactive substances activity;
- (b) an application which relates to the Agency's functions under the Ship Recycling Facilities Regulations 2015;
- (c) an application submitted as part of a staged procedure agreed with the Agency;
- (d) an application to revoke an impounding permit.
- (e) an application which relates to a groundwater mobile plant.

(2) In the case of an application for a permit, where the application is for –

- (a) a default standard facility, the charge is the relevant default standard facility charge;
- (b) an environmentally beneficial activity, the charge is £1,704.92 where the activity is the impounding or transfer of water, or £153.45 in any other case.

(3) The application charge for a renewal application is £153.45.

(4) The application charge for a different terms renewal application authorising an environmentally beneficial activity, is £1,704.92 where the activity is surface water or groundwater abstraction for the transfer of water, and £153.45 in any other case.

(5) In the case of an application to vary a permit, where the application is –

- (a) to authorise the operation of an activity which is not already authorised by that permit, the charge is the permit application charge applicable to that activity;
 - (b) to apply standard rules to an activity, the charge is the permit application charge applicable to an activity subject to those standard rules;
 - (c) to vary a permit which authorises only flood risk activities, the applicable charge shall be £75.88 in the case of a minor variation, and £227.63 in the case of any other variation;
 - (d) to vary event duration monitoring of combined sewer overflows or emergency overflows for asset management plan 6 or 7, under a permit authorising a water discharge or groundwater activity by a sewerage undertaker, the charge is £937.31;
 - (e) to remove authorisation to carry on an activity which has not been put into operation, the charge is the lower of £859.20 or the applicable charge for a minor variation;
 - (f) for a minor variation to a water resources permit, the charge is £943.39;
 - (g) vary a permit which authorises only an environmentally beneficial activity, the charge is £153.45.
- (6) In the case of a farming review variation, the charge is £394.44.
- (7) In the case of an application to transfer a permit, where –
- (a) the application relates to the whole of the permit, the transfer charge is the highest transfer charge applicable to an application activity authorised by the permit;
 - (b) the application relates to only part of the permit, the transfer charge is the total of the highest transfer and highest normal variation charges applicable to an application activity authorised by the permit;
 - (c) more than one application to transfer a permit from a single transferor to a single transferee are made at the same time, the transfer charge for each such application, (except the one for which the largest charge is payable, or any that relate to a radioactive substances activity or a landfill), is reduced by 80%;
 - (d) the application activity falls within references 2.17.11 to 2.17.16 of the Environmental Permitting Subsistence Charge Tables and is authorised by a permit which does not require financial provision, the transfer charge is £2,625.10.
- (8) In the case of an application to surrender a permit or part of a permit –

- (a) the surrender charge is the highest surrender charge applicable to any of the application activities that have at any time been authorised by the permit (or the part of the permit subject to the application), excluding any activities in relation to which surrender has already been accepted;
- (b) where an activity is a low risk surrender activity, the surrender charge is 20% of the charge that would apply to an application for a permit for that activity.
- (c) where an activity is a stand-alone groundwater activity consisting of a discharge to a well or borehole which –
 - (i) is used for hydrocarbon exploration or extraction, and
 - (ii) intersects a hydrocarbon formation,the surrender charge is £4,876.42.

(9) In the case of a regulator initiated variation, the charge is equivalent to the charge that would have been payable if the variation had been made in response to an application.

Application charges – additional charges

10. The following additional charges apply –

- (a) £557.93, where the Agency incurs or will incur costs in relation to the advertisement of an application made under the Regulations;
- (b) £2,153.59, in relation to an application amendment;
- (c) the relevant time and materials costs relating to enhanced pre-application advice;
- (d) £1,339.02, in relation to the service by the Agency of a third or subsequent information notice in relation to the same issue;
- (e) the charges relating to the plans and assessments described in Table 1.19 of the Environmental Permitting Application Charge Tables, except where consideration of a plan is included in an application activity;
- (f) The relevant time and materials costs relating to –
 - (i) a high public interest application;
 - (ii) an application for an abstraction permit, where another application is also made, or pre-application discussions are commenced, to allow abstraction or impounding of the same water,

to the extent that those costs exceed the application charge;

- (g) In the case of an application for an abstraction permit, or a variation of an abstraction permit –
- (i) £2,262.84, where the application is made by a water undertaker carrying out its statutory functions, except where the application is a renewal application or is for a temporary licence or a minor variation;
 - (ii) the costs incurred in relation to the advertisement of the application, plus £113.14;
 - (iii) £339.43, where consultation with another statutory authority is required under the Act;
 - (iv) £881.38, where a habitats assessment is required.

Part 3: Subsistence charges

Interpretation of this Part

11. In this Part –

“aggregate limit” means a limit in a permit which restricts the aggregate volume of water authorised to be abstracted from more than one point under the same permit, or under two or more permits;

“aggregate group permit” means a permit which is part of a group of permits (“aggregate group”) to which a common aggregate limit applies;

“authorised activities” means all those activities authorised by a permit;

“authorised activities charge” means the total of the subsistence activity charges which in combination apply to the authorised activities;

“common water abstraction activity” means any two or more water abstraction activities which share common cost factors, where “cost factor” means the following factors used in the Water Resources Subsistence Charge Tables, namely, loss, water availability, modelling and source of supply;

“compliance rating activities” means those authorised activities which are waste operations or installations, excluding waste mobile plant and farming installations falling within reference 2.14.2 of the Environmental Permitting Subsistence Charge Tables;

“compliance rating adjustment” means the relevant percentage figure set out in Box 1 below, which corresponds to the compliance rating band (“A” to “F”), accorded to the compliance rating activities by the Agency under the Compliance Rating Guidance on 31 December in the calendar year preceding the year in which the charge is payable, or on the date on which the permit is first granted, if later –

Box 1

Compliance rating band	A	B	C	D	E	F
Compliance rating adjustment (%)	95	100	110	125	150	300

“Compliance Rating Guidance” means the guidance titled “Waste operations and installations: assessing and scoring environmental permit compliance” published on GOV.UK;

“decarbonisation readiness report” has the meaning given in Schedule 25C of the Regulations;

“deployment application” means an application to locate and operate mobile plant on a site, made under the conditions of the permit authorising the operation of that plant;

“deployment charge” means the charge applicable to an activity set out in the column titled “deployment charge” in the Environmental Permitting Subsistence Charge Table unless the activity is a groundwater mobile plant, in which case the relevant time and materials charge under paragraph 13(7)(c) applies;

“discharge charge” means the number of water industry subsistence activities authorised by permits held by the sewerage undertaker multiplied by £407.93;

“domestic household” and “type” in relation to a water discharge or groundwater activity, have the meanings given in the Schedule;

“intermittent discharge” means non-continuous sewage discharges from the sewerage network, sewage treatment systems or trade effluent processes where the discharge is to accommodate circumstances outside the control of the operator;

“materials facility notification” means a notification made by the operator of a materials facility under paragraph 1(2) of Part 2 of Schedule 9 to the Regulations;

“relevant discharge” means a water discharge activity or groundwater activity falling within a description in references 2.3.1 to 2.3.59 or 2.3.81 to 2.3.91 of the Environmental Permitting Subsistence Charge Tables;

“spray or trickle activity” means spray or trickle irrigation authorised by an abstraction permit, provided that any spray irrigation is subject to an agreement with the Agency under section 127 of the Act and any trickle irrigation is subject to an agreement with the Agency, and the permit holder –

uses an approved water meter, installed and maintained to the satisfaction of the Agency, and

submits to the Agency within 28 days of a written request, a daily (or such other frequency agreed in writing by the Agency) meter reading of the quantities of water abstracted and details of pumping and irrigation equipment;

“subsistence activity” means a single activity described in a single sentence in column 2 of the Subsistence Charge Tables, provided that in the case of either a permit with an aggregate limit or an aggregate group permit, either of which authorises common water abstraction activities, the volumes of those common water abstraction activities are aggregated (subject to any applicable aggregate limit) and treated as a single activity;

“subsistence activity charge” means the charge in column 3 of the Subsistence Charge Tables, which corresponds to the relevant subsistence activity, together with –

- (a) in the case of an abstraction permit held by a water undertaker carrying out its statutory functions, the relevant additional charge set out in Table 1 of Chapter 4 of Part 2 of the Schedule, and
- (b) in the case of an abstraction permit authorising abstraction from a supported source, the supported source additional charge, set out in Table 2 or Table 2A of Chapter 4 of Part 2 of the Schedule;

“supported source” means those sources or parts of sources specified in –

- (a) the agreement made under section 20 of the Act with Anglian Water Services Limited dated 12th May 1995, or
- (b) Table 3 of Chapter 4 of Part 2 of the Schedule and [\[enter link to maps\]](#), supported either by the Kielder Reservoir Transfer Scheme (contained in an agreement between the National Rivers Authority and Northumbrian Services), or by any other source,

but excluding abstraction from a supported source authorised by a permit that contains 'hands off flow' conditions which prevent the abstraction from being made at any time during periods of river support and where those conditions cannot affect the magnitude of that support;

“suspension notice” includes a notice under the Environmental Licences (Suspension and Revocation) Regulations 1996;

“volume” in relation to a water abstraction activity means the authorised annual quantity specified in the permit provided that –

- (a) where a permit does not specify an authorised annual quantity, the volume is calculated from the rates of abstraction specified in the permit, and
- (b) where a permit or aggregate group is authorised to abstract over a multi-year period the authorised annual quantity is calculated as the average volume per year derived from that multi-year limit.

“volume charge” is calculated as follows –

- (a) Multiply the total number of permitted discharges for water industry subsistence activities authorised by permits held by the sewerage undertaker by –
 - (a) for water industry subsistence activities within references 2.3.81 to 2.3.90, the lowest value in the range of discharge volumes associated with any activity within the reference,
 - (b) for water industry subsistence activities within references 2.3.91 to 2.3.93, nil, and

calculate the sum of the resulting values.

(b) Multiply the value arrived at under paragraph (1) by £0.53.

“water industry subsistence activity” means a subsistence activity falling within references 2.3.81 – 2.3.93 (inclusive) of Table 2.3 of the Environmental Permitting Subsistence Charge Tables;

Application of subsistence charges

12. (1) Subject to the other provisions of this paragraph, a subsistence charge is payable for the subsistence of a permit, for any full or part financial year during which that permit is in force.

(2) Except in a case where the subsistence charge is the relevant time and materials costs or the authorised activity falls within the Water Resources Subsistence Charge Tables or reference 2.6.19 of the Environmental Permitting Subsistence Charge Tables, no subsistence charge is payable until either construction work in relation to, or the operation of, any of the authorised activities has commenced (whichever is the earlier).

(3) In the case of a permit authorising the operation of an activity from a specified date, the subsistence charge is only payable in relation to that activity, for any period following that specified date.

(4) No subsistence charge is payable where a permit authorises only –

(a) a flood risk activity where no compliance check is carried out in relation to that activity during the financial year,

(b) a discharge of sewage effluent of a volume of 5 cubic metres or less from a domestic household or an organisation that operates for charitable purposes,

(c) a water impounding activity, or

(d) a water abstraction activity –

(i) authorised under a temporary or transfer licence,

(ii) authorised by a permit granted to the Agency under section 64 of the Act,

(iii) where the abstraction is –

(a) for direct use in the production of electricity or any other form of power by generating station or apparatus of a capacity of not more than 5 megawatts, or

(b) from inland waters which the Agency or its predecessors has certified as having chloride content in excess of 8,000 milligrams per litre, or

- (iv) where the entire abstraction quantity authorised by the permit is the subject of a trading arrangement lasting more than 28 days, but only for the duration of that arrangement.

Subsistence charges – general

13. (1) Subject to the other provisions of this Part, the subsistence charge is the authorised activities charge, multiplied by the compliance rating adjustment (to the extent this applies).

(2) Where any of the authorised activities fall within a description in Table 2.16 of the Environmental Permitting Subsistence Charge Table, the subsistence activity charges for those activities are –

- (a) the highest applicable charge for any installation falling within that Table, and
- (b) the highest applicable charge for any other waste operation falling within that Table.

(3) Subject to sub-paragraph (4), where the authorised activities include a water discharge activity or groundwater activity consisting of the discharge of more than one effluent, a subsistence activity charge is payable for each such effluent, whether or not they are discharged together or from one or more outlets.

(4) Except in the case of an intermittent discharge, where the effluents receive treatment together (or having been treated are then joined together for monitoring), the subsistence activity charge is the highest charge applicable to a single discharge of that type, having first aggregated the volumes of all the discharges of that type, unless this results in a higher charge than would otherwise be payable.

(5) Where a permit authorises a relevant discharge for no more than 6 days in each year, the subsistence activity charge is reduced by 44%.

(6) Unless sub-paragraph (5) applies, where a permit prevents a relevant discharge from taking place for a period of at least three consecutive calendar months in a year, the subsistence activity charge is reduced by 4% for each such whole calendar month.

(7) The subsistence charge for the following activities is the relevant time and material costs-

- (a) a specified radioactive substance activity;
- (b) a groundwater mobile plant.

(8) The subsistence charge for a default standard facility is the relevant default standard facility charge.

(9) Where water abstraction activities that are not common water abstraction activities are subject to an aggregate limit, the authorised activity charge is the total of the highest and the next highest subsistence activity charge(s) that together make up the volume authorised by the aggregate limit.

(10) The authorised activities charge for an aggregate group permit is the relevant proportion of the subsistence activity charge or charges.

(11) Where a permit, or every permit in an aggregate group, only authorises spray or trickle activities, the subsistence charge is the total of –

(a) 50% of the subsistence charge that would otherwise apply, and

(b) up to 50% of the subsistence charge that would apply if that remaining charge were based on the ratio of the total volume actually abstracted compared to that authorised during the year for the purposes of the spray or trickle activities.

(12) Where a permit, or every permit in an aggregate group, only authorises water abstraction activities between 1 November and 31 March inclusive in each financial year, the subsistence activity charge is reduced by 50%.

(13) Where a permit authorises activities within references 2.10.7 to 2.10.13 of the Environmental Permitting Subsistence Charge Tables in Chapter 3 of Part 1 of the Schedule that operate solely limited hours under paragraph 7 or 8 of Part 2 to Schedule 25A of the Regulations or paragraph 2 (2)(c) of Schedule 25B of the Regulations, the subsistence activity charge is reduced by 50%.

Subsistence charges – additional charges

14. (1) Additional charges apply, consisting of the relevant time and materials costs relating to the following –

(a) an unplanned event, which causes or gives rise to a risk of significant harm to human health or the environment arising from the authorised activities, unless other cost recovery powers available to the Environment Agency are used;

(b) a suspension notice, once the decision to suspend has been made;

(c) an approval or agreement given by the Agency under a permit condition, except where the condition is contained in a permit authorising an activity described in Table 2.6 of the Environmental Permitting Subsistence Charge Tables, as “new”;

(d) the regulation of hydraulic fracturing for the purpose of recovering oil and gas;

(e) requesting the findings of an operator’s review of a decarbonisation readiness report, considering those findings and any work arising from doing so.

(2) The following additional charges apply –

- (a) £795.19, for the first year of the subsistence of a permit where that permit authorises activities falling within a description in Table 2.16 of the Environmental Permitting Subsistence Charge Tables;
 - (b) in relation to a deployment application, the applicable deployment charge;
 - (c) £4,915.51 for the relevant year in which a materials facility notification is made, subject to adjustment, pro rata, where the notification is in force for only part of a relevant year.
- (3) The water industry enforcement levy –
- (a) is payable by sewerage undertakers with one or more water industry subsistence activities authorised by their permits, and
 - (b) is the sum of –
 - (i) the discharge charge, and
 - (ii) the volume charge
- (4) No mid-year adjustments under paragraph 15 apply to the water industry enforcement levy.

Mid-year adjustments

15. The following mid-year adjustments shall be made –
- (a) in the case of a permit which, after the date on which the subsistence charge is payable in any year, is revoked or surrendered, or is varied in such a way as would affect the calculation of the subsistence charge, the charge is adjusted pro rata so that no charge, or the appropriate revised charge, is payable in relation to the period from the date on which the revocation, surrender, or variation (as the case may be), takes effect, but in the case of a permit authorising a water abstraction activity for only part of a year, any adjustment will be made only in relation to that authorised period;
 - (b) where the Agency considers that the operation of a subsistence activity, other than a water abstraction activity, which normally takes place on a continuous or repeating basis, is likely to temporarily cease for a period exceeding 12 months, that subsistence charge shall be reduced by 50% pro rata for the period during which the activity remains in temporary cessation, up to a maximum of 2 years;
 - (c) in a case where, by reason of a legislative amendment after the date on which the subsistence charge is payable in any year, a subsistence activity ceases to be required to be authorised or where the nature of the requirement to be authorised changes in a way which would affect the calculation of the

subsistence charge, the charge is adjusted pro rata from the date of the relevant amendment so that no charge, or the appropriate revised charge, is payable in relation to the period from the date of the amendment.

Part 4: Environmental improvement charges

Interpretation of this Part

16. (1) In this Part –

“environmental improvement charge” means the amount charged for the recovery of compensation costs associated with the revocation or variation of permits under the Act, or with the refusal of applications for, or imposition of conditions constraining abstraction on, permits under the Act determined under the Water Abstraction (Transitional Provisions) Regulations 2017 in relation to the removal of exemptions from abstraction control arising from amendments to sections 26 and 29 of the Act, by the Agency;

“regional charging area” means those areas designated by the Agency and marked on the map titled “Map of Environment Agency regional charge areas” published on GOV.UK;

Water resource management compensation funds

17. (1) In the case of permits granted under the Act, where the holder is not a water undertaker, an environmental improvement charge is payable, except in the cases of charges applying for the regional charging areas of North West, South West (including Wessex) and Thames;

(2) The environmental improvement charge is calculated for each regional charging area by applying the % increase shown below to the applicable subsistence charge.

Regional charging area	Environmental improvement charge (%)
Anglian	0
Midlands	0
Northumbria	0
North West	31
Southern	0
South West (including Wessex)	66

Regional charging area	Environmental improvement charge (%)
Thames	41
Yorkshire	0
Dee	0
Wye	0

(3) In the case of permits granted under the Act that authorise the abstraction of water from a supported source, the relevant supported source charge set out in the Table in Chapter 4 of Part 2 of the Schedule is disregarded when calculating the subsistence activity charge and the resulting environmental improvement charge.

(4) Where reductions in the relevant subsistence activity charge are applied as a result of paragraph 13(12) of this Scheme (Winter only reduction), the application of s126 (abatements) and s130 (CRT) of the Act shall also be applied in the calculation of the environmental improvement charge.

Part 5: Waste exemption charges

Interpretation of this Part

18. (1) In this Part –

“abated charges” means the sum of –

- (a) the additional band 1 and 2 compliance charges, and
- (b) the additional upper band compliance charges;

“additional band 1 and 2 compliance charges” are calculated as follows -

Step 1 – calculate the number of additional band 1 and 2 notified operations

Calculate the sum of the notified operations that are –

- (a) band 1 exempt waste operations; and
- (b) band 2 exempt waste operations.

Step 2 – if necessary, adjust the result of Step 1

If the number of notified operations that are exempt waste operations falling within -

- (a) paragraph 8 of Section 2 of Chapter 3,
- (b) paragraph 9 of Section 2 of Chapter 3, or
- (c) paragraph 16 of Section 2 of Chapter 2

of Part 1 of Schedule 3 to the Regulations is nil and the result of Step 1 is equal to or greater than 1, from the result of Step 1, subtract 1.

Step 3 – if necessary, further adjust the result of Step 1

If the common on-farm conditions are met for the notified operations, count the number of notified operations included in the calculation in Step 1 that were common on-farm waste operations, and deduct this from the result of Step 2.

Step 4 – calculate the total

Multiply the Step 1 value, adjusted by Steps 2 and 3 where applicable, by the value in column 3 of row 5 of the Waste Exemptions Charges Table ;

“additional upper band compliance charges” are calculated as follows -

Step 1 – calculate the number of additional upper band notified operations

Count the number of notified operations that are exempt waste operations falling within:

- (a) paragraph 8 of Section 2 of Chapter 3,
- (b) paragraph 9 of Section 2 of Chapter 3, or
- (c) paragraph 16 of Section 2 of Chapter 2

of Part 1 of Schedule 3 to the Regulations and if it is equal to or greater than 1, subtract 1.

Step 2 – calculate the total

Multiply the result of Step 1 by the value in column 3 of row 6 of the Waste Exemptions Charges Table;

“agriculture” means horticulture, fruit growing, seed growing, dairy farming and livestock breeding and keeping, the use of land as grazing land, meadow land, osier land, market gardens and nursery grounds, and the use of land for woodlands where that use is ancillary to the farming of land for other agricultural purposes,

“band 3 compliance charges” are calculated as follows -

Step 1 – calculate the number of band 3 notified operations

Count the number of notified operations that are band 3 exempt waste operations.

