NO:

EXPORT OF DAIRY PRODUCTS TO KENYA
HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM

FOR SIGNATURE BY: OFFICIAL OF THE RESPONSIBLE COMPETENT AUTHORITY

I Identification of consignment

- (a) Description of the products
- (b) Type and number of packages
- (c) Net weight of consignment
- (d) Shipping marks

II Origin of products

- (a) Name and address of the production establishment :

- (b) Name and address of exporter

III Destination of products

- (a) The product was despatched from United Kingdom to:
KENYA,
(country and place of destination)

(b) Name and address of consignee

(c) Means of transportation

IV Health Information

I, the undersigned, hereby certify that:

A. ANIMAL HEALTH ATTESTATION

1. The farms of origin of the milk were free from any epizootic disease to which cattle are susceptible and which is notifiable to the veterinary authorities of the United Kingdom (UK) at the time of collection of the milk.
2. There has been no outbreak Lumpy Skin disease or Contagious Bovine Pleuropneumonia in the UK during the past three months.
3. The UK is officially free of foot and mouth Disease, rinderpest and vesicular stomatitis in accordance with the World Organisation for Animal Health (WOAH) Terrestrial Animal Health Code.
4. The milk was produced from animals which were subjected to surveillance for the following diseases, and which did not show a positive reaction to the tests in question:
 - (i) Tuberculosis: A single comparative intradermal tuberculin test, interpreted according to the standards of WOAH.
 - (ii) Brucellosis: An ELISA/Serum Agglutination Test/Complement Fixation Test, interpreted in accordance with the standards of WOAH.
5. The milk and milk products are fit for human consumption and do not present any risk of transmitting infectious or contagious diseases such as vibriosis, leptospirosis, trichomoniasis, brucellosis, Johne's disease and enzootic bovine leucosis;
6. The milk was produced from animals not showing clinical signs of disease that can be transmitted through milk or milk products and the raw milk was produced, handled and kept hygienically as required by the food hygiene legislation before processing.
7. In the case of consignments containing ingredients and / or products that have been legally imported into the UK, I have received official documentation that paragraphs 1. - 6. above have been complied with.

B. PUBLIC HEALTH ATTESTATION

1. The milk and milk products were manufactured in officially approved establishments, and supervised by the competent authorities;
2. The raw milk was subjected to an initial pasteurisation (at least 72°C for at least 15 seconds) so as to produce a negative reaction to the phosphatase test, or an equivalent treatment;

3. The milk and milk products do not contain any harmful additives and are unconditionally passed safe and fit for human consumption;
4. Milk and milk products are monitored in the United Kingdom to ensure that they do not contain residues (anti-microbial or chemical) in concentrations deemed to be harmful;
5. The United Kingdom has a comprehensive programme in place to monitor radioactivity in food and the environment. The results demonstrates that even the most exposed members of the UK public received radiation doses from consumption of local food and exposure to environmental radioactivity (due to discharges and direct radiation) that were below the statutory EU annual dose limit to members of the public of 1 millisievert per year from artificially-produced radionuclides as set in the Council Directive 96/29/Euratom of 13 May 1996.
6. The milk and milk products have been processed, handled, packed, stored hygienically, and arrangements have been made to ensure they are transported or shipped hygienically with the necessary precautions taken to prevent contamination prior to their despatch;
7. The milk and milk products were subjected to the necessary quality control measures including laboratory tests and found to be of good quality, and they meet the microbiological criteria for pathogenic organisms including coliforms, listeria, salmonella etc. set out in the food hygiene legislation;
8. The milk and milk products comprising the consignment(s) were either manufactured from milk derived from animals reared in the United Kingdom, or the milk/products were legally imported into the United Kingdom;
9. The milk and milk products meet the requirements of the food hygiene legislation and are eligible for intra-EU trade.
