

THE DEPARTMENT FOR BUSINESS AND TRADE
NOTICE OF PUBLICATION
0136/26
of 4 June 2026

**of references to standards for machinery in support of the Supply of
Machinery (Safety) Regulations 2008 (S.I. 2008/1597)**

This notice confirms that:

- (a) The references to the standards listed in Part 1 of Annex I to this notice is published for the purposes of regulation 2A of S.I. 2008/1597 and accordingly are designated pursuant to that regulation in relation to England and Wales and Scotland. The list of published standards set out in Part 2 of Annex I to notice 0132/26 is amended in accordance with Annex I to this notice from the date of this notice. For clarity, Part 2 of Annex I to this notice sets out the complete list of references to standards which have been published (and which are not subject to a removal date) and accordingly are designated for the purposes of S.I. 2008/1597 as at the date of this notice. Any references to published designated standards that are subject to a removal date are listed separately in Annex II to this notice. Conformity with the designated standards listed in Annex II will continue to confer a presumption of conformity until their removal from publication date.
- (b) The list of references to standards to be removed from publication, set out in Part 2 of Annex II to notice 0132/26 (which have previously been published for the purposes of regulation 2A of S.I. 2017/1206), is amended in accordance with Annex II to this notice from the date of this notice. Part 2 of Annex II to this notice sets out the complete list of references to standards which, as at the date of this notice, are due to be removed from publication.

ANNEX I

Part 1

The list of published standards under C-type standards, as set out in Part 2 of Annex I to notice 0132/26, is amended as follows:

- (1) references to standards in rows 5, 18, 113, 115, 301, 365, 368, 372, 401, 403, 437, 457, 509, and 512 are added to Annex II and replaced by the following:

5.	EN 81-43:2025 Safety rules for the construction and installation of lifts – Special lifts for the transport of persons and goods – Part 43: Lifts for cranes
18.	EN 415-8:2025 Safety of packaging machines – Part 8: Strapping machines
113.	EN 1459-1:2025 Rough-terrain trucks – Safety requirements and verification – Part 1: Variable-reach trucks
115.	EN 1459-5:2020+A1:2025 Rough-terrain trucks – Safety requirements and verification – Part 5: Attachment interface
301.	EN 12312-15:2020+A2:2025 Aircraft ground support equipment – Specific requirements – Part 15: Baggage and equipment tractors
365.	EN 12965:2019+A1:2025 Tractors and machinery for agriculture and forestry – Power take-off (PTO) drive shafts and their guards – Safety
368.	EN 12999:2020+A1:2025 Cranes – Loader cranes
372.	EN 13001-3-1:2025 Cranes – General design – Part 3-1: Limit states and proof competence of steel structure
401.	EN 13155:2020+A1:2025 Crane – Safety – Non-fixed load lifting attachments
403.	EN 13204:2025 Powered rescue tools for fire and rescue service use – Safety and performance requirements
437.	EN 13852-1:2025 Cranes – Offshore cranes – Part 1: General-purpose offshore cranes
457.	EN 14439:2025 Cranes – Tower cranes

509.	EN 15895:2025 Powder actuated hand-held fixing and hard marking tools – Safety requirements
512.	EN 15955-2:2025 Railway applications – Infrastructure – Demountable machines, trailers and associated equipment – Part 2: General safety requirements

(2) rows 24 and 126 are replaced by the following:

24.	EN 474-1:2022 Earth-moving machinery – Safety – Part 1: General requirements Restriction: For the purpose of the presumption of conformity of this designated standard, the value in its clause 4.12.7.2 “at 125 % of Q1 and Q2” shall be read as “at least at 100 % or up to a value of 125 % of Q1 and Q2 insofar as the tested machine can indeed attain a higher load”, as well as the value in its clause 4.12.7.3 “at 110 % of Q1 and Q2” shall be read as ‘at least at 100 % or up to a value of 110 % of Q1 and Q2 insofar as the tested machine can indeed attain a higher load.
126.	EN 1501-5:2021 Refuse collection vehicles - General requirements and safety requirements - Part 5: Lifting devices for refuse collection vehicles Restriction: This designated standard does not confer a presumption of conformity with the essential health and safety requirements 1.1.7, 1.2.1 and 1.5.11 of Schedule 2, Part 1 (Annex I) to S.I. 2008/1597. Informative Note: British Standard BS EN 1501-5:2021, the UK adoption of EN 1501-5:2021, includes National Annex NA – “Method for safeguarding against reasonably foreseeable human error whilst in automatic mode”, which was developed by the UK national committee to address identified safety concerns, in particular in relation to automatic operation and reasonably foreseeable human error. Manufacturers are advised to consider applying the provisions of National Annex NA, when demonstrating compliance with the relevant essential health and safety requirements of S.I. 2008/1597. The application of the National Annex NA does not confer a presumption of conformity with those essential health and safety requirements.