Step 2 – If necessary, adjust the result of Step 1

If the common on-farm conditions are met for the notified operations, count the number of notified operations included in the calculation in Step 1 that were common on-farm waste operations, and where it is greater than 2, deduct this from the result.

Step 3 – calculate the total

Multiply the Step 1 value, as adjusted by Step 2 if applicable, by the value in column 3 of row 7 of the Waste Exemptions Charges Table;

“band 1 exempt waste operation” means one or more of the following waste operations in Part 1 of Schedule 3 to the Regulations -

S1	Storage of waste in secure containers
S2	Storage of waste in a secure place
U1	Use of waste in construction
U9	Use of waste to manufacture finished goods

T4	Preparatory treatments (baling, sorting, shredding etc)
T5	Screening and blending of waste
T6	Treating waste wood and waste plant matter by chipping, shredding, cutting or pulverising
T10	Sorting mixed waste
T12	Manual treatment of waste
T21	Recovery of waste at a wastewater treatment works
T24	Anaerobic digestion at premises used for agriculture and burning of resulting biogas
T25	Anaerobic digestion at premises not used for agriculture and burning of resulting biogas

“band 2 exempt waste operation” means one or more of the following waste operations in Part 1 of Schedule 3 to the Regulations -

S3	Storage of sludge
U2	Use of baled end-of-life tyres in construction
U4	Burning of waste as fuel in a small appliance
U5	Use of waste derived biodiesel as fuel
U8	Use of waste for a specified purpose
U10	Spreading waste on agricultural land to confer benefit
U11	Spreading waste on non-agricultural land to confer benefit
U15	Pig and poultry ash
T1	Cleaning, washing, spraying or coating relevant waste.

T2	Recovery of textiles
T13	Treatment of waste food
T14	Crushing and emptying waste vehicle oil filters
T15	Treatment of waste aerosol cans
T16	Treatment of waste toner cartridges and waste ink cartridges by sorting, dismantling, cleaning or refilling
T17	Crushing waste fluorescent tubes
T19	Physical and chemical treatment of waste edible oil and fat to produce biodiesel
T23	Aerobic composting and associated prior treatment
T30	Recovery of silver
T31	Recovery of monopropylene glycol from aircraft antifreeze fluids
T33	Recovery of central heating oil by filtration
D1	Deposit of waste from dredging inland waters
D6	Disposal by incineration

“band 3 exempt waste operation” means one or more of the following waste operations in Part 1 of Schedule 3 to the Regulations –

U3	Use of waste in the construction of entertainment or educational installations etc
U6	Use of sludge for the purposes of reseeded a waste water treatment plant
U7	Use of effluent to clean a highway gravel bed
U12	Use of mulch
U13	Spreading of plant matter to confer benefit

U14	Incorporation of ash into soil
T18	Dewatering using flocculants
T20	Treatment of waste at a water treatment works
T26	Treatment of kitchen waste in a wormery
T29	Treatment of non-hazardous pesticide washings by carbon filtration for disposal
T32	Treatment of waste in a biobed or biofilter
D2	Deposit of waste from a railway sanitary convenience
D3	Deposit of waste from a portable sanitary convenience
D4	Deposit of agricultural waste consisting of plant tissue under a Plant Health Notice
D5	Depositing samples of waste for the purposes of testing or analysing them
D7	Burning waste in the open
D8	Burning waste at a port under a Plant Health Notice

“basic charge” means the value in column 3 of the Waste Exemptions Charges Table, which is the full charge for subsistence of the registration, when the applicable row of the Waste Exemptions Charges Table is identified as follows –

(a) where a notified operation is within

- (i) paragraph 8 of Section 2 of Chapter 3,
 - (ii) paragraph 9 of Section 2 of Chapter 3, or
 - (iii) paragraph 16 of Section 2 of Chapter 2
- of Part 1 of Schedule 3 to the Regulations, row 2;

(b) where -

- (i) sub-paragraph (a) above does not apply; and
- (ii) a notified operation is a band 1 exempt waste operation,

row 3;

(c) where -

- (i) sub-paragraphs (a) or (b) above do not apply; and
- (ii) a notified operation is a band 2 exempt waste operation,

(d) row 4; but if the common on-farm conditions are met and -

- (i) those of the notified operations that are band 1 exempt waste operations are all common on-farm waste operations and none of the notified operations that are band 2 exempt waste operations are common on-farm waste operations, the value is nil,
- (ii) no notified operations that are band 1 exempt waste operations are common on-farm waste operations and those of the notified operations that are band 2 exempt waste operations are all common on-farm waste operations, the value is nil, or
- (iii) those of the notified operations that are band 1 exempt waste operations are all common on-farm waste operations and those of the notified operations that are band 2 exempt waste operations are all common on-farm waste operations, the value is nil.

“common on-farm conditions” are met if –

- (a) the main business of the establishment or undertaking notified under paragraph 10(4)(a)(i) of the Regulations is agriculture; and
- (b) the place notified under paragraph 10(4)(c) of the Regulations is on a farm;

“common on-farm compliance charge” means -

- (a) where the only notified operations are no more than two band three exempt waste operations that are common on-farm waste exemptions, nil; and
- (b) in all other circumstances, the value in column 2 and row 8 of the Waste Exemptions Charges Table, which is the adjusted charge for subsistence of the registration,

“common on-farm waste exemptions” means the following waste operations referred to in Part 1 of Schedule 3 to the Regulations -

U1	Use of waste in construction
U4	Burning of waste as fuel in a small appliance
U8	Use of waste for a specified purpose
U10	Spreading waste to benefit agricultural land

U12	Use of mulch
U13	Spreading of plant matter to confer benefit
U14	Incorporation of ash into soil
U15	Pig and poultry ash
D1	Deposit of waste from dredging of inland waters
D3	Deposit of waste from a portable sanitary convenience
D4	Deposit of agricultural waste consisting of plant tissue under a Plant Health Notice
D6	Disposal by incineration
D7	Burning waste in the open
T1	Cleaning, washing, spraying or coating relevant waste
T23	Aerobic composting and associated prior treatment
T29	Treatment of non-hazardous pesticide washings by carbon filtration for disposal
T32	Treatment of waste in a biobed or biofilter

“exemption registration charge” means the value in column 3 and row 1 of the Waste Exemptions Charges Table which is the charge for registration of waste operations (except a WEEE operation) notified under paragraph 10(4)(b) of Schedule 2 of the Regulations and carried on at –

- (a) a place;
- (b) equal to or more than 30 places (a bulk registration) and under the same paragraphs of Part 1 of Schedule 3 to the Regulations; or
- (c) a linear network and under paragraph:
 - (i) 1 of Section 2 of Chapter 2,
 - (ii) 12 of Section 2 of Chapter 2,
 - (iii) 1 of Section 2 of Chapter 4, or
 - (iv) 2 of Section 2 of Chapter 4
 of Part 1 of Schedule 3 to the Regulations,

“linear network” has the meaning described in “Choosing the right waste exemptions for your activity”, published on GOV.UK;

“place” means a single location identified using a method stipulated under paragraph 10 (4) (b) of Schedule 2 of the Regulations,

“notified operations” means waste operations notified under paragraph 10 (4) (b) of Schedule 2 of the Regulations and carried on at –

(a) a place; or

(b) an area of work having the meaning given in “Choosing the right waste exemptions for your activity”, published on GOV.UK;

“Waste Exemptions Charges Table” means the following table -

Activity description		Charge
1.	Exemption registration charge	£58.13
2.	Upper band compliance charge	£1,282.97
3.	Band 1 compliance charge	£435.96
4.	Band 2 compliance charge	£220.06
5.	Additional band 1 and 2 notified operation	£78.89
6.	Additional upper band notified operation	£235.63
7.	Band 3 exempt waste operation	£31.14
8.	Common on-farm compliance charge	£91.34
9.	WEEE operation registration and compliance charge	£1,267.40

“waste exemption charge” has the meaning given in paragraph 19. (2);

“WEEE operation registration and compliance charge” means –

(a) if there is no WEEE operation among the notified operations, nil; or

(b) the value in column 3 and row 9 of the Waste Exemptions Charges Table, which is the charge for the registration of a WEEE operation and its subsistence.

Waste exemption charges – general

19. (1) A waste exemption charge is payable for the registration and subsistence of an exempt waste operation unless the establishment or undertaking named in relevant particulars notified to the Agency pursuant to paragraph 10(1) of Schedule 2 of the Regulations operates exclusively for charitable purposes.

19. (2) The waste exemption charge is the sum of –

- (a) the exemption registration charge,
- (b) the exemption compliance charge, and
- (c) the WEEE operation registration and compliance charge.

19. (3) The exemption compliance charge is the sum of –

- (a) the basic charge,
- (b) the abated charges,
- (c) the band 3 compliance charges, and
- (d) if the common on farm conditions are met, the common on farm compliance charge.

Part 6: charges for non-permit holders

Charges for work relating to non-permit holders

20. (1) A fee for intervention is payable consisting of the relevant time and materials costs relating to an activity that the Agency reasonably suspects is being carried on without a permit contrary to regulation 12 of the Regulations or section 33 of the Environmental Protection Act 1990.

(2) If the Agency decides that the person the Agency imposed the charge upon was not carrying on the activity referred to in sub-paragraph (1) contrary to the provisions referred to there, the Agency will refund any fee for intervention already paid.

Schedule: Tables of charges

Part 1: Environmental permitting charges tables

Chapter 1: General

Interpretation

1. (1) In this Schedule

“ammonia modelling assessment”, “dust and bio-aerosol management plan”, “emissions management plan”, “fire prevention plan”, “noise and vibration management plan”, “odour management plan” and “pests management plan” mean the assessments and plans with those titles described in guidance published by the Agency on GOV.UK;

“aquaculture discharge” means a discharge from sites for the cultivation of fish or plants (such as fish or cress farms), not containing sewage effluent;

“BAT reference document” and “emission levels associated with the best available techniques” have the meanings given in the Industrial Emissions Directive;

“category 5 sealed source” has the meaning given in “How to apply for an environmental permit (Part RSR-B1) – standard facility”, version 1, April 2010;

“CCR conditions” means the conditions in paragraph 4 of Part 1 of Schedule 25C of the Regulations;

“closed landfill” means a landfill which

- (a) ceased accepting waste for disposal before the implementation of the Landfill Directive on 16 July 2001;
- (b) was granted a permit under the Landfill Directive and is now definitely closed; or
- (c) was not granted a permit under the Landfill Directive and is definitely closed or working towards definite closure in accordance with the transitional arrangements in article 14 of the Landfill Directive;

“combined sewer overflows” includes any overflows related to rainfall events from a sewerage network or system and any overflows from storm tank effluent discharges;

“component” means

- (a) in relation to an activity falling within Section 6.8, a component described in the Food and Drink Component Table in Part 4 of this Schedule, or
- (b) in relation to an activity falling within Section 6.1, a component described in the Paper and Pulp Component Table in Part 4 of this Schedule;

“cooling water” means discharges of water used directly and indirectly for temperature reduction purposes that does not come into contact with any other process or effluent so as to change its content or polluting nature, and does not contain specific substances;

“decarbonisation readiness assessment” means an assessment to determine whether

- (a) the CCR conditions or HCR conditions are met, or
- (b) meeting those conditions would not be reasonably practicable due to the location or technical characteristics of the relevant generator.

“domestic household” means any premises which is defined as a domestic property under section 66 of the Local Government Finance Act 1988 or any premises which is exempt from non-domestic rates under Schedule 5 to that Act;

“emergency overflow” or “emergency sewage discharge” means any authorised discharges in an emergency of sewage or trade effluent;

“existing”, in relation to an activity falling within Table 2.6 of the Environmental Permitting Subsistence Charge Tables, means an activity which has been operating for at least 2 years since the date the Agency agreed that commissioning had been successfully concluded; and “new” in relation to such an activity means one which is not “existing”;

“flood defence” means a structure built or used for flood defence purposes;

“HCR conditions” means the conditions in paragraph 5 of Part 1 of Schedule 25C of the Regulations;

“high complexity” has the meaning given in Annex 1 of “How to apply for an environmental permit (Radioactive Substances Activity) Part RSR F – Charges and Declarations”, version 3, April 2018;

“inert mining waste operation” means a mining waste operation which involves the management of only inert extractive waste;

“in-scope generator”, “specified installation” and “relevant generator” have the meanings given in Part 1 of Schedule 25C of the Regulations;

“integrated or multi product mill” means a mill producing more than one product and where a mixing calculation is required to determine the emission levels associated with the best available techniques for the installation;

“landspreading of biocides” means all non-point source liquid discharges or disposals of biocide washings on to land;

“landspreading of disinfectants” means all non-point source liquid discharges or disposals of disinfectant washings on to land;

“landspreading of pesticides” means all non-point source liquid discharges or disposals of pesticide washings on to land;

“landspreading of sheep dip” means all non-point source liquid discharges or disposals of sheep dip on to land;

“line” in Table 2.6 of the Environmental Permitting Subsistence Charge Tables means an incineration line;

“local authority activity” means a Part A (2) activity, a Part B activity or a small waste incineration plant, in relation to which the Agency is the regulator, including by virtue of a direction made under regulation 33;

“low impact installation” means a Part A(1) installation which, in the opinion of the Agency, cannot result in emissions or there is no likelihood that it will result in emissions except in a quantity which is so trivial that it is incapable of causing pollution or its capacity to cause pollution is insignificant;

“MWth” means the net rated thermal input of an appliance which is the rate at which fuel can be burned at the maximum continuous rating of an appliance multiplied by the net calorific value of the fuel and then expressed in MW;

“non-inert mining waste operation” means a mining waste operation which involves the management of non-hazardous non-inert or hazardous extractive waste (as well as any inert waste), but a mining waste operation which includes a Category A mining waste facility

or a mining waste facility involving the management of hazardous waste is not an inert mining waste operation or a non-inert mining waste operation;

“non-sewage effluent” means, where used in Table 1.3 of the Environmental Permitting Application Charge Tables or Table 2.3 of the Environmental Permitting Subsistence Charge Tables, an effluent which does not fall within the description of any other effluent in those Tables;

“numeric permit condition” means, in relation to Table 2.3 of the Environmental Permitting Subsistence Charge Tables, any permit condition which prescribes a maximum or minimum concentration of any substance or parameter in a permitted discharge, excluding flow;

“OSM” means operator self-monitoring, whereby the operator rather than the Agency carries out routine effluent quality compliance monitoring to standards specified in permits;

“population equivalent” has the meaning given in the Urban Waste Water Treatment (England and Wales) Regulations 1994;

“rainfall related” means discharges of site drainage, groundwater and storm water, not containing sewage effluent nor pollutants containing specific substances other than iron;

“specific substances assessment” means an assessment of an application for a permit or variation of a permit, where discharges contain or are likely to contain specific substances;

“specific substances” means

(a) in relation to Table 1.3 of the Environmental Permitting Application Charge Tables –

- (i) for a groundwater activity, hazardous substances (as defined by paragraph 4 of Schedule 22 to the Regulations) and/or non-hazardous pollutants (as defined by paragraph 5 of Schedule 22 to the Regulations), with the exception of discharges that only contain or are only likely to contain as their primary pollutants, heat, biological entities, micro-organisms, ammoniacal nitrogen or ammonium and suspended solids;
- (ii) for a water discharge activity, priority hazardous substances, priority substances or other pollutants as defined by the Environmental Quality Standards Directive (EQSD) (2008/105/EC, as amended by 2013/39/EU), specific pollutants as defined by the Water Framework Directive (Standards and Classification) Directions (England and Wales) 2015 or other substances

which were listed in Part 6 of the River Basin Districts Typology, Standards and Groundwater threshold values (Water Framework Directive)(England and Wales) Directions 2010, or any other substances which the Agency considers require assessment because of their bio- accumulative, toxic or ecotoxicological properties, or any other properties which the Agency considers present a risk to the aquatic environment;

(b) in relation to Table 2.3 of the Environmental Permitting Subsistence Charge Tables all those substances described in paragraph (a), provided they are the subject of an emission limit in the permit together with pesticides including organotins, fungicides, herbicides, polyhalogenated biphenyls, polynuclear aromatic hydrocarbons, aliphatic hydrocarbons, aromatic hydrocarbons, halogenated hydrocarbons including haloforms, alcohols, aromatic nitrogen compounds, phenolic compounds, heterocyclic hydrocarbons, esters, ethers, ketones, aldehydes, metals and metalloids, cyanides, sulphides, glycols (including total and poly), carboxylic acids, organic nitrogen compounds (other than those above and with the exception of urea and quaternary ammonium salts), and viruses;

“specified discharge” means a discharge in relation to which no volume is specified in the permit, or taken to be in the permit for the purposes of this Scheme;

“SR” means standard rules, and “(Superseded) SR” means standard rules which became unavailable to new applicants before 1 April 2022;

“stand-alone directly associated activity” means an activity which is not described in Part 2 of Schedule 1 to the Regulations and is authorised by a different permit to the remainder of the installation;

“surface water” means any inland freshwaters, coastal waters or relevant territorial waters as defined in section 104 of the Act;

“thermal discharge” means discharges from heat pumps and heat exchangers;

“type” in relation to a water discharge and groundwater activity, means an activity which falls within one of the following groups of activities, identified by the reference numbers in the Environmental Permitting Subsistence Charge Tables –

(a) references 2.3.1 to 2.3.20;

(b) references 2.3.21 to 2.3.59;

(c) references 2.3.60 to 2.3.62;

- (d) references 2.3.63 to 2.3.65;
- (e) references 2.3.66 to 2.3.67;
- (f) references 2.3.68 to 2.3.71;
- (g) references 2.3.72 to 2.3.74;
- (h) references 2.3.75 to 2.3.80;
- (i) references 2.3.81 to 2.3.91;
- (j) references 2.3.92 to 2.3.93;

“volume” in the context of water discharge and groundwater activities means the maximum daily volume where this is specified in the permit, or otherwise is taken to be –

(a) in the case of effluents containing sewage –

- (i) the flow to full treatment as specified in the permit,
- (ii) where no flow to full treatment is specified but an average daily flow is specified, 2.4 times the average daily flow,
- (iii) where neither flow to full treatment nor an average daily flow are specified, but dry weather flow is specified, 3 times that dry weather flow;

(b) in the case of other effluents, where an average daily flow is specified in the permit, that flow, except where the discharge may contain rainfall in which case the volume shall be taken to be 3 times the dry weather flow,

and where a permit authorises a water discharge activity or groundwater activity and the volume in permit conditions is expressed as “population equivalent”, the volume will be calculated based on 150 litres per population equivalent per day.

“waste recovery plan” means a plan submitted to the Agency in order to demonstrate that a proposed activity is a waste recovery operation within the meaning of the Waste Framework Directive.

(2) In this Schedule –

- (a) references in column 2 of a Table in this Schedule to a Section number, mean a Section number in Part 2 of Schedule 1 of the Regulations, and an activity description preceded by a Section number means an activity falling within that Section;
- (b) activities described in Table 1.11 of the Environmental Permitting Application Charge Tables or 2.11 of the Environmental Permitting Subsistence Charge Tables, do not include any activities connected with exploring for, or the production of, on shore oil and gas;
- (c) activities described in Table 2.16 of the Environmental Permitting Subsistence Charge Tables as a “waste operation” mean a waste operation which is not an installation, and activities described without reference to whether they are an installation or a waste operation, may be either an installation or a waste operation which is not an installation;
- (d) activities described in Table 2.6 of the Environmental Permitting Subsistence Charge Tables do not include any treatment of incinerator bottom ash or the operation of an effluent treatment plant.

