| Risk Type           | Fire and Explosion                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Risk Description    | <p>The products present a serious risk of fire and explosion as they have an incorrectly stamped spring, which could heat at the contact point and lead to thermal damage. This could lead to the terminal blocks catching fire, and present a risk of explosion if used in hazardous areas.</p> <p>The product does not meet the requirements of the Electrical Equipment (Safety) Regulations 2016 or The Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres Regulations 2016 (ATEX).</p>                                                         |
| Corrective Measures | The product has been recalled from end users by WAGO Limited.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