(3) rows 572a and 573a are renumbered 572b and 573b.

(4) the following rows are inserted in sequential order:

13a.	EN 415-2:2025 Safety of packaging machines – Part 2: Packaging machines for pre-formed rigid containers
114a.	EN 1459-4:2020+A1:2025 Rough-terrain trucks – Safety requirements and verification – Part 4: Additional requirements for variable-reach trucks handling freely suspended loads

494a.	EN 15180:2025 Food processing machinery – Food depositors – Safety and hygiene requirements
563a.	EN 17076:2020+A1:2025 Tower cranes – Anti-collision systems – Safety requirements
572a.	EN 17639:2025 Safety of machinery – Cableway installations designed for the transport of material and specially designated persons – General safety requirements
572c.	EN 17744:2025 Agricultural and forestry machinery – Environmental requirements for dusters
573a.	EN 17923:2025 Equipment for vine cultivation and wine making – Safety – Must and grape harvest pumps

Part 2

List of references of standards which have been published and accordingly designated for the purposes of S.I. 2008/1597 as at the date of this notice:

A-TYPE STANDARDS

1. Explanatory note.

A-type standards specify basic concepts, terminology and design principles applicable to all categories of machinery. Application of such standards alone, although providing an essential framework for the correct application of the Machinery (Safety) Regulations, is not sufficient to ensure conformity with the relevant essential health and safety requirements of the Regulations and therefore does not give a full presumption of conformity.

2. List of references of standards.

1.	EN ISO 12100:2010 Safety of machinery - General principles for design - Risk assessment and risk reduction (ISO 12100:2010)
----	---

B-TYPE STANDARDS

1. Explanatory note.

B-type standards deal with specific aspects of machinery safety or specific types of safeguard that can be used across a wide range of categories of machinery. Application of the specifications of B-type standards confers a presumption of conformity with the essential health and safety requirements of the Machinery (Safety) Regulations that they cover when a C-type standard or the manufacturer's risk assessment shows that a technical solution specified by the B-type standard is adequate for the particular category or model of machinery concerned. Application of B-type standards that give specifications for safety components that are independently placed on the market confers a presumption of conformity for the safety components concerned and for the essential health and safety requirements covered by the standards.

2. List of references of standards.

1.	EN 547-1:1996+A1:2008 Safety of machinery - Human body measurements - Part 1: Principles for determining the dimensions required for openings for whole body access into machinery
2.	EN 547-2:1996+A1:2008 Safety of machinery - Human body measurements - Part 2: Principles for determining the dimensions required for access openings
3.	EN 547-3:1996+A1:2008 Safety of machinery - Human body measurements - Part 3: Anthropometric data
4.	EN 614-1:2006+A1:2009 Safety of machinery - Ergonomic design principles - Part 1: Terminology and general principles
5.	EN 614-2:2000+A1:2008 Safety of machinery - Ergonomic design principles - Part 2: Interactions between the design of machinery and work tasks
6.	EN 842:1996+A1:2008 Safety of machinery - Visual danger signals - General requirements, design and testing
7.	EN 894-1:1997+A1:2008 Safety of machinery - Ergonomics requirements for the design of displays and control actuators - Part 1: General principles for human interactions with displays and control actuators
8.	EN 894-2:1997+A1:2008 Safety of machinery - Ergonomics requirements for the design of displays and control actuators - Part 2: Displays
9.	EN 894-3:2000+A1:2008 Safety of machinery - Ergonomics requirements for the design of displays and control actuators - Part 3: Control actuators

C-TYPE STANDARDS

1.Explanatory note.