Chapter 2: Environmental permitting application charge tables

1. These are the Environmental Permitting Application Charge Tables referred to in this Scheme

Table 1.1 Flood risk activities

Ref	Activity	Permit application
1.1.1	SR 2015 No.26 – temporary dewatering affecting up to 20 metres of a main river. SR 2015 No.27 – constructing an outfall pipe of 300 millimetres to 500 millimetres diameter. SR 2015 No.28 – installing a clear span bridge on a main river. SR 2015 No.29 – temporary storage within the flood plain of a main river. SR 2015 No.30 – temporary diversion of a main river. SR 2015 No.31 – channel habitat structure made of natural materials. SR 2015 No.32 – installing an access culvert of no more than 5 metres length. SR 2015 No.33 – repairing and protecting up to 20 metres of the bank of a main river. SR 2015 No.34 – temporary scaffolding affecting up to 20 metres length of a main river. SR 2015 No.35 – excavating a wetland or pond in a main river floodplain. SR 2015 No.36 – installing and using site investigation boreholes and temporary trial pits within a main river floodplain for a period of up to 4 weeks. SR 2015 No.38 – removing a total of 100 metres of exposed gravel from bars and shoals. SR 2019 No.1 – installation of mooring pile in a main river. SR 2019 No.2 – steps, ramps and other similar structures excavated into the existing bank profile of a main river. SR 2019 No.3 – installation of water gates across a main river. Non-commercial activities undertaken for the purpose of environmental improvement.	£189.69

	Works within the curtilage of a dwelling undertaken by or on behalf of the householder under permitted development rights.	
1.1.2	An activity which would be an exempt flood risk activity but for the fact that it does not satisfy the conditions set out paragraphs 1(3)(a) or 1(3)(d) of Part 4 to Schedule 3 of the Regulations. An activity which would be a standard facility but for the fact that it would not comply with condition 2.2.3 in the relevant standard rules. Steps, ramps and other similar structures excavated into the existing bank profile. Activities carried out within 8 metres of the bank of a non-tidal main river (or within 8 metres of a culvert or flood defence structure on that river) or within 16 metres of the bank of a tidal main river (or within 16 metres of any flood defence structure or culvert on that river). Installation of cattle gates across a watercourse. Minor refurbishment and alterations of existing structures. Excavation of site investigation boreholes and trial pits in the floodplain.	£246.61
1.1.3	Temporary storage in the floodplain. Temporary ground level raising. Creation of new or improved tracks or paths which require land profiling. The temporary dewatering of a work area. The construction and use of service crossings within an existing structure. Installation of outfalls within engineered banks. Installation of outfalls within natural banks. Maintenance of raised river or sea defences. Maintenance of reservoir banks. Culvert lining.	£497.67

	Construction of jetties (other than jetties likely to endanger the stability of, cause damage to, reduce the effectiveness of or interfere with the Agency's access to or along a flood defence, river control works, sea defence, culvert or remote defence). Installation of temporary floating structures (including pontoons and rafts). Construction of service crossings. Installation of temporary scaffolding. Construction of footbridge(s). Construction of steps, ramps or similar structures on natural banks other than flood defences. Construction of steps, ramps or similar structures on engineered banks other than flood defences. Soft engineered bank protection works over a total distance of less than 100 metres. Undertaking bank re-profiling work. Excavations (other than site investigation boreholes and trial pits) in the floodplain. Construction of moorings. Installation of in-channel structures not falling within the description of any other activity and affecting less than 25% of the channel width. Construction of steps, ramps or similar structures on flood defences. Installation of a temporary culvert. Like-for-like replacement of soft engineered bank protection works.	
1.1.4	Removal of silt, sand, gravel or other material from the bed of a main river (but excluding the subsequent use, treatment, and recovery or disposal of the dredgings). Movement of gravel within a main river channel. Construction of a temporary bypass channel. Construction of new bed reinforcements or the replacement or removal of existing bed reinforcements. Construction of new hard engineered bank protection works. Like-for-like replacement of hard engineered bank protection works.	£1,080.14

	Installation of in-channel structures not falling within the description of any other activity and affecting over 25% of the channel width. Gravel installation. Construction of bridges for vehicle access. Alteration or replacement of culverts. Installation of a permanent bypass channel with a total length of less than 30 metres. Installation of a new, permanent culvert with a length of less than 5 metres. Alteration of in-channel impounding or flow regulation structures. Construction of flood defences with a total length less than 100 metres. Permanent ground level raising. Construction of bridges over or on a flood defence. Works to remove in-channel structures. Soft engineered bank protection works over a total distance of 100 metres or more. Construction of foreshore pipelines and manholes (likely to endanger the stability of, cause damage to, reduce the effectiveness of or interfere with the Agency's access to or along a flood defence, river control works, sea defence, culvert or remote defence).	
1.1.5	Construction of a permanent culvert with a length of 5 metres or more. Construction of a bypass channel with a total length of 30 metres or more. Works to widen, deepen or straighten a channel. Construction of flood defences with a total length of 100 metres or more. Construction of permanent in-channel impounding or flow regulation structures. Construction of reservoir spillways or compensation flow channels.	£1,607.95

Table 1.2 Radioactive substance activities

Ref	Activity	Permit application	Minor variation	Normal variation	Transfer application	Surrender application
1.2.1	SR 2010 No.1 – category 5 sealed radioactive sources standard rules.	£1,196	N/A	N/A	£671	£671
1.2.2	Keeping or using category 5 sealed sources, including the accumulation and/or disposal of waste sealed sources.	£3,223	£2,381	£3,015	£2,381	£1,526
1.2.3	Keeping or using sources of similar potential hazard to high-activity sealed sources, including sources in reference 1.2.2.	£8,765	£2,478	£8,765	£2,381	£3,760
1.2.4	Keeping or using high-activity sealed sources, including sources in references 1.2.2 and 1.2.3.	£11,109	£2,478	£10,364	£3,968	£3,760
1.2.5	Keeping or using unsealed radioactive sources only.	£3,223	£2,381	£3,015	£2,381	£1,526
1.2.6	Keeping or use of unsealed radioactive sources and subsequent disposal only by transfer of radioactive waste – not high complexity.	£10,364	£3,467	£8,020	£2,381	£6,873
1.2.7	Keeping or use of unsealed radioactive sources and subsequent disposal of radioactive waste (including disposal by way of transfer) – not high complexity.	£12,623	£4,712	£10,047	£2,381	£8,875

Ref	Activity	Permit application	Minor variation	Normal variation	Transfer application	Surrender application
1.2.8	Keeping or use of unsealed radioactive sources and subsequent disposal of radioactive waste (including disposal by way of transfer) – high complexity.	£16,139	£6,531	£13,367	£2,381	£11,329
1.2.9	SR 2014 No.4 – NORM waste from oil and gas production. SR 2017 No.1 – unintentional receipt of radioactive materials and radioactive waste by the operator of any facility which uses a radiation detection system.	£3,113	N/A	N/A	£671	£2,381

Table 1.3 Water discharge and groundwater activities

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation
1.3.1	SR 2010 No.2 – discharge to surface water: cooling water and heat exchangers.	£1,390.52	£417.49	N/A	N/A
1.3.2	SR 2010 No.3 – discharge to surface water: secondary treated domestic sewage with a maximum daily volume between 5 and 20m ³ a day.	£1,390.52	£417.49	N/A	N/A

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation
1.3.3	Sewage effluent discharge with a volume up to and including 5m ³ a day to surface water from domestic households or organisations operating for charitable purposes; includes habitats assessment.	£141.43	£141.43	£141.43	£141.43
1.3.4	Sewage effluent discharge with a volume up to and including 5m ³ a day to groundwater from domestic households or organisations operating for charitable purposes; includes habitats assessment.	£141.43	£141.43	£141.43	£141.43
1.3.5	Sewage effluent discharge with a volume up to and including 5m ³ a day to surface water.	£2,753.88	£825.94	£1,376.94	£2,477.81
1.3.6	Sewage effluent discharge with a volume up to and including 5m ³ a day to groundwater.	£2,994.87	£898.35	£1,498.00	£2,695.04
1.3.7	Sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 15m ³ a day to groundwater.	£4,830.03	£1,449.35	£2,415.58	£4,346.92

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation
1.3.8	Sewage effluent discharge with a volume greater than 15m ³ a day to groundwater.	£11,384.35	£3,415.76	£5,692.17	£10,246.14
1.3.9	Sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 50m ³ a day to surface water.	£7,312.37	£2,193.82	£3,656.75	£6,581.47
1.3.10	Sewage effluent discharge with a volume greater than 50m ³ a day to surface water.	£11,384.35	£3,415.76	£5,692.17	£10,246.14
1.3.11	Trade effluent and/or non-sewage effluent and/or rainfall related discharge to surface water or groundwater with a volume up to and including 5m ³ a day.	£4,090.08	£1,226.46	£2,044.48	£3,680.51
1.3.12	Trade effluent and/or non-sewage effluent and/or rainfall related discharges to surface water or groundwater with a volume greater than 5m ³ a day.	£8,126.99	£2,438.21	£4,062.93	£7,313.50
1.3.13	Cooling water or thermal discharge to groundwater.	£8,423.42	£2,526.46	£4,211.15	£7,580.51

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation
1.3.14	Cooling water or thermal discharge to surface water.	£9,534.48	£2,860.23	£4,767.80	£8,581.82
1.3.15	Heat transfer from closed-loop ground source heating and cooling systems from domestic or community buildings; includes habitats assessment.	£4,008.62	£1,202.70	£2,004.88	£3,608.10
1.3.16	Heat transfer from closed-loop ground source heating and cooling systems.	£5,751.01	£1,725.42	£2,876.07	£5,176.25
1.3.17	Aquaculture.	£8,924.64	£2,676.94	£4,462.32	£8,031.95
1.3.18	Sewerage network and sewage treatment works storm sewage.	£11,357.19	£3,406.71	£5,678.60	£10,221.25
1.3.19	Emergency overflows.	£11,357.19	£3,406.71	£5,678.60	£10,221.25
1.3.20	Landspreading of sheep dip; includes specific substances assessment.	£2,810.90	£842.86	£1,405.45	£2,529.61
1.3.21	Landspreading of sheep dip; includes specific substances assessment and habitats assessment.	£3,619.51	£1,651.46	£2,214.05	£3,338.21

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation
1.3.22	Landspreading of pesticides, biocides and disinfectants; includes specific substances assessment.	£4,596.96	£1,379.20	£2,297.91	£4,137.60
1.3.23	The burial of human remains or non-waste solid discharges to land.	£5,063.10	£1,519.50	£2,532.12	£4,557.36

Table 1.4 Chemicals

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.4.1	Section 4.1 – production of a single organic chemical.	£13,710.94	£4,113.59	£6,854.95	£12,339.74	£2,552.44	£8,226.15
1.4.2	Section 4.1 – production of more than one organic chemical.	£17,091.71	£5,127.72	£8,545.85	£15,382.12	£2,552.44	£10,255.44

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.4.3	Section 4.1 – any Section 4.1 activity not falling in references 1.4.1 or 1.4.2 in Table 1.4.	£13,550.05	£4,064.81	£6,775.03	£12,195.46	£2,552.44	£8,129.62
1.4.4	Section 4.2 – production of a single inorganic chemical.	£13,710.94	£4,113.59	£6,854.95	£12,339.74	£2,552.44	£8,226.15
1.4.5	Section 4.2 – production of more than one inorganic chemical.	£17,091.71	£5,127.72	£8,545.85	£15,382.12	£2,552.44	£10,255.44
1.4.6	Section 4.2 – any Section 4.2 activity not falling in references 1.4.4 or 1.4.5 in Table 1.4.	£13,550.05	£4,064.81	£6,775.03	£12,195.46	£2,552.44	£8,129.62
1.4.7	Section 4.3 – production of a fertiliser.	£15,159.99	£4,548.52	£7,579.48	£13,643.47	£2,552.44	£9,095.99

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.4.8	Section 4.4, 4.5 or 4.6 – production of less than 2000 tonnes a year of plant health products, biocides, pharmaceuticals or explosives.	£13,871.83	£4,161.34	£6,935.92	£12,485.06	£2,552.44	£8,322.68
1.4.9	Section 4.4, 4.5 or 4.6 – production of 2000 tonnes or more a year of plant health products, biocides, pharmaceuticals or explosives.	£15,481.77	£4,644.01	£7,741.40	£13,934.11	£2,552.44	£9,289.06
1.4.10	Section 4.7 – manufacturing activities involving carbon disulphide or ammonia.	£13,871.83	£4,161.34	£6,935.92	£12,485.06	£2,552.44	£8,322.68

Table 1.5 Refineries

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.5.1	Section 1.2A (1) (a) – refining natural gas with a capacity of 1,000 tonnes or more a year.	£17,199.66	£5,159.90	£8,599.83	£15,479.69	£2,552.44	£10,319.80
1.5.2	Section 1.2A (1) (c) – gasification or liquefaction of fuels not derived from waste.	£17,199.66	£5,159.90	£8,599.83	£15,479.69	£2,552.44	£10,319.80
1.5.3	Section 1.2A (1) (d) – refining crude oil.	£20,419.54	£6,126.28	£10,209.77	£18,377.79	£2,552.44	£12,251.51
1.5.4	Section 1.2A (1) (e) – storage and handling of crude oil or stabilised crude petroleum with a tank storage capacity of 500 tonnes or more.	£20,419.54	£6,126.28	£10,209.77	£18,377.79	£2,552.44	£12,251.51
1.5.5	Section 1.2A (1) (b) – producing coke, with a capacity of 250 tonnes or more a year.	£17,924.18	£5,376.84	£8,962.09	£16,131.56	£2,552.44	£10,754.72
1.5.6	Section 1.2A (1) (b) – producing coke, with a capacity of less than 250 tonnes a year.	£17,199.66	£5,159.90	£8,599.83	£15,479.69	£2,552.44	£10,319.80

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.5.7	Section 1.2A (1) (f) – pyrolysis, carbonisation, distillation or partial oxidation of carbonaceous material not undertaken on an oil refinery.	£18,648.71	£5,594.82	£9,324.35	£16,783.42	£2,552.44	£11,189.64

Table 1.6 Energy from waste

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.6.1	Section 5.1 – incineration of hazardous waste with or without non-hazardous waste, and including high temperature or clinical waste incineration.	£20,473.51	£6,141.85	£10,236.76	£18,426.58	£2,552.44	£12,283.69
1.6.2	Section 5.1 – incineration of mixed non-hazardous waste streams including municipal waste and refuse derived fuel; includes assessment of fire prevention plan.	£19,346.24	£5,803.46	£9,673.12	£17,411.41	£2,552.44	£11,607.95
1.6.3	Section 5.1 – incineration of a single non-hazardous waste comprising waste wood, tyres or sewage sludge; includes assessment of fire prevention plan.	£16,068.24	£4,820.47	£8,034.12	£14,461.42	£2,552.44	£9,640.94

Table 1.7 Food and drink

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.7.1	Section 6.8 – food and drink production.	£14,515.39	£4,354.41	£7,257.70	£13,063.23	£2,552.44	£8,708.82

Table 1.8 Onshore oil and gas

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.8.1	SR 2014 No.2 – the management of extractive waste.	£2,741.36	£822.10	N/A	N/A	£2,552.44	£1,645.23
1.8.2	SR 2015 No.1 – onshore oil exploration.	£2,741.36	£822.10	N/A	N/A	£2,552.44	£1,645.23
1.8.3	SR 2015 No.2 – storage and handling of crude oil (up to and including 500 tonnes with hydrogen sulphide content of less than 10ppm).	£2,741.36	£822.10	N/A	N/A	£2,552.44	£1,645.23
1.8.4	Section 1.2A (1) (e) – storage and handling of crude oil or stabilised crude petroleum with a tank storage capacity of less than 500 tonnes.	£10,429.82	£3,128.53	£5,214.91	N/A	£2,552.44	£6,258.10
1.8.5	Mining waste operation without flare.	£13,451.44	£4,035.74	£6,726.24	£12,106.19	£2,552.44	£8,070.45

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.8.6	Mining waste operation with flare.	£14,659.67	£4,398.01	£7,330.36	£13,194.02	£2,552.44	£8,796.01
1.8.7	Mining waste operation with mining waste facility and flare.	£16,108.72	£4,832.93	£8,075.64	£14,498.78	£2,552.44	£9,664.82
1.8.8	Mining waste operation and mining waste facility with fracturing and flare.	£19,086.74	£5,725.61	£9,543.37	£17,177.86	£2,552.44	£11,452.25

Table 1.9 Paper, pulp, carbon, tar and bitumen

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.9.1	Section 6.1 – paper and pulp manufacture.	£13,871.83	£4,161.34	£6,935.92	£12,485.06	£2,552.44	£8,322.68
1.9.2	Section 6.2, 6.3 or 6.4 – carbon, tar and bitumen, coating, printing and textile activities.	£13,871.83	£4,161.34	£6,935.92	£12,485.06	£2,552.44	£8,322.68

Table 1.10 Combustion and power

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.1	Section 1.1 – combustion plant – rated thermal input of 50MWth or more.	£19,828.91	£5,948.78	£9,914.98	£17,846.33	£2,552.44	£11,897.56

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.2	Medium combustion plant site – requires dispersion modelling.	£6,798.90	£2,039.67	£3,399.45	£6,119.01	£2,552.44	£4,079.34
1.10.3	Medium combustion plant site – does not require dispersion modelling.	£2,105.06	£631.10	£1,052.53	£1,894.35	£2,552.44	£1,263.25
1.10.4	Carbon capture and storage.	£15,481.77	£4,644.01	£7,741.40	£13,933.07	£2,552.44	£9,289.06
1.10.5.1	SR 2018 No.1 – specified generator, Tranche B low risk, base load operation 0 – 5 MW – no new medium combustion plant with specified generator put into operation after 20 December 2018.	£229.40	N/A	N/A	N/A	£175.42	£129.75
1.10.5.2	SR 2018 No.1 – specified generator, Tranche B low risk, base load operation 0 – 5 MW – one new medium combustion plant with specified generator put into operation after 20 December 2018.	£550.14	N/A	N/A	N/A	£175.42	£129.75
1.10.5.3	SR 2018 No.1 – specified generator, Tranche B low risk, base load operation 0 – 5 MW – up to three new medium combustion plants with specified generator put into operation after 20 December 2018.	£643.56	N/A	N/A	N/A	£175.42	£129.75

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.5.4	SR 2018 No.1 – specified generator, Tranche B low risk, base load operation 0 – 5 MW – up to five new medium combustion plants with specified generator put into operation after 20 December 2018.	£747.36	N/A	N/A	N/A	£175.42	£129.75
1.10.5.5	SR 2018 No.1 – specified generator, Tranche B low risk, base load operation 0 – 5 MW – up to eight new medium combustion plants with specified generator put into operation after 20 December 2018.	£843.89	N/A	N/A	N/A	£175.42	£129.75
1.10.5.6	SR 2018 No.1 – specified generator, Tranche B low risk, base load operation 0 – 5 MW – up to ten new medium combustion plants with specified generator put into operation after 20 December 2018.	£885.41	N/A	N/A	N/A	£175.42	£129.75
1.10.5.7	SR 2018 No.1 – specified generator, Tranche B low risk, base load operation 0 – 5 MW – up to fifteen new medium combustion plants with specified generator put into operation after 20 December 2018.	£986.10	N/A	N/A	N/A	£175.42	£129.75

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.6.1	SR 2018 No.2 – specified generator, Tranche B low risk, base load operation 0-2 MW with high background NOx – no new medium combustion plant with specified generator put into operation after 20 December 2018.	£229.40	N/A	N/A	N/A	£175.42	£129.75
1.10.7.1	SR 2018 No.3 – specified generator, Tranche B low risk, base load operation 0-2 MW in Air Quality Management Areas or high ambient NOx	N/A	N/A	N/A	N/A	£175.42	N/A
1.10.8.1	SR 2018 No.4 – specified generator Tranche B low risk, 0-20 MW of gas or abated diesel engines operated less than 500 hours a year – no new medium combustion plant with specified generator put into operation after 20 December 2018.	£229.40	N/A	N/A	N/A	£175.42	£129.75
1.10.8.2	SR 2018 No.4 – specified generator Tranche B low risk, 0-20 MW of gas or abated diesel engines operated less than 500 hours a year – one new medium combustion plant with specified generator put into operation after 20 December 2018.	£550.14	N/A	N/A	N/A	£175.42	£129.75

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.8.3	SR 2018 No.4 – specified generator Tranche B low risk, 0-20 MW of gas or abated diesel engines operated less than 500 hours a year – up to three new medium combustion plants with specified generator put into operation after 20 December 2018.	£643.56	N/A	N/A	N/A	£175.42	£129.75
1.10.8.4	SR 2018 No.4 – specified generator Tranche B low risk, 0-20 MW of gas or abated diesel engines operated less than 500 hours a year – up to five new medium combustion plants with specified generator put into operation after 20 December 2018.	£747.36	N/A	N/A	N/A	£175.42	£129.75
1.10.8.5	SR 2018 No.4 – specified generator Tranche B low risk, 0-20 MW of gas or abated diesel engines operated less than 500 hours a year – up to eight new medium combustion plants with specified generator put into operation after 20 December 2018.	£843.89	N/A	N/A	N/A	£175.42	£129.75

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.8.6	SR 2018 No.4 – specified generator Tranche B low risk, 0-20 MW of gas or abated diesel engines operated less than 500 hours a year – up to ten new medium combustion plants with specified generator put into operation after 20 December 2018.	£885.41	N/A	N/A	N/A	£175.42	£129.75
1.10.8.7	SR 2018 No.4 – specified generator Tranche B low risk, 0-20 MW of gas or abated diesel engines operated less than 500 hours a year – up to fifteen new medium combustion plants with specified generator put into operation after 20 December 2018.	£986.10	N/A	N/A	N/A	£175.42	£129.75
1.10.11	SR 2018 No.7 – new, low risk, stationary medium combustion plant 1<20 MW – one plant.	£462.95	N/A	N/A	N/A	£175.42	£129.75
1.10.12	SR 2018 No.7 – new, low risk, stationary medium combustion plant 1<20 MW – up to three plants.	£539.76	N/A	N/A	N/A	£175.42	£129.75
1.10.13	SR 2018 No.7 – new, low risk, stationary medium combustion plant 1<20 MW – up to five plants.	£643.56	N/A	N/A	N/A	£175.42	£129.75

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.14	SR 2018 No.7 – new, low risk, stationary medium combustion plant 1<20 MW – up to eight plants.	£747.36	N/A	N/A	N/A	£175.42	£129.75
1.10.15	SR 2018 No.7 – new, low risk, stationary medium combustion plant 1<20 MW – up to ten plants.	£808.60	N/A	N/A	N/A	£175.42	£129.75
1.10.16	SR 2018 No.7 – new, low risk, stationary medium combustion plant 1<20 MW – up to fifteen plants.	£843.89	N/A	N/A	N/A	£175.42	£129.75
1.10.19.1	SR2022 No.9 – new and existing, low risk, stationary medium combustion plant which is a natural gas or hydrogen boiler– one plant.	£462.95	N/A	N/A	N/A	£175.42	N/A
1.10.19.2	SR2022 No.9 – new and existing, low risk, stationary medium combustion plant which is a natural gas or hydrogen boiler- up to three plants.	£539.76	N/A	N/A	N/A	£175.42	N/A
1.10.19.3	SR2022 No.9 – new and existing, low risk, stationary medium combustion plant which is a natural gas or hydrogen boiler - up to five plants.	£643.56	N/A	N/A	N/A	£175.42	N/A

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.10.19.4	SR2022 No.9 – new and existing, low risk, stationary medium combustion plant which is a natural gas or hydrogen boiler - up to eight plants.	£747.36	N/A	N/A	N/A	£175.42	N/A
1.10.19.5	SR2022 No.9 – new and existing, low risk, stationary medium combustion plant which is a natural gas or hydrogen boiler- up to ten plants.	£808.60	N/A	N/A	N/A	£175.42	N/A
1.10.19.6	SR2022 No.9 – new and existing, low risk, stationary medium combustion plant which is a natural gas or hydrogen boiler- more than ten plant	£843.89	N/A	N/A	N/A	£175.42	N/A

Table 1.11 Mining waste

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.11.1	Category A mining waste facility.	£21,662.02	£6,498.92	£10,830.49	£19,495.72	£2,552.44	£12,996.80
1.11.2	Management of inert extractive wastes at mines and quarries.	£2,872.15	£861.54	£1,436.59	£2,584.62	£2,552.44	£1,723.08
1.11.3	Inert mining waste operation.	£2,872.15	£861.54	£1,436.59	£2,584.62	£2,552.44	£1,723.08

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.11.4	Non-inert mining waste operation with a non-inert mining waste facility.	£7,219.29	£2,165.27	£3,610.16	£6,497.88	£2,552.44	£4,331.57
1.11.5	Non-inert mining waste operation without a mining waste facility.	£7,219.29	£2,165.27	£3,610.16	£6,497.88	£2,552.44	£4,331.57
1.11.6	SR 2009 No.8 – management of inert wastes and unpolluted soil at mines and quarries.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23

Table 1.12 Metals

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.12.1	Section 2.1 – ferrous metal production.	£16,609.04	£4,982.40	£8,304.00	£14,948.24	£2,552.44	£9,964.80
1.12.2	Section 2.1 – ferrous metal – roast/sinter/rolling mill.	£15,159.99	£4,547.48	£7,579.48	£13,643.47	£2,552.44	£9,095.99
1.12.3	Section 2.1 – ferrous metal handling.	£11,940.11	£3,582.14	£5,969.54	£10,746.41	£2,552.44	£7,164.28
1.12.4	Section 2.2 – non-ferrous metal production.	£16,609.04	£4,982.40	£8,304.00	£14,948.24	£2,552.44	£9,964.80

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.12.5	Section 2.2 – non-ferrous metal melting.	£14,515.39	£4,354.41	£7,257.70	£13,064.27	£2,552.44	£8,708.82
1.12.6	Section 2.2 – non-ferrous metal – cadmium/mercury production.	£12,261.89	£3,678.67	£6,130.43	£11,036.02	£2,552.44	£7,357.34
1.12.7	Section 2.3 – surface treatment.	£13,227.23	£3,968.27	£6,613.10	£11,903.78	£2,552.44	£7,935.51

1.16.23	SR 2009 No.4 – combustion of biogas in engines at a sewage treatment works.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.24	SR 2021 No.5 – composting in open and closed systems – waste recovery operation. (Superseded) SR 2010 No.14 – 500t: composting biodegradable waste.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.25	SR 2010 No.18 – storage and treatment of dredgings for recovery.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.26	(Superseded) SR 2011 No.1 – 500t: composting biodegradable waste (in open and closed systems).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.27	SR 2021 No.3 – composting in closed systems – waste recovery operation. (Superseded) SR 2012 No.3 – composting in closed systems.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.28	SR 2021 No.2 – composting in open systems – waste recovery operation. (Superseded) SR 2012 No.7 – composting in open systems. (Superseded) SR 2008 No.16 -25kte and 75kte: composting in open systems (existing permits).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.29	SR 2021 No.9 – on-farm anaerobic digestion facility, including use of the resultant biogas – waste recovery operation. (Superseded) SR 2012 No.10 – on-farm anaerobic digestion facility using farm wastes only, including use of the resultant biogas.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.30	(Superseded) SR 2008 No.17 – 75kte: composting in closed systems (in-vessel composting).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.31	SR 2021 No.7 – anaerobic digestion facility, including the use of the resultant biogas – waste recovery operation. (Superseded) SR 2010 No.15 – anaerobic digestion facility including use of the resultant biogas.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.32	(Superseded) SR 2010 No.16 – on-farm anaerobic digestion facility.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.33	(Superseded) SR 2012 No.12 – anaerobic facility including the use of the resultant biogas (waste recovery operation).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.34	SR 2021 No.4 – composting in closed systems – installations. (Superseded) SR 2012 No.4 – composting in closed systems (installation).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.35	SR 2021 No.1 – composting open systems – installations. (Superseded) SR 2012 No.8 – composting in open systems (installation).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.36	SR 2021 No.8 – on-farm anaerobic digestion using farm wastes only, including use of the resultant biogas – installations. (Superseded) SR 2012 No.9 – on-farm anaerobic digestion using farm wastes (installation).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.37	SR 2021 No.6 – anaerobic digestion facility, including use of the resultant biogas – installations. (Superseded) SR 2012 No.11 – anaerobic digestion facility including use of the resultant biogas (installation).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.38	SR 2022 No.5 – non-hazardous waste transfer with asbestos, hazardous batteries, cable and WEEE storage; includes assessment of fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.40	SR 2022 No.4 – non-hazardous waste recycling with asbestos, hazardous batteries, cable and WEEE storage; includes assessment of fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.46	SR 2008 No.9 – asbestos waste transfer station.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.47	SR 2022 No.3 – construction, demolition and excavation waste transfer station.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.48	SR 2022 No.1 – treatment of waste to produce soil, soil substitutes and aggregate.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.49	SR 2008 No.24 – standard rules for transfer of healthcare waste. (Superseded) SR 2008 No.24 – 75kte: clinical waste and healthcare waste transfer station (existing permits).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.50	(Superseded) SR 2008 No.25 – 75kte: clinical waste and healthcare waste treatment and transfer station (existing permits).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.51	SR 2010 No.17 – storage of wastes to be used in land treatment.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.55	SR 2012 No.15 – storage of electrical insulating oils.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.56	SR 2015 No.18 – metal recycling, vehicle storage, depollution and dismantling facility; includes assessment of fire prevention plan. (Superseded) SR 2012 No.14 – metal recycling, vehicle storage, depollution and dismantling facility (existing permits).	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.57	SR 2015 No.13 – 25kte vehicle storage depollution and dismantling (authorised treatment) facility; includes assessment of fire prevention plan. (Superseded) SR 2008 No.20 -25kte: vehicle storage, depollution and dismantling (authorised treatment) facility (existing permits).	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.58	SR 2015 No.16 – metal recycling site; includes assessment of fire prevention plan. (Superseded) SR 2011 No.2 – metal recycling site (existing permits).	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.59	SR 2015 No.14 – 75kte: metal recycling site; includes assessment of fire prevention plan. (Superseded) SR 2008 No.21 -75kte: metal recycling site (existing permits).	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.60	SR 2009 No.7 – storage of furnace ready scrap metal for recovery.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.61	SR 2008 No.22 – 75kte – storage of furnace ready scrap metal for recovery.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.62	SR 2015 No.15 – 75kte: WEEE authorised treatment facility excluding ozone depleting substances; includes assessment of fire prevention plan. (Superseded) SR 2008 No.23 -75kte: WEEE authorised treatment facility excluding ozone depleting substances (existing permits).	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.63	SR 2015 No.3 – metal recycling and WEEE authorised treatment facility excluding ozone depleting substances; includes assessment of fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.64	SR 2015 No.17 – vehicle storage depollution and dismantling authorised treatment facility; includes assessment of fire prevention plan. (Superseded) SR 2011 No.3 – vehicle storage depollution and dismantling (authorised treatment) facility (existing permits).	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.65	SR 2022 No.6 – household waste recycling centre; includes assessment of fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.67	SR 2022 No.7 – materials recycling facility; includes assessment of fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.69	SR 2022 No.8 – waste wood treatment.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.70	SR 2008 No.27 – mobile plant for the treatment of soils and contaminated material, substances or products.	£2,741.36	N/A	N/A	N/A	£2,625.10	N/A
1.16.71	SR 2022 No.2 – mobile treatment of waste to produce soil, soil substitutes and aggregate.	£2,741.36	N/A	N/A	N/A	£2,625.10	N/A
1.16.73	SR 2015 No.24 – use of waste to manufacture timber or construction products; includes assessment of fire prevention plan. (Superseded) SR 2010 No.13 – use of waste to manufacture timber or construction products (existing permits).	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.74	Mobile plant – treatment of waste (other than landspreading).	£7,738.29	£2,320.97	£3,869.66	£6,964.98	£2,625.10	N/A
1.16.75	SR 2012 No.13 – treatment of incinerator bottom ash (installation).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.76	SR 2020 No.1 – storage of PAS 107 certified clean cut tyre shred and chip at a port.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.16.77	SR 2021 No.11 – metal recycling facility with fire prevention plan.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.78	SR 2021 No.12 – vehicle storage depollution and dismantling (authorised treatment) with fire prevention plan.	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.16.79	SR 2021 No.13 – Mechanical treatment of end-of-life tyres for recovery with fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.80	SR 2021 No.14 – mechanical treatment of waste mattresses for recovery with fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53
1.16.81	SR 2021 No.15 – mechanical treatment of waste paper, cardboard and plastic for recovery with fire prevention plan.	£4,075.19	£1,222.76	N/A	N/A	£2,625.10	£2,445.53

Table 1.17 Landfill and deposit for recovery

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.17.1	Section 5.2 – landfill for non-hazardous waste with a separate cell for stable non-reactive hazardous waste, asbestos or gypsum; including assessment of odour management plan.	£23,801.34	£7,140.40	£11,900.67	£21,421.21	£5,772.32	£14,280.80
1.17.2	Section 5.2 – landfill for non-hazardous waste and lagoons/ dredging sites subject to the Landfill Directive; including assessment of odour management plan.	£23,640.45	£7,091.62	£11,820.74	£21,276.92	£5,772.32	£14,184.27
1.17.3	Section 5.2 – landfill for hazardous waste.	£23,801.34	£7,140.40	£11,900.67	£21,421.21	£5,772.32	£14,280.80
1.17.4	Section 5.4 – leachate treatment plant with a capacity of 50 or more tonnes a day.	£16,609.04	£4,982.40	£8,304.00	£14,948.24	£2,552.44	£9,964.80
1.17.5	Leachate treatment plant with a capacity of less than 50 tonnes a day.	£10,526.36	£3,157.60	£5,262.66	£9,473.83	£2,625.10	£6,316.23
1.17.6	Landfill gas plant.	£13,704.71	£4,111.52	£6,852.88	£12,334.55	£2,625.10	£8,223.04
1.17.7	Landfill for inert waste.	£13,704.71	£4,111.52	£6,852.88	£12,334.55	£5,772.32	£8,223.04

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.17.8	Lagoons and dredging sites, excluded from the Landfill Directive.	£10,526.36	£3,157.60	£5,262.66	£9,473.83	£5,772.32	£6,316.23
1.17.9	Deposit of waste for recovery.	£9,556.87	£2,866.96	£4,778.95	£8,600.87	£5,772.32	£5,733.91
1.17.10	SR 2015 No.39 – use of waste in a deposit for recovery operations (construction, reclamation, restoration or improvement of land other than by mobile plant).	£2,741.36	£822.10	N/A	N/A	£2,625.10	£1,645.23
1.17.11	Closed landfill that accepted hazardous, non-hazardous or other non-inert waste.	N/A	£7,140.40	£11,900.67	£21,421.21	£5,772.32	£14,280.80
1.17.12	Closed landfill that accepted inert waste.	N/A	£4,111.52	£6,852.88	£12,334.55	£5,772.32	£8,223.04

Table 1.18 Charges common to more than one sector

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.18.1	Local authority activity – Part A(2) activity or small waste incineration plant to which Schedule 13 of the Regulations applies.	£3,490.79	N/A	£1,419.98	£3,490.79	£243.93	£724.52

Ref	Activity	Permit application	Minor variation	Normal variation	Substantial variation	Transfer application	Surrender application
1.18.2	Local authority activity – Part B activity including those which are also small waste incineration plant.	£1,712.70	£1,089.90	£1,712.70	N/A	£175.42	N/A
1.18.3	Low impact installation. SR 2009 No.2 – low impact Part A installation. SR 2009 No.3 – low impact Part A installation for the production of biodiesel.	£3,147.22	£943.54	£1,573.61	N/A	£2,552.44	£1,888.12
1.18.4	Stand-alone directly associated activity.	90% of the charge for the most apt application activity	90% of the charge for the most apt application activity	90% of the charge for the most apt application activity	N/A	90% of the charge for the most apt application activity	90% of the charge for the most apt application activity

Table 1.19 Charges for plans and assessments

Ref	Plan or assessment	Charge
1.19.1	Waste recovery plan or variation or revision of a waste recovery plan.	£1,277.78
1.19.2	Habitats assessment (except where the application activity is a flood risk activity, water discharge or groundwater activity).	£808.60
1.19.3	Fire prevention plan (except where the application activity is a farming installation).	£1,288.16
1.19.4	Pests management plan (except where the application activity is a farming installation).	£1,288.16
1.19.5	Emissions management plan (except where the application activity is a farming installation).	£1,288.16
1.19.6	Odour management plan (except where the application activity is a farming installation).	£1,293.35
1.19.7	Noise and vibration management plan (except where the application activity is a farming installation).	£1,293.35
1.19.8	Ammonia modelling assessment.	£643.56
1.19.9	Dust and bio-aerosol management plan.	£643.56
1.19.10	Habitats assessment for discharges to water and groundwater activities.	£2,302.44
1.19.11	Specific Substances Assessment for a water discharge activity to surface water.	£4,269.98
1.19.12	Specific Substances Assessment for a groundwater activity.	£1,749.18
1.19.13	Decarbonisation readiness assessment for an in-scope generator which is a specified installation.	£5,283.42
1.19.14	Decarbonisation readiness assessment for an in-scope generator other than a specified installation.	£3,301.88

Chapter 3: Environmental permitting subsistence charge tables

1. This is the Environmental Permitting Subsistence Charge table referred to in this Scheme

Table 2.1 Flood risk activities

Ref	Activity	Subsistence activity charge
2.1.1	SR 2015 No.26 – temporary dewatering affecting up to 20 metres of a main river. SR 2015 No.27 – constructing an outfall pipe of 300 millimetres to 500 millimetres diameter. SR 2015 No.28 – installing a clear span bridge on a main river. SR 2015 No.29 – temporary storage within the flood plain of a main river. SR 2015 No.30 – temporary diversion of a main river. SR 2015 No.31 – channel habitat structure made of natural materials. SR 2015 No.32 – installing an access culvert of no more than 5 metres length. SR 2015 No.33 – repairing and protecting up to 20 metres of the bank of a main river. SR 2015 No.34 – temporary scaffolding affecting up to 20 metres length of a main river. SR 2015 No.35 – excavating a wetland or pond in a main river floodplain. SR 2015 No.36 – installing and using site investigation boreholes and temporary trial pits within a main river floodplain for a period of up to 4 weeks. SR 2015 No.38 – removing a total of 100 metres of exposed gravel from bars and shoals. SR 2019 No.1 – installation of mooring pile in a main river SR 2019 No.2 – steps, ramps and other similar structures excavated into the existing bank profile of a main river SR 2019 No.3 – installation of water gates across a main river	£75.88

Ref	Activity	Subsistence activity charge
	Non-commercial activities undertaken for the purpose of environmental improvement. Works within the curtilage of a dwelling undertaken by or on behalf of the householder under permitted development rights. An activity which would be an exempt flood risk activity but for the fact that it does not satisfy the conditions set out paragraphs 1(3)(a) or 1(3)(d) of Part 4 to Schedule 3 of the Regulations. An activity which would be a standard facility but for the fact that it would not comply with condition 2.2.3 in the relevant standard rules. Steps, ramps and other similar structures excavated into the existing bank profile. Activities carried out within 8 metres of the bank of a non-tidal main river (or within 8 metres of a culvert or flood defence structure on that river) or within 16 metres of the bank of a tidal main river (or within 16 metres of any flood defence structure or culvert on that river). Installation of cattle gates across a watercourse. Minor refurbishment and alterations of existing structures. Excavation of site investigation boreholes and trial pits in the floodplain	
2.1.2	Temporary storage in the floodplain. Temporary ground level raising. Creation of new or improved tracks or paths which require land profiling. The temporary dewatering of a work area. The construction and use of service crossings within an existing structure. Installation of outfalls within engineered banks. Installation of outfalls within natural banks. Maintenance of raised river or sea defences.	£302.40

Ref	Activity	Subsistence activity charge
	Maintenance of reservoir banks. Culvert lining. Construction of jetties (other than jetties likely to endanger the stability of, cause damage to, reduce the effectiveness of or interfere with the Agency's access to or along a flood defence, river control works, sea defence, culvert or remote defence). Installation of temporary floating structures (including pontoons and rafts). Construction of service crossings. Installation of temporary scaffolding. Construction of footbridge(s). Construction of steps, ramps or similar structures on natural banks other than flood defences. Construction of steps, ramps or similar structures on engineered banks other than flood defences. Soft engineered bank protection works. Undertaking bank re-profiling work. Excavations (other than site investigation boreholes and trial pits) in the floodplain. Construction of moorings. Installation of in-channel structures not falling within the description of any other activity and affecting less than 25% of the channel width. Construction of steps, ramps or similar structures on flood defences. Installation of a temporary culvert. Like-for-like replacement of soft engineered bank protection works. Removal of silt, sand, gravel or other material from the bed of a main river (but excluding the subsequent use, treatment, and recovery or disposal of the dredgings).	

Ref	Activity	Subsistence activity charge
	Movement of gravel within a main river channel. Construction of a temporary bypass channel. Construction of new bed reinforcements or the replacement or removal of existing bed reinforcements. Construction of new hard engineered bank protection works. Like-for-like replacement of hard engineered bank protection works. Installation of in-channel structures not falling within the description of any other activity and affecting over 25% of the channel width. Gravel installation. Construction of bridges for vehicle access. Alteration or replacement of culverts. Installation of a permanent bypass channel with a total length of less than 30 metres. Installation of a new, permanent culvert with a length of less than 5 metres. Alteration of in-channel impounding or flow regulation structures. Construction of flood defences with a total length less than 100 metres. Permanent ground level raising. Construction of bridges over or on a flood defence. Works to remove in-channel structures. Construction of foreshore pipelines and manholes (likely to endanger the stability of, cause damage to, reduce the effectiveness of or interfere with the Agency's access to or along a flood defence, river control works, sea defence, culvert or remote defence).	
2.1.3	Construction of a permanent culvert with a length of 5 metres or more. Construction of a bypass channel with a total length of 30 metres or more.	£416.22

Ref	Activity	Subsistence activity charge
	Works to widen, deepen or straighten a channel. Construction of flood defences with a total length of 100 metres or more. Construction of permanent in-channel impounding or flow regulation structures. Construction of reservoir spillways or compensation flow channels.	