C-type standards provide specifications for a given category of machinery. The different types of machinery belonging to the category covered by a C-type standard have a similar intended use and present similar hazards. C-type standards may refer to A or B-type standards, indicating which of the specifications of the A or B-type standard are applicable to the category of machinery concerned. When, for a given aspect of machinery safety, a C-type standard deviates from the specifications of an A or B-type standard, the specifications of the C-type standard take precedence over the specifications of the A or B-type standard. Application of the specifications of a C-type standard on the basis of the manufacturer's risk assessment confers a presumption of conformity with the essential health and safety requirements of the Machinery (Safety) Regulations covered by the standard. Certain C-type standards are organised as a series of several parts, Part 1 of the standard giving general specifications applicable to a family of machinery and other parts of the standard giving specifications for specific categories of machinery belonging to the family, supplementing or modifying the general specifications of Part 1. For C-type standards organised in this way, the presumption of conformity with the essential health and safety requirements of the Machinery (Safety) Regulations is conferred by application of the general Part 1 of the standard together with the relevant specific part of the standard.

3. List of references of standards.

ANNEX II

Part 1

The list of standards for removal from publication, as set out in Part 2 of Annex II to notice 0132/26, is amended as follows:

- (1) the following references to standards are added to Annex II under C-type standards and will continue to confer a presumption of conformity with the corresponding essential requirements until the removal from publication date of 20 January 2027: EN 81-43:2009, EN 415-8:2008, EN 1459-1:2017, EN 1459-5:2020, EN 12312-15:2006+A1:2009, EN 12965:2019, EN 12999:2020, EN 13001-3-1:2012+A2:2018, EN 13155:2003+A2:2009, EN 13204:2016, EN 13852-1:2013, EN 14439:2006+A2:2009, EN 15895:2011+A1:2018, EN 15955-2:2013.
- (2) under C-type standards, rows 1 to 4 inclusive are removed. The rows 5 to 14 inclusive are renumbered 1 to 10 inclusive.

Part 2

B-TYPE STANDARDS

1.Explanatory note.

B-type standards deal with specific aspects of machinery safety or specific types of safeguard that can be used across a wide range of categories of machinery. Application of the specifications of B-type standards confers a presumption of conformity with the essential health and safety requirements of the Machinery (Safety) Regulations that they cover when a C-type standard or the manufacturer's risk assessment shows that a technical solution specified by the B-type standard is adequate for the particular category or model of machinery concerned. Application of B-type standards that give specifications for safety components that are independently placed on the market confers a presumption of conformity for the safety components concerned and for the essential health and safety requirements covered by the standards.

2. List of references of standards.

No	Reference of standard	Date of removal from publication
1.	EN ISO 13849-1:2015 Safety of machinery - Safety-related parts of control systems - Part 1: General principles for design (ISO 13849-1:2015)	15 May 2027

C-TYPE STANDARDS

1.Explanatory note.

C-type standards provide specifications for a given category of machinery. The different types of machinery belonging to the category covered by a C-type standard have a similar intended use and present similar hazards. C-type standards may refer to A or B-type standards, indicating which of the specifications of the A or B-type standard are applicable to the category of machinery concerned. When, for a given aspect of machinery safety, a C-type standard deviates from the specifications of an A or B-type standard, the specifications of the C-type standard take precedence over the specifications of the A or B-type standard. Application of the specifications of a C-type standard on the basis of the manufacturer's risk assessment confers a presumption of conformity with the essential health and safety requirements of the Machinery (Safety) Regulations covered by the standard. Certain C-type standards are organised as a series of several parts, Part 1 of the standard giving general specifications applicable to a family of machinery and other parts of the standard giving specifications for specific categories of machinery belonging to the family, supplementing or modifying the general specifications of Part 1. For C-type standards organised in this way, the presumption of conformity with the essential health and safety requirements of the Machinery (Safety) Regulations is conferred by application of the general Part 1 of the standard together with the relevant specific part of the standard.