Table 2.2 Radioactive substance activities

Ref	Activity	Subsistence activity charge
2.2.1	SR 2010 No.1 – category 5 sealed radioactive sources standard rules.	£891
2.2.2	Keeping or using category 5 sealed sources, including the accumulation and/or disposal of waste sealed sources.	£891
2.2.3	Keeping or using sources of similar potential hazard to high-activity sealed sources including sources in reference 2.2.2.	£3,613
2.2.4	Keeping or using high-activity sealed sources including sources in references 2.2.2 and 2.2.3.	£5,774
2.2.5	Keeping or using unsealed radioactive sources only.	£891
2.2.6	Keeping or use of unsealed radioactive sources and subsequent disposal only by transfer of radioactive waste – not high complexity.	£2,783

Ref	Activity	Subsistence activity charge
2.2.7	Keeping or use of unsealed radioactive sources and subsequent disposal of radioactive waste (including disposal by way of transfer) – not high complexity.	£3,723
2.2.8	Keeping or use of unsealed radioactive sources and subsequent disposal of radioactive waste (including disposal by way of transfer) – high complexity.	£7,312
2.2.9	SR 2014 No.4 – NORM waste from oil and gas production. SR 2017 No.1 – Unintentional receipt of radioactive materials and radioactive waste by the operator of any facility which uses a radiation detection system.	£2,783

Table 2.3 Water discharge and groundwater activities

Ref	Activity	Subsistence activity charge
2.3.1	Sewage effluent discharge with a volume greater than 500,000m ³ a day with OSM.	£118,363.45
2.3.2	Sewage effluent discharge with a volume greater than 150,000m ³ a day and up to and including 500,000m ³ a day.	£68,860.04
2.3.3	Sewage effluent discharge with a volume greater than 150,000m ³ a day and up to and including 500,000m ³ a day with OSM.	£64,874.65
2.3.4	Sewage effluent discharge with a volume greater than 50,000m ³ a day and up to including 150,000m ³ a day.	£42,396.77

Ref	Activity	Subsistence activity charge
2.3.5	Sewage effluent discharge with a volume greater than 50,000m ³ a day and up to and including 150,000m ³ a day with OSM.	£36,995.35
2.3.6	Sewage effluent discharge with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day.	£22,186.38
2.3.7	Sewage effluent discharge with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day with OSM.	£20,190.80
2.3.8	Sewage effluent discharge with a volume greater than 1,000m ³ a day and up to and including 10,000 m ³ a day.	£10,688.77
2.3.9	Sewage effluent discharge with a volume greater than 1,000m ³ a day and up to and including 10,000 m ³ a day with OSM.	£9,655.27
2.3.10	Sewage effluent discharge with a volume greater than 500m ³ a day and up to and including 1,000m ³ a day.	£5,116.83
2.3.11	Sewage effluent discharge with a volume greater than 500m ³ a day and up to and including 1,000 m ³ a day with OSM.	£3,953.13
2.3.12	Sewage effluent discharge with a volume greater than 100m ³ a day and up to and including 500m ³ a day.	£3,863.26
2.3.13	Sewage effluent discharge with a volume greater than 100m ³ a day and up to and including 500m ³ a day with OSM.	£2,741.04
2.3.14	Sewage effluent discharge with a volume greater than 50m ³ a day and up to and including 100m ³ a day.	£2,176.47

Ref	Activity	Subsistence activity charge
2.3.15	Sewage effluent discharge with a volume greater than 50m ³ a day and up to and including 100m ³ a day with OSM.	£1,831.97
2.3.16	Sewage effluent discharge with a volume greater than 20m ³ a day and up to and including 50m ³ a day. Specified discharge consisting of sewage effluent.	£1,834.27
2.3.17	Sewage effluent discharge with a volume greater than 20m ³ a day and up to and including 50-m ³ a day with OSM. Specified discharge consisting of sewage effluent with OSM.	£1,443.68
2.3.18	Sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 20m ³ a day. SR 2010 No.3 – discharge to surface water: secondary treated domestic sewage with a maximum daily volume between 5 and 20 m ³ a day.	£1,023.14
2.3.19	Sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 20m ³ a day with OSM.	£936.72
2.3.20	Sewage effluent discharge with a volume up to 5m ³ a day.	£284.59
2.3.21	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 50,000m ³ a day.	£72,026.23
2.3.22	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 50,000m ³ a day with OSM.	£67,433.64
2.3.23	Trade effluent and/or non-sewage effluent discharge with a volume greater than 50,000m ³ a day.	£36,577.11

Ref	Activity	Subsistence activity charge
2.3.24	Trade effluent and/or non-sewage effluent discharge with a volume greater than 50,000m ³ a day with OSM.	£34,280.81
2.3.25	Trade effluent and/or non-sewage effluent discharge with a volume greater than 50,000m ³ a day with no numeric permit conditions.	£22,625.36
2.3.26	Trade effluent and/or non-sewage effluent discharge with a volume greater than 50,000m ³ a day with no numeric permit conditions with OSM.	£21,247.35
2.3.27	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day.	£33,280.72
2.3.28	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day with OSM.	£30,984.42
2.3.29	Trade effluent and/or non-sewage effluent discharge with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day.	£17,056.87
2.3.30	Trade effluent and/or non-sewage effluent discharge with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day with OSM.	£15,908.15
2.3.31	Trade effluent and/or non-sewage effluent discharge with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day with no numeric permit conditions.	£10,734.86
2.3.32	Trade effluent and/or non-sewage effluent discharge with a volume greater than 10,000m ³ a day and up to and including 50,000m ³ a day with no numeric permit conditions with OSM.	£10,045.86

Ref	Activity	Subsistence activity charge
2.3.33	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 1,000m ³ a day and up to and including 10,000m ³ a day.	£14,678.77
2.3.34	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 1,000m ³ a day and up to and including 10,000m ³ a day with OSM.	£13,530.05
2.3.35	Trade effluent and/or non-sewage effluent discharge with a volume greater than 1,000m ³ a day and up to and including 10,000m ³ a day.	£7,585.95
2.3.36	Trade effluent and/or non-sewage effluent discharge with a volume greater than 1,000m ³ a day and up to and including 10,000m ³ a day with OSM.	£7,011.02
2.3.37	Trade effluent and/or non-sewage effluent discharge with a volume greater than 1,000m ³ a day and up to and including 10,000m ³ a day with no numeric permit conditions.	£4,916.35
2.3.38	Trade effluent and/or non-sewage effluent discharge with a volume greater than 1,000m ³ a day and up to and including 10,000m ³ a day with no numeric permit conditions with OSM.	£4,571.85
2.3.39	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 100m ³ a day and up to and including 1,000m ³ a day.	£10,677.25
2.3.40	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 100m ³ a day and up to and including 1,000m ³ a day with OSM.	£9,529.68
2.3.41	Trade effluent and/or non-sewage effluent discharge with a volume greater than 100m ³ a day and up to and including 1,000m ³ a day.	£5,462.49

Ref	Activity	Subsistence activity charge
2.3.42	Trade effluent and/or non-sewage effluent discharge with a volume greater than 100m ³ a day and up to and including 1,000m ³ a day with OSM.	£4,888.70
2.3.43	Trade effluent and/or non-sewage effluent discharge with a volume greater than 100m ³ a day and up to and including 1,000m ³ a day with no numeric permit conditions.	£3,606.32
2.3.44	Trade effluent and/or non-sewage effluent discharge with a volume greater than 100m ³ a day and up to and including 1,000m ³ a day with no numeric permit conditions with OSM.	£3,261.82
2.3.45	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 20m ³ a day and up to and including 100 m ³ a day. Specified discharge consisting of trade effluent and/or non-sewage effluent discharge with specific substances.	£4,342.57
2.3.46	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 20m ³ a day and up to and including 100m ³ a day with OSM. Specified discharge consisting of trade effluent and/or non-sewage effluent discharge with specific substances with OSM.	£3,917.41
2.3.47	Trade effluent and/or non-sewage effluent discharge with a volume greater than 20m ³ a day and up to and including 100m ³ a day. Specified discharge consisting of trade effluent or non-sewage effluent.	£2,194.90

Ref	Activity	Subsistence activity charge
2.3.48	Trade effluent and/or non-sewage effluent discharge with a volume greater than 20m ³ a day and up to and including 100m ³ a day with OSM. Specified discharge consisting of trade effluent or no-sewage effluent with OSM.	£2,003.64
2.3.49	Trade effluent and/or non-sewage effluent discharge with a volume greater than 20m ³ a day and up to and including 100m ³ a day with no numeric permit conditions. Specified discharge consisting of trade effluent or non-sewage effluent with no numeric permit conditions.	£1,599.23
2.3.50	Trade effluent and/or non-sewage effluent discharge with a volume greater than 20m ³ a day and up to and including 100m ³ a day with no numeric permit conditions, with OSM. Specified discharge consisting of trade effluent and/or non-sewage effluent discharge with no numeric permit conditions, with OSM.	£1,484.01
2.3.51	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 5m ³ a day and up to and including 20m ³ a day.	£2,296.29
2.3.52	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume greater than 5m ³ a day and up to and including 20m ³ a day, with OSM.	£2,200.66
2.3.53	Trade effluent and/or non-sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 20m ³ a day.	£1,054.24
2.3.54	Trade effluent and/or non-sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 20m ³ a day with OSM.	£1,007.01

Ref	Activity	Subsistence activity charge
2.3.55	Trade effluent and/or non-sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 20m ³ a day with no numeric permit conditions.	£769.66
2.3.56	Trade effluent and/or non-sewage effluent discharge with a volume greater than 5m ³ a day and up to and including 20m ³ a day with no numeric permit conditions, with OSM.	£717.81
2.3.57	Trade effluent and/or non-sewage effluent discharge with specific substances with a volume up to 5m ³ a day.	£1,766.29
2.3.58	Trade effluent and/or non-sewage effluent discharge with a volume up to 5m ³ a day.	£491.98
2.3.59	Trade effluent and/or non-sewage effluent discharge with a volume up to 5m ³ a day with no numeric permit conditions.	£313.39
2.3.60	Landspreading of up to and including 5m ³ a year of undiluted working strength waste or used sheep dip.	£307.63
2.3.61	Landspreading of greater than 5m ³ a year undiluted working strength waste or used sheep dip.	£1,080.74
2.3.62	Landspreading of any volume of waste or used pesticides, biocides or disinfectant wash waters a year.	£411.33
2.3.63	The burial of up to and including 1,430 human remains or non-waste solid deposits into or on to land up to and including 100 tonnes a year.	£331.83
2.3.64	The burial of greater than 1,431 human remains or non-waste solid deposits into or on to land greater than 100 tonnes and up to and including 15,000 tonnes a year.	£1,042.72
2.3.65	Non-waste solid deposits into or on to land greater than 15,000 tonnes a year.	£6,092.73

Ref	Activity	Subsistence activity charge
2.3.66	Sewerage network and sewage treatment works combined sewer overflows.	£1,500.14
2.3.67	Emergency overflow discharge.	£455.11
2.3.68	Rainfall related discharge with no specific substances with a volume greater than 50,000m ³ a day.	£4,551.11
2.3.69	Rainfall related discharge with no specific substances with a volume greater than 1,000m ³ a day and up to and including 50,000m ³ a day.	£2,253.66
2.3.70	Rainfall related discharges with no specific substances with a volume greater than 20m ³ a day and up to and including 1,000m ³ a day. Specified discharge which is rainfall related.	£939.03
2.3.71	Rainfall related discharge with no specific substances with a volume up to and including 20m ³ a day.	£240.81
2.3.72	Aquaculture discharge with a volume greater than 50,000m ³ a day.	£5,176.74
2.3.73	Aquaculture discharge with a volume greater than 100m ³ a day and up to and including 50,000m ³ a day.	£1,579.64
2.3.74	Aquaculture discharge with a volume up to and including 100m ³ a day. Specified discharge consisting of aquaculture discharge.	£260.39
2.3.75	Cooling water discharge with a volume greater than 10,000m ³ a day.	£4,935.94

Ref	Activity	Subsistence activity charge
2.3.76	Cooling water discharge with a volume greater than 100m ³ a day and up to and including 10,000m ³ a day. SR 2010 No.2 – discharge to surface water: cooling water and heat exchangers.	£1,081.90
2.3.77	Cooling water discharge with a volume up to 100m ³ a day. Specified discharge consisting of cooling water.	£265.00
2.3.78	Thermal discharges with a volume greater than 100m ³ a day.	£164.76
2.3.79	Transfer of heat to or from the environment via closed loop ground source heating and cooling systems, from domestic households or community buildings.	£118.67
2.3.80	Transfer of heat to or from the environment via closed loop ground source heating and cooling systems.	£164.76
2.3.81	Sewage effluent: sewerage undertaker with a discharge volume greater than 500,000m ³ a day.	£196,242.75
2.3.82	Sewage effluent: sewerage undertaker with a discharge volume greater than 150,000m ³ and up to 500,000m ³ a day.	£108,670.16
2.3.83	Sewage effluent: sewerage undertaker with a discharge volume greater than 50,000m ³ and up to 150,000m ³ a day.	£63,844.60
2.3.84	Sewage effluent: sewerage undertaker with a discharge volume greater than 10,000m ³ and up to 50,000m ³ a day.	£36,584.02
2.3.85	Sewage effluent: sewerage undertaker with a discharge volume greater than 1,000m ³ and up to 10,000m ³ a day.	£16,786.11

Ref	Activity	Subsistence activity charge
2.3.86	Sewage effluent: sewerage undertaker with a discharge volume greater than 500m ³ and up to 1,000m ³ a day.	£7,984.61
2.3.87	Sewage effluent: sewerage undertaker with a discharge volume greater than 100m ³ and up to 500m ³ a day.	£6,035.12
2.3.88	Sewage effluent: sewerage undertaker with a discharge volume greater than 50m ³ and up to 100m ³ a day.	£4,438.20
2.3.89	Sewage effluent: sewerage undertaker with a discharge volume greater than 20m ³ and up to 50m ³ a day. Sewage effluent: sewerage undertaker with a specified discharge.	£3,905.89
2.3.90	Sewage effluent: sewerage undertaker with a discharge volume greater than 5m ³ and up to 20m ³ a day.	£2,603.93
2.3.91	Sewage effluent: sewerage undertaker with a discharge volume up to 5m ³ a day.	£1,871.14
2.3.92	Storm sewage discharge: sewerage undertaker.	£2,715.69
2.3.93	Emergency sewage discharge: sewerage undertaker.	£1,329.62

Table 2.4 Chemicals

Ref	Activity	Subsistence activity charge
2.4.1	Section 4.1, 4.2 or 4.3 – organic or inorganic chemical production, or chemical fertiliser production, involving continuous operations, discharging to a water course via an on-site effluent treatment plant, and including an incineration plant, multiple combustion plants, or the treatment of hazardous waste not produced on site.	£49,439.38
2.4.2	Section 4.1, 4.2 or 4.3 — organic or inorganic chemical production, or chemical fertiliser production, involving continuous operations, discharging to a water course via an on a site effluent treatment plant and including no more than one combustion plant.	£35,414.37
2.4.3	Section 4.1, 4.2, 4.3 or 4.5 – organic or inorganic chemical production, or chemical fertiliser or pharmaceutical production, involving batch manufacture or semi-continuous operations and discharging to a water course via an on-site effluent treatment plant.	£19,946.11
2.4.4	Section 4.1, 4.2 or 4.3 – organic or inorganic chemical production, or chemical fertiliser production, involving large scale continuous operations and discharging to sewer.	£31,422.60
2.4.5	Section 4.1, 4.2, 4.3 or 4.5 – organic or inorganic chemical production, or chemical fertiliser or pharmaceutical production, involving batch or semi- continuous operations and discharging to sewer, where the installation includes more than three Chapter 4 activities.	£20,641.70
2.4.6	Section 4.1, 4.2, 4.3 or 4.5 – organic or inorganic chemical production, or chemical fertiliser or pharmaceutical production, involving batch or semi- continuous operations and discharging to sewer.	£14,821.28

Ref	Activity	Subsistence activity charge
2.4.7	Section 4.1, 4.2, 4.3 or 4.5 – organic or inorganic chemical production, or chemical fertiliser or pharmaceutical production, involving small scale (the manufacture of products using reactors with a nominal capacity of 1,000 litres or less) or simple batch operations (involving raw material additives and & simple processing, with a discharge to holding tank, drums or intermediate bulk container).	£11,166.31
2.4.8	Section 4.1 or 4.2 – anaerobic digestion (designed to be fed with non-waste crops).	£10,039.03
2.4.9	Section 4.4 – large scale plant health products & biocides -- production of 2000 tonnes or more a year.	£15,648.80
2.4.10	Section 4.4 – plant health products & biocides – production of less than 2000 tonnes a year.	£7,456.94
2.4.11	Section 4.6 or 4.7 – explosives production or activities involving carbon disulphide or ammonia.	£6,002.12
2.4.12	Chemical production incidental to the primary purpose of the installation and not for commercial purposes.	£3,732.52

Table 2.5 Refineries

Ref	Activity	Subsistence activity charge
2.5.1	Section 1.2A(1)(d) – oil refining; including refinery combustion plant, incineration of refinery waste streams, production of petroleum coke and any on site effluent treatment plant and cooling water activities.	£116,182.59
2.5.2	Section 1.2A(1)(a) – gas refining; including refinery combustion plant, incineration of refinery waste streams and any on site effluent treatment plant and cooling water activities.	£29,780.29

Ref	Activity	Subsistence activity charge
2.5.3	Section 1.2A (1) (f) – petroleum distillation; including plant for refining of liquid petroleum residues and bitumen distillation and any on site effluent treatment plant and cooling water activities.	£25,126.50
2.5.4	Section 1.2A (1) (e) – crude oil storage with a tank storage capacity of 500 tonnes or more; including any on site effluent treatment plant and cooling water activities.	£23,083.75
2.5.5	Section 1.2A (1) (a) or (f) – gathering station; including any on site effluent treatment plant and cooling water activities.	£35,228.03
2.5.6	Section 1.2 – production of synthetic fuels and carbonisation plant; including any on site effluent treatment plant and cooling water activities.	£5,036.87

Table 2.6 Energy from waste

Ref	Activity	Subsistence activity charge
2.6.1	Section 5.1 – new mass-burn incineration or co-incineration plant – 1 line.	£27,964.37
2.6.2	Section 5.1 – new mass-burn incineration or co-incineration plant – 2 lines.	£29,098.60
2.6.3	Section 5.1 – new mass-burn incineration or co-incineration plant – 3 lines.	£30,223.56
2.6.4	Section 5.1 – new mass-burn incineration or co-incineration plant – 4 lines.	£31,369.36
2.6.5	Section 5.1 – new mass-burn incineration or co-incineration plant – 5 lines.	£32,493.17

Ref	Activity	Subsistence activity charge
2.6.6	Section 5.1 – new gasification or pyrolysis incineration or co-incineration plant – 1 line.	£31,141.36
2.6.7	Section 5.1 – new gasification or pyrolysis incineration or co-incineration plant – 2 lines.	£32,276.73
2.6.8	Section 5.1 – new gasification or pyrolysis incineration or co-incineration plant – 3 lines.	£33,412.12
2.6.9	Section 5.1 – new gasification or pyrolysis incineration or co-incineration plant – 4 lines.	£34,546.34
2.6.10	Section 5.1 – new gasification or pyrolysis incineration or co-incineration plant – 5 lines.	£35,670.14
2.6.11	Section 5.1 – existing incineration or co-incineration plant – 1 line.	£18,883.65
2.6.12	Section 5.1 – existing incineration or co-incineration plant – 2 lines.	£21,381.25
2.6.13	Section 5.1 – existing incineration or co-incineration plant – 3 lines.	£23,877.71
2.6.14	Section 5.1 – existing incineration or co-incineration plant – 4 lines.	£26,366.05
2.6.15	Section 5.1 – existing incineration or co-incineration plant – 5 lines.	£28,871.75
2.6.16	Section 1.2 – new waste gasification or pyrolysis plant which is not subject to Chapter IV of the Industrial Emissions Directive because the syngas meets end-of-waste requirements.	£23,991.13
2.6.17	Section 1.2 – existing waste gasification or pyrolysis plant which is not subject to Chapter IV of the Industrial Emissions Directive because the syngas meets end-of-waste requirements.	£17,515.64

Ref	Activity	Subsistence activity charge
2.6.18	Section 5.1 – new or existing biomass co-incineration plant which is not subject to Chapter IV of the Industrial Emissions Directive.	£8,215.01
2.6.19	Any activity falling in references 2.6.1 to 2.6.10 in Table 2.6 where construction has not commenced.	£1,920.08

Table 2.7 Food and drink

Ref	Activity	Subsistence activity charge
2.7.1	Section 6.8 – food and drink activity with no additional components.	£3,561.23
2.7.2	Section 6.8 – food and drink activity with 1 additional component.	£4,696.61
2.7.3	Section 6.8 – food and drink activity with 2 additional components.	£5,831.99
2.7.4	Section 6.8 – food and drink activity with 3 or 4 additional components.	£7,534.48
2.7.5	Section 6.8 – food and drink activity with 5 or 6 additional components.	£9,804.09
2.7.6	Section 6.8 – food and drink activity with 7 or 8 additional components.	£17,862.85
2.7.7	Section 6.8 – food and drink activity with 9 to 13 additional components.	£23,764.28
2.7.8	Section 6.8 – food and drink activity with 14 or more additional components.	£32,390.16

Table 2.8 Onshore oil and gas

Ref	Activity	Subsistence activity charge
2.8.1	SR 2014 No.2 – the management of extractive waste.	£8,539.08
2.8.2	SR 2015 No.1 – onshore oil exploration.	£10,724.19
2.8.3	Mining waste operation.	£13,486.84
2.8.4	Mining waste operation with a non-hazardous extractive waste facility.	£16,771.45
2.8.5	Mining waste operation with a hazardous extractive waste facility.	£18,581.58
2.8.6	Mining waste flare, whether or not an installation.	£2,542.75
2.8.7	Groundwater activity which is part of a mining waste operation.	£4,262.60
2.8.8	SR 2015 No.2 – storage and handling of up to 500 tonnes crude oil.	£5,255.62
2.8.9	Storage and handling of crude oil or petroleum with a capacity of less than 500 tonnes.	£7,623.60

Table 2.9 Paper, pulp, carbon, tar and bitumen

Ref	Activity	Subsistence activity charge
2.9.1	Section 6.4 – dye house and/or finishing site including any on site effluent treatment plant and cooling water activities.	£5,036.87
2.9.2	Section 6.4 – wool scouring including any on site effluent treatment plant and cooling water activities.	£6,228.97
2.9.3	Section 6.4 – carpet manufacturing with integrated dye house including any on site effluent treatment plant and cooling water activities.	£3,845.95
2.9.4	Section 6.1 – integrated or multi product mill with 2 additional components.	£16,464.75
2.9.5	Section 6.1 – integrated or multi product mill with 3 additional components.	£18,163.76
2.9.6	Section 6.1 – integrated or multi product mill with 4 four additional components.	£19,869.73
2.9.7	Section 6.1 – paper and pulp activity including a discharge to surface water.	£10,614.25
2.9.8	Section 6.1 – paper and pulp activity including a discharge to surface water and 1 additional component.	£11,749.62
2.9.9	Section 6.1 – paper and pulp activity including a discharge to surface water and 3 additional components.	£14,246.07
2.9.10	Section 6.1 – paper and pulp activity including a discharge to surface water and more than 4 additional components.	£16,515.67
2.9.11	Section 6.1 – paper and pulp activity including a discharge to sewer.	£5,847.03

Ref	Activity	Subsistence activity charge
2.9.12	Section 6.1 – paper and pulp activity including a discharge to sewer and 1 additional component.	£6,982.42
2.9.13	Section 6.1 – paper and pulp activity including a discharge to sewer and 2 additional components.	£8,117.79
2.9.14	Section 6.1 – paper and pulp activity including a discharge to sewer and more than 3 additional components.	£9,252.02

Table 2.10 Combustion and Power

Ref	Activity	Subsistence activity charge
2.10.1	Section 1.1 – coal fired combustion plant; including fuel storage and handling, gas abatement and any effluent treatment plant and cooling water activities, gas turbines, combined heat and power plants or engines, mechanical drive gas turbines and boilers.	£34,413.24
2.10.2	Section 1.1 - biomass combustion plant; including fuel storage and handling, gas abatement and any effluent treatment plant and cooling water activities, gas turbines, combined heat and power plant or engines, mechanical drive gas turbines and boilers.	£17,514.49
2.10.3	Section 1.1 – gas turbine, combined heat and power plant or engine including fuel storage and gas abatement and any effluent treatment plant and cooling water activities, mechanical drive gas turbines and boilers.	£13,748.40
2.10.4	Section 1.1 – compressor or boiler; including any fuel storage and gas abatement, effluent treatment plant and cooling water activities.	£13,629.19

Ref	Activity	Subsistence activity charge
2.10.5	Section 5.2 – landfill only serving and associated with an operating and permitted combustion plant; including any effluent treatment plant or sludge lagoon activities; excluding pulverised fuel ash treatment activities.	£7,456.94
2.10.6	Section 1.1 – odourization plant and Section 1.1(B) boiler, gas turbine or compression ignition engine with a rated thermal input greater than 20MW but less than 50MW.	£1,819.39
2.10.7	Medium combustion plant and/or specified generator comprising 1 combustion plant or generator.	£355.00
2.10.8	Medium combustion plant and/or specified generator comprising 2 or 3 combustion plants.	£387.17
2.10.9	Medium combustion plant and/or specified generator comprising 4 or 5 combustion plant.	£408.97
2.10.10	Medium combustion plant and/or specified generator comprising 6, 7 or 8 combustion plants.	£504.47
2.10.11	Medium combustion plant and/or specified generator comprising 9 or 10 combustion plants.	£539.76
2.10.12	Medium combustion plant and/or specified generator comprising 11, 12, 13, 14 or 15 combustion plants.	£550.14
2.10.13	Medium combustion plant and/or specified generator comprising more than 15 combustion plants.	£643.56

Table 2.11 Mining wastes

Ref	Activity	Subsistence activity charge
2.11.1	SR 2009 No.8 – management of inert extractive waste. Management of inert extractive waste, including with a point source discharge or by passive treatment.	£291.10
2.11.2	Management of non-inert non-hazardous extractive waste.	£1,668.48
2.11.3	Management of any extractive waste in a Category A mining waste facility. Management of hazardous extractive waste.	£9,245.28

Table 2.12 Metals

Ref	Activity	Subsistence activity charge
2.12.1	Section 2.1 – producing, melting or refining iron or steel in an integrated works; including all activities which are part of the installation such as any on site effluent treatment plant and cooling water activities.	£208,856.68
2.12.2	Section 2.1 – producing, melting or refining iron or steel in an electric arc furnace with a holding capacity of 7 tonnes or more; producing non-ferrous metals such as aluminium from bauxite or prebaked anodes produced in an aluminium smelter; processes that may form integrated installations using lead, zinc or precious metals with the production of copper; including any on site effluent treatment plant and cooling water activities; excluding any activities involving the treatment of hazardous waste not produced on site.	£47,927.85

Ref	Activity	Subsistence activity charge
2.12.3	Section 2.1 – processing ferrous metals and their alloys by using hot-rolling mills with a production capacity of more than 30 tonnes of crude steel per hour; including any on site effluent treatment plant and cooling water activities.	£11,619.99
2.12.4	Section 2.1 – processing ferrous metals and their alloys by using hot-rolling mills with a production capacity of more than 20 tonnes but less than or equal to 30 tonnes of crude steel per hour; including any on site effluent treatment plant and cooling water activities.	£5,945.41
2.12.5	Section 2.1 – loading, unloading and handling of more than 500,000 tonnes a year of iron ore; including any on site effluent treatment plant and cooling water activities; excluding any activities involving burnt pyrites or mining operations.	£9,442.99
2.12.6	Section 2.2 – production of a range of different non-ferrous metals from complex raw materials such as copper, lead, zinc and precious metals; including any on site effluent treatment plant and cooling water activities.	£13,879.18
2.12.7	Section 2.2 – production of non-ferrous metals not described in this reference 2.12.7; including any on site effluent treatment plant and cooling water activities.	£11,790.13
2.12.8	Section 2.2 – melting non-ferrous metals, including recovered products, the alloyage of non-ferrous metals and the operation of non-ferrous metals foundries, with a melting capacity greater than 4 tonnes per day for lead and cadmium or greater than 20 tonnes per day for all other metals; including any on site effluent treatment plant and cooling water activities; excluding any activities involving the treatment of hazardous waste not produced on site.	£9,600.39

Ref	Activity	Subsistence activity charge
2.12.9	Section 2.3 – surface treatment of metals and plastics – consisting of more than one activity falling within Part 2 of Schedule 1 to the Regulations; or one Section 2.3 Part A(1)(a) activity and one or more waste operation, and using over 3 surface treatment techniques, including any on site effluent treatment plant and cooling water activities.	£4,356.34
2.12.10	Section 2.3 – surface treatment of metals and plastics – consisting of more than one Section 2.3 Part A(1)(a) activity and using 2-3 surface treatment of metals techniques, including any on site effluent treatment plant and cooling water activities.	£2,880.70
2.12.11	Section 2.3 – surface treatment of metals and plastics – consisting of one Section 2.3 Part A(1)(a) activity and using no more than 1 surface treatment of metals technique such as pickling, including any on site effluent treatment plant and cooling water activities.	£1,405.05

Table 2.13 Cement, minerals and lime

Ref	Activity	Subsistence activity charge
2.13.1	Section 3.1 – production of cement clinker; including adjacent quarry for raw materials, receipt and storage of alternative raw materials, producing cement clinker in rotary kilns, grinding cement clinker (including imported), storing and dispatch of cement or clinker in bulk or in bags, nodulising cement kiln or by-pass dust and management of site drainage.	£14,514.58

Ref	Activity	Subsistence activity charge
2.13.2	Section 3.1 – production of cement clinker utilising waste derived fuel; including adjacent quarry for raw materials, receipt and storage of alternative raw materials, producing cement clinker in rotary kilns, grinding cement clinker (including imported), storing and dispatch of cement or clinker in bulk or in bags, receipt and storage of fuels (including waste derived fuels), nodulising cement kiln or by-pass dust and management of site drainage.	£28,429.64
2.13.3	Section 3.1 – production of lime and lime products; including adjacent quarry for raw materials, receipt and storage of additional raw materials, producing lime in kilns, slaking of lime for making calcium hydroxide or named inorganic salts, preparing and storing products in bulk or in bags and management of site drainage.	£16,909.18
2.13.4	Section 3.1 – production of lime (dolime); including receipt of raw materials, producing dolime in kilns, grinding of dolomitic products, storing and dispatch of products in bulk or in bags, receipt and storage of fuels (including waste derived fuels), waste storage and handling and management of site drainage.	£27,247.97
2.13.5	Section 3.1 – production of cement and lime; including production of cement clinker in kilns and manufacturing lime and lime products in kilns as described in references 2.13.2 and 2.13.3 in Table 2.13.	£42,855.10
2.13.6	Section 3.3 and 3.4 – manufacturing glass or mineral fibre; including receipt of raw materials, melting minerals in a furnace to produce a wool or fibre, producing fibres and products by conversion, drying or finishing, waste handling and management of site drainage.	£12,623.44
2.13.7	Section 1.1 – manufacture of plasterboard utilising combustion plant with a heating capacity of more than 50 MW; including adjacent quarry for raw materials, receipt on site of recycled gypsum products, production and drying of plasterboard, storing and loading of products in bulk or in bags, waste product handling and management of site drainage.	£12,402.38

Ref	Activity	Subsistence activity charge
2.13.8	Section 3.6 – brick manufacture; including adjacent quarry for raw materials, receipt and storage of alternative raw materials, producing bricks in kilns, storing and exporting brick products, waste handling and management of site drainage.	£14,728.69

Table 2.14 Intensive pig and poultry

Ref	Activity	Subsistence activity charge
2.14.1	Section 6.9 – farming installation; excluding incineration plant.	£2,761.48
2.14.2	Section 6.9 – farming installation operated by a member of the Agency's Pig and Poultry Assurance Scheme published on GOV.UK; excluding incineration plant.	£1,671.24

Table 2.15 Landspreading

Ref	Activity	Subsistence activity charge	Deployment charge
2.15.1	Mobile plant – landspreading.	£627.16	£1,783.28
2.15.2	SR 2010 No.4 – mobile plant for landspreading.	£627.16	£1,783.28
2.15.3	SR 2010 No.5 – mobile plant for reclamation, restoration or improvement of land.	£627.16	£1,783.28

Ref	Activity	Subsistence activity charge	Deployment charge
2.15.4	SR 2010 No.6 – mobile plant for landspreading of sewage sludge.	£627.16	£1,621.36

Table 2.16 Waste transfer treatment – hazardous waste treatment

Ref	Activity	Subsistence activity charge
2.16.1	Hazardous waste treatment – more than one waste stream – installation. Underground storage of hazardous waste.	£13,215.32
2.16.2	Asbestos treatment. Healthcare (including clinical) waste treatment – installation. Hazardous (including healthcare) waste transfer – installation. Oil or solvent treatment – installation.	£9,803.81
2.16.3	Hazardous waste treatment installation – single waste stream. Hazardous waste soil treatment. Hazardous waste transfer – waste operation. Hazardous waste treatment – waste operation. Oil or solvent transfer.	£5,729.64

Ref	Activity	Subsistence activity charge
2.16.4	Asbestos transfer facility. SR 2008 No.9 – asbestos waste transfer station. Drum reconditioning facility. Healthcare (including clinical) waste transfer – waste operation. SR 2008 No.24 – standard rules for transfer of healthcare waste. Healthcare (including clinical) waste treatment – waste operation. SR 2008 No.25 – 75kte: clinical waste and healthcare waste treatment and transfer station. In house storage of hazardous waste.	£2,952.38
2.16.5	Electrical oil storage facility. SR 2012 No.15 – storage of electrical insulating oils. Healthcare (including clinical) waste treatment at the site of production – 100 tonnes or less a year. SR 2013 No.1 – treatment of 100 tonnes a year of clinical and healthcare waste. Hazardous waste transfer – local authority collection depots.	£1,532.40

Table 2.16a Non-hazardous and inert waste

Ref	Activity	Subsistence activity charge
2.16.6	Treatment and transfer of non-hazardous waste – 75,000 tonnes or more a year. Waste wood treatment – 75,000 tonnes or more a year. Treatment of slags or ashes (including at an incineration or co-incineration plant) – installation. SR 2012 No.13 – treatment of incinerator bottom ash. Pre-treatment of waste for incineration or co-incineration – installation.	£6,856.16
2.16.7	Treatment and transfer of non-hazardous waste – from 25,000 to 75,000 tonnes a year. SR 2022 No.4 – non-hazardous waste recycling with asbestos, hazardous batteries, cable and WEEE storage. SR 2022 No.7 – materials recycling facility. SR 2015 No.24 – use of waste to manufacture timber or construction products. Transfer of non-hazardous waste – 75,000 tonnes or more a year. Waste wood treatment – from 25,000 to 75,000 tonnes a year. SR 2010 No.13 – use of waste to manufacture timber or construction products. Tyre recycling. SR 2021 No.15 – mechanical treatment of waste paper, cardboard and plastic for recovery.	£4,933.26
2.16.8	Treatment and transfer of non-hazardous waste – less than 25,000 tonnes a year.	£3,402.05

Ref	Activity	Subsistence activity charge
	Transfer of non-hazardous waste – from 25,000 to 75,000 tonnes a year. SR 2022 No.5 – non-hazardous waste transfer with asbestos, hazardous batteries, cable and WEEE storage. Treatment of inert or excavation waste – 250,000 tonnes or more a year. Treatment of liquid or sludge; including non-biological treatment of sludge and similar activities. Treatment of slags and ashes; including at an incineration or co-incineration plant – waste operation. Gypsum recycling. Soil and aggregate manufacture. SR 2022 No.1 – treatment of waste to produce soil, soil substitutes and aggregate. SR 2021 No.13 – Mechanical treatment of end-of-life tyres for recovery. SR 2021 No.14 – mechanical treatment of waste mattresses for recovery.	
2.16.9	Transfer of non-hazardous waste – less than 25,000 tonnes a year. Waste wood treatment – less than 25,000 tonnes a year. SR 2022 No.8 – waste wood treatment. Treatment or transfer of inert or excavation waste – less than 250,000 tonnes a year. SR 2022 No.3 – construction, demolition and excavation waste transfer station. Physical treatment – gully emptying wastes.	£2,271.97

Ref	Activity	Subsistence activity charge
2.16.10	Civic amenity site (household waste recycling centre); including hazardous household waste. SR 2022 No.6 – household waste recycling centre. SR 2010 No.18 – storage and treatment of dredgings for recovery.	£1,312.30
2.16.10.1	SR 2020 No.1 – storage of PAS 107 certified clean cut tyre shred and chip at a port.	£1,875.56

Table 2.16b Waste transfer and treatment – biowaste treatment

Ref	Activity	Subsistence activity charge
2.16.11	Biological treatment installation – treating 10 tonnes or more of animal waste or 10 tonnes or more of hazardous waste a day. Anaerobic and mechanical or biological treatment installation. Anaerobic digestion installation.	£13,039.00
2.16.13	Mechanical and biological treatment installation. In-vessel composting installation. Aerobic thermophilic digestion installation. Anaerobic digestion (including sewage sludge) – waste operation.	£9,154.16

Ref	Activity	Subsistence activity charge
2.16.14	SR 2021 No.6 – anaerobic digestion facility, including use of the resultant biogas – installations. SR 2021 No.8 – on-farm anaerobic digestion using farm wastes only, including use of the resultant biogas – installations. SR 2021 No.10 – anaerobic digestion of non-hazardous sludge at a wastewater treatment works, including the use of the resultant biogas. SR 2012 No.11 – anaerobic digestion facility including use of the resultant biogas. SR 2012 No.9 – on-farm anaerobic digestion using farm wastes. Sewage sludge treatment installation – no anaerobic digestion. In-vessel composting – waste operation. Open air composting – installation. Sewage or water treatment sludge treatment by physico-chemical treatment – waste operation. Anaerobic digestion – 75,000 tonnes or more a year. SR 2008 No.19 – 250kte: non-hazardous sludge biological chemical and physical treatment site.	£6,954.37

Ref	Activity	Subsistence activity charge
2.16.15	SR 2021 No.1 – composting open systems – installations. SR 2021 No.4 – composting in closed systems – Part A installation. SR 2021 No.7 – anaerobic digestion facility, including the use of the resultant biogas – waste recovery operation. SR 2021 No.9 – on-farm anaerobic digestion facility, including use of the resultant biogas – waste recovery operation. SR 2021 No.4 – composting in closed systems – Part A installation. SR 2012 No.8 – composting in open systems. Biological treatment of sewage sludge – waste operation. SR 2012 No.12 – anaerobic digestion facility including use of the resultant biogas (waste recovery operation). SR 2010 No.16 – on-farm anaerobic digestion facility. SR 2012 No.10 – on-farm anaerobic digestion facility using farm wastes only, including use of the resultant biogas. Open air compositing – waste operation processing more than 500 tonnes a year. SR 2010 No.15 – anaerobic digestion facility including use of the resultant biogas.	£4,507.27

Ref	Activity	Subsistence activity charge
2.16.16	SR 2021 No.2 – composting in open systems – waste recovery operation. SR 2021 No.3 – composting in closed systems – waste recovery operation. SR 2008 No.19 – 75kte: non-hazardous sludge biological chemical and physical treatment site. Remote storage of digestate – waste operation. Aerobic thermophilic digestion – waste operation. SR 2008 No.17 – 75kte: composting in closed systems (in-vessel composting). SR 2008 No.18 – 75kte: non-hazardous mechanical biological (aerobic) treatment facility (existing permits). SR 2015 No.12 – 75kte: non-hazardous mechanical biological (aerobic) treatment facility. SR 2012 No.7 – composting in open systems. SR 2012 No.3 – composting in closed systems. SR 2008 No.16 – 25kte and 75kte: composting in open systems (no longer available). Storage and combustion of biogas. SR 2009 No.4 – combustion of biogas in new Medium Combustion Plant engines at a sewage treatment works.	£2,492.07

Ref	Activity	Subsistence activity charge
2.16.17	SR 2021 No.5 – composting in open and closed systems – waste recovery operation. SR 2010 No.14 – 500t: composting biodegradable waste. SR 2011 No.1 – 500t: composting biodegradable waste (in open and closed systems). SR 2010 No.17 – storage of wastes to be used in land treatment. Open air composting – waste operation processing 500 tonnes or less a year.	£1,580.92
2.16.17.1	SR 2023 No.1 – capture, treatment and storage of biogas from lagoons and tanks.	1,386.77

Table 2.16c Waste and transfer treatment – metal recycling

Ref	Activity	Subsistence activity charge
2.16.18	Metal shredding – installation. WEEE treatment or transfer – installation. Other metal recycling, such as catalytic converters – installation. Dismantling of ships and off-shore structures.	£6,948.46

Ref	Activity	Subsistence activity charge
2.16.19	Metal recycling – 75,000 tonnes or more a year.	£4,740.38
	WEEE treatment or transfer –75,000 tonnes or more a year.	
	End of life vehicle treatment (including trains and boats) – 75,000 tonnes or more a year.	

Ref	Activity	Subsistence activity charge
2.16.20	Metal recycling – from 25,000 to 75,000 tonnes a year. SR 2008 No.21 – 75kte: metal recycling site (existing permits). SR 2015 No.14 – 75kte: metal recycling site. SR 2015 No.3 – metal recycling and WEEE authorised treatment facility excluding ozone depleting substances. SR 2015 No.18 – metal recycling, vehicle storage, depollution and dismantling (authorised treatment) facility. SR 2012 No.14 – metal recycling, vehicle storage, depollution and dismantling facility (existing permits). WEEE treatment or transfer – from 25,000 to 75,000 tonnes a year. SR 2008 No.23 – 75kte: WEEE authorised treatment facility excluding ozone depleting substances (existing permits). SR 2015 No.15 – 75kte WEEE: authorised treatment facility excluding ozone depleting substances. End of life vehicle treatment (including trains and boats) – from 25,000 to 75,000 tonnes a year. Catalytic converter treatment – less than 10 tonnes per day. Furnace ready metal storage – from 75,000 to 1,000,000 tonnes a year. SR 2009 No.7 – storage of furnace ready scrap metal for recovery.	£3,037.58

Ref	Activity	Subsistence activity charge
2.16.21	Metal recycling – from 5,000 to 25,000 tonnes a year. SR 2011 No.2 – metal recycling site (existing permits). SR 2015 No.16 – metal recycling site. WEEE treatment or transfer – less than 25,000 tonnes a year. End of life vehicle treatment – from 2,500 to 25,000 tonnes a year. SR 2008 No.20 – 25kte: vehicle storage, depollution and dismantling (authorised treatment) facility (existing permits). SR 2015 No.13 – 25kte: vehicle storage depollution and dismantling (authorised treatment) facility. Train or boat dismantling – less than 25,000 tonnes a year. Catalytic convertor storage – less than 50 tonnes at any one time. Furnace ready metal storage – less than 75,000 tonnes a year. SR 2008 No.22 – 75kte: storage of furnace ready scrap metal for recovery. Aircraft dismantling.	£2,204.53

Ref	Activity	Subsistence activity charge
2.16.22	Metal recycling – less than 5,000 tonnes a year. End of life vehicle treatment – less than 2,500 tonnes a year. SR 2011 No.3 – vehicle storage depollution and dismantling (authorised treatment) facility (existing permits). SR 2015 No.17 – vehicle storage depollution and dismantling authorised treatment facility. SR 2021 No.11 – metal recycling facility with fire prevention plan. SR 2021 No.12 – vehicle storage depollution and dismantling authorised treatment facility with fire prevention plan.	£1,149.00

Table 2.16d Waste transfer and treatment – mobile plant

Ref	Activity	Subsistence activity charge
2.16.23	Mobile plant – treatment of waste (other than landspreading).	£3,112.96
2.16.24	SR 2008 No.27 – mobile plant for treatment of soils and contaminated material, substances or products.	£3,112.96
2.16.25	SR 2022 No.2 – mobile treatment of waste to produce soil, soil substitutes and aggregate.	£1,576.72

Table 2.17 Landfill and deposit for recovery

Ref	Activity	Subsistence activity charge
2.17.1	Section 5.2 – landfill for non-hazardous waste with a separate cell for stable non-reactive hazardous waste, asbestos or gypsum; including landfill gas and leachate management, storage and/or treatment and landfill restoration.	£21,561.27
2.17.2	Section 5.2 – landfill for non-hazardous waste and dredging sites subject to the Landfill Directive; including landfill gas and leachate management, storage and/or treatment and landfill restoration.	£20,864.30
2.17.3	Section 5.2 – landfill for hazardous waste; including leachate management, storage and/or treatment and landfill restoration.	£20,052.54
2.17.4	Section 5.4 – leachate treatment plant with a capacity of 50 tonnes or more a day where not authorised by a landfill permit or a permit authorising the discharge of trade effluent.	£3,938.09
2.17.5	Leachate treatment plant with a capacity of less than 50 tonnes a day where not authorised by a landfill permit or trade effluent discharge consent.	£1,436.55
2.17.6	Landfill gas plant at a landfill for hazardous waste and where not authorised by a landfill permit.	£1,149.00
2.17.7	Landfill for inert waste; including restoration.	£7,945.99
2.17.8	Lagoon or dredging site excluded from the Landfill Directive; including restoration.	£4,875.28
2.17.9	Deposit of waste for recovery and landfill restoration where not authorised by a landfill permit.	£6,113.03
2.17.10	SR 2015 No.39 – deposit of waste for recovery.	£3,442.28

Ref	Activity	Subsistence activity charge
2.17.11	Closed landfill that, when operational, was authorised to accept only inert waste, and which is now subject to monitoring requirements.	£1,307.57
2.17.12	Closed landfill that, when operational, was authorised to accept only inert waste, and which is not now subject to monitoring requirements.	£784.54
2.17.13	Closed landfill that, when operational, was authorised to accept construction and demolition waste or other non-hazardous non-biodegradable waste, including sites that were authorised to only accept dredging waste.	£1,601.03
2.17.14	Closed landfill that, when operational, was authorised to accept hazardous and/or non-hazardous waste, and which is now subject to requirements for active management of landfill gas and/or leachate.	£3,740.47
2.17.15	Closed landfill that, when operational, was authorised to accept hazardous and/or non-hazardous waste, and which is now not subject to requirements for active management of landfill gas and/or leachate.	£1,803.38
2.17.16	Closed landfill that, when operational, was authorised to accept hazardous and/or non-hazardous waste including sites that were authorised to only accept dredging waste, provided that the permit has been varied to apply aftercare conditions, does not require the active management of landfill gas and/or leachate and only requires the submission of monitoring data once a year.	£1,356.08

Table 2.18 Charges common to more than one sector

Ref	Activity	Subsistence activity charge
2.18.1	Stand-alone directly associated activity.	£4,380.83

Ref	Activity	Subsistence activity charge
2.18.2	Low impact installation.	£913.89
2.18.3	Local authority activity – Part B activity including any which are also small waste incineration plant.	£1,411.56
2.18.4	Local authority activity – Part A2 activity.	£1,796.52
2.18.5	Local authority activity – small waste incineration plant to which Schedule 13 of the Regulations applies.	£2,603.28

Chapter 4: Miscellaneous environmental permitting charge tables

(1) Interpretation

In this Part:

“NECD substance” means oxides of nitrogen, sulphur dioxide, fine particulates (PM10s used as an indicator for PM2.5s), ammonia, and non-methane volatile organic compounds;

“NMP” means noise and vibration management plan;

“OMP” means odour management plan;

“Pollution Inventory reporting thresholds” means the thresholds with that title published on GOV.UK.

(2) Default standard facility charge table

2. This is the Default Standard Facility Charge Table referred to in paragraph 2(1) of this scheme.

Table A – charge bands available for a waste or installation default standard facility

Charge band	Application charge	Charge band	Transfer charge	Charge band	Surrender charge	Charge band	Deployment charge	Charge band	Subsistence charge
S030A (W)	£446.34	S035T (W)	£803.41	S040S (W)	£602.56	S045C (W)	£457.50	S030C (W)	£174.07
S040A (W)	£803.41	S040T (W)	£1,093.53	S045S (W)	£1,718.41	S060C (W)	£870.36	S040C (W)	£345.91
S050A (W)	£1,093.53			S050S (W)	£2,834.26	S070C (W)	£1,115.85	S050C (W)	£580.24
S060A (W)	£1,818.84			S060S (W)	£4,005.90	S074C (W)	£1,428.29	S060C (W)	£870.36
S070A (W)	£2,175.91					S100C (W)	£2,778.47	S074C (W)	£1,428.29
								S080C (W)	£1,763.04
								S090C (W)	£2,276.33
								S100C (W)	£2,778.47
								S120C (W)	£3,816.21

Table B – charge bands available for a default standard facility not covered by Table A

Charge band	Application charge	Charge band	Transfer charge	Charge band	Surrender charge	Charge band	Subsistence charge
S030A	£435.18	S035T	£781.10	S040S	£591.40	S030C	£169.61
S040A	£781.10	S040T	£1,060.06	S045S	£1,673.78	S040C	£334.76
S050A	£1,060.06			S050S	£2,756.15	S050C	£569.08
S060A	£1,774.20			S060S	£3,905.48	S060C	£848.05
S070A	£2,120.12					S074C	£1,394.81
						S080C	£1,718.41
						S090C	£2,220.54
						S100C	£2,700.36
						S120C	£3,715.78

Food and drink component table

3. This is the Food and Drink Component Table referred to in paragraph 1(1) of Part 1 of this Schedule –

Component reference	Description	Number of components
Multiple food and drink activities	Where the authorised activities include more than one different activity falling within Part A of Section 6.8.	1 for each different additional activity
Anaerobic digestion	Where the authorised activities include anaerobic digestion, including where used in effluent treatment.	1
Bioethanol plant	Where the authorised activities include bioethanol plant.	1
Section 1.1. – non-large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1, other than large combustion plant.	3
Section 1.1. – large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1 which are large combustion plant.	4
Other activities	Where the authorised activities include activities falling in Chapters 2, 3 or 4 of Part 2 to Schedule 1 of the Regulations.	1 per Chapter (3 maximum)
Solvent emission activity	Where the authorised activities include a solvent emission activity.	1
Waste Incineration	Where the authorised activities include waste incineration plant falling within Part A of Section 5.1.	3

Component reference	Description	Number of components
Abatement (air)	Where the principal process emission points require specific abatement for particulates and/or volatile organic compounds, excluding minor emission points such as silo vents.	1 (not additive)
Abatement (effluent)	Where there is on-site treatment of process effluent, excluding untreated effluent, cooling water, boiler blowdown and incidental discharges such as surface water.	1 – if disposal to sewer or off-site transfer 2 – if disposal to watercourse or soakaway
Odour	Where the authorised activities fall within these sub-sectors – • slaughterhouses; • rendering and animal by-product processing; • pet food manufacture; • sugar beet pulp drying; or where there is an approved OMP or ongoing control is reliant on an OMP.	1
Noise or vibration	Where there is an approved NMP or ongoing control is reliant on an NMP.	1
Air emissions	Where annual mass emissions of an NECD substance from the authorised activities exceeds the Pollution Inventory reporting threshold.	1 per substance (5 maximum)
Resource efficiency	Where any IED BAT reference document that applies to the authorised activities includes an emission level associated with the best available techniques for water consumption.	1

Paper and pulp component table

4. This is the paper and pulp component table referred to in paragraph 1(1) of Part 1 of this Schedule –

Component reference	Component description	Component
Waste paper and/or card	Where the authorised activities include processing waste paper and/or card.	1
De-inking	Where the authorised activities include de-inking.	1
Section 1.1. – non-large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1, other than large combustion plant.	1
Section 1.1 – large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1 which are Large Combustion Plant.	2
Waste incineration plant	Where the authorised activities include waste incineration plant falling within Part A of Section 5.1.	1
Anaerobic digestion	Where the authorised activities include on-site anaerobic digestion plant (where used as a stage in effluent treatment).	1

Part 2: Water resources charges tables

Chapter 1: General

Interpretation

1 (1) In this part –

“abstraction” means a water abstraction activity;

“high risk HEP application” means an application for a water resources permit to authorise hydroelectric power which involves –

(a) the presence of salmon or migratory trout, or

(b) flow requirements that depart from Tables B, C or D in “Appendix 1: Hydroelectric power water abstraction levels”, published on GOV.UK;

“hydroelectric power” means the generation of electricity by using the force of moving water to drive a turbine;

“low risk HEP application” means an application for an abstraction or impounding permit to authorise hydroelectric power which is not a high risk HEP application;

“megalitre” means 1000 cubic metres;

“model” means a tier 1 model or a tier 2 model as set out in the Water Resources Mapping Tool;

“non-tidal abstraction” means abstraction from a source of supply that is not tidal;

“restricted water” means water in a catchment for abstraction referenced as “no water available” or “restricted water available”, or where the groundwater status is classified as “poor” in the Water Resources Mapping Tool;

“tidal abstraction” means abstraction from those parts of inland waters downstream of the normal tidal limit as marked on the 1:25,000 Ordnance Survey Map and those parts of inland waters specified in maps published on GOV.UK with the Secretary of State’s approval;

“tier 1 model” and “tier 2 model” mean the applicable models for water resources management in different areas as set out in the Water Resources Mapping Tool;

“water available” means water in a catchment for abstraction as references as “water available” in the Water Resources Mapping Tool for that catchment area;

“Water Resources Mapping Tool” means the Agency’s mapping application with that title published on GOV.UK;

(2) In the case of a different terms renewal application which is also a HEP application or is for an open-loop water source heat pump, the applicable application charges are those in tables 3.3 and 3.4.

(3) references to high, medium and low loss, in relation to an abstraction, have the meanings given in Table 1 below, where “purpose” means the purpose for which the water is authorised to be used under the permit.

Table 1 – High, medium and low loss use and purpose table

High loss: use and purpose	Spray irrigation for agriculture or non-agriculture (for example, irrigating crops, golf course, racecourse, municipal gardens). Trickle irrigation. Horticultural irrigation. Dust suppression (for example, on industrial and construction sites: quarries, road building projects). Other purposes where, due to evaporation, water after use is not returned directly or indirectly to any source of supply. Make-up or top-up water (no through flow). Any other intended loss not captured elsewhere in this table.
----------------------------	---

Medium loss: use and purpose	Public water supply (which can include raw water supplies to industry) and private water supply. Commercial and industrial purposes not specified elsewhere in this Table (for example uses within the process and manufacture and washing purposes if not separately specified, for example, wheel washing, bottle washing). Boiler feed. Water used as a means of conveying material. Water bottling and uses, which incorporate water in the product. Abstraction for agricultural purposes (excluding spray irrigation, trickle irrigation, horticultural irrigation, warping, wet fencing, water meadows, fish farms and watercress growing). Anti-frost spraying. Water supply for a commercial purpose (for example, hotels, holiday accommodation, car washes, laundries).
---	--

Low loss: use and purpose	Mineral washing. Vegetable washing. Non-evaporative cooling. Power production (electricity generation) of greater than 5 megawatts. Hydroelectric power of greater than 5 megawatts (water abstracted is used to directly power machinery, for example milling). Amenity pools through flow. Hydraulic testing. Fish farms. Watercress growing. Wet fencing. Warping. Water meadows. Water transfers from any source of supply to water systems operated by navigation, harbour or conservancy authorities. Water transfers (under a full licence) for subsequent abstraction. Water transfers (under a full licence) not for subsequent abstraction. Dewatering for drainage purposes. Effluent dilution (water not used between the point of abstraction and point of discharge).
---------------------------	--

Chapter 2: Water resources application charge tables

These are the water resources application charge tables referred to in this Scheme

Table 3.1 Surface water or groundwater abstraction – water available

Charge reference	Activity description	Permit application	Normal variation	Substantial variation
3.1.1	Abstraction of water available up to and including 50 megalitres a year.	£2,443.71	£1,221.86	£2,199.35
3.1.2	Abstraction of water available greater than 50 and up to and including 120 megalitres a year.	£4,888.56	£2,443.71	£4,399.82
3.1.3	Abstraction of water available greater than 120 and up to and including 1,400 megalitres a year.	£12,220.83	£6,110.42	£10,998.98
3.1.4	Abstraction of water available greater than 1,400 megalitres a year.	£24,442.80	£12,220.83	£21,997.95

Table 3.2 Surface water or groundwater abstraction – restricted water

Charge reference	Activity description	Permit application	Normal variation	Substantial variation
3.2.1	Abstraction of restricted water up to and including 50 megalitres a year.	£4,162.27	£2,081.14	£3,745.14

Charge reference	Activity description	Permit application	Normal variation	Substantial variation
3.2.2	Abstraction of restricted water greater than 50 and up to and including 120 megalitres a year.	£8,323.40	£4,162.27	£7,491.40
3.2.3	Abstraction of restricted water greater than 120 and up to and including 1,400 megalitres a year.	£20,809.06	£10,404.53	£18,727.93
3.2.4	Abstraction of restricted water greater than 1,400 megalitres a year.	£41,618.11	£20,809.06	£37,456.99

Table 3.3 Hydroelectric power

Charge reference	Activity description	Permit application	Normal variation	Substantial variation	Different terms renewal
3.3.1	Low risk HEP application up to and including 15 kilowatts.	£6,944.69	£3,472.35	£6,250.22	£3,914.48
3.3.2	High risk HEP application up to and including 15 kilowatts.	£7,896.03	£3,948.58	£7,106.09	£4,450.96
3.3.3	Low Risk HEP application greater than 15 and up to and including 50 kilowatts.	£11,225.16	£5,612.58	£10,102.19	£6,327.51
3.3.4	High Risk HEP application greater than 15 and up to and including 50 kilowatts.	£12,938.04	£6,469.58	£11,644.57	£7,292.49

Charge reference	Activity description	Permit application	Normal variation	Substantial variation	Different terms renewal
3.3.5	Low Risk HEP application greater than 50 and up to and including 100 kilowatts.	£11,986.69	£5,993.35	£10,787.57	£6,756.01
3.3.6	High Risk HEP application greater than 50 and up to and including 100 kilowatts.	£13,318.80	£6,659.40	£11,986.69	£7,507.31
3.3.7	Low Risk HEP application greater than 100 and up to and including 500 kilowatts.	£12,938.04	£6,469.58	£11,644.57	£7,292.49
3.3.8	High Risk HEP application greater than 100 and up to and including 500 kilowatts.	£14,270.14	£7,135.64	£12,843.69	£8,043.79
3.3.9	Low Risk HEP application greater than 500 kilowatts.	£13,873.46	£6,936.74	£12,485.67	£7,819.88
3.3.10	High Risk HEP application greater than 500 kilowatts.	£15,221.48	£7,610.74	£13,699.57	£8,580.27

Table 3.4 Open-loop heat pump

Charge reference	Activity description	Permit application	Normal variation	Substantial variation	Different terms renewal
3.4.1	Abstraction of water up to and including 50 megalitres a year, for an open-loop heat pump.	£2,241.39	£1,120.70	£2,016.35	£1,262.78

Charge reference	Activity description	Permit application	Normal variation	Substantial variation	Different terms renewal
3.4.2	Abstraction of water greater than 50 and up to and including 120 megalitres a year, for an open-loop heat pump.	£4,481.66	£2,240.26	£4,032.69	£2,526.69
3.4.3	Abstraction of water greater than 120 megalitres a year, for an open-loop heat pump.	£11,205.84	£5,602.36	£10,085.15	£6,316.15

Table 3.5 Different terms renewal application – water available

Charge reference	Activity description	Permit application
3.5.1	Different terms renewal application for water available up to and including 50 megalitres a year.	£1,377.57
3.5.2	Different terms renewal application for water available greater than 50 and up to and including 120 megalitres a year.	£2,755.14
3.5.3	Different terms renewal application for water available greater than 120 and up to and including 1,400 megalitres a year.	£6,889.00
3.5.4	Different terms renewal application for water available greater than 1,400 megalitres a year.	£13,777.99

Table 3.6 Different terms renewal application – restricted water

Charge reference	Activity description	Permit application
3.6.1	Different terms renewal application for restricted water up to and including 50 megalitres a year.	£2,345.96
3.6.2	Different terms renewal application for restricted water greater than 50 and up to and including 120 megalitres a year.	£4,691.93
3.6.3	Different terms renewal application for restricted water greater than 120 and up to and including 1,400 megalitres a year.	£11,729.82
3.6.4	Different terms renewal application for restricted water greater than 1,400 megalitres a year.	£23,458.50

Table 3.7 Temporary licence – water available

Charge reference	Activity description	Permit application
3.7.1	Temporary licence for water available up to and including 50 megalitres a year.	£884.28
3.7.2	Temporary licence for water available greater than 50 and up to and including 120 megalitres a year.	£1,768.57
3.7.3	Temporary licence for water available greater than 120 and up to and including 1,400 megalitres a year.	£4,422.55
3.7.4	Temporary licence for water available greater than 1,400 megalitres a year.	£8,845.10

Table 3.8 Temporary licence – restricted water

Charge reference	Activity description	Permit application
3.8.1	Temporary licence for restricted water up to and including 50 megalitres a year.	£1,506.01
3.8.2	Temporary licence for restricted water greater than 50 and up to and including 120 megalitres a year.	£3,012.02
3.8.3	Temporary licence for restricted water greater than 120 and up to and including 1,400 megalitres a year.	£7,530.05
3.8.4	Temporary licence for restricted water greater than 1,400 megalitres a year.	£15,060.08

Table 3.9 Transfer licence – water available

Charge reference	Activity description	Permit application charge	Normal variation	Substantial variation
3.9.1	Transfer licence for water available up to and including 50 megalitres a year.	£1,220.72	£610.36	£1,099.11
3.9.2	Transfer licence for water available greater than 50 and up to and including 120 megalitres a year.	£2,440.31	£1,220.72	£2,195.93

Charge reference	Activity description	Permit application charge	Normal variation	Substantial variation
3.9.3	Transfer licence for water available greater than 120 and up to and including 1,400 megalitres a year.	£6,101.32	£3,050.66	£5,490.97
3.9.4	Transfer licence for water available greater than 1,400 megalitres a year.	£12,202.64	£6,101.32	£10,981.93

Table 3.10 Transfer licence – restricted water

Charge reference	Activity description	Permit application charge	Normal variation	Substantial variation
3.10.1	Transfer licence for restricted water up to and including 50 megalitres a year.	£2,077.72	£1,038.86	£1,869.73
3.10.2	Transfer licence for restricted water greater than 50 and up to and including 120 megalitres a year.	£4,155.45	£2,077.72	£3,739.45
3.10.3	Transfer licence for restricted water greater than 120 and up to and including 1,400 megalitres a year.	£10,389.76	£5,195.45	£9,350.90
3.10.4	Transfer licence for restricted water greater than 1,400 megalitres a year.	£20,778.37	£10,389.76	£18,700.65

Table 3.11 Impounding permit

Charge reference	Activity description	Permit application charge	Normal variation	Substantial variation
3.11.1	Water impounding activity excluding hydroelectric power.	£10,052.18	£5,026.09	£9,046.28

Chapter 3: Water resources subsistence charge tables

1. These are the water resources subsistence charge tables referred to in this Scheme.

Table 4.1 Low loss tidal abstractions

Charge reference	Activity description	Subsistence activity charge
4.1.1	Low loss tidal abstraction of water up to and including 25,002 megalitres a year, where no model applies.	£110.75
4.1.2	Low loss tidal abstraction of water up to and including 25,002 megalitres a year, where a Tier 1 model applies.	£116.46
4.1.3	Low loss tidal abstraction of water up to and including 25,002 megalitres a year, where a Tier 2 model applies.	£125.60
4.1.4	Low loss tidal abstraction of water greater than 25,002 up to and including 83,333 megalitres a year, where no model applies.	£585.74
4.1.5	Low loss tidal abstraction of water greater than 25,002 up to and including 83,333 megalitres a year, where a Tier 1 model applies.	£614.29
4.1.6	Low loss tidal abstraction of water greater than 25,002 up to and including 83,333 megalitres a year, where a Tier 2 model applies.	£671.38
4.1.7	Low loss tidal abstraction of water greater than 83,333 up to and including 141,667 megalitres a year, where no model applies.	£1,326.77

Charge reference	Activity description	Subsistence activity charge
4.1.8	Low loss tidal abstraction of water greater than 83,333 up to and including 141,667 megalitres a year, where a Tier 1 model applies.	£1,393.00
4.1.9	Low loss tidal abstraction of water greater than 83,333 up to and including 141,667 megalitres a year, where a Tier 2 model applies.	£1,508.32
4.1.10	Low loss tidal abstraction of water greater than 141,667 up to and including 200,000 megalitres a year, where no model applies.	£2,035.83
4.1.11	Low loss tidal abstraction of water greater than 141,667 up to and including 200,000 megalitres a year, where a Tier 1 model applies.	£2,136.31
4.1.12	Low loss tidal abstraction of water greater than 141,667 up to and including 200,000 megalitres a year, where a Tier 2 model applies.	£2,314.43
4.1.13	Low loss tidal abstraction of water greater than 200,000 up to and including 366,667 megalitres a year, where no model applies.	£3,298.66
4.1.14	Low loss tidal abstraction of water greater than 200,000 up to and including 366,667 megalitres a year, where a Tier 1 model applies.	£3,461.94
4.1.15	Low loss tidal abstraction of water greater than 200,000 up to and including 366,667 megalitres a year, where a Tier 2 model applies.	£3,748.53
4.1.16	Low loss tidal abstraction of water greater than 366,667 up to and including 666,667 megalitres a year, where no model applies.	£6,003.58

Charge reference	Activity description	Subsistence activity charge
4.1.17	Low loss tidal abstraction of water greater than 366,667 up to and including 666,667 megalitres a year, where a Tier 1 model applies.	£6,301.59
4.1.18	Low loss tidal abstraction of water greater than 366,667 up to and including 666,667 megalitres a year, where a Tier 2 model applies.	£6,823.40
4.1.19	Low loss tidal abstraction of water greater than 666,667 up to and including 1,250,000 megalitres a year, where no model applies.	£11,347.21
4.1.20	Low loss tidal abstraction of water greater than 666,667 up to and including 1,250,000 megalitres a year, where a Tier 1 model applies.	£11,910.12
4.1.21	Low loss tidal abstraction of water greater than 666,667 up to and including 1,250,000 megalitres a year, where a Tier 2 model applies.	£12,896.63
4.1.22	Low loss tidal abstraction of water greater than 1,250,000 up to and including 2,333,333 megalitres a year, where no model applies.	£21,051.37
4.1.23	Low loss tidal abstraction of water greater than 1,250,000 up to and including 2,333,333 megalitres a year, where a Tier 1 model applies.	£22,094.97
4.1.24	Low loss tidal abstraction of water greater than 1,250,000 up to and including 2,333,333 megalitres a year, where a Tier 2 model applies.	£23,926.42
4.1.25	Low loss tidal abstraction of water greater than 2,333,333 up to and including 3,666,667 megalitres a year, where no model applies.	£36,104.86

Charge reference	Activity description	Subsistence activity charge
4.1.26	Low loss tidal abstraction of water greater than 2,333,333 up to and including 3,666,667 megalitres a year, where a Tier 1 model applies.	£37,895.20
4.1.27	Low loss tidal abstraction of water greater than 2,333,333 up to and including 3,666,667 megalitres a year, where a Tier 2 model applies.	£41,036.29
4.1.28	Low loss tidal abstraction of water greater than 3,666,667 up to and including 10,833,333 megalitres a year, where no model applies.	£74,731.95
4.1.29	Low loss tidal abstraction of water greater than 3,666,667 up to and including 10,833,333 megalitres a year, where a Tier 1 model applies.	£78,438.23
4.1.30	Low loss tidal abstraction of water greater than 3,666,667 up to and including 10,833,333 megalitres a year, where a Tier 2 model applies.	£84,938.50
4.1.31	Low loss tidal abstraction of water greater than 10,833, 333 up to and including 15,000,000 megalitres a year, where no model applies.	£159,372.44
4.1.32	Low loss tidal abstraction of water greater than 10,833, 333 up to and including 15,000,000 megalitres a year, where a Tier 1 model applies.	£167,277.13
4.1.33	Low loss tidal abstraction of water greater than 10,833, 333 up to and including 15,000,000 megalitres a year, where a Tier 2 model applies.	£181,110.03
4.1.34	Low loss tidal abstraction of water greater than 15,000,000 up to and including 35,833,333 megalitres a year, where no model applies.	£293,997.51

Charge reference	Activity description	Subsistence activity charge
4.1.35	Low loss tidal abstraction of water greater than 15,000,000 up to and including 35,833,333 megalitres a year, where a Tier 1 model applies.	£308,579.44
4.1.36	Low loss tidal abstraction of water greater than 15,000,000 up to and including 35,833,333 megalitres a year, where a Tier 2 model applies.	£334,148.91
4.1.37	Low loss tidal abstraction of water greater than 35,833,333 up to and including 166,666,667 megalitres a year, where no model applies.	£750,428.64
4.1.38	Low loss tidal abstraction of water greater than 35,833,333 up to and including 166,666,667 megalitres a year, where a Tier 1 model applies.	£787,647.89
4.1.39	Low loss tidal abstraction of water greater than 35,833,333 up to and including 166,666,667 megalitres a year, where a Tier 2 model applies.	£852,915.47
4.1.40	Low loss tidal abstraction of water greater than 166,666,667 megalitres a year, where no model applies.	£3,842,531.51
4.1.41	Low loss tidal abstraction of water greater than 166,666,667 megalitres a year, where a Tier 1 model applies.	£4,033,110.49
4.1.42	Low loss tidal abstraction of water greater than 166,666,667 megalitres a year, where a Tier 2 model applies.	£4,367,195.46

Table 4.2 Medium loss tidal abstractions

Charge reference	Activity description	Subsistence activity charge
4.2.1	Medium loss tidal abstraction of water up to and including 125 megalitres a year, where no model applies.	£110.75
4.2.2	Medium loss tidal abstraction of water up to and including 125 megalitres a year, where a Tier 1 model applies.	£116.46
4.2.3	Medium loss tidal abstraction of water up to and including 125 megalitres a year, where a Tier 2 model applies.	£125.60
4.2.4	Medium loss tidal abstraction of water greater than 125 up to and including 417 megalitres a year, where no model applies.	£585.74
4.2.5	Medium loss tidal abstraction of water greater than 125 up to and including 417 megalitres a year, where a Tier 1 model applies.	£614.29
4.2.6	Medium loss tidal abstraction of water greater than 125 up to and including 417 megalitres a year, where a Tier 2 model applies.	£671.38
4.2.7	Medium loss tidal abstraction of water greater than 417 up to and including 708 megalitres a year, where no model applies.	£1,326.77
4.2.8	Medium loss tidal abstraction of water greater than 417 up to and including 708 megalitres a year, where a Tier 1 model applies.	£1,393.00
4.2.9	Medium loss tidal abstraction of water greater than 417 up to and including 708 megalitres a year, where a Tier 2 model applies.	£1,508.32

Charge reference	Activity description	Subsistence activity charge
4.2.10	Medium loss tidal abstraction of water greater than 708 up to and including 1,000 megalitres a year, where no model applies.	£2,035.83
4.2.11	Medium loss tidal abstraction of water greater than 708 up to and including 1,000 megalitres a year, where a Tier 1 model applies.	£2,136.31
4.2.12	Medium loss tidal abstraction of water greater than 708 up to and including 1,000 megalitres a year, where a Tier 2 model applies.	£2,314.43
4.2.13	Medium loss tidal abstraction of water greater than 1,000 up to and including 1,833 megalitres a year, where no model applies.	£3,298.66
4.2.14	Medium loss tidal abstraction of water greater than 1,000 up to and including 1,833 megalitres a year, where a Tier 1 model applies.	£3,461.94
4.2.15	Medium loss tidal abstraction of water greater than 1,000 up to and including 1,833 megalitres a year, where a Tier 2 model applies.	£3,748.53
4.2.16	Medium loss tidal abstraction of water greater than 1,833 up to and including 3,333 megalitres a year, where no model applies.	£6,003.58
4.2.17	Medium loss tidal abstraction of water greater than 1,833 up to and including 3,333 megalitres a year, where a Tier 1 model applies.	£6,301.59
4.2.18	Medium loss tidal abstraction of water greater than 1,833 up to and including 3,333 megalitres a year, where a Tier 2 model applies.	£6,823.40

Charge reference	Activity description	Subsistence activity charge
4.2.19	Medium loss tidal abstraction of water greater than 3,333 up to and including 6,250 megalitres a year, where no model applies.	£11,347.21
4.2.20	Medium loss tidal abstraction of water greater than 3,333 up to and including 6,250 megalitres a year, where a Tier 1 model applies.	£11,910.12
4.2.21	Medium loss tidal abstraction of water greater than 3,333 up to and including 6,250 megalitres a year, where a Tier 2 model applies.	£12,896.63

4.6.71	High loss non-tidal abstraction of restricted water greater than 9,000 up to and including 21,500 megalitres a year, where a Tier 1 model applies.	£363,704.40
4.6.72	High loss non-tidal abstraction of restricted water greater than 9,000 up to and including 21,500 megalitres a year, where a Tier 2 model applies.	£389,273.87

Charge reference	Activity description	Subsistence activity charge
4.6.73	High loss non-tidal abstraction of water greater than 21,500 up to and including 100,000 megalitres a year, where no model applies.	£750,428.64
4.6.74	High loss non-tidal abstraction of water greater than 21,500 up to and including 100,000 megalitres a year, where a Tier 1 model applies.	£787,647.89
4.6.75	High loss non-tidal abstraction of water greater than 21,500 up to and including 100,000 megalitres a year, where a Tier 2 model applies.	£852,915.47
4.6.76	High loss non-tidal abstraction of restricted water greater than 21,500 up to and including 100,000 megalitres a year, where no model applies.	£891,134.94
4.6.77	High loss non-tidal abstraction of restricted water greater than 21,500 up to and including 100,000 megalitres a year, where a Tier 1 model applies.	£928,354.19
4.6.78	High loss non-tidal abstraction of restricted water greater than 21,500 up to and including 100,000 megalitres a year, where a Tier 2 model applies.	£993,621.76
4.6.79	High loss non-tidal abstraction of water greater than 100,000 megalitres a year, where no model applies.	£3,842,531.51
4.6.80	High loss non-tidal abstraction of water greater than 100,000 megalitres a year, where a Tier 1 model applies.	£4,033,110.49
4.6.81	High loss non-tidal abstraction of water greater than 100,000 megalitres a year, where a Tier 2 model applies.	£4,367,195.46

Charge reference	Activity description	Subsistence activity charge
4.6.82	High loss non-tidal abstraction of restricted water greater than 100,000 megalitres a year, where no model applies.	£4,563,009.59
4.6.83	High loss non-tidal abstraction of restricted water greater than 100,000 megalitres a year, where a Tier 1 model applies.	£4,753,588.57
4.6.84	High loss non-tidal abstraction of restricted water greater than 100,000 megalitres a year, where a Tier 2 model applies.	£5,087,673.54

Chapter 4: Additional charges

These are the Tables of charges referred to in the definition of “subsistence activity charge” in paragraph 11 of this Scheme.

Table 1: Additional charges for water undertakers

Volume stated on abstraction licence related to loss category (Ml/year)

Charge	High loss	Medium loss	Low loss
£9.13	Up to 15	Up to 25	Up to 5,000
£46.81	15 to 50	25 to 83	5,000 to 16,667
£105.05	50 to 85	83 to 142	16,667 to 28,333
£160.99	85 to 120	142 to 200	28,334 to 40,000
£260.33	120 to 220	200 to 367	40,000 to 73,333
£473.85	220 to 400	367 to 667	73,334 to 133,333
£896.31	400 to 750	667 to 1,250	133,334 to 250,000
£1,662.46	750 to 1400	1,250 to 2,333	250,000 to 466,667
£2,852.22	1,400 to 2200	2,333 to 3,667	466,667 to 733,333
£5,903.11	2,200 to 6500	3,667 to 10,833	733,334 to 2,166,667
£12,588.35	6,500 to 9000	10,833 to 15,000	2,166,667 to 3,000,000

Charge	High loss	Medium loss	Low loss
£23,221.93	9,000 to 21500	15,000 to 35,833	3,000,000 to 7,166,667
£59,274.26	21,500 to 100000	35,833 to 166,667	7,166,667 to 33,333,333
£303,508.71	Above 100,000	Above 166,667	Above 33,333,333

Table 3: Supported source upstream and downstream extents

Candover

Source of supply	Upstream extent	Downstream extent
Candover Stream	SU 567 367	SU 568 319
River Itchen	SU 572 323	SU 439 153

Dee

Source of supply	Upstream extent	Downstream extent
River Dee	SH 929 351	SJ 408 658

Earl Soham – Deben

Source of supply	Upstream extent	Downstream extent
Deben Chalk Corridor (River Deben and a corridor through the Chalk aquifer 400m either side of the supporting surface water)	TM 232 627	TM 292 502

Great East Anglian Groundwater

Source of supply (Corridors of the Chalk aquifer as shown by the Water Resources Mapping Tool)	Upstream extent	Downstream extent
Stour Chalk Corridor	TL 679 559	TM 102 330
Pant and Blackwater Chalk Corridor	TL 644 353	TL 839 084
Brett Chalk Corridor	TL 930 521	TM 035 350
Thet Chalk Corridor	TL 992 912	TL 869 830
Thet tributary Chalk Corridor	TM 049 873	TL 987 872
Little Ouse Chalk Corridor	TL 987 807	TM 494 935

Great East Anglian Surface Water

Source of supply	Upstream extent	Downstream extent
Cut Off Channel	TF 591 009	TL 731 739
River Stour (Essex and Suffolk)	TL 680 560	TM 102 330
River Pant and River Blackwater	TL 644 353	TL 839 084

Kielder

Source of supply	Upstream extent	Downstream extent
River Tyne	NY 632 924	NZ 121 646
River Wear	NZ 012 377	NZ 294 524
River Tees	NY 814 290	NZ 463 191
Tyne Tees aqueduct	NZ 026 617	NZ 005 215

Lower Yorkshire Derwent

Source of supply	Upstream extent	Downstream extent
River Derwent reaches impounded by Barmby Barrage and Elvington Sluices	SE 735 585	SE 681 286

Medway – Allington

Source of supply	Upstream extent	Downstream extent
River Medway reaches upstream of impounding assets at Allington and Teston	TQ 690 498	TQ 748 581

Nene – Northampton

Source of supply	Upstream extent	Downstream extent
River Nene reach upstream of impounding assets at Northampton	SP 750 601	SP 758 599

Nene – Water Newton

Source of supply	Upstream extent	Downstream extent
River Nene reach upstream of impounding assets at Water Newton	TL 075 984	TL 110 974

Ouse – Eaton Socon

Source of supply	Upstream extent	Downstream extent
River Ouse reach upstream of impounding assets at Eaton Socon	TL 160 535	TL 175 586

Ouse – Hermitage

Source of supply	Upstream extent	Downstream extent
River Ouse reach upstream of impounding assets at Hermitage	TL 369 727	TL 394 747

Ouse – Offord

Source of supply	Upstream extent	Downstream extent
River Ouse reach upstream of impounding assets at Offord	TL 186 619	TL 216 669

Severn

Source of supply	Upstream extent	Downstream extent
River Severn	SN 954 847	SO 822 182 and SO 818 216
Gloucester and Sharpness Canal	SO 827 184	SO 667 022

Thames

Source of supply	Upstream extent	Downstream extent
River Thames	SU 222 990	TQ 170 714

Thet and Little Ouse Surface Water

Source of supply	Upstream extent	Downstream extent
River Thet	TL 992 912	TL 869 830
Thet tributary	TM 049 873	TL 987 872
Thet tributary	TL 975 880	TL 983 880
Thet tributary	TL 970 906	TL 983 898
River Little Ouse	TL 987 807	TL 732 870

Waveney Groundwater

Source of supply	Upstream extent	Downstream extent
Waveney Chalk Corridor (A Corridor of the Chalk aquifer 1km either side of the River Waveney)	TM 092 698	TM 494 935

Waveney Surface Water

Source of supply	Upstream extent	Downstream extent
River Dove and River Waveney	TM 092 698	TM 494 935

Welland – Tinwell Sluices

Source of supply	Upstream extent	Downstream extent
River Welland reach upstream of impounding assets at Tinwell	TF 002 058	TF 018 060

Witham and Ancholme

Source of supply	Upstream extent	Downstream extent
River Witham	SK 974 712	TF 323 445
River Ancholme	TF 032 875	SE 975 211

Wye

Source of supply	Upstream extent	Downstream extent
River Wye	SN 966 656	SO 516 131

Lodes Grant Groundwater

Source of supply: Chalk aquifer as shown in the Water Resources Mapping Tool.

Rhee Groundwater

Source of supply: Chalk aquifer as shown in the Water Resources Mapping Tool.
